I am writing as a citizen of Ellensburg WA to express my objections to the creation of a behemoth trailer park located within the Cle Elum/Roslyn communities. I have read about the project and the negative effects that such a development would have, not only on the character of these towns, but on the entire Kittitas Valley. It is simply the wrong match for the area and causes massive problems for current residents and businesses. This is not a rejection of development; it is a rejection of the absolutely wrong kind of development. Please listen to the concerns of those who have carefully identified the negative results of very poor planning. To implement such a monstrous plan would be simply tragic. Sincerely yours, Beverly Vifian

Re: 47 Degrees North Major Amendment proposal

I am writing to inform the city of my very strong opposition to the Sun Communities 47° North proposal for the Bullfrog flats property. The proposed manufactured home / RV community:

- Is in clear violation of the vision for the property adopted by the city and presented to the public as a condition for annexing Bullfrog Flats into the city. It's not in character with the City of Cle Elum and does not comply with fundamental requirements of the city's comprehensive plan, the development agreement, or zoning for the property.

- Instead of traditional neighborhoods that were planned to be connected to and a natural extension of the city, supporting the rest of the city, 47 Degrees North would create a private for-profit community and tourist resort with gates, private roads and utilities which will be separated from the rest of the city. It will create a private city within a city, forever.

- Fiscal studies of 47 Degrees North show that it will not create sufficient tax revenue to cover the city's cost to serve it. Unless the developer agrees to financially cover the substantial deficits, forever, existing city taxpayers will be required to subsidize Sun's development and taxes will go up.

- Sun's 47 Degrees North will be in its entirety a private business not a natural neighborhood (no lots sold, all spots leased), wholly owned by a massive out-of-state publicly traded corporation whose fiduciary duty is to its shareholders, not city taxpayers. Any subsidies of the project would be a gift of public funds to a private entity.

- Is not housing as contemplated for the Bullfrog UGA. It will displace half of the actual housing planned for the area and replace it with a private park designed as a transient playground.

- Will be the largest manufactured home/RV park on the West Coast and will double the population of Cle Elum. Parks of this magnitude have no place in a town as small as Cle Elum. Wrong Place, Wrong Size.

- Sun has eliminated the industrial park component of the approved plan and is proposing a major new retail center to the project which would compete with existing city businesses and will seriously damage Cle Elum's downtown, which the city has invested millions of dollars to reinvigorate. The retail center is in direct conflict with the city's comprehensive plan which states that the Bullfrog Flats Master Plan…."is intended to elevate the DTC (downtown core) as the primary retail and activity nexus for Cle Elum". Current rules for the Bullfrog Flats property prohibit a retail center on the property.

- Provides no significant benefits to city or UKC residents, but creates serious and significant impacts on roads, police, fire, schools, emergency services, hospitals and other public services that can't be (or won't be) fully mitigated by the developer.

- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for. Any such increase in taxes will effectively translate to a subsidy for a private business,

- Denial of 47 Degrees North will not take away or reduce underlying property rights. It will simply require Sun Communities to comply with city's current rules, regulations and comprehensive plan for the property. The original underlying zoning approval and development agreement already allows development of this site, just not as a private resort/manufactured home community/retail center.

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Respectfully,
Billie Jeanne Williams

Re: **47 Degrees North Major Amendment proposal**

I'm writing to inform the city of my **very strong opposition** to the Sun Communities 47° North proposal for the Bullfrog flats property. I've been a Cle Elum resident for the last 3 years and owned recreational property on the Yakima River. I've moved my family moved here to enjoy the small-town feel, gracious residents and the tremendous opportunities for recreation and simply enjoying our quiet outdoors.

What is being proposed in the current 47 Degrees North plan is going to permanently scar this beautiful place, cause irreparable harm to our shared lands, swamp the area with a new "instant city" of visitors with their RVs, motorcycles, boats and snow machines and is completely out of step with the character of Cle Elum and the surrounding areas. This is not the legacy you would be proud to leave behind.

These are the key issues that I strongly object to:

1. This project will be the largest manufactured home/RV park on the West Coast. Pouring thousands of visitors to our already overcrowded rivers, lakes, camp sites and playgrounds. This proposed project is way too much too fast. A slow growing community like the original plan makes so much more sense for handling infrastructure, creating meaningful jobs. A measured slow and steady growth is welcome.

2. This proposed development provides no significant benefits to city or UKC residents, but creates serious and significant impacts on roads, police, fire, schools, emergency services, medical facilities and other public services that can't be (or won't be) fully mitigated by the developer.

3. I-90 in both directions on a Sunday afternoon is currently gridlock.....adding 600+ RVs towing boats, motorcycles, snow machines etc. will make I-90 impassable. If this project happens, we can add Friday afternoon I-90 gridlock to the mix.

4. Wildfires are inevitable - God forbid one rips though our community we will be forced to compete with thousands of people evacuating RVs on one two lane road. Weve seen it before in Paradise California- complete pandemonium and disaster. Not to mention an impassable gridlock for the firefighters.

5. As I'm sure you are aware, Fiscal studies of 47 Degrees North show that it will not create sufficient tax revenue to cover the city's cost to serve it.

For these reasons, and many more, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Respectfully,

Bob Case

Re: **47 Degrees North Major Amendment Proposal**

I am writing to inform the city of my very strong opposition to the Sun Communities 47 Degrees North proposal for the Bullfrog flats property. The proposed manufactured home/RV community will result in negative impacts:

- Traffic gridlock with high volume of transient visitors in large recreational vehicles
- Decreased level of service for emergency medical services
- Decreased level of service for police protection
- Decreased level of service for fire protection
- Increased tax burden on existing property owners to pay for aging infrastructure (water, sewer, power, roads)
- Increased 2nd home ownership within a private resort adversely impacting many throughout the community
- Adverse impact to downtown core businesses as resort environment will drive dollars to remain at the resort
- Potential to increase jobs yet does little to offer adequate affordable housing options in relationship to amount of workers necessary to support multiple resorts on the area
- Potential to require additional city resources to manage and address concerns by a high volume of transient visitors
- High volume of short term rentals (STRs) tax revenue by law are applied to tourism rather than infrastructure upgrades

- 90% of profits will be, by law, sent out of our community to Wall Street investors

For these reasons, I implore the City to DENY this proposed major amendment and retain the current approved land use for the property.

Respectfully,

Bob Price

Re: 47 Degrees North Major Amendment proposal

I am writing to express my absolute opposition to the Sun Communities 47° North proposal for the Bullfrog Flats property -the proposed manufactured home & RV community.

My family has been residing with home and property in Roslyn since the early 1950's. We have witnessed the growth of both Roslyn and Cle Elum. We have had some trepidation but thus far the results have been acceptable. That cannot be said for the proposed Sun Communities 47° North proposal for the Bullfrog Flats. This "planned" community is not appropriate on so many fronts. And in no particular order as most of these are damning reasons not to allow the project to go forward.

1. This project stymies the imagination of those who live here because this proposed project will create the largest manufactured home/RV park on the West Coast leading to a doubling of the population of Cle Elum. I mean really. Just the RV park and manufactured homes will lead to a doubling of the population. How on earth is that acceptable? Also, the size of this RV park is going to be the largest on the West Coast. I mean what's the deal with that. How can that be conducive to a rural community such as ours?

2. The RV park/manufactured homes will not lead to affordable housing for residents. It will lead to increased park rents for those who buy a manufactured home every time there is a bump in social security benefits or any time, they feel like increasing the rent. The land isn't owned by the owner of the manufactured home. That is not home ownership.

3. The RV Park/manufactured homes project displaces half of the "true" residential housing that was planned for the area. The RV park will also be filled with transients staying one night or maybe a week. How much do you think they are likely to contribute in taxes to our great community.

4. Sun Communities, as you know, is a private business, not a natural neighborhood where lots are sold, and people contribute to the tax base with the value of their home. I can assure you the tax base for this business will not equal the tax base that family homes provide to the community. In addition, Sun Communities as landlord is beholden to their shareholder and not to the communities, they have holdings in.

5. This plan is a violation of the vision for the property adopted by the city and presented to the public as a condition for annexing Bullfrog Flats into the city. It is not reflective of the City of Cle Elum, Roslyn, Easton, Ronald and other areas to be affected by this monstrosity. In addition, it does Not comply with the fundamental requirements of the city's comprehensive plan, the development agreement, or zoning for the property. This last one is reason enough NOT to allow this project to proceed.

6. The "business/commercial development" of this proposed plan will negatively impact the local downtown centers or Roslyn and Cle Elum. There is already plenty of empty storefronts in both these downtowns and additional storefronts will only cause the current downtown cores to completely implode. Also of utmost importance is that the current rules for Bullfrog Flats property Prohibit Retail Centers on the property.

7. And from my standpoint, the very worst thing about this project is that there is only one way in and out of this area for those of us who live in Roslyn and Ronald. It should scare you to your core that if this development is allowed to proceed that you could be the very cause of death and of those of us who live in Roslyn and Ronald. You may recall a few years ago a beautiful little place called the Town of Paradise in Butte County California. It burned to the ground and not only was there massive loss of property, but worse was the loss of lives because there was only one way in and out of that town. That could easily become the issue for us as our route to safety will be blocked by hundreds of non-residents trying to get their RV's out of harms way and to hell with the locals.

Bonnie Banks
304 South 3rd Street, Roslyn WA
503-819-6882 or 541-649-2928 beachbanks@yahoo.com

8. Please note that there is article upon article that can be found on the web concerning the bad neighbor, bad landlord and all-around bad players that Sun Communities are in the areas they are located.

    *One of the recent ones is in Connecticut where there is an investigation by the Attorney General William Tog who is looking into issues such as affordability and management of the Beechwood Community. Complaint upon complaint has been filed with his office regarding lot rent increases and unresponsiveness to tenant needs.

    *The Better Business Bureau has received numerous complaints as well concerning Sun Communities throughout the nation.

    *There is a class action lawsuit against Sun Communities.

    *Following Hurricane Ian Sun Communities Indian Creek RV Resort was without power for far too long when other communities were back up on operational.

    *Rent increases at Sun Communities mobile home parks are rising faster than inflation.

9. Traffic congestion will be deplorable and dangerous Again refer to #7 above. The traffic on I90 is atrocious on the weekends, especially during the summer. If you plan to allow the development of transient RV accommodations to exit and enter I90 at Bull Frog Road, you will see many accidents just like those that occur at Hwy 18 and I90.

Thus, for all the reasons above I implore you to Vote NO on Sun Communities 47° North proposal for Bullfrog Flats. The ruination of our communities and perhaps the loss of lives will be on you should you allow this to proceed.

Thank you for your time and attention to my letter and my concerns.

Bonnie Banks

Re: 47 Degrees North Sun Communities Proposal

I am asking the city to maintain the current zoning for the approximately 1,100 acres knowns as Bullfrog Flats located in the City of Cle Elum, generally bounded by I-90, Bullfrog Road, SR-903, the City Cemetery and the Washington State Horse Park.

Sun Communities purchased the above referenced property knowing that it was zoned for 1,334 dwelling units, 50 affordable housing units, a 75 acre business park, associated amenities, infrastructure improvements, and 524 acres of open space. Sun Communities files an annual report (Form 10-K) pursuant to Section 13 or 15(D) of the Securities Exchange Act of 1934. In their Form 10-K filing for the fiscal year ended December 31, 2022 under Item 1A. Risk Factors, Material Risks Relating to our MH, RV and Marina Businesses. Sun Communities made the following statements, among several others, about risks to their investments:

- The perceptions by prospective tenants of the safety, convenience and attractiveness of our MH properties and the neighborhoods where they are located;
- Zoning or other environmental regulatory restrictions;
- We may be unable to obtain, or face delays in obtaining, necessary zoning, building and other governmental permits and authorizations which could result in increased costs and delays, and **even require us to abandon development of the property entirely if we are unable to obtain such permits or authorizations**;
- We may abandon development opportunities that we have already begun to explore and as a result we may not recover expenses already incurred in connection with exploring such development opportunities;

Sun Communities recognizes that investments and planned developments may not obtain approvals and projects may be abandoned. The Mayor, City Council Members and the Planning Department should not fee obligated or pressured to approve Sun Communities proposed changes to Bullfrog Flats. Here is a link to the Form 10-K reference above https://suncommunities.gcs-web.com/sec-filings/sec-filing/10-k/0000912593-23-000080.

I submit the following for your consideration:

- Sun Communities leases the land to manufactured home and RV owners. This has two negative impacts:
  - Owners will not see any appreciation on their dwellings because they do not own the land. This essentially prevents them from building equity in their investment.
  - The City will realize decreased property tax revenues over the years as the rate of appreciation for traditional single family homes and multi-family units is much greater than that of a land use for mobile and temporary housing units.

- Sun Communities plan is to "hook up" to existing utilities and not build additional capacity as in normally done by single family home and multi-family developers.

- The road infrastructure servicing Bullfrog Flats is insufficient to service a community the size Sun Communities is proposing to have built out by 2031. Single family home and multi-family developers of communities of this size often assist with road infrastructure improvements and their build out timelines are usually much longer enabling improvements to keep up with increased traffic.

- My understanding is that the traffic study completed did not evaluate peek volume days. I recommend the City have a new traffic impact study completed during a summer non-holiday weekend, Friday through Sunday.

- Sun Communities has proposed retail space for a second grocery store. This space will likely not be filled as the Cle Elum population does not support a second grocery store. No grocery store operator will open a store where the population base is insufficient to generate the customer traffic required for profitable operating margins. The sales tax revenues in Sun Communities proposal should be ignored when assessing City tax revenue sources.

- Changing the land use for Sun Communities needs will effectively mean the City will not have any future control over the land. Sun Communities will retain all infrastructure and improvements ownership and maintenance responsibilities. The City will not have any control over leasees which in this day of rising homeless populations and illegal immigration could have serious consequences. The City of Seattle, State of Washington, cities outside of Washington, states or the federal government could lease Sun Communities to house these individuals.

I have attended recent City Council meetings. It is quite clear that the residences of Cle Elum and the surrounding communities are overwhelming opposed to Sun Communities proposed use of the land. For the most part residents understand that development is inevitable and they want a say in how Cle Elum evolves over the coming years. The Bullfrog Flats land use approved over twenty years ago remains a well thought out use for the land that will enable home buyers to build equity, provides the infrastructure to encourage light industry to locate here and a significant source of reliable tax revenues for the City.

Please vote no to Sun Communities proposed changes, they are not in the best interest of Cle Elum, the surrounding communities and the residents. We all live here, Sun Communities does not.

Regards,

Brad Gray

Re: 47 Degrees North Major Amendment proposal

I am writing to inform the city of my very strong opposition to the Sun Communities 47° North proposal for the Bullfrog flats property. The proposed manufactured home / RV community:

- Is in clear violation of the vision for the property adopted by the city and presented to the public as a condition for annexing Bullfrog Flats into the city. It's not in character with the City of Cle Elum and does not comply with fundamental requirements of the city's comprehensive plan, the development agreement, or zoning for the property.
- Instead of traditional neighborhoods that were planned to be connected to and a natural extension of the city, supporting the rest of the city, 47 Degrees North would create a private for-profit community and tourist resort with gates, private roads and utilities which will be separated from the rest of the city. It will create a private city within a city, forever.
- Fiscal studies of 47 Degrees North show that it will not create sufficient tax revenue to cover the city's cost to serve it. Unless the developer agrees to financially cover the substantial deficits, forever, existing city taxpayers will be required to subsidize Sun's development and taxes will go up.
- Sun's 47 Degrees North will be in its entirety a private business not a natural neighborhood (no lots sold, all spots leased), wholly owned by a massive out-of-state publicly traded corporation who's fiduciary duty is to its shareholders, not city taxpayers. Any subsidies of the project would be a gift of public funds to a private entity.
- Is not housing as contemplated for the Bullfrog UGA. It will displace half of the actual housing planned for the area and replace it with a private park designed as a transient playground.
- Will be the largest manufactured home/RV park on the West Coast and will double the population of Cle Elum. Parks of this magnitude have no place in a town as small as Cle Elum. Wrong Place Wrong Size.
- Sun has eliminated the industrial park component of the approved plan and is proposing a major new retail center to the project which would compete with existing city businesses and will seriously damage Cle Elum's downtown, which the city has invested millions of dollars to reinvigorate. The retail center is in direct conflict with the city's comprehensive plan which states that the Bullfrog Flats Master Plan...."is intended to elevate the DTC (downtown core) as the primary retail and activity nexus for Cle Elum". Current rules for the Bullfrog Flats property prohibit a retail center on the property.
- Provides no significant benefits to city or UKC residents, but creates serious and significant impacts on roads, police, fire, schools, emergency services, hospitals and other public services that can't be (or won't be) fully mitigated by the developer, and,
- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for. Any such increase in taxes will effectively translate to a subsidy for a private business,
- Denial of 47 Degrees North will not take away or reduce underlying property rights. It will simply require Sun Communities to comply with city's current rules, regulations and comprehensive plan for the property. The original underlying zoning approval and development agreement already allows development of this site, just not as a private resort/manufactured home community/retail center.
- _____

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Respectfully, Signature: Brandon C Ashley

Hello,

We are writing on behalf of Mountain Elegance Furniture and Design. Our hope and desire is for Cle Elum to uphold its commitment reflected in Municipal Code Sec. 17.45.010 B.9 to keep Old Town Cle Elum as the designated retail center. We are opposed to the institution or construction of any retail center outside of Old Town Cle Elum.

Sincerely,
Brandyn Bettis - Warehouse Manager

Re: 47 Degrees North Major Amendment proposal

I am writing to inform the city of my very strong opposition to the Sun Communities 47° North proposal for the Bullfrog flats property. The proposed manufactured home / RV community:

- Is in clear violation of the vision for the property adopted by the city and presented to the public as a condition for annexing Bullfrog Flats into the city. It's not in character with the City of Cle Elum and does not comply with fundamental requirements of the city's comprehensive plan, the development agreement, or zoning for the property.

- Instead of traditional neighborhoods that were planned to be connected to and a natural extension of the city, supporting the rest of the city, 47 Degrees North would create a private for-profit community and tourist resort with gates, private roads and utilities which will be separated from the rest of the city. It will create a private city within a city, forever.

- Fiscal studies of 47 Degrees North show that it will not create sufficient tax revenue to cover the city's cost to serve it. Unless the developer agrees to financially cover the substantial deficits, forever, existing city taxpayers will be required to subsidize Sun's development and taxes will go up.

- Sun's 47 Degrees North will be in its entirety a private business not a natural neighborhood (no lots sold, all spots leased), wholly owned by a massive out-of-state publicly traded corporation whose fiduciary duty is to its shareholders, not city taxpayers. Any subsidies of the project would be a gift of public funds to a private entity.

- Is not housing as contemplated for the Bullfrog UGA. It will displace half of the actual housing planned for the area and replace it with a private park designed as a transient playground.

- Will be the largest manufactured home/RV park on the West Coast and will double the population of Cle Elum. Parks of this magnitude have no place in a town as small as Cle Elum. Wrong Place, Wrong Size.

- Sun has eliminated the industrial park component of the approved plan and is proposing a major new retail center to the project which would compete with existing city businesses and will seriously damage Cle Elum's downtown, which the city has invested millions of dollars to reinvigorate. The retail center is in direct conflict with the city's comprehensive plan which states that the Bullfrog Flats Master Plan…."is intended to elevate the DTC (downtown core) as the primary retail and activity nexus for Cle Elum". Current rules for the Bullfrog Flats property prohibit a retail center on the property.

- Provides no significant benefits to city or UKC residents, but creates serious and significant impacts on roads, police, fire, schools, emergency services, hospitals and other public services that can't be (or won't be) fully mitigated by the developer.

- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for. Any such increase in taxes will effectively translate to a subsidy for a private business,

- Denial of 47 Degrees North will not take away or reduce underlying property rights. It will simply require Sun Communities to comply with city's current rules, regulations and comprehensive plan for the property. The original underlying zoning approval and development agreement already allows development of this site, just not as a private resort/manufactured home community/retail center.

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Respectfully,

Bret J Van Sickle

Re: 47 Degrees North Proposal

I am writing to provide the city with my very strong concerns about the Sun Communities 47°N proposal for the Bullfrog Flats property. The proposed manufactured home/RV community:

· Is not in character with the City of Cle Elum or the upper Kittitas Valley (a fundamental requirement of the current zoning for the property),

· Would create a new and separate private tourist resort instead of the natural extension of city neighborhoods originally envisioned by city zoning and current approvals,

· Is in its entirety a private business not a neighborhood (no lots will be created or sold, all spots will be leased, and the project will be private), wholly owned by a large out-of-state publicly traded corporation whose fiduciary duty is to its shareholders,

· Provides no significant benefits to upper valley residents and tax payers,

· Will create serious and significant impacts on roads, police, fire, schools, emergency services, hospitals, and other public services that can't (or won't) be fully mitigated by the developer, and therefore,

· Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for, essentially a subsidy for a private business,

· Denial of the Sun Communities proposal would not take away or reduce underlying property rights. The original underlying zoning approval would still allow development of this site, just not as a private resort/manufactured home community.

For all of these reasons, and others, I implore the City to DENY this proposed major amendment and retain the current approved land use for the property.

Sincerely,
Brett Nasinec

We writing to voice our strong opposition to the Sun Communities 47° North proposal for the Bullfrog flats property. We have a residence nearby and greatly appreciate the uncrowded nature of the community. We want growth but in thoughtful and controlled manner.

The proposed 47 Degrees North development is going to cause irreparable harm to our local community and is out of step with the character of Cle Elum and the surrounding areas. The area is not prepared to absorb such a dramatic change in visitors.

Some of the key issues that we object to are:

1. The proposed project is way too much development too fast. Perhaps a slower, phased approach along with matching infrastructure changes could work.

2. This proposed development will create serious and significant impacts on local roads, police, fire, schools, emergency services, medical facilities and other public services that can't be (or won't be) fully mitigated by the developer.

3. The added traffic from the development will be a serious problem on I-90 in both directions. On a Sunday afternoon it is already frequently gridlock. Adding 600+ RVs towing boats, motorcycles, snow machines etc. will make I-90 impassable.

4. To our knowledge, the issue of evacuation during a wildfire has not been addressed.

5. It seems that fiscal studies of 47 Degrees North show that it will not create sufficient tax revenue to cover the city's cost to serve it.

We ask that the City DENY this proposed major amendment and retain the current approved land use for the property.

Respectfully,

Brian & Kim Cox

planning@cleelum.gov

Subject:
47 Degrees North

My wife and I have lived in the Upper County over 50 years (since 1973). Our children went through the local schools. We've owned and managed a large commercial building in downtown Cle Elum for almost 50 years.
My wife served on the School Board for 12 years and chaired it for 8 years. I practiced law in Cle Elum and Ellensburg for 30 years.
We mention all this to demonstrate our long time commitment to our community.

We have carefully read the materials available online re the 47 Degrees North proposal. We are **very much opposed** to the developer's revised plan. The plan substitutes recreational vehicles for much of the permanent housing previously planned. **RV's are not housing.** RV's house a transient population with NO commitment or permanent ties to our community.

RV's will produce:
LESS PROPERTY & REAL ESTATE EXCISE TAX REVENUE.
INCREASED NEED FOR POLICE
INCREASED FIRE THREATS
INCREASED TRAFFIC ON BULLFROG RD which is already overburdened

The changes proposed by the new developer are fundamentally flawed. They accomplish **none of the goals** of the original plan. We all know that additional housing is needed in the Upper County. This new proposal is not the answer. Cle Elum should not waste this opportunity to accomplish what is really needed.

To allow the developer to create the largest RV park in the Northwest versus the opportunity to actually solve the permanent housing shortage we have in Cle Elum would be a monumental failure in planning Cle Elum's future.

BG

All,

As an attendee at the City Council meeting last night , Monday 5/8 at the Centennial Bldg , it became apparent that of the 250+ towns people attending plus more online , all there for their expressed interest in the issue at hand (47DEGREESNORTH) it stood out that not a single person spoke in favor of this grossly ill-conceived project . NOT ONE !

Many spoke with strong data and great detail , enumerating the many devastating drawbacks of this flawed proposal , including SEVERAL VIOLATIONS OF THE CITY`S OWN CODES as previously passed by the City Council itself , and the many ways in which the quality of life not just in the City of Cle Elum , but the entire Upper County , would be altered ..... endangered socially , financially , esthetically , environmentally for ever .

There's no need for me to enumerated all the negatives here . They are clearly identified and well understood . It`s amazing to all familiar , that such an obviously bad deal for Cle Elum would have come to this point . WRONG PROJECT , WRONG PLACE , WRONG STRUCTURE .

So with that said , let it GO ON THE RECORD that , among the 250+ attendees at last night City Council meeting , there was 0% EXPRESSED SUPPORT for the 47DEGREENORTH project , and 100% EXPRESSED OPPOSITION .

I strongly urge a NO VOTE to the approval of this egregiously flawed and glaringly one sided 47DEGREENORTH proposal .

Respectfully submitted ,

Bruce Gore

To the Planning Commission

As a resident of the Cle Elum surrounding area for 35 years, plus of the City for the past five, I appreciate that growth is coming and we aren't likely to stop it. However, to the extent that the City has control over growth in the City and its designated Urban Growth Areas, it can be managed. As to the 47 Degrees North project, I believe this would would be disastrous to our City and the surrounding areas.

Specifically, the effect of this development on all of the various concerns for infrastructure and public services in the short time frame for the build-out alone should be enough to deny the request flatly. The amount of mitigation money offered is barely a drop in the bucket of what it will cost the City and the existing taxpayers. Studies all over the United States have shown that no residential development of large size has ever paid for all the additional infrastructure and services that have been required to support it.

This project would have a severe negative effect on the taxes and quality of life of the current residents of the City and surrounding areas. It will lead to an increased lack of access to critical services due to demand without providing sufficient tax or business income to pay for expansion. Where will all those people work? If they commute to the west side or other areas for jobs many will do their shopping there, that doesn't help Cle Elum at all.

However, I have another major concern. In the NKC Tribune recently was a photograph of the garbage left behind in a camping area. If a huge 650-space RV park were constructed the result is unthinkable. There is already much evidence of the human effects in the surrounding forests and rivers and lakes. As well as on the wildlife. There are plenty of deer and elk in the Bullfrog area and this will wipe out their local range. City Heights is already driving bears and cougars down into the residential areas to

ransack garbage and kill small farm animals and pets.

All in all, 47 Degrees North is a very bad choice for development. As I understood from information presented during the earlier submission that was withdrawn, the Bullfrog UGA does not permit manufactured home parks or RV parks. So why is there any discussion at all? It should simply be rejected as not being within the established guidelines. Beyond that, it just doesn't make sense.

Re: 47 Degrees North Proposal

I am writing to share the city with my concerns about the Sun Communities 47°N proposal for the Bullfrog Flats property. The proposed manufactured home/RV community:

First, the City is about to decide on something that will start us on a path of regret that will last GENERATIONS.

We have spent years preserving the Mountains to Sound Greenway and you are on the precipice of destroying it forever. Years of advocacy work at the state and federal level to preserve our landscape- only to have you consider throwing it all away with one very poor decision.

This planned mobile home community is not in character with the City of Cle Elum or the upper Kittitas Valley (a fundamental requirement of the current zoning for the property),

· Would create a new and separate private tourist resort instead of the natural extension of city neighborhoods originally envisioned by city zoning and current approvals,

· Is in its entirety a private business not a neighborhood (no lots will be created or sold, all spots will be leased, and the project will be private), wholly owned by a large out-of-state publicly traded corporation whose fiduciary duty is to its shareholders,

· Provides no significant benefits to upper valley residents and tax payers,

· Will create serious and significant impacts on roads, police, fire, schools, emergency services, hospitals, and other public services that can't (or won't) be fully mitigated by the developer, and therefore,

· Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for, essentially a subsidy for a private business,

· Denial of the Sun Communities proposal would not take away or reduce underlying property rights. The original underlying zoning approval would still allow development of this site, just not as a private resort/manufactured home community.

For all of these reasons, and others, I implore the City to DENY this proposed major amendment and retain the current approved land use for the property.

Planning Dept., City of Cle Elum
May 17,2023

I am writing to express my opposition to approval of this poorly planned private for profit development. Although I now live in Ellensburg, we still have property in upper county and continue to enjoy our small town.

The burden on City and County resources is extensive as pointed out by multiple municipal County entities. The burden of the inter structure falls to Kittitas County and its tax payers. See attached letter.

Approval is detrimental to Kittitas County, please oppose approval of this private for profit development.

Re: 47 Degrees North Major Amendment proposal

I am writing to inform the city of my very strong opposition to the Sun Communities 47° North proposal for the Bullfrog flats property. The proposed manufactured home / RV community:

- Is in clear violation of the vision for the property adopted by the city and presented to the public as a condition for annexing Bullfrog Flats into the city. It's not in character with the City of Cle Elum and does not comply with fundamental requirements of the city's comprehensive plan, the development agreement, or zoning for the property.

- Instead of traditional neighborhoods that were planned to be connected to and a natural extension of the city, supporting the rest of the city, 47 Degrees North would create a private for-profit community and tourist resort with gates, private roads and utilities which will be separated from the rest of the city. It will create a private city within a city, forever.

- Fiscal studies of 47 Degrees North show that it will not create sufficient tax revenue to cover the city's cost to serve it. Unless the developer agrees to financially cover the substantial deficits, forever, existing city taxpayers will be required to subsidize Sun's development and taxes will go up.

- Sun's 47 Degrees North will be in its entirety a private business not a natural neighborhood (no lots sold, all spots leased), wholly owned by a massive out-of-state publicly traded corporation who's fiduciary duty is to its shareholders, not city taxpayers. Any subsidies of the project would be a gift of public funds to a private entity.

- Is not housing as contemplated for the Bullfrog UGA. It will displace half of the actual housing planned for the area and replace it with a private park designed as a transient playground.

- Will be the largest manufactured home/RV park on the West Coast and will double the population of Cle Elum. Parks of this magnitude have no place in a town as small as Cle Elum. Wrong Place Wrong Size.

- Sun has eliminated the industrial park component of the approved plan and is proposing a major new retail center to the project which would compete with existing city businesses and will seriously damage Cle Elum's downtown, which the city has invested millions of dollars to reinvigorate. The retail center is in direct conflict with the city's comprehensive plan which states that the Bullfrog Flats Master Plan…."is intended to elevate the DTC (downtown core) as the primary retail and activity nexus for Cle Elum". Current rules for the Bullfrog Flats property prohibit a retail center on the property.

- Provides no significant benefits to city or UKC residents, but creates serious and significant impacts on roads, police, fire, schools, emergency services, hospitals and other public services that can't be (or won't be) fully mitigated by the developer, and,

- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for. Any such increase in taxes will effectively translate to a subsidy for a private business,

- Denial of 47 Degrees North will not take away or reduce underlying property rights. It will simply require Sun Communities to comply with city's current rules, regulations and comprehensive plan for the property. The original underlying zoning approval and development agreement already allows development of this site, just not as a private resort/manufactured home community/retail center.

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Respectfully,

To All Decision Makers Involved in the Bullfrog UGA Master Site Plan,

Growth is a natural part of a healthy community. I'm not opposed to growth but am strongly opposed to approving the Sun Communities proposal for 47 degrees north. Their proposal is very different from the 2002 approved plan.

Swapping out stick built homes where the homeowner owns his lot for the new proposal of half of the lots being modular homes on leased land and the other half being RV sites is a very different concept and not favorable for Cle Elum. It is only favorable to Sun Communities. Their proposal makes it sound like they are doing us a favor and enhancing our area. They are not!

The original plan would have developed the community over 20 to 30 years according to demand. The new plan has a very short development period with hundreds of RVs arriving quite quickly. It potentially could double the population of Cle Elum in a very short period creating what I perceive to be numerous crises in all of the support infrastructure.

Please do **not** approve 47 degrees north as currently presented.

Sincerely,
Carol Wilson

To Whom it may concern,

This letter is in strong opposition to the 47 Degree North Major Amendment Proposal. We visit Cle Elum regularly as we own property there and enjoy the small town community. The proposal would change all that. The roads through Cle Elum areas two way and no room for expansion with businesses on both sides. It is a home town community with farm and family values. I hope common sense would prevail with this proposal in a day when there does not seem to be much of it. I appeal to the powers that be to not destroy a special area of Washington state with and over growth that cannot be handled in this small community with neither retail or medical to sustain what is proposed. You are wrong! This is not the place for this bloated expansion. Please go somewhere else like Oregon they need more houses-I've heard.

Thank you for your time,

Sincerely,

Re: 47 Degrees North Major Amendment proposal

I am writing to inform the city of my very strong opposition to the Sun Communities 47° North proposal for the Bullfrog flats property. The proposed manufactured home / RV community:

- Is in clear violation of the vision for the property adopted by the city and presented to the public as a condition for annexing Bullfrog Flats into the city. It's not in character with the City of Cle Elum and does not comply with fundamental requirements of the city's comprehensive plan, the development agreement, or zoning for the property.

- Instead of traditional neighborhoods that were planned to be connected to and a natural extension of the city, supporting the rest of the city, 47 Degrees North would create a private for-profit community and tourist resort with gates, private roads and utilities which will be separated from the rest of the city. It will create a private city within a city, forever.

- Fiscal studies of 47 Degrees North show that it will not create sufficient tax revenue to cover the city's cost to serve it. Unless the developer agrees to financially cover the substantial deficits, forever, existing city taxpayers will be required to subsidize Sun's development and taxes will go up.

- Sun's 47 Degrees North will be in its entirety a private business not a natural neighborhood (no lots sold, all spots leased), wholly owned by a massive out-of-state publicly traded corporation whose fiduciary duty is to its shareholders, not city taxpayers. Any subsidies of the project would be a gift of public funds to a private entity.

- Is not housing as contemplated for the Bullfrog UGA. It will displace half of the actual housing planned for the area and replace it with a private park designed as a transient playground.

- Will be the largest manufactured home/RV park on the West Coast and will double the population of Cle Elum. Parks of this magnitude have no place in a town as small as Cle Elum. Wrong Place, Wrong Size.

- Sun has eliminated the industrial park component of the approved plan and is proposing a major new retail center to the project which would compete with existing city businesses and will seriously damage Cle Elum's downtown, which the city has invested millions of dollars to reinvigorate. The retail center is in direct conflict with the city's comprehensive plan which states that the Bullfrog Flats Master Plan…."is intended to elevate the DTC (downtown core) as the primary retail and activity nexus for Cle Elum". Current rules for the Bullfrog Flats property prohibit a retail center on the property.

- Provides no significant benefits to city or UKC residents, but creates serious and significant impacts on roads, police, fire, schools, emergency services, hospitals and other public services that can't be (or won't be) fully mitigated by the developer.

- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for. Any such increase in taxes will effectively translate to a subsidy for a private business,

- Denial of 47 Degrees North will not take away or reduce underlying property rights. It will simply require Sun Communities to comply with city's current rules, regulations and comprehensive plan for the property. The original underlying zoning approval and development agreement already allows development of this site, just not as a private resort/manufactured home community/retail center.

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Respectfully,

Signature

To the Planner, Mayor, and Council Members

There has been much written about the disastrous effects that the proposed 47°N development will have on our community. You live here and it will affect you too, so I am hopeful that you will vote to stop this development.

My concern is this: 47°N is using the development approved in 2002 as the basis for their application. That 2002 development agreement allowed a traditional subdivision in which property owners own lots on which the homes they own are built. The 46°N proposal bears NO RESEMBLANCE to that previously approved plan. What 47°N proposes is a giant private business, where all land is owned by the corporation and tenants pay rent to the corporation. This manufactured-home-on-leased-lots and RV "resort" plan is in no way consistent with the original 2002 development application. They should not be allowed to progress under the original agreement—it's simply not the same thing. And it's not too late to call a halt.

Please stop 47°N from progressing any further. If they want to continue, they should be required to resubmit as a totally new application and drop this pretense that their project fits the parameters of the original 2002 agreement. Please don't allow this corporation to decimate our community.

Thank you

As a resident for over 16 years, I strongly oppose the Sun Communities 47 Degrees North, Bullfrog Flats Property proposal. The project does not make sense for Cle Elum and the surrounding communities. There are no benefits to the community. The proposed community and development will forever obliterate the City of Cle Elum.

Please **DENY and reject** this proposed major amendment and retain our community.

Re: 47 Degrees North Major Amendment Proposal

I am writing to provide the city with my very strong concerns about the Sun Communities 47°N proposal for the Bullfrog Flats property. The proposed manufactured home/RV community:

- Is not in character with the City of Cle Elum or the upper Kittitas Valley (a fundamental requirement of the current zoning for the property),
- Would create a new and separate private tourist resort instead of the natural extension of city neighborhoods originally envisioned by city zoning and current approvals,
- Is in its entirety a private business not a neighborhood (no lots will be created or sold, all spots will be leased, and the project will be private), wholly owned by a large out-of-state publicly traded corporation whose fiduciary duty is to its shareholders,
- Provides no significant benefits to upper valley residents and tax payers,
- Will create serious and significant impacts on roads, police, fire, schools, emergency services, hospitals, and other public services that can't (or won't) be fully mitigated by the developer, and therefore,
- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for, essentially a subsidy for a private business,
- Denial of the Sun Communities proposal would not take away or reduce underlying property rights. The original underlying zoning approval would still allow development of this site, just not as a private resort/manufactured home community.

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Re: 47 Degrees North Major Amendment proposal

I am writing to inform the city of my very strong opposition to the Sun Communities 47° North proposal for the Bullfrog flats property. The proposed manufactured home / RV community:

• Is in clear violation of the vision for the property adopted by the city and presented to the public as a condition for annexing Bullfrog Flats into the city. It's not in character with the City of Cle Elum and does not comply with fundamental requirements of the city's comprehensive plan, the development agreement, or zoning for the property.

• Instead of traditional neighborhoods that were planned to be connected to and a natural extension of the city, supporting the rest of the city, 47 Degrees North would create a private for-profit community and tourist resort with gates, private roads and utilities which will be separated from the rest of the city. It will create a private city within a city, forever.

• Fiscal studies of 47 Degrees North show that it will not create sufficient tax revenue to cover the city's cost to serve it. Unless the developer agrees to financially cover the substantial deficits, forever, existing city taxpayers will be required to subsidize Sun's development and taxes will go up.

• Sun's 47 Degrees North will be in its entirety a private business not a natural neighborhood (no lots sold, all spots leased), wholly owned by a massive out-of-state publicly traded corporation who's fiduciary duty is to its shareholders, not city taxpayers. Any subsidies of the project would be a gift of public funds to a private entity.

• Is not housing as contemplated for the Bullfrog UGA. It will displace half of the actual housing planned for the area and replace it with a private park designed as a transient playground.

• Will be the largest manufactured home/RV park on the West Coast and will double the population of Cle Elum. Parks of this magnitude have no place in a town as small as Cle Elum. Wrong Place Wrong Size.

• Sun has eliminated the industrial park component of the approved plan and is proposing a major new retail center to the project which would compete with existing city businesses and will seriously damage Cle Elum's downtown, which the city has invested millions of dollars to reinvigorate. The retail center is in direct conflict with the city's comprehensive plan which states that the Bullfrog Flats Master Plan...."is intended to elevate the DTC (downtown core) as the primary retail and activity nexus for Cle Elum". Current rules for the Bullfrog Flats property prohibit a retail center on the property.

• Provides no significant benefits to city or UKC residents, but creates serious and significant impacts on roads, police, fire, schools, emergency services, hospitals and other public services that can't be (or won't be) fully mitigated by the developer, and,

• Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for. Any such increase in taxes will effectively translate to a subsidy for a private business,

• Denial of 47 Degrees North will not take away or reduce underlying property rights. It will simply require Sun Communities to comply with city's current rules, regulations and comprehensive plan for the property. The original underlying zoning approval and development agreement already allows development of this site, just not as a private resort/manufactured home community/retail center.

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Respectfully,

Chris Frankenfield

To the City of Cle Elum,

I am writing to express my concerns over the proposed 47 Degrees North Development.

I believe the Sun Communities financial model is a one that will leave the developer with valuable land and "owners" with rapidly depreciating "homes." It will be another Mountain River Trials in 20 years. We don't need more "RV" spots and poorly constructed mobile homes. We need well planned and thoughtful housing.

I hope you will deny their request to amend the original development agreement.

Re: 47 Degrees North Major Amendment Proposal

I am writing to provide the city with my very strong concerns about the Sun Communities 47°N proposal for the Bullfrog Flats property. The proposed manufactured home/RV community:

- Is not in character with the City of Cle Elum or the upper Kittitas Valley (a fundamental requirement of the current zoning for the property),
- Would create a new and separate private tourist resort instead of the natural extension of city neighborhoods originally envisioned by city zoning and current approvals,
- Is in its entirety a private business not a neighborhood (no lots will be created or sold, all spots will be leased, and the project will be private), wholly owned by a large out-of-state publicly traded corporation whose fiduciary duty is to its shareholders,
- Provides no significant benefits to upper valley residents and tax payers,
- Will create serious and significant impacts on roads, police, fire, schools, emergency services, hospitals, and other public services that can't (or won't) be fully mitigated by the developer, and therefore,
- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for, essentially a subsidy for a private business,
- Denial of the Sun Communities proposal would not take away or reduce underlying property rights. The original underlying zoning approval would still allow development of this site, just not as a private resort/manufactured home community.

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

I am writing to express my disappointment in the possible 47 Degrees North development. We bought here in Suncadia 10 months ago making Cl Elum our primary home after living in Gig Harbor on the Puget Sound to be more central to our 3 sons and their families.
Nothing was mentioned to us about this possible development when we were looking or after purchase of our home on the ridge and vacant lot. We have a lot invested here and gave up a beautiful place and setting only to find out 2 months ago of this low income development that would only bring in the wrong people and encourage homelessness and crime.
I can't believe this is even being considered. There is nothing positive to gain by this but negative actions. I oppose this going forward and pray the City will come to their senses and not follow through allowing this to come into our small community.

Sent from my iPhone

Dear City of Cle Elum, 6/9/23

In regards to the pending 47 degrees north project, I believe that this would have substantial negative effects on the town. I believe this because nothing in the town or surrounding towns could support this boom in population. The population would jump from the current of around 3,350 and increase it by around 73% which would bring the population to roughly 6,000 people depending on the time of year.

Of those new people, they could bring in an estimated 620 new students into the school district which would put the schools over 20% above capacity. And all of these people would need to get around which brings us to the next issue, traffic.

The Master Plan shows that the only exits of the entire project would be on WA-903 and onto Bullfrog Road, this would cause extreme congestion at the entrance to Roslyn, the highway, and the area once you reach the main town of Cle Elum. The entire area would be bad in general due to the added 757 houses but during any weekend you would not be able to go anywhere because of the 637 RV spots that will be added.

With all of these people driving around they will all also need to fill up their vehicles. All of the gas stations around Cle Elum are not big enough to support everyone already. So once everyone moves in the gas stations will be full. Then during any weekend or summer travelers and RVs will fill the gas stations and you won't be able to fill up your gas.

The utilities of Cle Elum will also not be able to support the increase in people. As of 2005, Cle Elum has had a 3.6 million gallon per day wastewater treatment plant and that covers Cle Elum, South Cle Elum, Roslyn, Ronald, and Suncadia but with the added people Cle Elum will need a much bigger wastewater treatment system to support the added people.

In conclusion, neither Cle Elum nor the surrounding towns would be able to support the proposed 47 degrees north project.

Sincerely,

Cody Olson

Greetings,

My husband and I are homeowners in Suncadia. We are extremely concerned about safety and evacuation procedures. Because Suncadia is located in a high-risk fire zone and has only one road to get out, we are requesting a major safety review by the Washington State Department of Transportation and the City of Cle Elum before this project goes forth.

It is obvious to all that fires have occurred frequently. With the addition of this many homes, dwellings and an RV Park, without the addition of access roads to safety, you will be putting all of us at great risk.

I am certain that you have the numbers of homes, visitors and vehicles occupying Suncadia during the summer/fall fire season. The surrounding cities should also be considered as we all need to access I-90. Please respond to us in writing as soon as possible with the course of actions to be taken to assure us and all Suncadia property owners that, in case of emergency, we have a safe evacuation route.

Sincerely,

Cori and Jim Mothersbaugh

Re: 47 Degrees North Major Amendment proposal

I am writing to inform the city of my very strong opposition to the Sun Communities 47° North proposal for the Bullfrog flats property. The proposed manufactured home / RV community:
Is in clear violation of the vision for the property adopted by the city and presented to the public as a condition for annexing Bullfrog Flats into the city. It's not in character with the City of Cle Elum and does not comply with fundamental requirements of the city's comprehensive plan, the development agreement, or zoning for the property.

Instead of traditional neighborhoods that were planned to be connected to and a natural extension of the city, supporting the rest of the city, 47 Degrees North would create a private for-profit community and tourist resort with gates, private roads and utilities which will be separated from the rest of the city. It will create a private city within a city, forever.

Fiscal studies of 47 Degrees North show that it will not create sufficient tax revenue to cover the city's cost to serve it. Unless the developer agrees to financially cover the substantial deficits, forever, existing city taxpayers will be required to subsidize Sun's development and taxes will go up, which does not make sense for Cle Elum property owners to subsidize a private for profit entity.

Sun's 47 Degrees North will be in its entirety a private business not a natural neighborhood (no lots sold, all spots leased), wholly owned by a massive out-of-state publicly traded corporation who's fiduciary duty is to its shareholders, not city taxpayers. Any subsidies of the project would be a gift of public funds to a private entity and is misuse of funds.

Is not housing as contemplated for the Bullfrog UGA. It will displace half of the actual housing planned for the area and replace it with a private park designed as a transient playground.
Will be the largest manufactured home/RV park on the West Coast and will double the population of Cle Elum. Parks of this magnitude have no place in a town as small as Cle Elum, creating congestion, ruining the quaint character of Cle Elum and the beautiful nature and reason we are living here.

It provides no significant benefits to city or UKC residents, but creates serious and significant impacts on roads, police, fire, schools, emergency services, hospitals and other public services that can't be (or won't be) fully mitigated by the developer, and, will create extensive traffic congestion and gridlock

conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for. Any such increase in taxes will effectively translate to a subsidy for a private business,

Denial of 47 Degrees North will not take away or reduce underlying property rights. It will simply require Sun Communities to comply with city's current rules, regulations and comprehensive plan for the property. The original underlying zoning approval and development agreement already allows development of this site, just not as a private resort/manufactured home community/retail center.

Based on the amount of proposed land use and trees that would need to be cut down the already increasing traffic noise and fumes will be even more prominent throughout the city which is already hampering peaceful life in this small community and quiet asphalt does not seem to be moving into the area. There is potential for even greater visibility to the freeway changing the entire feel of the community and natural aspect of the town which is already having too many trees cut down in clear cut fashion vs forests managed in a firewise sense to retain tranquility, sound and provide wildlife corridors for the large elk herds and other wildlife that frequent this specific area and don't feel adequate mitigation is in place for any of these factors..

For all of these reasons, and others, I implore the City to DENY this proposed major amendment and retain the current approved land use for the property.

Respectfully,
Corinna Bolender

Hello,

I am writing to you today to express my opposition for the Sun Communities 47 degrees north proposal for the Bullfrog Flats property. Not only is this project a tax burden instead of revenue for the city of Cle Elum, but, in doubling Cle Elum's existing population it would put a huge burden on not only the resources for our school, roads, and other public services, but it would overwhelm our emergency services as well. I implore you to consider what this would do to our community not only as a citizen of the upper county but as a Fire Chief and EMT. Moving forward with this would be dangerous for our current and future citizens.

It would also compete with existing businesses and in leasing, instead of selling there would be a decrease in the sense of community and responsibility for our beautiful lands and recreation areas.

We need to make sure that this project complies with the city's rules, regulations, and comprehensive plan for the property. We need to make sure that it follows the current approved land use for the property. If this does become the private resort/manufactured home community/retail center that is suggested, it would only damage and overwhelm our community that is struggling already.

Please deny this proposed major amendment and retain the current approved land use for the property.

Thank you,

--

May 12, 2023

City of Cle Elum,
Attention: Planning Department/47 Degrees North,
119 West First Street,
Cle Elum, WA 98922

RE: 47 Degrees North – Opposition – Please Deny Application

Dear City of Cle Elum and Planning Department:

We own two parcels in Cle Elum. We are strongly opposed to the 47 Degree North project. We believe the addition of the trailer park will significantly increase the population of the City without the commensurate tax base to support the additional population or infrastructure required. The rapid development and habitation timeframe is not sufficient for the City or the current population to adapt. This includes roadways, hospitals and medical care, police, fire, EMS, retail store capacity, parks, recreation, as well as way of life. This project put the cost burden squarely on current property owners with no aid or remediation from the new proposed residents. This is not fair to the community and its current citizens. We urge you to deny the 47 Degree North application and continue with sustainable City expansion and services planning.

Parcel Owners:

Subject: 47 Degrees North - Opposition to the Project

[EXTERNAL EMAIL] DO NOT CLICK links or attachments unless you recognize the sender and know the content is safe.

Dear City of Cle Elum and Planning Department: We own two parcel's in Cle Elum. We are strongly opposed to the 47 Degree North project. We believe the addition of the trailer park will significantly increase the population of the City without the commensurate tax base to support the additional population or infrastructure required. The rapid development and habitation timeframe is not sufficient for the City or the current population to adapt. This includes roadways, hospitals and medical care, police, fire, EMS, retail store capacity, parks, recreation, as well as way of life. This project put the cost burden squarely on current property owners with no aid or remediation from the new proposed residents. This is not fair to the community and its current citizens. We urge you to deny the 47 Degree North application and continue with sustainable City expansion and services planning.

Parcel Owners:
3770 Suncadia Trails, #305, Cle Elum, WA 98922

3841 Suncadia Trails, Cle Elum, WA 98922

Re: 47 Degrees North Major Amendment proposal

I am writing to inform the city of my very strong opposition to the Sun Communities 47° North proposal for the Bullfrog flats property. The proposed manufactured home / RV community:

- Is in clear violation of the vision for the property adopted by the city and presented to the public as a condition for annexing Bullfrog Flats into the city. It's not in character with the City of Cle Elum and does not comply with fundamental requirements of the city's comprehensive plan, the development agreement, or zoning for the property.

- Instead of traditional neighborhoods that were planned to be connected to and a natural extension of the city, supporting the rest of the city, 47 Degrees North would create a private for-profit community and tourist resort with gates, private roads and utilities which will be separated from the rest of the city. It will create a private city within a city, forever.

- Fiscal studies of 47 Degrees North show that it will not create sufficient tax revenue to cover the city's cost to serve it. Unless the developer agrees to financially cover the substantial deficits, forever, existing city taxpayers will be required to subsidize Sun's development and taxes will go up.

- Sun's 47 Degrees North will be in its entirety a private business not a natural neighborhood (no lots sold, all spots leased), wholly owned by a massive out-of-state publicly traded corporation whose fiduciary duty is to its shareholders, not city taxpayers. Any subsidies of the project would be a gift of public funds to a private entity.

- Is not housing as contemplated for the Bullfrog UGA. It will displace half of the actual housing planned for the area and replace it with a private park designed as a transient playground.

- Will be the largest manufactured home/RV park on the West Coast and will double the population of Cle Elum. Parks of this magnitude have no place in a town as small as Cle Elum. Wrong Place, Wrong Size.

- Sun has eliminated the industrial park component of the approved plan and is proposing a major new retail center to the project which would compete with existing city businesses and will seriously damage Cle Elum's downtown, which the city has invested millions of dollars to reinvigorate. The retail center is in direct conflict with the city's comprehensive plan which states that the Bullfrog Flats Master Plan...."is intended to elevate the DTC (downtown core) as the primary retail and activity nexus for Cle Elum". Current rules for the Bullfrog Flats property prohibit a retail center on the property.

- Provides no significant benefits to city or UKC residents, but creates serious and significant impacts on roads, police, fire, schools, emergency services, hospitals and other public services that can't be (or won't be) fully mitigated by the developer.

- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for. Any such increase in taxes will effectively translate to a subsidy for a private business.

- Denial of 47 Degrees North will not take away or reduce underlying property rights. It will simply require Sun Communities to comply with city's current rules, regulations and comprehensive plan for the property. The original underlying zoning approval and development agreement already allows development of this site, just not as a private resort/manufactured home community/retail center.

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Respectfully,

Craig S. Pigeon

RE: 47 Degrees North Major Amendment Proposal

I am writing to inform the city of my very strong opposition to the Sun Communities 47° North proposal for the Bullfrog flats property. The proposed manufactured home / RV community will result in negative impacts:

- Decreased level of service for emergency medical services
- Decreased level of service for police protection
- Decreased level of service for fire protection
- Traffic gridlock with high volume of transient visitors in large recreational vehicles
- Increased tax burden on existing property owners to pay for aging infrastructure (water, sewer, power, roads)
- Increased 2nd home ownership within a private resort adversely impacting many throughout the community.
- Adverse impact to downtown core businesses as resort environment will drive dollars to remain at the resort.
- Potential to increase jobs yet does little to offer adequate affordable housing options in relationship to number of workers necessary to support multiple resorts in the area.
- Potential to require additional city resources to manage and address concerns by a high volume of transient visitors.
- High volume of short-term rentals (STRs) tax revenue by law are applied tourism rather than infrastructure upgrades.
- 90% of profits will be, by law, sent out of our community to Wall Street investors.

For these reasons, I implore the City to DENY this proposed major amendment and retain the current approved land use for the property.

Respectfully,,

Re: 47 Degrees North Major Amendment Proposal

I am writing to provide the city with my very strong concerns about the Sun Communities 47°N proposal for the Bullfrog Flats property. The proposed manufactured home/RV community:

- Is not in character with the City of Cle Elum or the upper Kittitas Valley (a fundamental requirement of the current zoning for the property),
- Would create a new and separate private tourist resort instead of the natural extension of city neighborhoods originally envisioned by city zoning and current approvals,
- Is in its entirety a private business not a neighborhood (no lots will be created or sold, all spots will be leased, and the project will be private), wholly owned by a large out-of-state publicly traded corporation whose fiduciary duty is to its shareholders,
- Provides no significant benefits to upper valley residents and tax payers,
- Will create serious and significant impacts on roads, police, fire, schools, emergency services, hospitals, and other public services that can't (or won't) be fully mitigated by the developer, and therefore,
- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for, essentially a subsidy for a private business,
- Denial of the Sun Communities proposal would not take away or reduce underlying property rights. The original underlying zoning approval would still allow development of this site, just not as a private resort/manufactured home community.

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Re: 47 Degrees North Major Amendment proposal

As a Roslyn property owner since the late 1950's, I have watched the growth of the Upper County, sometimes with trepidation and sometime with delight. However, this proposed development makes anything else I have seen over the years seem like a children's tea party.

We all have become aware that corporations no longer truly care about anything except the bottom line. Their executives may mutter platitudes, but it has become obvious that if something causes a reduction in the bottom line and the consequent reduction in the largess which the executives of a corporation will receive, those executives will do anything they can to eliminate whatever it is that is squeezing their bottom line.

It sure seems that the current 47 Degrees North proposal is even more egregious than most. The proposal up-ends everything which they had initially proposed, everything that the citizens of Cle Elum largely embrace, everything the citizens of the Upper County would prefer. In other words, it stinks.

I am writing to inform the city of my very strong opposition to the Sun Communities 47° North proposal for the Bullfrog flats property. The proposed manufactured home / RV community:

- Is in clear violation of the vision for the property adopted by the city and presented to the public as a condition for annexing Bullfrog Flats into the city. It's not in character with the City of Ce Elum and does not comply with fundamental requirements of the city's comprehensive plan, the development agreement, or zoning for the property.

- Instead of traditional neighborhoods that were planned to be connected to and a natural extension of the city, supporting the rest of the city, 47 Degrees North would create a private for-profit community and tourist resort with gates, private roads and utilities which will be separated from the rest of the city. It will create a private city within a city, forever.

- Fiscal studies of 47 Degrees North show that it will not create sufficient tax revenue to cover the city's cost to serve it. Unless the developer agrees to financially cover the substantial deficits, forever, existing city taxpayers will be required to subsidize Sun's development and taxes will go up.

- Sun's 47 Degrees North will be in its entirety a private business not a natural neighborhood (no lots sold, all spots leased), wholly owned by a massive out-of-state publicly traded corporation who's fiduciary duty is to its shareholders, not city taxpayers. Any subsidies of the project would be a gift of public funds to a private entity.

- Is not housing as contemplated for the Bullfrog UGA. It will displace half of the actual housing planned for the area and replace it with a private park designed as a transient playground.

- Will be the largest manufactured home/RV park on the West Coast and will double the population of Cle Elum. Parks of this magnitude have no place in a town as small as Cle Elum. Wrong Place Wrong Size.

- Sun has eliminated the industrial park component of the approved plan and is proposing a major new retail center to the project which would compete with existing city businesses and will seriously damage Cle Elum's downtown, which the city has invested millions of dollars to reinvigorate. The retail center is in direct conflict with the city's comprehensive plan which states that the Bullfrog Flats Master Plan...."is intended to elevate the DTC (downtown core) as the primary retail and activity nexus for Cle Elum". Current rules for the Bullfrog Flats property prohibit a retail center on the property.

- Provides no significant benefits to city or UKC residents, but creates serious and significant impacts on roads, police, fire, schools, emergency services, hospitals and other public services that can't be (or won't be) fully mitigated by the developer, and,

- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for. Any such increase in taxes will effectively translate to a subsidy for a private business,

- Denial of 47 Degrees North will not take away or reduce underlying property rights. It's not in character with the City of Cle Elum and does not comply with fundamental requirements of the city's comprehensive plan, the development agreement, or zoning for the property.

- Instead of traditional neighborhoods that were planned to be connected to and a natural extension of the city, supporting the rest of the city, 47 Degrees North would create a private for-profit community and tourist resort with gates, private roads and utilities which will be separated from the rest of the city. It will create a private city within a city, forever.

- Fiscal studies of 47 Degrees North show that it will not create sufficient tax revenue to cover the city's cost to serve it. Unless the developer agrees to financially cover the substantial deficits, forever, existing city taxpayers will be required to subsidize Sun's development and taxes will go up.

- Sun's 47 Degrees North will be in its entirety a private business not a natural neighborhood (no lots sold, all spots leased), wholly owned by a massive out-of-state publicly traded corporation whose fiduciary duty is to its shareholders, not city taxpayers. Any subsidies of the project would be a gift of public funds to a private entity.

- Is not housing as contemplated for the Bullfrog UGA. It will displace half of the actual housing planned for the area and replace it with a private park designed as a transient playground.

- Will be the largest manufactured home/RV park on the West Coast and will double the population of Cle Elum. Parks of this magnitude have no place in a town as small as Cle Elum. Wrong Place, Wrong Size.

- Sun has eliminated the industrial park component of the approved plan and is proposing a major new retail center to the project which would compete with existing city businesses and will seriously damage Cle Elum's downtown, which the city has invested millions of dollars to reinvigorate. The retail center is in direct conflict with the city's comprehensive plan which states that the Bullfrog Flats Master Plan…."is intended to elevate the DTC (downtown core) as the primary retail and activity nexus for Cle Elum". Current rules for the Bullfrog Flats property prohibit a retail center on the property.

- Provides no significant benefits to city or UKC residents, but creates serious and significant impacts on roads, police, fire, schools, emergency services, hospitals and other public services that can't be (or won't be) fully mitigated by the developer.

- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for. Any such increase in taxes will effectively translate to a subsidy for a private business,

- Denial of 47 Degrees North will not take away or reduce underlying property rights. It will simply require Sun Communities to comply with city's current rules, regulations and comprehensive plan for the property. The original underlying zoning approval and development agreement already allows development of this site, just not as a private resort/manufactured home community/retail center.

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Respectfully,

Dan Sater

To the City of Cle Elum,

June 9, 2023

Good day and I hope this letter finds you well. I am currently attending Cle Elum Roslyn High School and my class has recently done a project on the negative impacts that Project 47 Degrees north would have on this community. I wanted to take a moment and reach out and inform you of why Project 47 Degrees north is not a good idea as it stands. I hope that possibly this message would help with any reconsideration of the project, if you give my classmates and I a second of your day to lend an ear and listen.

Naturally, cities do evolve and grow, there is no way around that. However, as populations rise cities must adapt overtime to a spike, but this process happens slowly and possibly over decades. Project 47 Degrees north could potentially double the population overnight, raising Cle Elum's population by 73%. With proper preparation, this would not be terrible, but we haven't braced for anything quite like this so far. Take Safeway for example, a weekend in summer completely packs the building and supplies run low swiftly. Without proper supplies, a situation such as this one could get dangerous for any local here in the heart of the cascades. Road ways we have set up would quickly be overwhelmed with cars zipping through it back and forth, a commute to our local school district could take twice as long with a spike in students. It would be needed to construct a new building which would cost millions of dollars, money that we don't have lying around. Hallways would be packed and teachers overwhelmed with new faces.

Project 47 Degrees North could work out only if we prepare for thousands of new people, but if construction starts too soon, then our locals could face consequences we didn't expect anytime soon.

Thank you for your time and reading over this.

To All Concerned: As a life-long resident of Cle Elum and a business owner in the downtown core I have to speak out against Sun Communities and the 47 Degrees North proposed plan. Simple research will tell any intelligent individual this will not in any way be a benefit to all the upper county communities, specifically Cle Elum. The list of negatives is long, traffic gridlock, decreased services for medical, police and fire protection, negative impact to the city businesses we all support.
The most important drawback is the insufficient tax structure this type of development creates.

This is not a Suncadia or Tumble Creek that have created incremental tax for the county with a new water treatment plant, natural gas infrastructure and a truly vibrant group of citizens giving back to our schools and businesses. This is nothing more than a cheap trailer park, the largest of it's kind in the state of Washington. Sun Communities have a horrible track record which anyone can find with little effort.
The planned business park is the Trojan Horse they are using to sway the residents with the prospect of a new grocery store, one Sun Communities legally cannot provide. There are too many variables in this "plan" and none of it is for the betterment of our communities. This project must be stopped. Say NO to Sun Communities.....Please!

Respectfully

Re: 47 Degrees North Major Amendment proposal

I am writing to inform the city of our **very strong opposition** to the Sun Communities 47° North proposal for the Bullfrog flats property. We believe that the proposed manufactured home / RV community:

- Is in clear violation of the vision for the property adopted by the city and presented to the public as a condition for annexing Bullfrog Flats into the city. It is **not in character with the City of Cle Elum** and does not comply with fundamental requirements of the city's comprehensive plan, the development agreement, or zoning for the property.

- Instead of traditional neighborhoods that were planned to be connected to and a natural extension of the city, supporting the rest of the city, 47 Degrees North would create a private for-profit community and tourist resort with gates, private roads and utilities which will be separated from the rest of the city. It will create a private city within a city, forever.

- Fiscal studies of 47 Degrees North show that it will not create sufficient tax revenue to cover the city's cost to serve it. Unless the developer agrees to financially cover the substantial deficits, forever, existing city taxpayers will be required to subsidize Sun's development and taxes will go up.

- Sun's 47 Degrees North will be a private business not a natural neighborhood (no lots sold, all spots leased), wholly owned by a massive out-of-state publicly traded corporation who's fiduciary duty is to its shareholders, not city taxpayers. Any subsidies of the project would be a gift of public funds to a private entity.

- Is not housing as contemplated for the Bullfrog UGA. It will displace half of the actual housing planned for the area and replace it with a private park designed as a transient playground.

- Will be the largest manufactured home/RV park on the West Coast and will double the population of Cle Elum. This project **provides no significant benefits to city or UKC residents, but creates serious and significant impacts on roads, police, fire, schools, emergency services, hospitals and other public services that won't be fully mitigated by the developer.**

- Sun has eliminated the industrial park component of the approved plan and is proposing a major new retail center to the project which would compete with existing city businesses and will seriously damage Cle Elum's downtown, which the city has invested millions of dollars to reinvigorate. The retail center is in direct conflict with the city's comprehensive plan which states that the Bullfrog Flats Master Plan...."is intended to elevate the DTC (downtown core) as the primary retail and activity nexus for Cle Elum". Current rules for the Bullfrog Flats property prohibit a retail center on the property.

- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for. Any such increase in taxes will effectively translate to a subsidy for a private business,

- Denial of 47 Degrees North will not take away or reduce underlying property rights. It will simply require Sun Communities to comply with the city's current rules, regulations and comprehensive plan for the property. The original underlying zoning approval and development agreement already allows development of this site, just not as a private resort/manufactured home community/retail center.

For all of these reasons, and others, we implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Respectfully,

David and Nancy Corwin

Subject: 47 Degrees North

[EXTERNAL EMAIL] DO NOT CLICK links or attachments unless you recognize the sender and know the content is safe.

To whom it may concern.

I am opposed to the 47 Degrees North project for a multitude of reasons.
Starting with the lack of infrastructure for signficantly increased road traffic and congestion along Bullfrog road that will occur if this project is allowed to move forward.
In addition, our local services (fire/police) will be further strained based upon population projections that this project will cause and with the project being 'transient' in that no significant tax dollars are consistenly derived from this development (as the project consists of camp sites for RV/campers and manufactured home pads for those who rent from the developer (so the classification of the manufactured home is not real property but rather personal property, a significantly lessor tax basis that will be needed to increase the number of essential service jobs to handle this transient site). So, as a full time Kittitas County resident; do I end up having an increase in my property taxes to make up the shortfall that this project will surely create for basic services?
This developer is known as a manufactured housing/recreational park builder; not as a low-income/substainable housing advocate; which the original intent of this property development was meant to be (to provide affordable housing; based upon SFRs (single family residence) and low rise apartments; not manufactured homes on pads (that the homeowner does not own the pad or the land underneath) and RV parking; none of which evokes pride of homeownership or sustainable housing for our community).
Reject this proposal and force this developer to adhere to the original plan or sell it to some entity that will!

Sincerely,

David Angrove

May 24, 2023

City of Cle Elum
Attention: Planning Department/47 Degrees North
119 West First Street, Cle Elum, WA 98922

My wife Katherine and I have recently moved into our home in the area and have rapidly become engaged citizens of the Cle Elum community. As we've become more familiar with the details of the Sun Community proposal, we are very puzzled why this proposal has gotten this far, why it is even is under consideration, and have numerous questions that need to be considered and answered:

If you are to accept this proposal:

1. What are the benefits to the City of Cle Elum? The proposal states the benefits provided are in the "best interest of the community." The community has and is demonstrating very strong opposition to the Sun Community proposal.
2. What are the benefits to the residents of Cle Elum and surrounding region of Upper Kittitas County?
3. What are the benefits to the Cle Elum downtown businesses and retailers?
4. What are benefits to the potential owners of the manufactured homes, which doesn't appear to fit the original Suncadia vision of affordable home ownership and living for the Bullfrog property? The proposal does not include "affordable home ownership" in truth, the proposal doesn't include the opportunity for potential buyers to own the land on which the dwelling sits, preventing true equity opportunities for the buyer.

If you are to accept this proposal:

5. How will the City, County, State, and Federal entities fund and address the necessary infrastructure of the expected rapid growth, such as transportation and traffic control, police, fire and emergency services, postal services, schools, roads, water and utilities.

As the sitting Mayor and City Council of the City of Cle Elum, you owe detailed answers to these questions. You are responsible and will be held accountable if you chose not to address these critical issues and questions and address the best interest of the community. As residents of Cle Elum, we remain skeptical and do not identify any benefit to the Cle Elum region and community and strongly oppose this Sun Community proposal.

Sincerely,
David Gusdorf

Re: 47 Degrees North Major Amendment proposal

I am writing to inform the city of my very strong opposition to the Sun Communities 47° North proposal for the Bullfrog flats property. The proposed manufactured home / RV community:

- Is in clear violation of the vision for the property adopted by the city and presented to the public as a condition for annexing Bullfrog Flats into the city. It's not in character with the City of Cle Elum and does not comply with fundamental requirements of the city's comprehensive plan, the development agreement, or zoning for the property.

- Instead of traditional neighborhoods that were planned to be connected to and a natural extension of the city, supporting the rest of the city, 47 Degrees North would create a private for-profit community and tourist resort with gates, private roads and utilities which will be separated from the rest of the city. It will create a private city within a city, forever.

- Fiscal studies of 47 Degrees North show that it will not create sufficient tax revenue to cover the city's cost to serve it. Unless the developer agrees to financially cover the substantial deficits, forever, existing city taxpayers will be required to subsidize Sun's development and taxes will go up.

- Sun's 47 Degrees North will be in its entirety a private business not a natural neighborhood (no lots sold, all spots leased), wholly owned by a massive out-of-state publicly traded corporation whose fiduciary duty is to its shareholders, not city taxpayers. Any subsidies of the project would be a gift of public funds to a private entity.

- Is not housing as contemplated for the Bullfrog UGA. It will displace half of the actual housing planned for the area and replace it with a private park designed as a transient playground.

- Will be the largest manufactured home/RV park on the West Coast and will double the population of Cle Elum. Parks of this magnitude have no place in a town as small as Cle Elum. Wrong Place, Wrong Size.

- Sun has eliminated the industrial park component of the approved plan and is proposing a major new retail center to the project which would compete with existing city businesses and will seriously damage Cle Elum's downtown, which the city has invested millions of dollars to reinvigorate. The retail center is in direct conflict with the city's comprehensive plan which states that the Bullfrog Flats Master Plan...."is intended to elevate the DTC (downtown core) as the primary retail and activity nexus for Cle Elum". Current rules for the Bullfrog Flats property prohibit a retail center on the property.

- Provides no significant benefits to city or UKC residents, but creates serious and significant impacts on roads, police, fire, schools, emergency services, hospitals and other public services that can't be (or won't be) fully mitigated by the developer.

- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for. Any such increase in taxes will effectively translate to a subsidy for a private business,

- Denial of 47 Degrees North will not take away or reduce underlying property rights. It will simply require Sun Communities to comply with city's current rules, regulations and comprehensive plan for the property. The original underlying zoning approval and development agreement already allows development of this site, just not as a private resort/manufactured home community/retail center.

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Respectfully,

Re: 47 Degrees North Major Amendment proposal

I am writing to inform the city of my very strong opposition to the Sun Communities 47° North proposal for the Bullfrog flats property. The proposed manufactured home / RV community:

- Is in clear violation of the vision for the property adopted by the city and presented to the public as a condition for annexing Bullfrog Flats into the city. It's not in character with the City of Cle Elum and does not comply with fundamental requirements of the city's comprehensive plan, the development agreement, or zoning for the property.

- Instead of traditional neighborhoods that were planned to be connected to and a natural extension of the city, supporting the rest of the city, 47 Degrees North would create a private for-profit community and tourist resort with gates, private roads and utilities which will be separated from the rest of the city. It will create a private city within a city, forever.

- Fiscal studies of 47 Degrees North show that it will not create sufficient tax revenue to cover the city's cost to serve it. Unless the developer agrees to financially cover the substantial deficits, forever, existing city taxpayers will be required to subsidize Sun's development and taxes will go up.

- Sun's 47 Degrees North will be in its entirety a private business not a natural neighborhood (no lots sold, all spots leased), wholly owned by a massive out-of-state publicly traded corporation whose fiduciary duty is to its shareholders, not city taxpayers. Any subsidies of the project would be a gift of public funds to a private entity.

- Is not housing as contemplated for the Bullfrog UGA. It will displace half of the actual housing planned for the area and replace it with a private park designed as a transient playground.

- Will be the largest manufactured home/RV park on the West Coast and will double the population of Cle Elum. Parks of this magnitude have no place in a town as small as Cle Elum. Wrong Place, Wrong Size.

- Sun has eliminated the industrial park component of the approved plan and is proposing a major new retail center to the project which would compete with existing city businesses and will seriously damage Cle Elum's downtown, which the city has invested millions of dollars to reinvigorate. The retail center is in direct conflict with the city's comprehensive plan which states that the Bullfrog Flats Master Plan…."is intended to elevate the DTC (downtown core) as the primary retail and activity nexus for Cle Elum". Current rules for the Bullfrog Flats property prohibit a retail center on the property.

- Provides no significant benefits to city or UKC residents, but creates serious and significant impacts on roads, police, fire, schools, emergency services, hospitals and other public services that can't be (or won't be) fully mitigated by the developer.

- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for. Any such increase in taxes will effectively translate to a subsidy for a private business,

- Denial of 47 Degrees North will not take away or reduce underlying property rights. It will simply require Sun Communities to comply with city's current rules, regulations and comprehensive plan for the property. The original underlying zoning approval and development agreement already allows development of this site, just not as a private resort/manufactured home community/retail center.

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Respectfully,

Cle Elem, WA 98922

Dear Planning Department,

I am writing today regarding my objections to pending permit application submitted for the proposed 47 Degrees North project.

I currently own a small business in the Roslyn Commercial Core and although some would argue that this huge, proposed development would be a boon for small, local business I believe the opposite to be true. The small, sleepy, Mayberry feel of Roslyn and Cle Elum are what draw visitors. A development this large would destroy that vibe and historical significance of the area.

Additionally, I think it's obvious that the infrastructure of the area is nowhere near ready for the influx of so many new commuters and residences.

Respectfully,

Dawn Rushton

Hello,
I am a member of the equine community in town and a member of The Washington State Horse Park. The loss of so much of the WSHP trail system is not acceptable! We now have a world class facility that draws people from all over the country. It enriches our community by the great numbers that become patrons to our whole community.
I hope everyone on the planning commission really thinks out all of the negative impact that 47° will have on our lovely area
Thank you for your time

Any such increase in taxes will effectively translate to a subsidy for a private business,**

- Denial of 47 Degrees North will not take away or reduce underlying property rights. It will simply require Sun Communities to comply with city's current rules, regulations and comprehensive plan for the property. The original underlying zoning approval and development agreement already allows development of this site, just not as a private resort/manufactured home community/retail center.

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Respectfully,

Re: 47 Degrees North Major Amendment proposal

I am writing to inform the city of my very strong opposition to the Sun Communities 47° North proposal for the Bullfrog flats property. The proposed manufactured home / RV community:

- Is in clear violation of the vision for the property adopted by the city and presented to the public as a condition for annexing Bullfrog Flats into the city. It's not in character with the City of Cle Elum and does not comply with fundamental requirements of the city's comprehensive plan, the development agreement, or zoning for the property.

- Instead of traditional neighborhoods that were planned to be connected to and a natural extension of the city, supporting the rest of the city, 47 Degrees North would create a private for-profit community and tourist resort with gates, private roads and utilities which will be separated from the rest of the city. It will create a private city within a city, forever.

- Fiscal studies of 47 Degrees North show that it will not create sufficient tax revenue to cover the city's cost to serve it. Unless the developer agrees to financially cover the substantial deficits, forever, existing city taxpayers will be required to subsidize Sun's development and taxes will go up.

- Sun's 47 Degrees North will be in its entirety a private business not a natural neighborhood (no lots sold, all spots leased), wholly owned by a massive out-of-state publicly traded corporation whose fiduciary duty is to its shareholders, not city taxpayers. Any subsidies of the project would be a gift of public funds to a private entity.

- Is not housing as contemplated for the Bullfrog UGA. It will displace half of the actual housing planned for the area and replace it with a private park designed as a transient playground.

- Will be the largest manufactured home/RV park on the West Coast and will double the population of Cle Elum. Parks of this magnitude have no place in a town as small as Cle Elum. Wrong Place. Wrong Size.

- Sun has eliminated the industrial park component of the approved plan and is proposing a major new retail center to the project which would compete with existing city businesses and will seriously damage Cle Elum's downtown, which the city has invested millions of dollars to reinvigorate. The retail center is in direct conflict with the city's comprehensive plan which states that the Bullfrog Flats Master Plan...."is intended to elevate the DTC (downtown core) as the primary retail and activity nexus for Cle Elum". Current rules for the Bullfrog Flats property prohibit a retail center on the property.

- Provides no significant benefits to city or UKC residents, but creates serious and significant impacts on roads, police, fire, schools, emergency services, hospitals and other public services that can't be (or won't be) fully mitigated by the developer.

- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for. Any such increase in taxes will effectively translate to a subsidy for a private business,

- Denial of 47 Degrees North will not take away or reduce underlying property rights. It will simply require Sun Communities to comply with city's current rules, regulations and comprehensive plan for the property. The original underlying zoning approval and development agreement already allows development of this site, just not as a private resort/manufactured home community/retail center.

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Subject: 47 Degrees North Proposal

[EXTERNAL EMAIL] DO NOT CLICK links or attachments unless you recognize the sender and know the content is safe.

I am writing as a 20 year resident of Kittitas County, former resident of Cle Elum (10 years) and current employee (9 years) of the healthcare industry in Kittitas County, to express to the City of Cle Elum my strong concerns about the Sun Communities 47°N proposal for the Bullfrog Flats property.

- The proposed manufactured home/RV community:
  - Is not in character with the City of Cle Elum or the upper Kittitas Valley (a fundamental requirement of the current zoning for the property),
  - Would create a new and separate private tourist resort instead of the natural extension of city neighborhoods originally envisioned by city zoning and current approvals,
  - It is, in its entirety, a private business not a neighborhood (no lots will be created or sold, all spots will be leased, and the project will be private), wholly owned by a large out-of-state publicly traded corporation whose fiduciary duty is to its shareholders,
  - Provides no significant benefits to upper county residents and taxpayers,
  - Will create serious and significant impacts on roads, police, fire, schools, emergency services, hospitals, and other public services that can't (or won't) be fully mitigated by the developer, and therefore,
  - Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for, essentially a subsidy for a private business,
  - Denial of the Sun Communities proposal would not take away or reduce underlying property rights. The original underlying zoning approval would still allow development of this site, just not as a private resort/manufactured home "community".

For all of these reasons and more, ***I implore the City to DENY this proposed major amendment and retain the current approved land use for the property.***

Re: 47 Degrees North Major Amendment proposal

We are writing to inform the city of our very strong opposition to the Sun Communities 47° North proposal for the Bullfrog flats property. The proposed manufactured home / RV community:

- Is in clear violation of the vision for the property adopted by the city and presented to the public as a condition for annexing Bullfrog Flats into the city. It's not in character with the City of Cle Elum and does not comply with fundamental requirements of the city's comprehensive plan, the development agreement, or zoning for the property.

- Instead of traditional neighborhoods that were planned to be connected to and a natural extension of the city, supporting the rest of the city, 47 Degrees North would create a private for-profit community and tourist resort with gates, private roads and utilities which will be separated from the rest of the city. It will create a private city within a city, forever.

- Fiscal studies of 47 Degrees North show that it will not create sufficient tax revenue to cover the city's cost to serve it. Unless the developer agrees to financially cover the substantial deficits, forever, existing city taxpayers will be required to subsidize Sun's development and taxes will go up.

- Sun's 47 Degrees North will be in its entirety a private business not a natural neighborhood (no lots sold, all spots leased), wholly owned by a massive out-of-state publicly traded corporation who's fiduciary duty is to its shareholders, not city taxpayers. Any subsidies of the project would be a gift of public funds to a private entity.

- Is not housing as contemplated for the Bullfrog UGA. It will displace half of the actual housing planned for the area and replace it with a private park designed as a transient playground.

- Will be the largest manufactured home/RV park on the West Coast and will double the population of Cle Elum. Parks of this magnitude have no place in a town as small as Cle Elum. Wrong Place Wrong Size.

- Sun has eliminated the industrial park component of the approved plan and is proposing a major new retail center to the project which would compete with existing city businesses and will seriously damage Cle Elum's downtown, which the city has invested millions of dollars to reinvigorate. The retail center is in direct conflict with the city's comprehensive plan which states that the Bullfrog Flats Master Plan...."is intended to elevate the DTC (downtown core) as the primary retail and activity nexus for Cle Elum". Current rules for the Bullfrog Flats property prohibit a retail center on the property.

- Provides no significant benefits to city or UKC residents, but creates serious and significant impacts on roads, police, fire, schools, emergency services, hospitals and other public services that can't be (or won't be) fully mitigated by the developer, and,

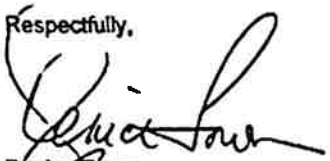
- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for. Any such increase in taxes will effectively translate to a subsidy for a private business,

- Denial of 47 Degrees North will not take away or reduce underlying property rights. It will simply require Sun Communities to comply with city's current rules, regulations and comprehensive plan for the property. The original underlying zoning approval and development agreement already allows development of this site, just not as a private resort/manufactured home community/retail center.

This cannot be the vision the Mayor and City Council must have for the City when the City deserves so much more from you.

For all of these reasons, and others, we implore the City to DENY this proposed major amendment and retain the current approved land use for the property.

Respectfully,



Denice Town

Please stop this . We left the city for Cle Elum and this type of development will bring the city right to your doorstep. Please don't allow it in such a gorgeous area. Thank you for your consideration.

Re: 47 Degrees North Major Amendment proposal

I am writing to inform the city of my very strong opposition to the Sun Communities 47° North proposal for the Bullfrog flats property. The proposed manufactured home / RV community:

- Is in clear violation of the vision for the property adopted by the city and presented to the public as a condition for annexing Bullfrog Flats into the city. It's not in character with the City of Ce Elum and does not comply with fundamental requirements of the city's comprehensive plan, the development agreement, or zoning for the property.

- Instead of traditional neighborhoods that were planned to be connected to and a natural extension of the city, supporting the rest of the city, 47 Degrees North would create a private for-profit community and tourist resort with gates, private roads and utilities which will be separated from the rest of the city. It will create a private city within a city, forever.

- Fiscal studies of 47 Degrees North show that it will not create sufficient tax revenue to cover the city's cost to serve it. Unless the developer agrees to financially cover the substantial deficits, forever, existing city taxpayers will be required to subsidize Sun's development and taxes will go up.

- Sun's 47 Degrees North will be in its entirety a private business not a natural neighborhood (no lots sold, all spots leased), wholly owned by a massive out-of-state publicly traded corporation who's fiduciary duty is to its shareholders, not city taxpayers. Any subsidies of the project would be a gift of public funds to a private entity.

- Is not housing as contemplated for the Bullfrog UGA. It will displace half of the actual housing planned for the area and replace it with a private park designed as a transient playground.

- Will be the largest manufactured home/RV park on the West Coast and will double the population of Cle Elum. Parks of this magnitude have no place in a town as small as Cle Elum. Wrong Place Wrong Size.

- Sun has eliminated the industrial park component of the approved plan and is proposing a major new retail center to the project which would compete with existing city businesses and will seriously damage Cle Elum's downtown, which the city has invested millions of dollars to reinvigorate. The retail center is in direct conflict with the city's comprehensive plan which states that the Bullfrog Flats Master Plan...."is intended to elevate the DTC (downtown core) as the primary retail and activity nexus for Cle Elum". Current rules for the Bullfrog Flats property prohibit a retail center on the property.

- Provides no significant benefits to city or UKC residents, but creates serious and significant impacts on roads, police, fire, schools, emergency services, hospitals and other public services that can't be (or won't be) fully mitigated by the developer, and,

- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for. Any such increase in taxes will effectively translate to a subsidy for a private business,

- Denial of 47 Degrees North will not take away or reduce underlying property rights. It will simply require Sun Communities to comply with city's current rules, regulations and comprehensive plan for the property. The original underlying zoning approval and development agreement already allows development of this site, just not as a private resort/manufactured home community/retail center.

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

To the City of Cle Elum: Mayor, City Council Members, and Planning Department

I am writing to provide the city with my very strong concerns about the Sun Communities 47°N proposal for the Bullfrog Flats property. The proposed manufactured home/RV community:

· Is not in character with the City of Cle Elum or the upper Kittitas Valley (a fundamental requirement of the current zoning for the property),

· Would create a new and separate private tourist resort instead of the natural extension of city neighborhoods originally envisioned by city zoning and current approvals,

· Is in its entirety a private business not a neighborhood (no lots will be created or sold, all spots will be leased, and the project will be private), wholly owned by a large out-of-state publicly traded corporation whose fiduciary duty is to its shareholders,

· Provides no significant benefits to upper valley residents and tax payers,

· Will create serious and significant impacts on roads, police, fire, schools, emergency services, hospitals, and other public services that can't (or won't) be fully mitigated by the developer, and therefore,

· Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for, essentially a subsidy for a private business,

· Denial of the Sun Communities proposal would not take away or reduce underlying property rights. The original underlying zoning approval would still allow development of this site, just not as a private resort/manufactured home community.

For all of these reasons, and others, I implore the City to DENY this proposed major amendment and retain the current approved land use for the property.

I am writing from the perspective of a current resident of Kittitas County (20 years), former resident of Cle Elum (11 years), and an longtime employee of the Cle Elum-Roslyn School District (18 years) to express to the City of Cle Elum my **strong concerns** about the Sun Communities 47°N proposal for the Bullfrog Flats property.

- The proposed manufactured home/RV community:
  - Is not in character with the City of Cle Elum or the upper Kittitas Valley (a fundamental requirement of the current zoning for the property),
  - Would create a new and separate private tourist resort instead of the natural extension of city neighborhoods originally envisioned by city zoning and current approvals,
  - It is, in its entirety, a private business not a neighborhood (no lots will be created or sold, all spots will be leased, and the project will be private), wholly owned by a large out-of-state publicly traded corporation whose fiduciary duty is to its shareholders,
  - Provides no significant benefits to upper valley residents and taxpayers,
  - **Will create serious and significant impacts on** roads, police, fire, **schools**, emergency services, hospitals, and other public services that can't (or won't) be fully mitigated by the developer, and therefore,
  - Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for, essentially a subsidy for a private business,
  - Denial of the Sun Communities proposal would not take away or reduce underlying property rights. The original underlying zoning approval would still allow development of this site, just not as a private resort/manufactured home "community".

For all of these reasons and more, ***I implore the City to DENY this proposed major amendment and retain the current approved land use for the property.***

Subject: 47 North

[EXTERNAL EMAIL] DO NOT CLICK links or attachments unless you recognize the sender and know the content is safe.

Hello,

I live at 310 Rinky Dink Lane in Cle Elum. I am writing with concerns with the proposed development of 47 North.

We are originally from the Sammamaish/Issaquah area. These two communities are often used as a comparison model to what Cle Elum's future could be. When we first moved to Sammamish, it was a much smaller community than it is now. We knew our neighbors and it was almost impossible to go to the grocery store without seeing someone you knew. If we didn't know the person by name, surely, we would recognize their face and we'd smile and say hello. We lived in a safe community and could let our children be children and move about without so much fear for their safety.

During this time, it was also easy to move about town as the roads were busy but not jammed pack and we didn't have to plan our trips to town around the rush hour.

The school system wasn't as crowded as it is now. Schools were a warmer environment and the built a strong connection with our community.

Do the positive traits listed above sound familiar and reflect similarities with the current Cle Elum? I think they do! That's part of what drew us to Cle Elum. We were also impressed with the quality of people. They are a community of warm, kind and hard working group. If you need help, people are quick to respond and if they cannot assist with your need, they know of someone who can.

These are the type of traits that slowly start to disappear as towns grow too quickly. I know this first hand. Over the years these are the things that have vanished in Sammamish/Issaquah. Now we are lucky to know our neighbors, our schools are over crowded and the teachers are exhausted. Lockdowns at schools aren't unheard of. Package deliveries can and often do disappear the second they hit our front porches. Our roads are not built to hold the level of traffic they consume. Trees are being destroyed for more and more new community developments. Thieves are studying home owner's behaviors and are breaking in at alarming rates. They have no regard or care from neighbors who are watching them and if they are being chased away, they jump 6 foot high fences without a stumble. Police are powerless and don't come when a 911 call is placed. Sex traffickers stalk women in our local Target and Fred Meyers. Drugs are more prevalent, cars are frequently stolen and the homeless population of Seattle has penetrated our town. People are over stressed and don't care for their neighbors and our city counsel has become greedy and care less about their community's quality of life and the ability to meets their burdened resident's needs. Nor are they able afford or maintain the law enforcement staff that creates safety for our towns.

Moving forward with the 47 North development would irrevocably change Cle Elum's future. All the listed issues that plaque Sammamish/Issaquah will become Cle Elum's new normal.

Cle Elum has the right to grow, but moving ahead with the Sun Communities Corporation is NOT the answer. Not only am I concerned about the issues above, I'm concerned about Sun Communities historically lack of quality control. Their low income housing is widely known to be of poor quality. Cle Elum residents currently cares for their neighbor; Why isn't the city's officials showing care, too? Why would the City of Cle Elum approve shoddy, low quality housing for the most vulnerable people in our community? These homes will have a laundry list of on going, expensive repairs for the very people who are least likely to afford them. They will have to cut costs and be forced to make difficult decisions such as cutting their heat just to afford their leaking and drafty homes. This will place more of a burden on our community pantries and clothing closets. More children will attend school more hungry than ever before. These people will develop high medical needs due to the mold growing in their walls and their illness will create the need for medical care they cannot afford. Working while ill may create absenteeism thus forcing them into unemployment or disability. The irony will be that they will not have the financial resources available to correct the problem that makes them ill nor will they be able to afford the option to move.

None of the decisions to the proposed 47 North makes any sense. This development will cause more harm to our current community and create more expense for the city to right all the wrongs.

I implore the city to REJECT 47 North and reject any partner ship with the Sun Communities Corporation. Please listen to the needs and concerns of the residents of Cle Elum! Please do not burden us by moving forward with these plans. We do not/should not be forced to pay more taxes just to fix a poorly designed/built/managed development. We shouldn't be expected to deal with more crime or the fallout because the cost these services this will cause. There can be a better, more thoughtful plan to expand our community that also preserves the small business owned retailers. We do not need a Target/Walmart, Office Depot or the such to better our community.

These are just the local issues, too. How about the problems that this community will impose on us that are handled at the state level? The state certainly won't jump on improving our highways or meet the mailing needs that our already too small, understaffed Post Office serves. The government didn't blink an eye at forcing our office-less Postal Workers into the cold in the dead of winter and sort mail outdoors.

Neither the city of Cle Elum nor the Government are adequately prepared to manage the outcomes of the 47 North Development.

Let's plan ahead as a community in a way that maintains our relationships, businesses, schools and quality of life. Cle Elum has an opportunity to have a bright future, one with out the input or designs from Sun Communities.

Regards,
Deveaux Philpot

Re: 47 Degrees North Major Amendment Proposal

I am writing to express my **strong opposition** to the Sun Communities 47 Degrees North proposal for the Bullfrog Flats property.

This proposal is a major deviation from the original application.

The complete traffic gridlock this project, if built as proposed, will not only be catastrophic to the community with regards to conveniently moving around, but will be a significant danger with regards to First Responders and evacuation of residents if necessary.

The cost to the city of Cle Elum will be more than tax revenue will cover, potentially creating not only a deficit to the City, but possibly even bankrupting the finances of the City.

There is NO significant benefit to the City or UKC residents. Conversely, it creates significant impacts on roads, emergency services, schools and other public services that won't be mitigated by the developer.

We do not have the infrastructure to assimilate a project of this magnitude. We are under-served at present with one grocery store. Sun Communities has no legal obligation to add any services to the UKC.

You have for your review scores of letters like mine. I do not need to list all the talking points. Suffice it to say, I am in agreement with all the arguments against this planned development. Please add my voice to the thousands of residents opposed to the approval of the 47 North proposal.

I implore the City to **DENY** this proposed major amendment.

Any subsidies of the project would be a gift of public funds to a private entity.

- Is not housing as contemplated for the Bullfrog UGA. It will displace half of the actual housing planned for the area and replace it with a private park designed as a transient playground.

- Will be the largest manufactured home/RV park on the West Coast and will double the population of Cle Elum. Parks of this magnitude have no place in a town as small as Cle Elum. Wrong Place Wrong Size.

- Sun has eliminated the industrial park component of the approved plan and is proposing a major new retail center to the project which would compete with existing city businesses and will seriously damage Cle Elum's downtown, which the city has invested millions of dollars to reinvigorate. The retail center is in direct conflict with the city's comprehensive plan which states that the Bullfrog Flats Master Plan...."is intended to elevate the DTC (downtown core) as the primary retail and activity nexus for Cle Elum". Current rules for the Bullfrog Flats property prohibit a retail center on the property.

- Provides no significant benefits to city or UKC residents, but creates serious and significant impacts on roads, police, fire, schools, emergency services, hospitals and other public services that can't be (or won't be) fully mitigated by the developer, and,

- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for. Any such increase in taxes will effectively translate to a subsidy for a private business,

- Denial of 47 Degrees North will not take away or reduce underlying property rights. It will simply require Sun Communities to comply with city's current rules, regulations and comprehensive plan for the property. The original underlying zoning approval and development agreement already allows development of this site, just not as a private resort/manufactured home community/retail center.

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Re: 47 Degrees North Major Amendment proposal

I am writing to inform the city of my very strong opposition to the Sun Communities 47° North proposal for the Bullfrog flats property. The proposed manufactured home / RV community:

- Is in clear violation of the vision for the property adopted by the city and presented to the public as a condition for annexing Bullfrog Flats into the city. It's not in character with the City of Cle Elum and does not comply with fundamental requirements of the city's comprehensive plan, the development agreement, or zoning for the property.

- Instead of traditional neighborhoods that were planned to be connected to and a natural extension of the city, supporting the rest of the city, 47 Degrees North would create a private for-profit community and tourist resort with gates, private roads and utilities which will be separated from the rest of the city. It will create a private city within a city, forever.

- Fiscal studies of 47 Degrees North show that it will not create sufficient tax revenue to cover the city's cost to serve it. Unless the developer agrees to financially cover the substantial deficits, forever, existing city taxpayers will be required to subsidize Sun's development and taxes will go up.

- Sun's 47 Degrees North will be in its entirety a private business not a natural neighborhood (no lots sold, all spots leased), wholly owned by a massive out-of-state publicly traded corporation who's fiduciary duty is to its shareholders, not city taxpayers. Any subsidies of the project would be a gift of public funds to a private entity.

- Is not housing as contemplated for the Bullfrog UGA. It will displace half of the actual housing planned for the area and replace it with a private park designed as a transient playground.

- Will be the largest manufactured home/RV park on the West Coast and will double the population of Cle Elum. Parks of this magnitude have no place in a town as small as Cle Elum. Wrong Place Wrong Size.

Re: 47 Degrees North Major Amendment Proposal

I am writing to provide the city with my very strong concerns about the Sun Communities 47°N proposal for the Bullfrog Flats property. The proposed manufactured home/RV community:

- Is not in character with the City of Cle Elum or the upper Kittitas Valley (a fundamental requirement of the current zoning for the property),
- Would create a new and separate private tourist resort instead of the natural extension of city neighborhoods originally envisioned by city zoning and current approvals,
- Is in its entirety a private business not a neighborhood (no lots will be created or sold, all spots will be leased, and the project will be private), wholly owned by a large out-of-state publicly traded corporation whose fiduciary duty is to its shareholders,
- Provides no significant benefits to upper valley residents and tax payers,
- Will create serious and significant impacts on roads, police, fire, schools, emergency services, hospitals, and other public services that can't (or won't) be fully mitigated by the developer, and therefore,
- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for, essentially a subsidy for a private business,
- Denial of the Sun Communities proposal would not take away or reduce underlying property rights. The original underlying zoning approval would still allow development of this site, just not as a private resort/manufactured home community.

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

[EXTERNAL EMAIL] DO NOT CLICK links or attachments unless you recognize the sender and know the content is safe.

I am a property owner and resident outside of city limits - 3600 Suncadia Trl, Unit 5062, Cle Elum, WA

I am writing to let you know of my very strong concerns about the proposed changes to the existing Bullfrog Flats (2001?) approved plan. The Sun Communities development with manufactured homes and an RV park is not in any way close to what was approved when Trend West (Suncadia) planned their development. It is not in keeping with the character of the upper county nor does it jibe with the current city zoning for the property.

The fact that the lots will not be sold provides no real benefit to upper county residents and tax base, but in fact will become a detriment as it impacts our public service -- schools, fire services, police and emergency services -- none of which Sun Communities plans to address. They will foist these problems on current property OWNERS and the wider based community - not just Cle Elum, but Roslyn and Ronald.

The RV park proposal looks to become a nightmare - please project even 25% of the proposed 600 RV's clogging up our already jammed Bullfrog Road and I-90 corridor. The gridlock on weekends is already horrendous --- add another 125 to 200 land yachts every weekend and then try to deal with that disaster.

The original zoning approval should remain in place as it will still allow for development of the site, but in a manner that aligns with what really should be a long term development and comprehensive plan for the entire upper county.

I urge you to deny this proposed amendment and retain the current approved land use for the property.

Subject: IS THE COUNCIL CORRUPT OR JUST INCOMPETENT?

To whom it may concern: (YOU)

It has become clear how much is wrong with the 47 Degrees North proposal. You no doubt have heard from hundreds of people the many reasons why this is detrimental and absolutely wrong for our area.

What on earth are you being paid for?? Why is the City Council breaking the ordinances of the city by allowing the models to remain and continuing without a business license? It is a clear violation of the law. It is right there in black and white! Is there corruption within the council or are you just too lazy to get the job done that you are elected to do?

Additionally, do you want this to be your legacy as ELECTED servants of this community? What you are allowing will absolutely change the character and safety of Cle Elum and surrounding areas permanently, and not for the better.

We urge you to step back and reconsider the damage you are promoting and instead, work for the interest of the people of this community.

RE: 47 Degrees North proposed Bullfrog UGA Master Site Plan, Development Agreement, and Major Amendment Proposal

To: City of Cle Elum Mayor, City Council members, and Planning Department

We cannot sit idly by as I observe the blatant disregard for the well-being and wishes of Cle Elum's, Roslyn's and Ronald's communities by the proposed 47 Degrees North project. This proposal is so one-sided that it steals money and resources from Cle Elum, Roslyn, Ronald, and the other surrounding communities. The near doubling of population will have a huge impact on public services in our communities throughout the upper county. Basic infrastructure needs include more police, fire, medical, hospital and garbage services; all of which the developer proposes nothing. Our school system will be overwhelmed at all levels. And it does not take a rocket scientist to imagine the monumental impact on our roads and traffic issues that already plague the area.

As currently proposed, the City's own commissioned fiscal study shows that over time the taxes collected from the 47 Degrees North project will be far less than what would have been collected from the current approved traditional neighborhoods. Collected tax revenue would not be nearly enough to offset either the City's increased cost for ongoing services (Police, Fire, Parks, Public Works) or the increased costs for schools, emergency services and other public services. It is not appropriate for the City to rely upon or impose new taxes or fees to balance the budget or seek to change levels of public services to meet available revenues.[1]

The City needs to carefully consider the pros and cons of turning over a large part of its Urban Growth Area, with a future population equal to the size of the existing City, to a large out of state corporate entity whose interests will surely be different than the City's interests over time; it's about money and profits, nothing else, period.

We request that the City deny the proposed major amendment and retain the existing approval.[2]

---

[1] Draft SEIS, Appendix K, Page 45, ECONorthwest Memo 9/9/20: to meet shortfalls..."*....Consistent with typical municipal budgeting practices, the city could impose new taxes or fees to balance its budget or seek to change levels of public services to meet available revenues, or a combination of both approaches.....*"

[2] The original master plan approved by Cle Elum in 2002 agreed to the construction of 1,334 dwelling units, including 810 single family units and 524 multi-family units, a 75-acre business park and 7.5 acres for the construction of 50 affordable housing units

Should the City decide to move forward with this project, totally ignoring the wishes and concerns of most of the residents of upper county, then they should put conditions on the the project so that there is no financial impact to upper county residents; including but not limited to, no new taxes or fees that would effectively subsidize this private business venture. The 47 Degrees North project must be held accountable for all City and County financial impacts and funding shortfalls that will most likely occur with emergency services, schools, waste management, and transportation. It is inevitable that this business venture will want to extort as much as it can from the City of Cle Elum and the surrounding communities.

Let us reiterate that 47 Degrees North's proposed manufactured home and RV community clearly is not what was sold the public as a condition for annexing the Bullfrog Flats into the City and it does not comply with the established requirements of the City's comprehensive plan, development agreement, or zoning for the property. The development will not create sufficient tax revenue to cover the City's cost to serve it and we do not think it's right for our tax dollars to be used to subsidize this commercial business venture. Lastly, the overwhelming traffic congestion it will create will only foster resentment as upper county residents will be forced to pay more in taxes to fix that which should have been paid for by the developer; effectively providing a subsidy for a private business venture.

For all the reasons stated above, we want the City to deny the proposed major amendment and retain the current approved land use for the property.

Respectfully,

Re: **47 Degrees North Major Amendment Proposal**

I am writing to inform the city of my very strong opposition to the Sun Communities 47 Degrees North proposal for the Bullfrog flats property. The proposed manufactured home/RV community will result in negative impacts:

- Traffic gridlock with high volume of transient visitors in large recreational vehicles
- Decreased level of service for emergency medical services
- Decreased level of service for police protection
- Decreased level of service for fire protection
- Increased tax burden on existing property owners to pay for aging infrastructure (water, sewer, power, roads)
- Increased 2nd home ownership within a private resort adversely impacting many throughout the community
- Adverse impact to downtown core businesses as resort environment will drive dollars to remain at the resort
- Potential to increase jobs yet does little to offer adequate affordable housing options in relationship to amount of workers necessary to support multiple resorts on the area
- Potential to require additional city resources to manage and address concerns by a high volume of transient visitors
- High volume of short term rentals (STRs) tax revenue by law are applied to tourism rather than infrastructure upgrades
- 90% of profits will be, by law, sent out of our community to Wall Street investors

For these reasons, I implore the City to DENY this proposed major amendment and retain the current approved land use for the property.

I am writing to inform the city of my very strong **opposition** to the Sun Communities 47° North proposal for the Bullfrog flats property.

I'm not against building homes on this property, but the proposed manufactured home / RV community is in violation of the vision for the property adopted by the city and presented to the public as a condition for annexing Bullfrog Flats into the city. It's not in character with the City of Cle Elum and does not comply with fundamental requirements of the city's comprehensive plan, the development agreement, or zoning for the property.

Fiscal studies of 47 Degrees North show that it will not create sufficient tax revenue to cover the city's cost to serve it. Unless the developer agrees to financially cover the substantial deficits, forever, existing city taxpayers will be required to subsidize Sun's development and taxes will go up.

Sun's 47 Degrees North will be in its entirety a private business not a natural neighborhood (no lots sold, all spots leased), wholly owned by a massive out-of-state publicly traded corporation whose fiduciary duty is to its shareholders, not city taxpayers. Any subsidies of the project would be a gift of public funds to a private entity.

Sun has eliminated the industrial park component of the approved plan and is proposing a major new retail center to the project which would compete with existing city businesses and will seriously damage Cle Elum's downtown, which the city has invested millions of dollars to reinvigorate. The retail center is in direct conflict with the city's comprehensive plan which states that the Bullfrog Flats Master Plan…."is intended to elevate the DTC (downtown core) as the primary retail and activity nexus for Cle Elum". Current rules for the Bullfrog Flats property prohibit a retail center on the property. Why would the Mayor and City Council even consider hurting businesses downtown? This doesn't make any sense.

The proposed manufactured home / RV community:

- Is not housing as contemplated for the Bullfrog UGA. It will displace half of the actual housing planned for the area and replace it with a private park designed as a transient playground.
- Will be the largest manufactured home/RV park on the West Coast and will double the population of Cle Elum. Parks of this magnitude have no place in a town as small as Cle Elum, nor Roslyn, Ronald, and the beautiful areas beyond.
- Provides no significant benefits to city or UKC residents, but creates serious and significant impacts on roads, police, fire, schools, emergency services, hospitals and other public services that can't be (or won't be) fully mitigated by the developer, and,
- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for. Any such increase in taxes will effectively translate to a subsidy for a private business.

Denial of 47 Degrees North will not take away or reduce underlying property rights. It will simply require Sun Communities to comply with city's current rules, regulations and comprehensive plan for the property. The original underlying zoning approval and development agreement already allows development of this site, just not as a private resort/manufactured home community/retail center.

It's difficult to understand how this project is even being considered for this property. Has Sun Communities made personal promises to Mayor McGowan? Any council members? Everything I read seems to be pointing to this. Why the silence from the Mayor and Council members? Why are there no constructive discussions between elected officials and residents? Engaging with your community would go a long way.

For the reasons above, and others, I ask the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Respectfully,
Dusty Cavaliere

Dear City of Cle Elum - Mayor, City Council members, Planning Department, and all residents of Cle Elum, Ronald and Roslyn:

Thank you for the opportunity to provide my comments on the Sun Communities 47 Degrees North Major Amendment, SEPA Addendum/SEIS and Draft Development Agreement. I am adamantly opposed to this project due to the impact the traffic would burden our already taxed road systems and the significant increase in population to the city and localities.

First, the SEPA Traffic analysis has a number of flaws which result in significantly underestimating the congestion on the city and county road system with the addition of the 47 Degrees North project.

The 47°N traffic study doesn't include the full buildout traffic of major developments already approved, vested and in the pipeline (Suncadia, City Heights and Ronald PUD/Hotel). Because Sun assumed such a short buildout period for 47 Degrees North (5 years), the project is getting its traffic in the road system before other approved major developments are completed. 47 Degrees North is essentially proposing to use up road capacity that is already allocated to others. Full buildout of approved, but not yet completed, developments cannot be ignored. They have legal vested rights to complete their projects and add their traffic. 47°N traffic will be added to that, not replace it.

The significance of this error is that if all the traffic from approved developments is included we are likely to find that the city and UKC road systems are already significantly beyond their max capacity and there is little or no capacity for 47 Degrees North without massive investments in infrastructure that will take many years to complete. This is not currently being considered for the project as is.

Additionally, and as living off of 903 being of GREAT concern, the Addendum traffic study ignores peak summer weekends (Friday evening through Sunday evening).

Roughly half of 47 Degrees North is an RV resort, a business that will likely operate at maximum capacity on summer weekends. Sun's business plan will clearly be to maximize summer weekend occupancy, but the traffic report uses weekday evenings as the basis for mitigation.

This is a flawed assumption for assessing impacts. On summer weekends our UKC streets are packed and on weekday evenings the streets are largely empty. Irrespective of any comp plan policy, best practices for traffic studies require that mitigations be applied to the impacts of a project whenever that might be. Sun should be required to mitigate its full impacts, including but not limited Summer weekends.

It does not appear that Large RV's and travel trailers (oversize vehicles) are fully accounted for in the traffic analysis, they were counted as if they were trips from a passenger car. Standard traffic analysis protocol is that oversize vehicles count as more than one passenger vehicle trip because they occupy more space (and time) on the roadway. Given that Sun Community's RV resort will introduce a very large number of oversize vehicles, improperly accounting for them significantly understates the real impacts from the project.

The traffic analysis didn't study the need for road widening on Bullfrog Rd or SR 903 (i.e. a corridor study). The study only looked at intersections. With the large amount of traffic added by 47 Degrees North onto Bullfrog Rd and SR 903, together with the large amount of traffic already drawn to these roads by the school campus, Suncadia, future City Heights access, transfer station etc., it is essential to analyze whether these roadway corridors will be over capacity and will need to be widened or lanes added. The fact that this wasn't studied is a major oversight.

There is no information on the traffic analysis specifically relating to Summer traffic, which we all know can be treacherous. Not taking into account the increased weekend traffic is a major flaw in this proposal.

There is no analysis of cut through or bypass traffic when the freeway is in gridlock condition. We who live here know that on peak summer weekends significant bypass traffic occurs on Cle Elum 1st and 2nd Streets, SR 903 and Bullfrog Rd. How will the proposed 47 Degrees North collector arterial (connecting SR 903 to Bullfrog Rd.) function during bypass events and how will this affect queues and backups at exit 80?

Vitally important to the community is the lack of access for emergency responders in peak Summer traffic congestion. The studies didn't analyze the impact of major congestion on the ability of our emergency responders and law enforcement to respond to accidents and emergencies, nor the impact of congestion on wildfire evacuation. We who live here know that emergency vehicle access is currently a major issue and it can only be expected to worsen. The fact that this wasn't studied is a major oversight. The city committed to looking at emergency evacuation during scoping.

In conclusion, the 47 Degree North traffic analysis significantly understates congestion on the city and UKC road network both with and without 47 Degrees North which leads to false or incomplete information. No further action should be taken until the Addendum traffic analysis is corrected. Additionally, the City should take the step of cancelling the proposal based on laws of concurrency.

Concurrency is a state law (WAC 365-196-840) which says if roadway systems are congested and failing from existing traffic and/or developments already approved and vested, a city can deny new development until enough capacity is added. It is a significant tool small cities can use to manage growth and leverage greater developer participation in road improvements. Under this Development Agreement as written the city would waive its rights under concurrency, taking away that tool and allowing Sun Communities to add more traffic to roads already over capacity.

The road system improvements that would be needed to add capacity for 47 Degrees North are cost-prohibitive without additional investment from Sun Communities. The current traffic study shows more than 10 intersections in the city and Upper Kittitas County that need to be upgraded to accommodate this development.

As is, Sun would have no responsibility to make any offsite road improvements anywhere. All responsibility would be passed to the city and UKC taxpayers. This is unacceptable.

The city knows well how grant funding cycles operate, they are lengthy and uncertain and never yield as much as is needed. And as the years go on the cost of road improvements will continue to rise (they always do) but with this agreement Sun's responsibility won't rise. It will be capped and again, costs passed to taxpayers. This is unacceptable.

The agreement should include a "concurrency plan" which restricts the pace of development to actual available capacity in the road system. Mitigation occurs when a project is built, not when a fee is paid. The developer should not be allowed to pay a small fee and add traffic to already failing roads.

Section 3 of the Development Agreement contains a clause that appears to exempt 47 Degrees North from WA state concurrency law. This clause should be removed, no development should be allowed to add traffic to already failing road systems.

Additionally, in the current Development Agreement, the city would be accepting a fee for improvements to County and WSDOT facilities (Bullfrog Rd and I-90 ramps). Without an Interlocal Agreement the city cannot accept payments or responsibility for improving County and/or WSDOT facilities. Even if the city could accept these fees, it is not in the city's interest to take responsibility for these facilities. It falls to the developer taking responsibility to negotiate mitigation with the county and WSDOT and any agreements reached with them should be incorporated into this development agreement.

I respectfully request that the city halt this process and require the traffic studies be corrected for the reasons stated above. Also, the city should review it's options under concurrency law and not allowing traffic and risk onto the city and UKC taxpayers.

Thank you again for the opportunity to submit these comments. My hope is that the City of Cle Elum and Planning Department take specific consideration to the Summer traffic congestion and how it will be detrimentally impact if the 47 Degrees North project is allowed to move forward without significant investment and planning to our existing road systems.

Re: 47 Degrees North Major Amendment proposal

I am writing to inform the city of my strong opposition to the Sun Communities 47° North (47N) proposal for the Bullfrog flats property. The proposed manufactured home / RV community:

We do agree that housing for Cle Elum community is a need, we do not believe 47N is the solution. With 50 Affordable units and 707 Market-Rate units the local community will likely be priced out. The product type and purchase structure/cost is not going to meet the needs of the local Cle Elum workforce. People that work in Cle Elum need places where they can afford to live. 47N will create more service needs in the community but it's not going to be economically suitable housing for the additional workforce. It will drive an even bigger housing shortage.

In addition to the general real estate criticism above, we have a concern that 47N will not generate tax revenue to fund its municipal-support costs. We believe the costs would be subsidized by existing taxpayers. The existing public services would be overburdened. The school system would have an influx of new students that the existing infrastructure, teachers, and schools themselves, could not support. For a small city the impact on traffic would be overwhelming to existing residents. The public expenditure to address these concerns would result in tax increases for existing residents. Locals would not be receiving a benefit from the project, just their share of the added cost to maintain adequate infrastructure.

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Respectfully,

Signature

As a property owner in upper county (241 Chandler Road, Cle Elum), we've been following the 47Degrees development closely.

It's concerning that a development of the scale of 47Degrees would be allowed to happen.

There are many factors in opposition to a resort of this type and size - from wildlife corridor issues, fire hazard and evacuation routes, infrastructure impact (fire dept, medical, school, roads, water). And most importantly, 47Degrees does nothing to improve the low/middle housing issues in upper county.

This type of development is not cohesive with the area that it borders, and will affect the livability along with the natural heritage of our area for generations to come.

We recognize that there are legal ramifications that stand in the way of rejecting a development from a REIT like SunCommunities, but the whole point of your leadership and planning power is to represent the local population, who clearly does not want this to happen, and to bravely stand up for what is right for the future of our area.

Thank you

Ed and Sarah Kuerner

Re: 47 Degrees North

The Facts
On May 5, 2021, the City of Cle Elum issued Sun Communities a Temporary Use Authorization in connection with building permits relating to five (5) model manufactured homes to be used for public display. The location of the site is 4240 Bullfrog Road, Cle Elum WA.

That Temporary Use Authorization specifically states:

1) This temporary use shall be limited for a period of not to exceed two years from the date of issuance of the first building permit, provided that the authorization may be extended for one additional year, at the City's sole discretion.
2) The Project Sponsor shall apply, receive, and maintain in good standing a City Business License.
3) Prior to the expiration of this use authorization, the model homes, the temporary garage type structure, and all signage shall be removed, and the Project Sponsor shall return the site to its previous condition.

Sun Communities is in direct violation of the Temporary Use Authorization due to the following:

1) It has failed to remove the units or before May 5, 2023, as required; and
2) No business license was applied for, received or maintained

Relief Requested
The City of Cle Elum should require immediate removal of the structures and not elect to extend the non-conforming so-called Temporary Use Authorization.

General Comments
The Cle Elum Municipal Code does not contemplate such a thing as a Temporary Use Authorization. The code does allow for Special Use Permits and Conditional Use Permits, but each of these have specific qualifiers and conditions of approval. The Zoning associated with the location of these model homes is that of General Commercial. That zone contemplates commerce and general uses that serve the community. The trailers are simply staged in an attempt to fool the public into believing that the 47 Degrees North Development has been approved, which it has not.

On the City's website, under the Recent Planning News page, the City has been actively advertising for the model homes for Sun Communities. Statements such as these indicate to the public that the 47 Degrees North development has been approved and is a done deal, which it is not.

Did you know? Sun Communities is currently displaying models of the manufactured homes proposed for the 47 Degrees North project at 4240 Bullfrog Road near the School District Administration Building!

The community has voiced its opposition to the 47 Degrees North development in a loud and clear manner. Following the public comment period, when the tally is over, the City will likely receive close to 1,000 letters of condemnation associated with the project.

I understand that there is a process in play as it relates to the Sun Communities application. However, the City should not be making up new rules favoring the applicant and thumbing its nose at the community in the process.

You have my request and my comments. Please reply to this correspondence identifying what the City's intentions are.

Dear Council Members,

I am writing to you to express my concerns over the 47 Deegrees North proposed development.

Those of us who been in the area for a while, (28 years at Pineloch Sun, part time) have seen the huge impact growth has had on our community over the last 20 years.

We are in need of infrastructure such as, school, grocery store, garbage services.

Our recreational areas are crowded to the point where it isn't worth trying to go to these places on the weekends. While I cannot blame anyone who wants to experience the beauty of this area, I cannot help but notice our beautiful recreation areas are left with garbage, empty beer can/bottles and sadly, human feces, toilet paper, dirty diapers, feminine hygiene products and garbage.

In light of what we have seen in many other places around our state and country, I think it makes sense to pause and address our existing problems before we add to them. If we recklessly develop this area we will loose what is unique to it.

Do we need more police? Do we need more park rangers? How do we address the growing garbage scattered throughout or parks? How will we deal with additional traffic, especially in the case of an evacuation? How do we insure our grocery store is well stocked for locals? What is the plan for our school system moving forward?

These decisions are CRITICAL to the future of this area.

As a taxpayer on two properties in the area I would feel much more comfortable addressing these issues first.

PAUSE on this development!

Thanks

Re: 47 Degrees North Major Amendment proposal

I am writing to inform the city of my very strong opposition to the Sun Communities 47° North proposal for the Bullfrog flats property. The proposed manufactured home / RV community:

- Is in clear violation of the vision for the property adopted by the city and presented to the public as a condition for annexing Bullfrog Flats into the city. It's not in character with the City of Cle Elum and does not comply with fundamental requirements of the city's comprehensive plan, the development agreement, or zoning for the property.
- Instead of traditional neighborhoods that were planned to be connected to and a natural extension of the city, supporting the rest of the city, 47 Degrees North would create a private for-profit community and tourist resort with gates, private roads and utilities which will be separated from the rest of the city. It will create a private city within a city, forever.
- Fiscal studies of 47 Degrees North show that it will not create sufficient tax revenue to cover the city's cost to serve it. Unless the developer agrees to financially cover the substantial deficits, forever, existing city taxpayers will be required to subsidize Sun's development and taxes will go up.
- Sun's 47 Degrees North will be in its entirety a private business not a natural neighborhood (no lots sold, all spots leased), wholly owned by a massive out-of-state publicly traded corporation who's fiduciary duty is to its shareholders, not city taxpayers. Any subsidies of the project would be a gift of public funds to a private entity.
- Is not housing as contemplated for the Bullfrog UGA. It will displace half of the actual housing planned for the area and replace it with a private park designed as a transient playground.
- Will be the largest manufactured home/RV park on the West Coast and will double the population of Cle Elum. Parks of this magnitude have no place in a town as small as Cle Elum. Wrong Place Wrong Size.
- Sun has eliminated the industrial park component of the approved plan and is proposing a major new retail center to the project which would compete with existing city businesses and will seriously damage Cle Elum's downtown, which the city has invested millions of dollars to reinvigorate. The retail center is in direct conflict with the city's comprehensive plan which states that the Bullfrog Flats Master Plan...."is intended to elevate the DTC (downtown core) as the primary retail and activity nexus for Cle Elum". Current rules for the Bullfrog Flats property prohibit a retail center on the property.
- Provides no significant benefits to city or UKC residents, but creates serious and significant impacts on roads, police, fire, schools, emergency services, hospitals and other public services that can't be (or won't be) fully mitigated by the developer, and,
- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for. Any such increase in taxes will effectively translate to a subsidy for a private business,
- Denial of 47 Degrees North will not take away or reduce underlying property rights. It will simply require Sun Communities to comply with city's current rules, regulations and comprehensive plan for the property. The original underlying zoning approval and development agreement already allows development of this site, just not as a private resort/manufactured home community/retail center.

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Respectfully,

Eliza Stephenson

City of Cle Elum – Mayor, City Council members, Planning Department,

Re: 47 Degrees North Major Amendment proposal

We are writing to provide the city with my very strong concerns about the Sun Communities 47° North proposal for the Bullfrog flats property. **We are not against development of city neighborhoods, we built a new house directly across from the City Heights development.**

The proposed manufactured home / RV community:

– is not in character with the City of Ce Elum or the upper valley (a fundamental requirement of the current zoning for the property),
– would create a new and separate private tourist resort and not a natural extension of city neighborhoods as originally envisioned/required by city zoning and current approvals,
– is in its entirety a private business not a neighborhood (no lots will be created or sold, all spots will be leased, and the project will be private), wholly owned by a large out-of-state publicly traded corporation who's fiduciary duty is to its shareholders,

– provides no significant benefits to upper valley residents and tax payers, but

– will create serious and significant impacts on roads, police, fire, schools, emergency services, hospitals and other public services that can't (or won't) be fully mitigated by the developer, and therefore,

– will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for, essentially a subsidy for a private business,

– Denial of the Sun Communities proposal would not take away or reduce underlying property rights. The original underlying zoning approval would still allow development of this site, just not as a private resort/manufactured home community.

For all of these reasons, and others, we implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

May 1, 2023

Dear City Managers and Planners-

I have been a land and home owner in Upper County since 1989. I pay my taxes and contribute where I can.

It is my belief that approving the 47 Degrees North project is a huge mistake. Having so many rental properties compressed in a small area is not good for the community of UKC.

As a Realtor and homeowner, I have seen that owners are generally much more concerned about their communities than tenants.

A community of 100's of mobile homes is likely to put a strain on the first responders, while contributing minimal tax revenue to the area.

Please reconsider the many negative ways this project will affect the area.

Who does it really benefit and who does it really cost?

Re: 47 Degrees North Major Amendment Proposal

I am writing to inform the City of my strong opposition to The Sun Communities 47° North Proposal for the Bullfrog Flats property. The proposed Manufactured Home / RV Community.

What is the advantage of this to Us citizens? Just how on earth is this going to benefit We the taxpayers? Our town is Not the place for the largest trailer park in the whole State! Such a beautiful 1,100 acres of trees and Wildlife will be destroyed forever!

I find it offensive that something this HUGE, that affects everyone in the Upper County, does not have the right to a Vote on the future of Our town. Cle Elum belongs to ALL of Us, not just a handful of City Council members who may, or may not share our values.

I have talked to many citizens who have not even heard

about this "47° North Proposal". There is something very wrong with selling out our souls to these multi billion dollar international developers. They make fast money, making their shareholders richer, and leave us to pay for it in higher taxes, lower property values, and the stigma of being the largest trailer park in the State!

In addition to the enormous infrastructure issues we will inevitably have as taxpayers, we can count on higher crime rates, huge drug problems, etc. Our Post Offices, Dentists, Health facilites, Schools, Grocery Store, and shopping in general will be completly overwhelmed. Especially our Police Department!

It is paramount that our city council members keep in mind that the overwhelming majority of citizens in the upper county are counting on their NO vote, for the good of our beautiful "City of Trees" and for those of us that call Cle Elum our home.

Thank you for your consideration,

Sincerely,

Ellen A. Sutton

Re: 47 Degrees North Major Amendment proposal

I am writing to inform the city of my very strong opposition to the Sun Communities 47° North proposal for the Bullfrog flats property. The request to modify the development agreement should not be considered as it is vastly different than the previously approved development agreement. Sun Communities needs to start over if they want to develop the proposed 47° North community on the Bullfrog Flats property. Any consideration to approve the request for modification would be a gross misjudgment of the City, opening the City up to a costly legal fight. None of which is in the best interest of the taxpayers. Simply follow the code and deny the modification.

- These proposed changes are a clear violation of the vision for the property adopted by the city and presented to the public as a condition for annexing Bullfrog Flats into the city. It's not in character with the City of Cle Elum and does not comply with fundamental requirements of the city's comprehensive plan, the development agreement, or zoning for the property.

- Fiscal studies of 47 Degrees North show that it will not create sufficient tax revenue to cover the city's cost to serve it. Unless the developer agrees to financially cover the substantial deficits, forever, existing city taxpayers will be required to subsidize Sun's development and taxes will go up.

- Is not housing as contemplated for the Bullfrog UGA. It will displace half of the actual housing planned for the area and replace it with a private park designed as a transient playground.

- Sun has eliminated the industrial park component of the approved plan and is proposing a major new retail center. This alone should be grounds for a denial. Any development agreement for retail needs to that specific component studied. You can't just swap one use for another and call it a minor change. Further, current rules for the Bullfrog Flats property prohibit a retail center on the property.

- Denial of 47 Degrees North will not take away or reduce underlying property rights. It will simply require Sun Communities to comply with city's current rules, regulations and comprehensive plan for the property. The original underlying zoning approval and development agreement already allows development of this site, just not as a private resort/manufactured home community/retail center. If they want a private resort/manufactured home community/retail center, then they need to follow the City's process to apply for that development approval – from scratch.

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Respectfully,

Signature

Re: 47 Degrees North Major Amendment proposal

I am writing to inform the city of my very strong opposition to the Sun Communities 47° North proposal for the Bullfrog flats property. The proposed manufactured home / RV community:

- Is in clear violation of the vision for the property adopted by the city and presented to the public as a condition for annexing Bullfrog Flats into the city. It's not in character with the City of Cle Elum and does not comply with fundamental requirements of the city's comprehensive plan, the development agreement, or zoning for the property.
- Instead of traditional neighborhoods that were planned to be connected to and a natural extension of the city, supporting the rest of the city, 47 Degrees North would create a private for-profit community and tourist resort with gates, private roads and utilities which will be separated from the rest of the city. It will create a private city within a city, forever.
- Fiscal studies of 47 Degrees North show that it will not create sufficient tax revenue to cover the city's cost to serve it. Unless the developer agrees to financially cover the substantial deficits, forever, existing city taxpayers will be required to subsidize Sun's development and taxes will go up.
- Sun's 47 Degrees North will be in its entirety a private business not a natural neighborhood (no lots sold, all spots leased), wholly owned by a massive out-of-state publicly traded corporation who's fiduciary duty is to its shareholders, not city taxpayers. Any subsidies of the project would be a gift of public funds to a private entity.
- Is not housing as contemplated for the Bullfrog UGA. It will displace half of the actual housing planned for the area and replace it with a private park designed as a transient playground.
- Will be the largest manufactured home/RV park on the West Coast and will double the population of Cle Elum. Parks of this magnitude have no place in a town as small as Cle Elum. Wrong Place Wrong Size.
- Sun has eliminated the industrial park component of the approved plan and is proposing a major new retail center to the project which would compete with existing city businesses and will seriously damage Cle Elum's downtown, which the city has invested millions of dollars to reinvigorate. The retail center is in direct conflict with the city's comprehensive plan which states that the Bullfrog Flats Master Plan…"is intended to elevate the DTC (downtown core) as the primary retail and activity nexus for Cle Elum". Current rules for the Bullfrog Flats property prohibit a retail center on the property.
- Provides no significant benefits to city or UKC residents, but creates serious and significant impacts on roads, police, fire, schools, emergency services, hospitals and other public services that can't be (or won't be) fully mitigated by the developer, and,
- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for. Any such increase in taxes will effectively translate to a subsidy for a private business.
- Denial of 47 Degrees North will not take away or reduce underlying property rights. It will simply require Sun Communities to comply with city's current rules, regulations and comprehensive plan for the property. The original underlying zoning approval and development agreement already allows development of this site, just not as a private resort/manufactured home community/retail center.

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Respectfully,

EWadeikis

To The City of Cle Elum
Attn. Mr. Mayor and members of the City Council

We are the Christensons, Eric and Susan living at 648 Masterson Rd. Cle Elum.
The change to the original development plan of Bullfrog Flats is not in the best interest for our home town. The type of homes do not support the city or county with the proper tax base and will cause property owners taxes to increase to make up the short fall. We are against the Sun Community takeover.
We Respectfully request that The City of Cle Elum reject the new proposal of Sun Community, and stick with the original 2002 approval, single family dwellings on city parcels for slow sustainable growth. Maintaining a strong and stable home town to live in.

Respectfully,

Eric Christenson

To the Mayor and City Council

My wife and I have attended the last 4 council meetings and confirmed the fact that the "47 Degrees North Development" is not in the best interest of our City and Upper County. We have not heard 1 citizen speak in a positive way about the proposed development. We have noted the "outrage" that is displayed due to the Mayor and City Council's lack of comment and their lack of admission to the fact they are public servants and are required to meet the needs and requests of the community they serve. We have heard citizens point out the lack of compliance in the proposed development to City Codes and Ordinances which points to incompetence. The point of Tax increases due to this development is intolerable, and will impact all property owners in very negative way. The fact of Crime in or area is terrible and very hard to avoid, but why invite the possiblity of more with this type of development.

With respect we request the Mayor and City Council deny the "47 Degrees North Devlopment Group" any consideration to their type of change to our City and County. The original approved plan with homes on city parcils with property taxes and "home owners" will better serve the citizens and grow our City and County in a more sustainable fashion.

Re: 47 Degrees North Major Amendment proposal

I am writing to inform the city of my very strong opposition to the Sun Communities 47° North proposal for the Bullfrog flats property. The proposed manufactured home / RV community:

STOP Negative Impact of 47° North STOP

- STOP Decreased level of service for EMS
- STOP Decreased level of service for fire protection
- STOP Decrease level of service for police protection
- STOP Increased traffic burden on 2-lane roads
- STOP Increased tax burden to pay for aging infrastructure (water, sewer, power, roads, EMS, schools, police,)
- STOP Doubling the population of Cle Elum within 6 years
- STOP Profits sent out of our community to Wallstreet investors
- STOP Largest private trailer park community west of the Mississippi
- STOP Wildfire risk due to limited ingress & egress: **Paradise Fire 2.0**

For these reasons, and so many others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Re: 47 Degrees North Major Amendment Proposal

I am writing to provide the city with my very strong concerns about the Sun Communities 47°N proposal for the Bullfrog Flats property. The proposed manufactured home/RV community:

- Is not in character with the City of Cle Elum or the upper Kittitas Valley (a fundamental requirement of the current zoning for the property),
- Would create a new and separate private tourist resort instead of the natural extension of city neighborhoods originally envisioned by city zoning and current approvals,
- Is in its entirety a private business not a neighborhood (no lots will be created or sold, all spots will be leased, and the project will be private), wholly owned by a large out-of-state publicly traded corporation whose fiduciary duty is to its shareholders,
- Provides no significant benefits to upper valley residents and tax payers,
- Will create serious and significant impacts on roads, police, fire, schools, emergency services, hospitals, and other public services that can't (or won't) be fully mitigated by the developer, and therefore,
- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for, essentially a subsidy for a private business,
- Denial of the Sun Communities proposal would not take away or reduce underlying property rights. The original underlying zoning approval would still allow development of this site, just not as a private resort/manufactured home community.

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Re: 47 Degrees North Major Amendment proposal

We are writing to inform the city of our very strong opposition to the Sun Communities 47° North proposal for the Bullfrog flats property.

The proposed manufactured home / RV community:

- Is in clear violation of the vision for the property adopted by the city and presented to the public as a condition for annexing Bullfrog Flats into the city. It's not in character with the City of Cle Elum and does not comply with fundamental requirements of the city's comprehensive plan, the development agreement, or zoning for the property.

- Instead of traditional neighborhoods that were planned to be connected to and a natural extension of the city, supporting the rest of the city, 47 Degrees North would create a private for-profit community and tourist resort with gates, private roads and utilities which will be separated from the rest of the city. It will create a private city within a city, forever. This type of residential development is WRONG on many levels.

- Furthermore, fiscal studies of the 47 Degrees North proposal show that it will not create sufficient tax revenue to cover the city's cost to serve it (WHY should the city of Cle Elum provide services to a private for-profit entity??). Unless the developer agrees to financially cover the substantial deficits, forever, existing city taxpayers will be required to subsidize this development and our taxes will go up. Again, WHY should the taxpayers be on the hook for a PRIVATE FOR-PROFIT enterprise?

- The proposed 47 Degrees North development will be in its entirety a private business not a natural neighborhood (no lots sold, only leased), wholly owned by a massive out-of-state publicly traded corporation who's fiduciary duty is to its shareholders, not city taxpayers or its lease holders. Any subsidies of the project would be a gift of public funds to a private entity. Is this a tax write off for the city?

- This project is not housing as contemplated for the Bullfrog UGA. It will displace half of the actual housing planned for the area and replace it with a private park designed as a transient playground.

Fred & Ginny Becker
40 Snow Ridge Drive
Cle Elum, WA 98922
206-953-0933

- If allowed, this project will be the largest manufactured home/RV park on the West Coast and will double the population of Cle Elum. Parks of this magnitude have no place in a town as small as Cle Elum. Wrong Place Wrong Size, Just Plain Wrong.

- The developer has eliminated the industrial park component of the approved plan and is proposing a major new retail center to the project, which would compete with existing city businesses and will seriously damage Cle Elum's downtown core, which the city has invested millions of dollars to reinvigorate. The retail center is in direct conflict with the city's comprehensive plan which states that the Bullfrog Flats Master Plan...."is intended to elevate the DTC (downtown core) as the primary retail and activity nexus for Cle Elum". Current rules for the Bullfrog Flats property prohibit a retail center on the property.

- Provides no significant benefits to city or Upper Kittitas County residents, but creates serious and significant impacts on roads, police, fire, schools, emergency services, hospitals and other public services that can't be (or won't be) fully mitigated by the developer, and,

- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for. Any such increase in taxes will effectively translate to a subsidy for a private business,

- Denial of 47 Degrees North will not take away or reduce underlying property rights. It will simply require Sun Communities to comply with city's current rules, regulations and comprehensive plan for the property. The original underlying zoning approval and development agreement already allows development of this site, just not as a private resort/manufactured home community/retail center.

- We would add that our potable water supply is already at risk from climate change. Winters are shorter and we cannot assume that snowpack won't get smaller as well. Temperature measurements show the low and high temperatures are increasing.

- Is the city of Cle Elum going to be responsible for doubling the size of the water treatment facilities?? I'm an environmental professional and have worried for many years about what I see as inadequate water treatment across the country. Given the depletion of regional aquifers mainly from industrial farming, water is fast becoming a scarce resource exacerbated by climate change. Clean water is at risk and the "downstream" impacts include potable water supplies, fishing, hunting, agriculture and wildlife.

For these reasons and more, We implore the City of Cle Elum to **DENY** this proposed major amendment and retain the current approved land use for the property.

Respectfully,
Fred & Ginny Becker

Mr Mayor
Cle Elum City Council
Cle Elum Residents and Property Owners
Upper Kittitas County Property Owners

RECEIVED
JUN 28 2023

Re; 47 Degrees North

All Concerned Neighbors,

We have been coming to the Upper Kittitas County for over 40 years, initially as campers, then we bought a homesite in Suncadia in August of 2006. We then built our home and have been very involved ever since. I have represented the Owners at Suncadia for the majority of the last 16 years as the elected Board Member for the Suncadia Residential Owners Association. We too have had issues with development and the lack of follow-through on the part of the developer and even as of today we do not have many of the amenities originally promised. 47 degrees North is just another chance for a developer to make money but not follow through with their promises. We are totally against this project. Leave the approved Master Plan in Place and do not adjust any zoning or give Sun Communities the chance to disappoint everyone. Here are some specific thoughts.

Here are a few of the larger projects that are already approved by Kittitas County and The City of Cle Elum;

- **Suncadia/Mountainstar's master plan originally included 3485 residential units but has been amended to 4550 residential units according to the developer.** Currently there are approximately 1900 privately owned units (Homes, Condos and Vacant Homesites) Within that number there are approximately 1500 completed homes and condos in the resort and currently several hundred vacant lots either completed or under development. There are approximately 500 residences occupied most of the year. Many owners have moved there full time due to the serenity the Upper County and high speed internet. On a busy weekend, there can be over 7000 people visiting or staying in

Suncadia/Tumble Creek. That is an average of about 4 people per residential unit on the average. Using this calculation, in 2023, Suncadia /TC should experience and increase to about 8000 people on a busy weekend. I would add this same increase in population every year.

- City Heights plan is approved for 968 residential units. As the start to build, I believe they will add 100 people per year in the next three years and the numbers will increase after that.
- If The City of Cle Elum approves the Sun Communities Plan, that will bring 627 RV's to Cle Elum. Most of those will tow additional vehicles and if one was to estimate the amount of parking needed to just accommodate the RV's going to shop at Safeway, get a bite at all of the great restaurants and shop the retail outlets, that might be 7.7 miles worth of parking if we lined up all of the RV's coming to town. That does not take into consideration the visits to fuel up their RV's. Safeway's Great Employee Team is already very busy and cannot keep their shelves stocked with the current population. If half of the RV's leave to go elsewhere in Sunday morning, they will clog the Bullfrog Road's single lane for 5.5 hours if they each take 1 minute to exit the park and enter the freeway. Remember the RV's are 40 to 65' for the most part. This may not concern the Council but what if a fire happens to come our way and the call to evacuate is communicated to everyone....No one north of the entrance to the RV park will be able to get to I-90 for many hours and traffic will backup through Ronald and well into Cle Elum.
- If The City of Cle Elum approves the Sun Communities plan, there will be 757 Manufactured Homes Plus Cottages, Yurts and other forms of housing. **If you happened to visit their models, you might have realized they are all built out of state. No Local Labor, No Local Taxes, No Local Jobs and No City Permits to build these units. Please realize that their model mockup does not represent what their neighborhood will look like. There were no garages, carports, parking, yards in the model display. Note that MODULAR HOMES ARE REGULATED BY THE WASHINGTON STATE DEPARTMENT OF LABOR AND INDUSTRIES and NO BUILDING PERMITS WILL BE ISSUED BY THE CITY for the modular homes.** There will be a small fee for the foundation and utility hookup inspection and garage, if any. Modular Homes of this type do not appreciate in value and the homes will reside on leased land. No one will own the land they live on. Lease Costs will rise at Sun Communities choice. If you owned a modular and you had a financial issue and could not pay for either the Modular Home or the Leased Land, they will take it all and resell it to someone else especially since the modular will probably be worth less than you owe. If you read the notes on the internet, they do not have a good reputation and there is talk of a Class Action Suit. The models and marketing pieces clearly show a picturesque, vibrant community with smiling faces and happy kids, but what do these developments look like in 3-7 years ? The glow will have worn off and the condition of many units in a low income development will likely show their wear. The marketing pieces will be forgotten. Has any member of the council investigated or evaluated what an existing Sun Communities development is like in 5 or 10 years old ?
- For the level of impact the 47N development will create, will the City of Cle Elum actually realize any significant revenues to offset the wear and tear on the communities water, traffic and related infrastructure, strain on local social services and public health and safety services, transfer station, public schools etc. *Will the city or any of these services receive sufficient funding to ever offset the impacts of all these developments ?Suncadia/Mountainstar was required to mitigate the Fire Department, Water Treatment Plant, the Sewer Treatment Facility, The Transfer Station and Have it's own recycle facility, Where is Dark Skies in all of this?*
- The last major negative impact I will list here is the impact on the Elk herd. I guess they will be walking on Bullfrog road to get from the river to the mountains. There should be a 300' wide wildlife corridor through this densely populated development or maybe the Government will need to install arrow signs to direct the elk where they should walk?

Based on the current approvals in place, the greater Cle Elum area will double in population in less than 5 years. Do we need more development? What are the real costs?

Let's look at Bullfrog Road...2.7 miles from I-90 to the SR903 roundabout. To make it 4 lanes it might cost $7.2mil per mile plus $2.5mil for a new bridge over the Cle Elum River...$21.940,000 without any improvements on the state interchange. How about SR 903? I guess the existing residents in the Upper Valley will be required to pay for this?

Schools, Roads, Parks, Police, Fire Protection, Social Services...Why are there not Mitigation/Impact Fee requirements already in place so that the services can be supplied for the new homes being built before they arrive? **I have attached a copy of some Mitigation/Impact Fee schedules from King County and The City of Issaquah**. It is amazing that they are increasing their School Impact Fees and there are none here...

47 Degrees does not help those who are climbing the ladder nor is this helping others. It is just a rental scam. If you want homes that can help those climbing the ladder, contact ARCH out of Redmond. They have a great plan to help those in need of assistance while they move forward in life.

If we take just the trailer park they are proposing and review where Cle Elum is currently, look at Chapter 8.44 which disallows all camping in the City without special Cle Elum Governmental approval and it is restated in the Short Term Rental Ordinance #1601. So let's look at the trailer park...661 spaces at let's say an average of $50 per night...**That's $33,050.00 per night** that will go to the Sun Communities Corporation's Pocket....**If they we busy for just one month out of the year, that would total $991,000.00** (For Just One Month) And remember that a tax paying resident of Cle Elum cannot have their friend stay in their RV in their driveway for even one night without special permission...**That's Plain Discrimination under the laws in the State of Washington**.

The 47 Degrees plan is bad for everyone in the Upper Kittitas County area. Please Deny their application. Keep the current Approved Plan in Place for the Bullfrog property. Shut down all future development at least until the mitigation/impact fee requirements are established.

The council has to ask itself, is this the type of development we want or need in Cle Elum ? With the overwhelming burdens 47N will place on the city, its citizens and our Upper County community is the burden and impact of a development of this size be worth the cost. Can the City, School District, Fire and Police services afford to expand services just to support what this growth will create? Do remember that the tax revenues do not start until after the development is built and services are required during the process.

Elections are forthcoming.....

Please make sure the attached supporting documents are included with this letter.
I attached my original letter from September 9th 2001 regarding the prior application.

Thank You!

Mr Mayor
Cle Elum City Council
Cle Elum Residents and Property Owners
Upper Kittitas County Property Owners

Re; 47 Degrees North

All Concerned Neighbors,

We have been coming to the Upper Kittitas County for over 40 years, initially as campers then we bought a homesite in Suncadia in August of 2006. We then built our home and have been very involved ever since. I have represented the Owners at Suncadia for the majority of the last 12 years as the elected Board Member for the Suncadia Residential Owners Association. We too have had issues with development and the lack of follow-through on the part of the developer and even as of today we do not have many of the amenities originally promised. 47 degrees North is just another chance for a developer to make money but not follow through with their promises. We are totally against this project. Leave the approved Master Plan in Place and do not adjust any zoning or give Sun Communities the chance to disappoint everyone. Here are some specific thoughts.

Here are a few of the larger projects that are already approved by Kittitas County and The City of Cle Elum;

- Suncadia/Mountainstar's master plan includes 3485 residential units. Currently there are 1786 privately owned units (Homes, Condos and Vacant Homesites) Within that number there are currently 1330 Homes and Condos which will grow to over 1500 by early 2022. There are approximately 400 residences occupied most of the year. Many owners have moved there full time due to high speed internet. On a busy weekend, there can be over 5000 people visiting or staying in Suncadia/Tumble Creek. That is an average of about 4 people per residential unit on the average. Using this calculation, in 2022, Suncadia /TC should experience and increase to about 5700 people on a busy weekend. I would add this same increase in population every year that the economy remains strong.
- City Heights plan is approved for 968 residential units. As the start to build, I believe they will add 100 people per year in the next three years and the numbers will increase after that.
- If The City of Cle Elum approves the Sun Communities Plan, that will bring 661 RV's to Cle Elum. Most of those will not tow additional vehicles and if one was to estimate the amount of parking needed to just accommodate the RV's going to shop at Safeway, get a bite at all of the great restaurants and shop the retail outlets, that might be 7.6 miles worth of parking if we lined up all of the RV's coming to town. That does not take into consideration the visits to fuel up their RV's. Safeway's Great Employee Team is already very busy and cannot keep their shelves stocked with the current population. If half of the RV's leave to go elsewhere in Sunday morning, they will clog the Bullfrog Road's single lane for 5.5 hours if they each take 1 minute to exit the park and enter the freeway. Remember the RV's are 40 to 65' for the most

part. This may not concern the Council but what if a fire happens to come our way and the call to evacuate is communicated to everyone....No one north of the entrance to the RV park will be able to get to I-90 for many hours and traffic will backup through Ronald and well into Cle Elum.

- If The City of Cle Elum approves the Sun Communities plan, there will be 673 Manufactured Homes. **If you happened to visit their models, you might have realized they are all built out of state. No Local Labor, No Local Taxes, No Local Jobs and No City Permits to build these units. Please realize that their model mockup does not represent what their neighborhood will look like. There were no garages, carports, parking, yards in the model display. Note that MODULAR HOMES ARE REGULATED BY THE WASHINGTON STATE DEPARTMENT OF LABOR AND INDUSTRIES and NO BUILDING PERMITS WILL BE ISSUED BY THE CITY for the modular homes.** There will be a small fee for the foundation and utility hookup inspection and garage, if any. Modular Homes of this type do not appreciate in value and the homes will reside on leased land. No one will own the land they live on. Lease Costs will rise at Sun Communities choice. If you owned a modular and you had a financial issue and could not pay for either the Modular Home or the Leased Land, they will take it all and resell it to someone else especially since the modular will probably be worth less than you owe. If you read the notes on the internet, they do not have a good reputation and there is talk of a Class Action Suit. The models and marketing pieces clearly show a picturesque, vibrant community with smiling faces and happy kids, but what do these developments look like in 3-7 years ? The glow will have worn off and the condition of many units in a low income development will likely show their wear. The marketing pieces will be forgotten. Has any member of the council investigated or evaluated what an existing Sun Communities development is like in 5 or 10 years old ?

- For the level of impact the 47N development will create, will the City of Cle Elum actually realize any significant revenues to offset the wear and tear on the communities water, traffic and related infrastructure, strain on local social services and public health and safety services, transfer station, public schools etc. *Will the city or any of these services receive sufficient funding to ever offset the impacts of all these developments ?Suncadia/Mountainstar was required to mitigate the Fire Department, Water Treatment Plant, the Sewer Treatment Facility, The Transfer Station and Have it's own recycle facility, Where is Dark Skies in all of this?*

- The last major negative impact I will list here is the impact on the Elk herd. I guess they will be walking on Bullfrog road to get from the river to the mountains. There should be a 300' wide wildlife corridor through this densely populated development or maybe the Government will need to install arrow signs to direct the elk where they should walk?

Based on the current approvals in place, the greater Cle Elum area will double in population in less than 5 years. Do we need more development? What are the real costs?

Let's look at Bullfrog Road...2.7 miles from I-90 to the SR903 roundabout. To make it 4 lanes it might cost $6mil per mile plus $2mil for a new bridge over the Cle Elum River...$18,200,000 without any improvements on the state interchange. How about SR 903? I guess the existing residents in the Upper Valley will be required to pay for this?

Schools, Roads, Parks, Police, Fire Protection, Social Services…Why are there not Mitigation/Impact Fee requirements already in place so that the services can be supplied for the new homes being built before they arrive? **I have attached a copy of some Mitigation/Impact Fee schedules from King County and The City of Issaquah**. It is amazing that they are increasing their School Impact Fees and there are none here…

47 Degrees does not help those who are climbing the ladder nor is this helping others. It is just a rental scam. If you want homes that can help those climbing the ladder, contact ARCH out of Redmond. They have a great plan to help those in need of assistance while they move forward in life.

If we take just the trailer park they are proposing and review where Cle Elum is currently, look at Chapter 8.44 which disallows all camping in the City without special Cle Elum Governmental approval and it is restated in the Short Term Rental Ordinance #1601. 2023 Fee Guide 03, School Impact Mitigation Measures

Chapter 21A.43 of the King County Code provides a framework for school districts to require that King County assess impact fees on new residential development in unincorporated King County. School districts affected by growth may request that impact fees be imposed on each new residential dwelling unit in the unincorporated portion of its district for which an impact fee has been established. One-half of the impact fee is paid at final plat approval and the other half when building permits are issued. Residential lots that did not pay an impact fee during platting, multi-family building permits, mobile home permits, and site plan approvals for mobile home parks must pay the total fee when the permits are issued. The applicant may defer payment of impact fees until final inspection of the building permit in accordance with Chapter 21A.43. The amount of the fee is based on the fee schedule that is in effect at the time of permit application or final plat approval. (KCC 21A.43.050) The following fees have been adopted by ordinance 19545, effective January 1, 2023:

School District	Fee per Dwelling Unit	
	Single Family	Multiple Family
Auburn, No. 17408	$7,963	$9,913
Enumclaw, No. 17216	$13,210	$8,326
Federal Way, No. 17210	-	-
Fife, No. 27417	$4,039	$733
Highline, No. 17401	--	--
Issaquah, No. 17411	$11,377	$4,718
Kent, No. 17415	-	-
Lake Washington, No. 17414	$18,610	$3,586
Northshore, No. 17417	$17,963	$2,625
Renton, No. 17403	$2,911	$3,697
Riverview, No. 17407	$8,246	$5,517
Snoqualmie Valley, No. 17410	$16,203	$5,534
Tahoma, No. 17409	$4,535	$1,210
Vashon Island, No 17402	--	--

Single family units are defined as single detached dwelling units and multi-family units are townhouses and apartments. The following types of developments are exempt from school impact fees:

- Any form of housing exclusively for the elderly, including nursing homes and retirement centers
- Replacement or remodeling of existing homes
- Shelters for temporary placement
- Relocation facilities
- Transitional housing facilities
- Low-income housing
- Community residential facilities (i.e., group homes)

- Temporary dwellings for medical hardship
- Accessory dwelling unit

This information is a general guide and should not be used as a substitute for current codes and regulations. Please contact King County Permitting at 206-296-6600, or email DPERWebInquiries@kingcounty.gov for additional information.

Impact & Mitigation Fee Schedule

CITY OF ISSAQUAH
COMMUNITY PLANNING & DEVELOPMENT
130 E Sunset Way | P.O. Box 1307
Issaquah, WA 98027
425-837-3100
issaquahwa.gov

BACKGROUND
The State Growth Management Act (GMA) recognizes that new development creates additional demand for public facilities and services and authorizes cities to collect impact fees to help pay for the additional facilities needed to serve new development.

For these reasons, the Issaquah City Council has approved impact fee ordinances for City & County Traffic, Schools, Parks, and Fire impacts. Impacts to Police and General Government Buildings are assessed through the environmental review process.

Note: The rates listed in this handout may not apply to Development Agreement areas. Please contact Development Services for the most up to date rates.

FREQUENTLY ASKED QUESTIONS
When are fees required? Impact fees are required as part of any construction, reconstruction or any use of property which requires review and approval of a Development Permit. A Development Permit includes a Building Permit, Administrative Site Development Permit, Site Development Permit, Short Plat Application, Preliminary Plat Application, or Project Rezone Application.

When are fees due? Unless otherwise required, impact fees are determined and due upon issuance of a Building Permit.

How are fees calculated? The specific methods for calculating the impact fees are contained in each of the impact fee ordinances adopted by the City Council. Impact Fee Rate Studies provide the basis for many assumptions and background information for the fees. School impact fees are based upon the Issaquah School District's annual Capital Improvement Plan (CIP). For more information regarding the CIP, please contact the School District at (425) 837-7000.

How can I get an estimate of fees? Estimates of City and School impact fees may be obtained by contacting the Development Services Department at (425) 837-3100, or calling your project planner directly.

Can fee adjustments be made? An applicant may provide studies and data for the City's consideration to suggest that adjustment of particular factors determining the fee would be appropriate.

Are there exemptions? Limited exemptions are established in each of the impact fee ordinances. Affordable Housing and Accessory Dwelling Units are the most common exemptions.

How can I appeal an impact fee determination? Appeals of impact fees follow the appeal process established in Issaquah Municipal Code IMC 18.04.250 Administrative Appeals.

Impact Fees

Fee Payment Due - *Impact fees are calculated and due upon issuance of a Building Permit, unless otherwise required.*

Traffic Impact Fee

IMC 3.71 - Adopted by the City Council 2/21/2023 – Ordinance No.3004, Update Eff 2023-03-01

Land Use Type	Impact Fee	Unit of Development
Single-Family Detached	$ 10,608.84	per Dwelling Unit
Multifamily (Low-Rise)	5,458.66	per Dwelling Unit
Other	See **Attachment 1** for transportation impact fees for other common residential, retail, commercial, and industrial uses.	

Fire Impact Fee

IMC 3.73 - Adopted by the City Council 2/21/2023 – Ordinance No.3004, Update Eff 2023-03-01

Re: 47 Degrees North Major Amendment proposal

I know you have seen many of these letters, but instead of creating yet another document, expressing the same data in different words I felt it was best to just use this memo that fully expresses our concerns. I am writing to inform the city of my very strong opposition to the Sun Communities 47° North proposal for the Bullfrog flats property. The proposed manufactured home / RV community:

- Is in clear violation of the vision for the property adopted by the city and presented to the public as a condition for annexing Bullfrog Flats into the city. It's not in character with the City of Cle Elum and does not comply with fundamental requirements of the city's comprehensive plan, the development agreement, or zoning for the property.
- Instead of traditional neighborhoods that were planned to be connected to and a natural extension of the city, supporting the rest of the city, 47 Degrees North would create a private for-profit community and tourist resort with gates, private roads and utilities which will be separated from the rest of the city. It will create a private city within a city, forever.
- Fiscal studies of 47 Degrees North show that it will not create sufficient tax revenue to cover the city's cost to serve it. Unless the developer agrees to financially cover the substantial deficits, forever, existing city taxpayers will be required to subsidize Sun's development and taxes will go up.
- Sun's 47 Degrees North will be in its entirety a private business not a natural neighborhood (no lots sold, all spots leased), wholly owned by a massive out-of-state publicly traded corporation who's fiduciary duty is to its shareholders, not city taxpayers. Any subsidies of the project would be a gift of public funds to a private entity.
- Is not housing as contemplated for the Bullfrog UGA. It will displace half of the actual housing planned for the area and replace it with a private park designed as a transient playground.
- Will be the largest manufactured home/RV park on the West Coast and will double the population of Cle Elum. Parks of this magnitude have no place in a town as small as Cle Elum. Wrong Place Wrong Size.
- Sun has eliminated the industrial park component of the approved plan and is proposing a major new retail center to the project which would compete with existing city businesses and will seriously damage Cle Elum's downtown, which the city has invested millions of dollars to reinvigorate. The retail center is in direct conflict with the city's comprehensive plan which states that the Bullfrog Flats Master Plan...."is intended to elevate the DTC (downtown core) as the primary retail and activity nexus for Cle Elum". Current rules for the Bullfrog Flats property prohibit a retail center on the property.
- Provides no significant benefits to city or UKC residents, but creates serious and significant impacts on roads, police, fire, schools, emergency services, hospitals and other public services that can't be (or won't be) fully mitigated by the developer, and,
- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for. Any such increase in taxes will effectively translate to a subsidy for a private business,
- Denial of 47 Degrees North will not take away or reduce underlying property rights. It will simply require Sun Communities to comply with city's current rules, regulations and comprehensive plan for the property. The original underlying zoning approval and development agreement already allows development of this site, just not as a private resort/manufactured home community/retail center.

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property. **There is no good reason to turn this into a mini Seattle East...**

Respectfully,

Gary Hollie

I wonder how many of you live here? You will turn this area into a garbage can in just a few years. Your increase in tax money will out weighed by the crime , drugs and degrading the property values. This looks like Plan to destroy us just like what is happening to our country.
They will put all of the illegals that have come across the border into this low income housing and kill our chance at growing slowly with higher value homes.

Re: 47 Degrees North Major Amendment proposals

First and foremost I am absolutely against the Sun Communities 47° North proposal for the Bullfrog flats property. This opposition extends for both the land rental housing proposal / model and well as RV community:

Land Rental Housing Model

1) Land rental housing models provide the upside to the land developer as they will obviously retain ownership of a scarce commodity - LAND. Price point housing units placed on the land are a depreciating asset that provide no long term increase in value for the home owner (not unlike a car when driven off the lot).
2) Land rental housing models provide income to the land owner and all future asset value increases stay with them as well
3) Land rental housing models do NOT provide the city with property tax values typical to an asset appreciation single family home
4) The City can and MUST stay with development standards contained within Comprehensive Planning documents
5) We all know this area will be built on in the future and as such it is CRITICAL that any planned / future development be held to the standards of accountability for impacts resulting from such, as well as long term community contributions that will need to be added. This includes infrastructure related to City services County services, schools, parks, core downtown improvements to support planned growth. All these service will cost money to set up / build / manage… these costs must be included in the planning and be put in place concurrently with the development – NOT A PROMISE TO DO SO IN THE FUTURE

RV Community

1) A RV park of this magnitude has NO PLACE in today's real world challenges associated with the ongoing turn-over of living units of this nature.
2) This RV park is NOT a recreational resort. It has no amenities on "campus" for the number of spaces proposed. As such recreation activities will further tax existing natural resources – lakes, trails, rivers and services required to manage – Fire / Safety – water and back woods / animal protection / habitat management. Responding to an onslaught of "visitors" will be too late.
3) In light of recent developments of transient RV owners, the City must be prepared for the dark side of such development as will existing homeowners – RV living is NOT the family fun filled event it used to be…everyone MUST open their eyes to the fact that Sun Country will not be able to effectively manage the real world issues such a development will attract – NOR WILL THE CITY OF CLE ELUM
4) The Comp Plan does not support this type of development – NOR SHOULD THE CITY

Services

1) Any / all determined services for any development of this sized MUST be in place concurrent with development… not a promise, not after the development is complete
2) Any / all determined mitigation costs for schools, parks / park land / fire and police improvements and staffing / water and sewer / traffic and road improvements / health services MUST be paid by the DEVELOPER prior to any permitting is approved. Mitigation fees can not be pushed on the homeowner and collected by the City at the time of house / RV slot delivery
3) The City of Cle Elum does NOT need a new city center… it needs to build upon the area and infrastructure that is already here. Again, a development of nature needs to contribute the dollars to revitalize NOT reinvent,

Traffic

1) Any / all future development must accept the responsibility to pay for / install infrastructure concurrent with development – NOT AFTER
2) Traffic is already out of control – today / May 29th the traffic on Bullfrog extended from the Suncadia roundabout to I-90 – fully stopped. (Ref pic below – Fire / Safety could not respond if there was an event). A development of this size will further impact the region and improvements must be in place before development.

.Summary

1) The current planned development is CAN NOT be the future identity / brand for Cle Elum
2) The comp plan is in place to provide reasonable guidance and planning to SUPPORT growth in Cle Elum – FOLLOW IT
3) Growth MUST BE PLANNED not dumped in the laps of the Citizens to figure it out AND pay for after the fact

47 Degrees North is NOT for the good of the people of Cle Elem… not now nor in the future. It will be a burden of extremes. It must not be allowed to be pushed through based on the illusion of future gains. We look to the City to support the people who live here NOT the company / proposal to change what we have here. Growth will come, but it does need to be in keeping with the planned future and support of the citizens.

STOP 47 Degrees North

Hello Cle Elum council members

I am writing this as I'm sure many are to say please do not allow 47 North to ruin our county with this terrible development.
This is not needed here nor is it wanted here.
You have gotten plenty of letters stating all of the scientific and facts about water roads and infrastructure.
Of course I agree with all that that the county cannot handle that many more people and I would imagine what would happen is that 47 North would get what they wanted and then pretty much just move on to the next project and let Cle elum pick up the pieces.
For the life of me I have read everything and can't figure out how this could even be considered.
We have the most beautiful county with forests and rivers and cleanliness etc.
There is already so much regular building going on in so many more people coming over as you've heard over and over again.
I think just with the normal amount of growth that's already happening you will be struggling to keep up with the infrastructure.
As far as a new grocery store I am pretty sure it would also be packed because there would be so many more people using it so that would not solve anything.
I can only imagine the amounts of garbage along the roads and in the forests with more people camping with more noisy razor side by sides.
Talk about ruining the forests.
Can you imagine how much more crowded the lake would be than it already has been! Well actually it would be more crowded everywhere and wouldn't help during the winters either with road maintenance.
You are all on the council representing all the citizens in the county and it's hard for me to understand how any of you would want this project to happen.
There's so many more things to consider but I just want to say that my family and I which there's about 25 of us are a big no to this development. Please don't do this to our county, we are full-time residents and have been here for about 25 years and already the changes are hard to see with the regular growth.
This will ruin our county as we know it forever and this is a decision that should be easily a big no to any of their projects.

Thank you
Gayla Barton

To Whom It May Concern:

We would like to express our deep concern regarding the proposed 47 Degree North project. It is hard to imagine that there would be consideration of a project as extensive and intrusive such as the 47 Deg. North project.
It adds several dangerous scenarios to our current area. Traffic would be overwhelming and emergency exiting next to impossible. All kinds of travel vehicles will gridlock Bullfrog Rd. Lifestyle change would bring in increased crime and possible homelessness. Greater Police and fire protection would be needed and medical emergency services would be decreased.
Sun will still have the freedom to develop where already proposed and accepted. 47North is a major deviation from the original plan. Please do not approve this plan!

RE: 47 Degrees North

Dear Sir / Madam;

I am a resident of Cle Elum. I am currently employed as the middle school basketball coach and I also work at the Suncadia golf course. I am highly concerned about the 47 Degree north project and its negative impact on the community.

The 47 Degrees North project is behemoth that will destroy this area. 47 Degrees North project is **REIT** (Real Estate Investment Trust) that is not interested in investing in our neighborhood. A **REIT is required to pay 90% of its profits to the shareholders to keep its tax-free corporate status**. Their priority is required to be its shareholders and not the citizens of its development or surrounding community. The shareholders of Sun Communities (SUI – NYSE) are comprised of the top institutional investment firms. The top two institution shareholders own 23% of the shares of SUI as 12/31/2022 – Vanguard (14%) & Blackrock (9%).

A real estate investment trust (REIT) is a company that owns, operates, or finances income-generating real estate. Modeled after mutual funds, REITs pool the capital of numerous investors. This makes it possible for individual investors to earn dividends from real estate investments—without having to buy, manage, or finance any properties themselves. By law and IRS regulation, REITs must pay out 90% or more of their taxable

profits (to shareholders in the form of dividends. As a result, REIT companies are often exempt from most corporate income tax. Shareholders of REITs who receive dividends are taxed as if they are ordinary dividends.

SUI is America's leading owner/operator of manufactured housing (MH) , recreational vehicle (RV) parks and marinas.

SUI revenue for the twelve months ending December 31, 2022, was **$3 Billion**, a 31% increase year-over-year. One day of SUI revenue equals the annual budget of Cle Elum.

Market Capitalization **$18 Billion**.

Debt As of March 31, 2023, the Company had **$7.5 billion** in debt outstanding with a weighted average interest rate of 3.9% and a weighted average maturity of 7.4 years.

As of December 31, 2022, owned, operated, or had an interest in a portfolio of 669 developed properties comprising over 179,700 developed sites and approximately 47,800 wet slips and dry storge spaces in the US (39 states), UK and Canada.

Existing portfolio 352 MH communities, 179 RV parks and 131 marinas.

Development pipeline 9,000 MH sites, 7,000 RV sites

CEO Gary Schiffman -his estimated Net Worth is at least $173 Million dollars as of 16 August 2021. Mr. Shiffman owns over 362,903 units of Sun Communities stock worth over $121,715,751 and over the last 19 years he sold SUI stock worth over $42,994,704. In addition, he makes $7,969,260 as Chairman of the Board at Sun Communities.

There are an awful number of negative reviews from many website and legal issues that seem to occur their properties. Sun Communities Review: Harassment and unfair treatment - ComplaintsBoard.com

Please reject this proposal.

Thank you for reading my email.

Sincerely,

George McKeefry

Re: 47 Degrees North Major Amendment proposal

I am writing to inform the city of my very strong opposition to the Sun Communities 47° North proposal for the Bullfrog flats property. The proposed manufactured home / RV community:

- Is in clear violation of the vision for the property adopted by the city and presented to the public as a condition for annexing Bullfrog Flats into the city. It's not in character with the City of Cle Elum and does not comply with fundamental requirements of the city's comprehensive plan, the development agreement, or zoning for the property.
- Instead of traditional neighborhoods that were planned to be connected to and a natural extension of the city, supporting the rest of the city, 47 Degrees North would create a private for-profit community and tourist resort with gates, private roads and utilities which will be separated from the rest of the city. It will create a private city within a city, forever.
- Fiscal studies of 47 Degrees North show that it will not create sufficient tax revenue to cover the city's cost to serve it. Unless the developer agrees to financially cover the substantial deficits, forever, existing city taxpayers will be required to subsidize Sun's development and taxes will go up.
- Sun's 47 Degrees North will be in its entirety a private business not a natural neighborhood (no lots sold, all spots leased), wholly owned by a massive out-of-state publicly traded corporation who's fiduciary duty is to its shareholders, not city taxpayers. Any subsidies of the project would be a gift of public funds to a private entity.
- Is not housing as contemplated for the Bullfrog UGA. It will displace half of the actual housing planned for the area and replace it with a private park designed as a transient playground.
- Will be the largest manufactured home/RV park on the West Coast and will double the population of Cle Elum. Parks of this magnitude have no place in a town as small as Cle Elum. Wrong Place Wrong Size.
- Sun has eliminated the industrial park component of the approved plan and is proposing a major new retail center to the project which would compete with existing city businesses and will seriously damage Cle Elum's downtown, which the city has invested millions of dollars to reinvigorate. The retail center is in direct conflict with the city's comprehensive plan which states that the Bullfrog Flats Master Plan…."is intended to elevate the DTC (downtown core) as the primary retail and activity nexus for Cle Elum". Current rules for the Bullfrog Flats property prohibit a retail center on the property.
- Provides no significant benefits to city or UKC residents, but creates serious and significant impacts on roads, police, fire, schools, emergency services, hospitals and other public services that can't be (or won't be) fully mitigated by the developer, and,
- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for. Any such increase in taxes will effectively translate to a subsidy for a private business,
- Denial of 47 Degrees North will not take away or reduce underlying property rights. It will simply require Sun Communities to comply with city's current rules, regulations and comprehensive plan for the property. The original underlying zoning approval and development agreement already allows development of this site, just not as a private resort/manufactured home community/retail center.

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Respectfully,

In Regard To The 47 Degree North development

It would Be a very Big mistake To Let This 47 Degree Nort Be Built

It would Completely ruin The whole UpperCounty, Cle Elum and Roslyn would Be Hurt The Most.

If you want to Have Another mess like Mountain Riders Trails With Run down Trailer and Junk all over To Place, That want you will end up With If you let This Development Be Built.

Please Stop This 47 Degree North Now Before it gets Started

There is already Enough People moving to The Area as it is Dont Need A mess like 47 Degree North

Very Concerned Citizen

Re: 47 Degrees North Major Amendment proposal

I am writing to inform the city of my very strong opposition to the Sun Communities 47° North proposal for the Bullfrog flats property. The proposed manufactured home / RV community:

- Is in clear violation of the vision for the property adopted by the city and presented to the public as a condition for annexing Bullfrog Flats into the city. It's not in character with the City of Cle Elum and does not comply with fundamental requirements of the city's comprehensive plan, the development agreement, or zoning for the property.

- Instead of traditional neighborhoods that were planned to be connected to and a natural extension of the city, supporting the rest of the city, 47 Degrees North would create a private for-profit community and tourist resort with gates, private roads and utilities which will be separated from the rest of the city. It will create a private city within a city, forever.

- Fiscal studies of 47 Degrees North show that it will not create sufficient tax revenue to cover the city's cost to serve it. Unless the developer agrees to financially cover the substantial deficits, forever, existing city taxpayers will be required to subsidize Sun's development and taxes will go up.

- Sun's 47 Degrees North will be in its entirety a private business not a natural neighborhood (no lots sold, all spots leased), wholly owned by a massive out-of-state publicly traded corporation whose fiduciary duty is to its shareholders, not city taxpayers. Any subsidies of the project would be a gift of public funds to a private entity.

- Is not housing as contemplated for the Bullfrog UGA. It will displace half of the actual housing planned for the area and replace it with a private park designed as a transient playground.

- Will be the largest manufactured home/RV park on the West Coast and will double the population of Cle Elum. Parks of this magnitude have no place in a town as small as Cle Elum. Wrong Place, Wrong Size.

- Sun has eliminated the industrial park component of the approved plan and is proposing a major new retail center to the project which would compete with existing city businesses and will seriously damage Cle Elum's downtown, which the city has invested millions of dollars to reinvigorate. The retail center is in direct conflict with the city's comprehensive plan which states that the Bullfrog Flats Master Plan…."is intended to elevate the DTC (downtown core) as the primary retail and activity nexus for Cle Elum". Current rules for the Bullfrog Flats property prohibit a retail center on the property.

- Provides no significant benefits to city or UKC residents, but creates serious and significant impacts on roads, police, fire, schools, emergency services, hospitals and other public services that can't be (or won't be) fully mitigated by the developer.

- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for. Any such increase in taxes will effectively translate to a subsidy for a private business,

- Denial of 47 Degrees North will not take away or reduce underlying property rights. It will simply require Sun Communities to comply with city's current rules, regulations and comprehensive plan for the property. The original underlying zoning approval and development agreement already allows development of this site, just not as a private resort/manufactured home community/retail center.

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

May 2, 2023

Mr Mayor,

I am a senior citizen of Cle Elum and strongly protest the "addition" of Sun communities (47 Degrees North) on Bullfrog flat.

47 Degrees is a private community, and not part of our community, our lifestyle, and the planned growth of Cle Elum. It is a private community excluding additional businesses and the Cle Elum community from any advantages - although I see NO advantages. It should never have been considered from the beginning of this fiasco.

Our city and the surrounding area CANNOT survive an onslaught of doubling the size of our community, road and traffic issues, water, sewer, and garbage services. This is a foreign corporation that will not be paying the taxes required to meet the increase of fire, police, schools, and groceries. Safeway cannot handle the current local and week-end customers now!

I have done research on the internet and have found NOTHING POSITIVE in regards to other Sun Communities. They are not known for maintenance of their properties; it is not affordable housing when a buyer never owns the property. Families cannot even come in to support the elderly in times of extended illness! The camp sites for trailers, motorhomes, and tents have NO time limit on them and will end up allowing homeless, drug using groups, illegals, a party time and crime society to rent that site.

You, as representatives of our community, ***do not have the best interests of the community in your decisions***. You, as Cle Elum officials are signing a death certificate for all of us that live in Cle Elum, Roslyn, and Ronald – in the form of taxes, services, traffic, and even the ability to evacuate.

STOP 47 DEGREES DEVELOPMENT NOW!

Sent from my Below I'm posting excerpts from my 47°N comment letter to Cle Elum. It's lightly edited from its original form to take out some technical detail and make it a bit shorter for Facebook.

Subject: 47 Degrees North Major Amendment, SEPA and Development Agreement - Traffic Comments

City of Cle Elum - Mayor, City Council members, Planning Department,

Re: 47 Degrees North Major Amendment, SEPA and Development Agreement

Thank you for the opportunity to provide my comments on the Sun Communities 47 Degrees North Major Amendment, SEPA Addendum/SEIS and Draft Development Agreement. This email contains my comments on traffic only. Future emails will address other aspects of the application.

Comments on the SEIS/Addendum Traffic Analysis

The SEPA Traffic analysis has a number of major flaws which result in significantly understating the amount of congestion on the city and county road system both with and without 47 Degree North. These flaws significantly overestimate the road capacity that's available for 47 Degrees North traffic. SEPA should not be closed until the traffic analysis is corrected.

Specifically:

1. The 47°N traffic study doesn't include the full buildout traffic of major developments already approved, vested and in the pipeline (Suncadia, City Heights and Ronald PUD/Hotel). Because Sun assumed such a short buildout period for 47 Degrees North (5 years), the project is essentially trying to "cut the line" by getting its traffic in the road system before other approved major developments are completed. 47 Degrees North is essentially proposing to use up road capacity that is already allocated to others. Full buildout of approved, but not yet completed, developments cannot be ignored. They have legal vested rights to complete their projects and add their traffic. 47°N traffic will be added to that, not replace it.

The significance of this error is that if all the traffic from approved developments is included we are likely to find that the city and UKC road systems are already significantly beyond their max capacity and there is little or no capacity for 47 Degrees North without massive investments in infrastructure that will take many years to complete.

2. The Addendum traffic study ignores peak summer weekends (Friday evening through Sunday evening) for mitigation purposes.

Roughly half of 47 Degrees North is an RV resort, a business that will operate at maximum capacity on summer weekends, and the other half is a manufactured home community assumed to have a high percentage of 2nd homes that will be weekend getaways or short-term weekend rentals, again, operating at maximum capacity on summer weekends. Sun's business plan will clearly be to maximize summer weekend occupancy. Yet the traffic report uses weekday evenings as the basis for mitigation.

This is a flawed assumption for assessing impacts. We who live here know the traffic patterns; our businesses and emergency responders know the patterns. On summer weekends our UKC streets are packed and on weekday evenings the streets are largely empty. Irrespective of any comp plan policy, best practices for traffic studies require that mitigations be applied to the impacts of a project whenever that might be. Sun should be required to mitigate its full impacts... which are on weekends.

3. It does not appear that Large RV's and travel trailers (oversize vehicles) are fully accounted for in the traffic analysis. It appears they were counted as if they were trips from a typical passenger car. Standard traffic analysis protocol is that oversize vehicles count as more than one passenger vehicle trip because they occupy more space (and time) on the roadway. Given that Sun's RV resort will introduce a very large number of oversize vehicles, improperly accounting for them significantly understates the real impacts from the project.

4. The traffic analysis didn't study the need for road widening on Bullfrog Rd or SR 903 (i.e. a corridor study). The study only looked at intersections. With the large amount of traffic added by 47 Degrees North onto Bullfrog Rd and SR 903, together with the large amount of traffic already drawn to these roads by the school campus, Suncadia, future City Heights access, transfer station etc., it is essential to analyze whether these roadway corridors will be over capacity and will need to be widened or lanes added. The fact that this wasn't studied is a major oversight.

5. The traffic analysis of the I-90 Exit 80 ramps is flawed because it does not reflect the gridlock effects from the freeway during peak summer weekend periods. We who live here know that on peak summer weekends traffic backs up past the weigh station onto Bullfrog Rd. often past the Tumble Creek entrance. And that's before adding the additional background from Suncadia, City Heights and other major projects vested and in the pipeline.

During peak summer periods no mitigation at the ramps can be effective until if/when the freeway itself is fixed. Adding the 47 Degree North traffic will simply make peak backups worse, perhaps extending all the way to the Suncadia Trail main entrance or further.

6. There is no analysis of cut through or bypass traffic when the freeway is in gridlock condition. We who live here know that on peak summer weekends significant bypass traffic occurs on Cle Elum 1st and 2nd Streets, SR 903 and Bullfrog Rd. How will the proposed 47 Degrees North collector arterial (connecting SR 903 to Bullfrog Rd.) function during bypass events and how will this affect queues and backups at exit 80?

7. The studies didn't analyze the impact of major congestion on the ability of our emergency responders and law enforcement to respond to accidents and emergencies, nor the impact of congestion on wildfire evacuation. We who live here know that emergency vehicle access is currently a major issue and it can only be expected to worsen. The fact that this wasn't studied is a major oversight. The city committed to looking at emergency evacuation during scoping.

Conclusion - The 47 Degree North traffic analysis doesn't accurately report traffic from 47°N. It significantly understates congestion on the city and UKC road network both with and without 47 Degrees North and so it is flawed. No further action should be taken until the Addendum traffic analysis is corrected.

Comments on the Draft Development Agreement

Until the SEPA traffic analysis is updated to correctly reflect expected congestion and impacts no action should be taken on the development agreement because it will be based on flawed data. However, since the Draft agreement is a part of the application materials, I provide my initial comments on the Exhibit D - 47 North Transportation Impact Mitigation Plan.

When reviewing the agreement, I ask the city to think about recent experiences with the City Heights Development Agreement. Many provisions in Development Agreements may seem simple and benign at first but carry interpretations that have impacts far beyond original intents and understandings. Yet they obligate the city to accept responsibilities, costs and risks regardless of the passage of time. The 47 Degree North Development Agreement carries far more significant risks and potential costs for the city than any previous development agreement.

I also ask the city to think about recent experiences on the 1st Street Downtown Revitalization Project, the difficulties and uncertainties of securing funding, the length of time to completion, the uncertainty of cost estimates and unforeseen circumstances that arise. 1st Street is just one project, albeit a very large (and important) one. The 47 Degrees North agreement as written would obligate the City to build 14 or more intersection projects and potential road corridor widening of uncertain scope and cost with little help from Sun Communities.

This draft Development Agreement is clearly very "developer friendly", and a very unfair deal for the city. In many, if not most, jurisdictions in Washington, 47 Degrees North would be a non-starter, and rejected on its face because it doesn't meet concurrency requirements.

Concurrency is a state law which says if roadways are congested and failing from existing traffic and/or developments already approved and vested, a city can deny new development until enough capacity is added. It is a significant tool small cities can use to manage growth and leverage greater developer participation in road improvements. Under this Development Agreement as written the city would waive its rights under concurrency, taking away that tool and allowing Sun Communities to add more traffic to roads already over capacity.

Even under the current traffic analysis in the Addendum (which understates traffic) much of the city's and UKC's primary road systems will be at failure (gridlock) by 2031 during peak periods, even without 47 Degrees North. When the traffic analysis is updated to include the correct background traffic from Suncadia and City Heights it's likely the entire system will be at failure (gridlock) by 2031. The fact is, there is simply no excess road capacity available for 47 Degrees North in the current system. All available capacity has been used up and/or allocated to the other large developments the city and the county have approved.

The road improvements that would be needed to add capacity for 47 Degrees North are massive and system wide. Just looking at intersections in the current traffic study, it shows about 14 intersections in the city and UKC that need to be upgraded. And the traffic report significantly understates what's needed

because it only looked at intersections, not at corridors. When corridors are included in the updated traffic analysis it's likely that the total cost to upgrade the road system could easily be well more than $20 million.

With the city facing massive costs for road system expansion, Sun proposes the city allow them to add all of the 47 Degrees North traffic onto the already gridlocked failing road system in exchange for a fee of just $1.0 million and a "loan" of $3.6 million which has to be paid back under uncertain terms (but it definitely has to be paid back). Sun would have no responsibility to make any offsite road improvements anywhere. Simply pay the fee and go. All the responsibility would be passed to the city and UKC taxpayers.

This development agreement as written is a recipe for years of gridlock because most of the road system won't be upgraded for decades because every single intersection and roadway will have to wait on city (or county) funding, band width, priorities and grant availability. The city knows well how grant funding cycles operate, they are lengthy and uncertain and never yield as much as is needed. And as the years go on the cost of road improvements will continue to rise (they always do) but with this agreement Sun's responsibility won't rise. It will be capped.

My specific comments on the development agreement are:

1. The Recitals (A. thru E.) require the city to accept the results of the flawed traffic analysis. If the DA is signed as written the city will have no future legal recourse to contest the inaccurate traffic studies.

2. The agreement should include a "concurrency plan" which restricts the pace of development to actual available capacity in the road system. Mitigation occurs when a project is built, not when a fee is paid. The developer should not be allowed to pay a small fee and add traffic to already failing roads.

Section 3 of the DA contains a clause that appears to exempt 47 Degrees North from WA state concurrency law. This clause should be removed, no development should be allowed to add traffic to already failing roads.

3. The developer's estimates of project costs are very very preliminary and understate the true cost of what it will actually take to build projects. None of the road system improvements in the study are on any CIP/TIP list; there are no preliminary design plans, surveys, or engineering cost estimates; there are no studies of utility relocations, soils conditions or ROW acquisition; no studies of number of lanes, lane lengths, impacts on adjacent properties.

The developers' "estimates" are described in their application material as "notional"....in other words, not based on any site-specific real-world data. As the agreement is currently written the city will be accepting responsibility for a huge black box of unknown scope, cost or schedule and inevitable cost overruns.

5. As the agreement is currently written, the city would be accepting a fee for improvements to County and WSDOT facilities (Bullfrog Rd and I-90 ramps). Without an Interlocal Agreement the city cannot accept payments or responsibility for improving County and/or WSDOT facilities. But even if the city could, it's not in the city's interest to take responsibility for other jurisdictions. It should be the developer's sole responsibility to negotiate mitigation with the county and WSDOT and any agreements reached with them should be incorporated into this development agreement.

Request

I respectfully request that the city halt this process and require that the traffic studies be redone to correct the serious flaws that have been identified, and that the city review its options under concurrency law and not spinning traffic and risk onto the city and UKC taxpayers.

Thanks for the opportunity to make these comments. I will be commenting on other aspects of the 47 Degree North project prior to the conclusion of the public comment period.

Re: 47 Degrees North Major Amendment proposal

I am writing to inform the city of my very strong opposition to the Sun Communities 47° North proposal for the Bullfrog flats property. The proposed manufactured home / RV community:

- Is in clear violation of the vision for the property adopted by the city and presented to the public as a condition for annexing Bullfrog Flats into the city. It's not in character with the City of Ce Elum and does not comply with fundamental requirements of the city's comprehensive plan, the development agreement, or zoning for the property.

- Instead of traditional neighborhoods that were planned to be connected to and a natural extension of the city, supporting the rest of the city, 47 Degrees North would create a private for-profit community and tourist resort with gates, private roads and utilities which will be separated from the rest of the city. It will create a private city within a city, forever.

- Fiscal studies of 47 Degrees North show that it will not create sufficient tax revenue to cover the city's cost to serve it. Unless the developer agrees to financially cover the substantial deficits, forever, existing city taxpayers will be required to subsidize Sun's development and taxes will go up.

- Sun's 47 Degrees North will be in its entirety a private business not a natural neighborhood (no lots sold, all spots leased), wholly owned by a massive out-of-state publicly traded corporation who's fiduciary duty is to its shareholders, not city taxpayers. Any subsidies of the project would be a gift of public funds to a private entity.

- Is not housing as contemplated for the Bullfrog UGA. It will displace half of the actual housing planned for the area and replace it with a private park designed as a transient playground.

- Will be the largest manufactured home/RV park on the West Coast and will double the population of Cle Elum. Parks of this magnitude have no place in a town as small as Cle Elum. Wrong Place Wrong Size.

- Sun has eliminated the industrial park component of the approved plan and is proposing a major new retail center to the project which would compete with existing city businesses and will seriously damage Cle Elum's downtown, which the city has invested millions of dollars to reinvigorate. The retail center is in direct conflict with the city's comprehensive plan which states that the Bullfrog Flats Master Plan...."is intended to elevate the DTC (downtown core) as the primary retail and activity nexus for Cle Elum". Current rules for the Bullfrog Flats property prohibit a retail center on the property.

- Provides no significant benefits to city or UKC residents, but creates serious and significant impacts on roads, police, fire, schools, emergency services, hospitals and other public services that can't be (or won't be) fully mitigated by the developer, and,

- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for. Any such increase in taxes will effectively translate to a subsidy for a private business,

- Denial of 47 Degrees North will not take away or reduce underlying property rights. It will simply require Sun Communities to comply with city's current rules, regulations and comprehensive plan for the property. The original underlying zoning approval and development agreement already allows development of this site, just not as a private resort/manufactured home community/retail center.

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Respectfully,

Virgil Amick

Subject: To the City of Cle Elum: Mayor, City Council Members, and Planning Department Re: 47 Degrees North Proposal

[EXTERNAL EMAIL] DO NOT CLICK links or attachments unless you recognize the sender and know the content is safe.

I am writing to provide the city with my very strong concerns about the Sun Communities 47°N proposal for the Bullfrog Flats property. The proposed manufactured home/RV community:

· Is not in character with the City of Cle Elum or the upper Kittitas Valley (a fundamental requirement of the current zoning for the property),

· Would create a new and separate private tourist resort instead of the natural extension of city neighborhoods originally envisioned by city zoning and current approvals,

· Is in its entirety a private business not a neighborhood (no lots will be created or sold, all spots will be leased, and the project will be private), wholly owned by a large out-of-state publicly traded corporation whose fiduciary duty is to its shareholders,

· Provides no significant benefits to upper valley residents and tax payers,

· Will create serious and significant impacts on roads, police, fire, schools, emergency services, hospitals, and other public services that can't (or won't) be fully mitigated by the developer, and therefore,

· Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for, essentially a subsidy for a private business,

· Denial of the Sun Communities proposal would not take away or reduce underlying property rights. The original underlying zoning approval would still allow development of this site, just not as a private resort/manufactured home community.

For all of these reasons, and others, I implore the City to DENY this proposed major amendment and retain the current approved land use for the property.

- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for. Any such increase in taxes will effectively translate to a subsidy for a private business,

- Denial of 47 Degrees North will not take away or reduce underlying property rights. It will simply require Sun Communities to comply with city's current rules, regulations and comprehensive plan for the property. The original underlying zoning approval and development agreement already allows development of this site, just not as a private resort/manufactured home community/retail center.

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Respectfully,

Signature

Re: 47 Degrees North Major Amendment proposal

I am writing to inform the city of my very strong opposition to the Sun Communities 47° North proposal for the Bullfrog flats property. The proposed manufactured home / RV community:

- Provides no significant benefits to city or UKC residents, but creates serious and significant impacts on roads, police, fire, schools, emergency services, hospitals and other public services that can't be (or won't be) fully mitigated by the developer. I

don't appreciate continuing seeing increased taxes for this development over the next 10 years. The submission my Sun Communities doesn't come anywhere close to covering the costs its residents will cause.

- This potential development is not in character with the City of Ce Elum and does not comply with fundamental requirements of the city's comprehensive plan, the development agreement, or zoning for the property.

- Instead of traditional neighborhoods that were planned to be connected to and a natural extension of the city, supporting the rest of the city, 47 Degrees North would create a private for-profit community and tourist resort with gates, private roads and utilities which will be separated from the rest of the city. It will create a private city within a city.

- Sun's 47 Degrees North will be in its entirety a private business not a natural neighborhood (no lots sold, all spots leased), wholly owned by a massive out-of-state publicly traded corporation who's fiduciary duty is to its shareholders, not city taxpayers. Any subsidies of the project would be a gift of public funds to a private entity.

- Will be the largest manufactured home/RV park on the West Coast and will double the population of Cle Elum. Parks of this magnitude have no place in a town as small as Cle Elum. Wrong Place Wrong Size.

- Sun has eliminated the industrial park component of the approved plan and is proposing a major new retail center to the project which would compete with existing city businesses and will seriously damage Cle Elum's downtown, which the city has invested millions of dollars to reinvigorate. The retail center is in direct conflict with the city's comprehensive plan which states that the Bullfrog Flats Master Plan...."is intended to elevate the DTC (downtown core) as the primary retail and activity nexus for Cle Elum". Current rules for the Bullfrog Flats property prohibit a retail center on the property.

- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for. Any such increase in taxes will effectively translate to a subsidy for a private business,

- Denial of 47 Degrees North will not take away or reduce underlying property rights. It will simply require Sun Communities to comply with city's current rules, regulations and comprehensive plan for the property. The original underlying zoning approval and development agreement already allows development of this site, just not as a private resort/manufactured home community/retail center.

For all of these reasons, I ask the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

I would really appreciate hearing or having a dialog with you about what you feel is in this project for the city. I personally don't see the benefits however, you may have a different opinion. I would love to see meetings set up where you are able to express both benefits and downsides to be considered.

Respectfully,

Greg Schatzlein

Honorable City Council members,
I am aware that you have heard it all by now. I am hopeful that standing up for our community and the desires of its citizens is paramount to you. But I find myself needing to implore you to reject this project. Do not let this be the legacy you leave behind. A mess for future generations to try to navigate their way around. Let's Be that David against Goliath and make headlines for standing up for our small town way of life. I for one would rather go down in a fight against the behemoth than capitulate. Your people have spoken. You are our representatives. Your business interests should not be put above the majority decision. Please remember that.
Sincerely
Guy and Marlene Drew

[EXTERNAL EMAIL] DO NOT CLICK links or attachments unless you recognize the sender and know the content is safe.

We are opposed to the 47Degrees North development for all the reasons that have been pointed out to the Planning Department and the City Council already:
--Water and Sewer
Significant issues relating to Water and Sewer as explained by Tom Hastings --Traffic
Tom Uren, Larrey Stauffer and many others have provided various reasons leading to the inescapable conclusion that the roads serving Cle Elum and the neighboring communities are incapable of handling the added traffic that would result if this project is approved.
--Public Safety
The First Responders do not have the manpower and resources to respond in the event of a major disaster such as a fire as explained by the Kittitas County Sherriff, the Kittitas County Commissioners, the Mayor of Roslyn and many others.

For these reasons and the many others that have been presented, we join the overwhelming sentiment of the citizens of Cle Elum and the surrounding communities in asking that you deny the 47Degrees North proposal.

Respectfully submitted,

Subject: 47 Degrees North

[EXTERNAL EMAIL] DO NOT CLICK links or attachments unless you recognize the sender and know the content is safe.

I'm writing to inform the city of my very strong opposition to the Sun Communities 47° North proposal for the Bullfrog flats property. I owned a property in Suncadia.

What is being proposed in the current 47 Degrees North plan is going to permanently scar this beautiful place, cause irreparable harm to our shared lands, swamp the area with a new "instant city" of visitors with their RVs, motorcycles, boats and snow machines and is completely out of step with the character of Cle Elum and the surrounding areas. This is not the legacy you would be proud to leave behind.

These are the key issues:

1. This project will be the largest manufactured home/RV park on the West Coast. Pouring thousands of visitors to our already overcrowded rivers, lakes, camp sites and playgrounds. This proposed project is way too much too fast.

2. This proposed development provides no significant benefits to city or UKC residents, but creates serious and significant impacts on roads, police, fire, schools, emergency services, medical facilities and other public services that can't be (or won't be) fully mitigated by the developer.

3. I-90 in both directions on a Sunday afternoon is currently gridlock.....adding 600+ RVs towing boats, motorcycles, snow machines etc. will make I-90 impassable. If this project happens, we can add Friday afternoon I-90 gridlock to the mix.

4. Wildfires are inevitable - God forbid one rips though our community we will be forced to compete with thousands of people evacuating RVs on one two lane road. Weve seen it before in Paradise California- complete pandemonium and disaster. Not to mention an impassable gridlock for the firefighters.

5. As I'm sure you are aware, Fiscal studies of 47 Degrees North show that it will not create sufficient tax revenue to cover the city's cost to serve it.

For these reasons, and many more, I implore the City to DENY this proposed major amendment and retain the current approved land use for the property.

Respectfully,

Herng Liu

I am writing to voice my strong opposition to the 47 Degrees North project that is planned for the Bull Frog Flats area.

As a homeowner, small business owner, mom and citizen of the area I have lost sleep thinking about what approval of this massive development would do to our area.

This project does not fit. If the plan was 1/10th the anticipated size it would not fit into our community. We already face incredible traffic issues on the weekends. If the housing does turn out to be mostly transient, we will face constant weekend gridlock.

We do not have the infrastructure for this. Roslyn would be decimated by weekenders; the lake would be overrun. I can only picture a scene of locusts coming through and annihilating the good of our UKC that we love. We do not even have the groceries to handle the citizens that are already here and we are cleaned out by weekenders to the point that our store is out of major items like milk and cheese when we try to shop. This just does not fit.

If the homes do not all end up being transient, I don't see forethought into education/schooling?

If this project is approved I can only vision a future in which we will have to leave this community that we love.

Please do not ruin everything wonderful about our area with one stroke of a key. Certainly it would be a career ender for anyone involved in its approval.

Thank you, for your thoughtful consideration,

Hilary Shemanski
UKC Resident

[EXTERNAL EMAIL] DO NOT CLICK links or attachments unless you recognize the sender and know the content is safe.

I am writing to inform the city and board members of my (and many many others in the community) very strong opposition to the Sun Communities 47° North proposal for the Bullfrog flats property. The proposed manufactured home / RV community:

- Is in clear violation of the vision for the property adopted by the city and presented to the public as a condition for annexing Bullfrog Flats into the city. It's not in character with the City of Cle Elum and does not comply with fundamental requirements of the city's comprehensive plan, the development agreement, or zoning for the property.
- Instead of traditional neighborhoods that were planned to be connected to and a natural extension of the city, supporting the rest of the city, 47 Degrees North would create a private for-profit community and tourist resort with gates, private roads and utilities which will be separated from the rest of the city. It will create a private city within a city, forever.
- Fiscal studies of 47 Degrees North show that it will not create sufficient tax revenue to cover the city's cost to serve it. Unless the developer agrees to financially cover the substantial deficits, forever, existing city taxpayers will be required to subsidize Sun's development and taxes will go up.
- Sun's 47 Degrees North will be in its entirety a private business not a natural neighborhood (no lots sold, all spots leased), wholly owned by a massive out-of-state publicly traded corporation who's fiduciary duty is to its shareholders, not city taxpayers. Any subsidies of the project would be a gift of public funds to a private entity.
- Is not housing as contemplated for the Bullfrog UGA. It will displace half of the actual housing planned for the area and replace it with a private park designed as a transient playground.
- Will be the largest manufactured home/RV park on the West Coast and will double the population of Cle Elum. Parks of this magnitude have no place in a town as small as Cle Elum. Wrong Place Wrong Size.
- Sun has eliminated the industrial park component of the approved plan and is proposing a major new retail center to the project which would compete with existing city businesses and will seriously damage Cle Elum's downtown, which the city has invested millions of dollars to reinvigorate. The retail center is in direct conflict with the city's comprehensive plan which states that the Bullfrog Flats Master Plan…."is intended to elevate the DTC (downtown core) as the primary retail and activity nexus for Cle Elum". Current rules for the Bullfrog Flats property prohibit a retail center on the property.

- Provides no significant benefits to city or UKC residents, but creates serious and significant impacts on roads, police, fire, schools, emergency services, hospitals and other public services that can't be (or won't be) fully mitigated by the developer, and,
- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for. Any such increase in taxes will effectively translate to a subsidy for a private business,
- Denial of 47 Degrees North will not take away or reduce underlying property rights. It will simply require Sun Communities to comply with city's current rules, regulations and comprehensive plan for the property. The original underlying zoning approval and development agreement already allows development of this site, just not as a private resort/manufactured home community/retail center.

For all of these reasons, and others, I implore the City to DENY this proposed major amendment and retain the current approved land use for the property.

Respectfully,

Hunter James

Re: 47 Degrees North Major Amendment proposal

I am writing to inform the city of my very strong opposition to the Sun Communities 47° North proposal for the Bullfrog flats property. The proposed manufactured home / RV community:

- Is in clear violation of the vision for the property adopted by the city and presented to the public as a condition for annexing Bullfrog Flats into the city. It's not in character with the City of Cle Elum and does not comply with fundamental requirements of the city's comprehensive plan, the development agreement, or zoning for the property.
- Instead of traditional neighborhoods that were planned to be connected to and a natural extension of the city, supporting the rest of the city, 47 Degrees North would create a private for-profit community and tourist resort with gates, private roads and utilities which will be separated from the rest of the city. It will create a private city within a city, forever.
- Fiscal studies of 47 Degrees North show that it will not create sufficient tax revenue to cover the city's cost to serve it. Unless the developer agrees to financially cover the substantial deficits, forever, existing city taxpayers will be required to subsidize Sun's development and taxes will go up.
- Sun's 47 Degrees North will be in its entirety a private business not a natural neighborhood (no lots sold, all spots leased), wholly owned by a massive out-of-state publicly traded corporation who's fiduciary duty is to its shareholders, not city taxpayers. Any subsidies of the project would be a gift of public funds to a private entity.
- Is not housing as contemplated for the Bullfrog UGA. It will displace half of the actual housing planned for the area and replace it with a private park designed as a transient playground.
- Will be the largest manufactured home/RV park on the West Coast and will double the population of Cle Elum. Parks of this magnitude have no place in a town as small as Cle Elum. Wrong Place Wrong Size.
- Sun has eliminated the industrial park component of the approved plan and is proposing a major new retail center to the project which would compete with existing city businesses and will seriously damage Cle Elum's downtown, which the city has invested millions of dollars to reinvigorate. The retail center is in direct conflict with the city's comprehensive plan which states that the Bullfrog Flats Master Plan…."is intended to elevate the DTC (downtown core) as the primary retail and activity nexus for Cle Elum". Current rules for the Bullfrog Flats property prohibit a retail center on the property.
- Provides no significant benefits to city or UKC residents, but creates serious and significant impacts on roads, police, fire, schools, emergency services, hospitals and other public services that can't be (or won't be) fully mitigated by the developer, and,
- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for. Any such increase in taxes will effectively translate to a subsidy for a private business,
- Denial of 47 Degrees North will not take away or reduce underlying property rights. It will simply require Sun Communities to comply with city's current rules, regulations and comprehensive plan for the property. The original underlying zoning approval and development agreement already allows development of this site, just not as a private resort/manufactured home community/retail center.

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Respectfully,

Hunter Miller

Cle Elum, WA 98922

Subject: **DENIAL OF THE MAJOR MODIFICATIONS OF THE 47* NORTH APPLICATION—Please do not put profits ahead of lives! Please enter my comments into public record.**

I am a concerned citizen who has lived and owned property in the Cle Elum area for 20 years. I lost a home to the Taylor Bridge Fire, which has intensified my commitment and involvement in helping to build a better future for the design of our community.

Suggestion:
Create an integrated, safe, healthy Upper Kittitas County for Bullfrog Flats (AKA: Sun Communities) and future developments in the Cle Elum UGA.

Recommendation: It's critical to have coordinated community planning that can help us avoid another serious tragedy.

- ❑ Planning Coordination to design and insure a healthy safe community. We need a:
  - Regional planning council—elected to serve the community for current and future generations specific to:
    - ▶ Road systems—multiple evacuation routes vs. DEAD END ROADS & DEVELOPMENTS
    - ▶ Fire services—enough equipment & infrastructure and staff to support population growth
    - ▶ EMS—enough equipment and staff to support population growth
    - ▶ Emergency evacuation plan-- WHAT IS OUT EMERGENCY EVACUATION PLAN FOR UPPER KITTITAS COUNTY? We do not have a formal or informal plan in place as of 2023.

Valuable Lessons Learned from: Paradise California "Camp Fire" 2018

- ❑ How Paradise leadership ignored warnings and became a deathtrap: Paradise Fire: Warnings and predictions ignored
- ❑ ***A Los Angeles Times investigation found that Paradise ignored repeated warnings of the risk its residents faced, crafted no plan to evacuate the area all at once, entrusted public alerts to a system vulnerable to fire, and did not sound citywide orders to evacuate.***
- ❑ In the aftermath of the Camp fire — 86 dead, more than 13,900 homes destroyed, and Paradise decimated — local and state officials said the tragedy was unforeseen and unavoidable, an "unprecedented" monster of fire.

Paradise "Camp Fire" was predicted by early planners but ultimately allowed by aggressive developers

- ❑ Paradise mobile home park post Camp Fire 2018 video
  - ❑ ***The 2005 CA state fire management plan for the ridge, developed in consultation with some of those same Paradise planners:*** "Heavy fuel loads, steep terrain, poor access and light flashy fuels create severe fire hazards. The increased population in this area creates a high potential for catastrophic life and property loss."

Coordinated Planning could have prevented Paradise tragedy:

- ❑ Developers started with what had been gold mine trails and then apple orchard roads to pave a street system that **maximized buildable space** to maximize profit—not safety!
- ❑ In the aftermath of the Camp fire — 86 dead, more than 13,900 homes destroyed, and Paradise decimated — local and state officials said the tragedy was unforeseen and unavoidable, an "unprecedented" monster of fire.
- ❑ In truth, the destruction was utterly ***predictable***, and the community's struggles to deal with the fire were the result of lessons ***forgotten*** and warnings ***ignored***.

Summary: Forest Fire is an Impending Threat for Cle Elum, and we can avoid the same tragedy if we plan to avoid it!

Solution to minimize risk:

- ❑ Coordinate planning that utilized all lessons learned from similar "at risk" towns that includes:
- ❑ Controlled growth planning through the development of:
- ❑ Infrastructure planning to support coordinated grow:
    - Fire services
    - Forest management
    - EMS
    - Roads/Evacuation routes with no dead-ends
- ❑ Effectively manage new community development that meets needs of the Cle Elum area residents.

Your vote on any new applications must ensure that there is no reduction in the level of service. The 47* North Major Modification will reduce levels of service for roads, fire, EMS, police, schools, water, and sewer. The infrastructure of Cle Elum is already on the verge of collapse due to the explosive growth over the past 3 years.

I respectfully ask you to deny THE MAJOR MODIFICATIONS OF THE 47* NORTH APPLICATION. It is your responsibility, opportunity, and duty to protect our community and listen to the constituents.

Sincerely,

Ingrid Vimont

Cle Elum Mayor McGowan & Cle Elum City Council

Cle Elum, WA 98922

Subject: **DENIAL OF THE MAJOR MODIFICATIONS OF THE 47* NORTH APPLICATION Please enter my comments into public record.**

Sun Communities proposed major changes to the 47* North Master Site Plan:

- 673 manufactured housing units
- the development of an RV resort which would accommodate up to 661 recreational vehicles
- dedication of 7.5 acres to the City of Cle Elum for the construction of affordable housing units
- 530-acres of open space
- a 26-acre business park to retained by Suncadia
- neighborhood parks and trails to be maintained by Sun Communities
- the construction of an amenity center
- an allocation of 10 acres for the expansion of the Cle Elum Cemetery

Revised-47-North-SEIS-Addendum-3.9.23 Page 34

https://cityofcleelum.com/wp-content/uploads/2023/03/Revised-47-North-SEIS-Addendum-3.9.23-Full-Document.pdf

If you read nothing else is the Revised 47 North SEIS Addendum, please read this AND DENY THE MAJOR MODIFICAITONS APPLICATION THAT WILL DESTROY OUR COMMUNITY.
Every requested change from Sun Communities on the 47 Degrees North SEIS Addendum are **detrimental** to our community.

Fiscal Condition

No new, significant or materially different fiscal impacts would occur from the Revised Proposal and no additional mitigation measures are recommended.

The mitigation measure identified below is updated to provide additional considerations relating to fiscal monitoring; monitoring was recommended in the Final SEIS and would similarly apply to the Revised Proposal.

Citizen Request to the City Of Cle Elum

I request that the City deny the proposed major amendment and retain the existing approval.

If the City of Cle Elum determines to move forward with this project, I request that the City of Cle Elum:

- Hire a full-time, experienced land-use and master planned community lawyer to represent the City of Cle Elum and protect our interests and who resides in our community.
- Condition the project in a strong legally enforceable way so that there are **NO** financial impacts to existing upper county residents; so that higher taxes aren't needed; so, the residents of the upper county aren't required to subsidize a private business venture.
- Provide legal mechanisms so the Sun Communities project pays for all special district (non-city) financial Impacts and funding shortfalls (roads, fire, police, EMS, schools, waste, transportation).
- Infrastructure and concurrency – Condition the project so that infrastructure is built when it's needed and not after the project is built out and the developer is finished with little or no incentive to participate.
- Require that Sun Communities is responsible for funding/constructing any infrastructure needed to support it, or if the city were to accept some, or all, of the responsibility ("% share" method), the project should be required to be put on hold until the city builds infrastructure to support the current population and the require the financial mitigation to build all infrastructure needed in perpetuity for the all phases of 47* North (concurrency).
- Condition the project with a concurrency agreement/phasing plan so that development is only allowed to proceed in phases as infrastructure is fully funded/constructed.
- The study of impacts for this project is largely based on modeling and assumptions from other regions which may not be accurate for this development in our unique location. The progress of the project should be tied to a monitoring plan as part of concurrency. No model is 100% accurate. The future impact(s), not addressed in the study assumed by the "models", must require ongoing mitigation (more funding) in all future phases (and in perpetuity) to make up for shortfalls.
- No taxpayer money should ever be used to support this project.

    - Draft SEIS, Appendix K, Page 45, ECONorthwest Memo 9/9/20: to meet shortfalls…"….*Consistent with typical municipal budgeting practices, the city could impose new taxes or fees to balance its budget or seek to change levels of public services to meet available revenues, or a combination of both approaches*….."

Sincerely,

Ingrid Vimont

Utilities

Required Mitigation Measures

Solid Waste

- ~~The Applicant would contribute a pro-rata share to construct improvements to the solid waste transfer station, consistent with the Kittitas County Solid Waste Management Plan (SWMP) Amendment for the Trendwest (now New Suncadia) Master Plan Resort and UGA (November 2000). The Applicant would handle all construction debris, separate re-cyclable materials, and otherwise handle all of its solid waste and household hazardous waste consistent with the requirement for such handling in the Kittitas SWMP. The same requirements would apply to the adjacent commercial development property, based on pro-rata share.~~ Kittitas County Solid Waste will be consulted to determine the basis for any mitigation requirement and whether the 47° North development is responsible to mitigate impacts, and for its proportional contribution to improvements to the Cle Elum Transfer Station and the Ryegrass Landfill. Kittitas County supports its solid waste program through tipping fees (91%) and grants; project-based mitigation may not be applicable.

Fiscal Condition

No new, significant or materially different fiscal impacts would occur from the Revised Proposal and no additional mitigation measures are recommended.

The mitigation measure identified below is updated to provide additional considerations relating to fiscal monitoring; monitoring was recommended in the Final SEIS and would similarly apply to the Revised Proposal.

City of Cle Elum

- The fiscal monitoring consultant will need the following information to assure that all taxes due to the city are properly reported and collected:
  - **Property Taxes**. The consultant will need information from the county assessor that detail new construction value and assessed value for all 47° North tax parcels.
  - **Sales Taxes.** The city will have to work with the Washington State Department of Revenue to request individual tax reports for businesses and households. If these data are not available to the fiscal monitoring consultant due to data privacy restrictions, the consultant will have to work with publicly available retail sales data to apportion city receipts to 47° North.
  - **Utility Taxes.** Due to the mix of utility providers, the consultant will have to work with publicly available utility tax data to apportion city receipts to 47° North.
  - **Real Estate Excise Taxes.** The consultant will need information from the county assessor to summarize real estate transactions within 47° North.

Other Service Purveyors

- The Applicant should, and has committed to, pursue mitigation agreements with the affected service providers to address fiscal impacts, if any, resulting from increased service demands attributable to the Revised Proposal.

> Re: 47 Degrees North Major Amendment, SEPA and Development Agreement

Thank you for the opportunity to provide my comments on the Sun Communities 47 Degrees North Major Amendment, SEPA Addendum/SEIS and Draft Development Agreement. This email contains my comments on traffic only. Future emails will address other aspects of the application.

Comments on the SEIS/Addendum Traffic Analysis

The SEPA Traffic analysis has a number of major flaws which result in significantly understating the amount of congestion on the city and county road system both with and without 47 Degree North. These flaws significantly overestimate the road capacity that's available for 47 Degrees North traffic. SEPA should not be closed until the traffic analysis is corrected.

Specifically:

1. The 47°N traffic study doesn't include the full buildout traffic of major developments already approved, vested and in the pipeline (Suncadia, City Heights and Ronald PUD/Hotel). Because Sun assumed such a short buildout period for 47 Degrees North (5 years), the project is essentially trying to "cut the line" by getting its traffic in the road system before other approved major developments are completed. 47 Degrees North is essentially proposing to use up road capacity that is already allocated to others. Full buildout of approved, but not yet completed, developments cannot be ignored. They have legal vested rights to complete their projects and add their traffic. 47°N traffic will be added to that, not replace it.

The significance of this error is that if all the traffic from approved developments is included we are likely to find that the city and UKC road systems are already significantly beyond their max capacity and there is little or no capacity for 47 Degrees North without massive investments in infrastructure that will take many years to complete.

2. The Addendum traffic study ignores peak summer weekends (Friday evening through Sunday evening) for mitigation purposes.

Roughly half of 47 Degrees North is an RV resort, a business that will operate at maximum capacity on summer weekends, and the other half is a manufactured home community assumed to have a high percentage of 2nd homes that will be weekend getaways or short-term weekend rentals, again, operating at maximum capacity on summer weekends. Sun's business plan will clearly be to maximize summer weekend occupancy. Yet the traffic report uses weekday evenings as the basis for mitigation.

This is a flawed assumption for assessing impacts. We who live here know the traffic patterns; our businesses and emergency responders know the patterns. On summer weekends our UKC streets are packed and on weekday evenings the streets are largely empty. Irrespective of any comp plan policy, best practices for traffic studies require that mitigations be applied to the impacts of a project whenever that might be. Sun should be required to mitigate its full impacts... which are on weekends.

3. It does not appear that Large RV's and travel trailers (oversize vehicles) are fully accounted for in the traffic analysis. It appears they were counted as if they were trips from a typical passenger car. Standard traffic analysis protocol is that oversize vehicles count as more than one passenger vehicle trip because they occupy more space (and time) on the roadway. Given that Sun's RV resort will introduce a very large number of oversize vehicles, improperly accounting for them significantly understates the real impacts from the project.

4. The traffic analysis didn't study the need for road widening on Bullfrog Rd or SR 903 (i.e. a corridor study). The study only looked at intersections. With the large amount of traffic added by 47 Degrees North onto Bullfrog Rd and SR 903, together with the large amount of traffic already drawn to these roads by the school campus, Suncadia, future City Heights access, transfer station etc., it is essential to analyze whether these roadway corridors will be over capacity and will need to be widened or lanes added. The fact that this wasn't studied is a major oversight.

5. The traffic analysis of the I-90 Exit 80 ramps is flawed because it does not reflect the gridlock effects from the freeway during peak summer weekend periods. We who live here know that on peak summer weekends traffic backs up past the weigh station onto Bullfrog Rd. often past the Tumble Creek entrance. And that's before adding the additional background from Suncadia, City Heights and other major projects vested and in the pipeline.

During peak summer periods no mitigation at the ramps can be effective until if/when the freeway itself is fixed. Adding the 47 Degree North traffic will simply make peak backups worse, perhaps extending all the way to the Suncadia Trail main entrance or further.

6. There is no analysis of cut through or bypass traffic when the freeway is in gridlock condition. We who live here know that on peak summer weekends significant bypass traffic occurs on Cle Elum 1st and 2nd Streets, SR 903 and Bullfrog Rd. How will the proposed 47 Degrees North collector arterial (connecting SR 903 to Bullfrog Rd.) function during bypass events and how will this affect queues and backups at exit 80?

7. The studies didn't analyze the impact of major congestion on the ability of our emergency responders and law enforcement to respond to accidents and emergencies, nor the impact of congestion on wildfire evacuation. We who live here know that

emergency vehicle access is currently a major issue and it can only be expected to worsen. The fact that this wasn't studied is a major oversight. The city committed to looking at emergency evacuation during scoping.

Conclusion - The 47 Degree North traffic analysis doesn't accurately report traffic from 47°N. It significantly understates congestion on the city and UKC road network both with and without 47 Degrees North and so it is flawed. No further action should be taken until the Addendum traffic analysis is corrected.

Comments on the Draft Development Agreement

Until the SEPA traffic analysis is updated to correctly reflect expected congestion and impacts no action should be taken on the development agreement because it will be based on flawed data. However, since the Draft agreement is a part of the application materials, I provide my initial comments on the Exhibit D - 47 North Transportation Impact Mitigation Plan.

When reviewing the agreement, I ask the city to think about recent experiences with the City Heights Development Agreement. Many provisions in Development Agreements may seem simple and benign at first but carry interpretations that have impacts far beyond original intents and understandings. Yet they obligate the city to accept responsibilities, costs and risks regardless of the passage of time. The 47 Degree North Development Agreement carries far more significant risks and potential costs for the city than any previous development agreement.

I also ask the city to think about recent experiences on the 1st Street Downtown Revitalization Project, the difficulties and uncertainties of securing funding, the length of time to completion, the uncertainty of cost estimates and unforeseen circumstances that arise. 1st Street is just one project, albeit a very large (and important) one. The 47 Degrees North agreement as written would obligate the City to build 14 or more intersection projects and potential road corridor widening of uncertain scope and cost with little help from Sun Communities.

This draft Development Agreement is clearly very "developer friendly", and a very unfair deal for the city. In many, if not most, jurisdictions in Washington, 47 Degrees North would be a non-starter, and rejected on its face because it doesn't meet concurrency requirements.

Concurrency is a state law which says if roadways are congested and failing from existing traffic and/or developments already approved and vested, a city can deny new development until enough capacity is added. It is a significant tool small cities can use to manage growth and leverage greater developer participation in road improvements. Under this Development Agreement as written the city would waive its rights under concurrency, taking away that tool and allowing Sun Communities to add more traffic to roads already over capacity.

Even under the current traffic analysis in the Addendum (which understates traffic) much of the city's and UKC's primary road systems will be at failure (gridlock) by 2031 during peak periods, even without 47 Degrees North. When the traffic analysis is updated to include the correct background traffic from Suncadia and City Heights it's likely the entire system will be at failure (gridlock) by 2031. The fact is, there is simply no excess road capacity available for 47 Degrees North in the current system. All available capacity has been used up and/or allocated to the other large developments the city and the county have approved.

The road improvements that would be needed to add capacity for 47 Degrees North are massive and system wide. Just looking at intersections in the current traffic study, it shows about 14 intersections in the city and UKC that need to be upgraded. And the traffic report significantly understates what's needed because it only looked at intersections, not at corridors. When corridors are included in the updated traffic analysis it's likely that the total cost to upgrade the road system could easily be well more than $20 million.

With the city facing massive costs for road system expansion, Sun proposes the city allow them to add all of the 47 Degrees North traffic onto the already gridlocked failing road system in exchange for a fee of just $1.0 million and a "loan" of $3.6 million which has to be paid back under uncertain terms (but it definitely has to be paid back). Sun would have no responsibility to make any offsite road improvements anywhere. Simply pay the fee and go. All the responsibility would be passed to the city and UKC taxpayers.

This development agreement as written is a recipe for years of gridlock because most of the road system won't be upgraded for decades because every single intersection and roadway will have to wait on city (or county) funding, band width, priorities and grant availability. The city knows well how grant funding cycles operate, they are lengthy and uncertain and never yield as much as is needed. And as the years go on the cost of road improvements will continue to rise (they always do) but with this agreement Sun's responsibility won't rise. It will be capped.

My specific comments on the development agreement are:

1. The Recitals (A. thru E.) require the city to accept the results of the flawed traffic analysis. If the DA is signed as written the city will have no future legal recourse to contest the inaccurate traffic studies.

2. The agreement should include a “concurrency plan” which restricts the pace of development to actual available capacity in the road system. Mitigation occurs when a project is built, not when a fee is paid. The developer should not be allowed to pay a small fee and add traffic to already failing roads.

Section 3 of the DA contains a clause that appears to exempt 47 Degrees North from WA state concurrency law. This clause should be removed, no development should be allowed to add traffic to already failing roads.

3. The developer's estimates of project costs are very very preliminary and understate the true cost of what it will actually take to build projects. None of the road system improvements in the study are on any CIP/TIP list; there are no preliminary design plans, surveys, or engineering cost estimates; there are no studies of utility relocations, soils conditions or ROW acquisition; no studies of number of lanes, lane lengths, impacts on adjacent properties.

The developers' "estimates" are described in their application material as "notional"....in other words, not based on any site-specific real-world data. As the agreement is currently written the city will be accepting responsibility for a huge black box of unknown scope, cost or schedule and inevitable cost overruns.

5. As the agreement is currently written, the city would be accepting a fee for improvements to County and WSDOT facilities (Bullfrog Rd and I-90 ramps). Without an Interlocal Agreement the city cannot accept payments or responsibility for improving County and/or WSDOT facilities. But even if the city could, it's not in the city's interest to take responsibility for other jurisdictions. It should be the developer's sole responsibility to negotiate mitigation with the county and WSDOT and any agreements reached with them should be incorporated into this development agreement.

Request:

I respectfully request that the city halt this process and require that the traffic studies be redone to correct the serious flaws that have been identified, and that the city review its options under concurrency law and not spinning traffic and risk onto the city and UKC taxpayers.

Thanks for all the hard work you're putting in on this project and taking the time to make the right decision for you your children grandchildren our community and the citizens of upper Kittitas countUpper Kittitas county county. Thank you for denying the major modification from 47° north and considering excepting the original application of design for 47° north.

Thank you,

Re: 47 Degrees North Major Amendment proposal

I am writing to inform the city of my very strong opposition to the Sun Communities 47° North proposal for the Bullfrog flats property. The proposed manufactured home / RV community:

Negative Impacts of 47° North

- Decreased level of service for EMS
- Decreased level of service for fire protection
- Decrease level of service for police protection
- Traffic gridlock on 2-lane roads
- Increased tax burden to beef-up infrastructure (water, sewer, power, roads, EMS, schools, police,)
- Doubling the population of Cle Elum within 6 years
- Profits sent out of our community to Wallstreet investors
- Largest private trailer park community west of the Mississippi
- Severe wildfire risk due to limited ingress & egress

For these reasons, and so many others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Respectfully,

Signature

Re: 47 Degrees North Major Amendment Proposal

June 7, 2023

I am sure you have received plenty of comments from concerned individuals regarding the more obvious topics of concern with respect to the proposed 47° development such as: traffic, infrastructure (water/sewer), school impact mitigation, wildlife impacts, and the like. While I share these concerns, the purpose of my public comment letter is to highlight some problems I see as I take a broader, "big-picture" approach to the applicant's "March 2023 Application - Exhibit 2A Project Overview". I shall highlight financial shortcomings, and errors / omissions including some as they pertain to adherence to the Cle Elum Municipal Code. (Note: page references refer to the Exhibit 2A - Project Overview)

Financial Shortcomings (to the city and to a resident of the development)

Numerous individuals have dug into the details and already stated to you how fiscal studies indicate a shortfall of income - over the long term - to Cle Elum. When I use the "big picture" approach, these negative fiscal impacts are clear:

* 1. Sun states they "may" sell the commercial center once construction is complete (page 4). Sun also desires a reconfiguration of the property to create specific parcels to include a "Commercial Center Parcel" (page 8). Taken together with the fact Sun is a REIT and as such does not operate retail/commercial establishments (outside normal activities associated with an RV park) it is clear Sun intends to sell the "commercial center" as soon as they can, making it someone else's problem. Big Picture: the commercial center will end up as one large unoccupied building and a good amount of dirt, generating zero sales tax revenue and minimal property tax revenue.

* 2. Residents of manufactured home (MH) communities do not move there expecting their homes to appreciate. As a former resident of a MH community I can tell you first hand how financially painful it can be for people who would buy a "single family residential unit" from Sun. Let's imagine a young couple just starting out on their own. In order to to purchase their unit they will likely need a loan. Since most banks do not make MH purchase loans their choice of banks will be very limited. When they do find a bank for the loan, they will be faced with mortgage rates that are generally 25-35 percent higher than traditional mortgages due to the lack of collateral (no land). After loan approval and unit purchase, they will move in and face a new economic reality: in addition to their mortgage, insurance, and utilities, they will also have a monthly rent payment to Sun. Note: rents are generally very low in the first year in order to help entice new residents and ease their financial fears; rents increase annually and are seldom regulated or controlled by local regulation. Our imaginary couple will now be living in their new residential unit that costs more and more each year while retaining less and less of its original value. The financial shortcoming to the city is a lack of property tax revenue from this couple;

the financial shortcoming to this young couple is an ever increasing rent payment with an ever decreasing home value.

Errors / Omissions / Inconsistencies

The following are numerous sections of the applicant's "Exhibit 2A - Project Overview" containing errors/omissions/inconsistencies with CEMC, thus highlighting the careless nature with which Sun has prepared their paperwork. If the careless and haphazard nature of the paperwork is any indication of how they will handle their business operations and legal obligations, well..... the city should factor that in to their evaluation of the proposal. At a minimum, the sections I highlight should be rejected outright and the applicant should be required to re-submit a fresh, error-free proposal.

* I - Project Overview Section H.1 Water & Sanitary Sewer Utilities - error - page 10
Sun wants the city to pay for water system improvements, yet the math they present is inaccurate and/or misleading: "Sun will also deposit three million six hundred thirty four thousand dollars ($4,102,000.00) into an escrow account for the City to use, exclusively, for the construction of the Water System Improvements." Note the discrepancy between the written out "three million six hundred thirty four thousand dollars" and the numerical "$4,102,000." Which figure is correct? If the developer is so careless as to inaccurately describe a large sum of money, what other careless things will they do?

* I - Project Overview Section H.2 Roads and Transportation - omission - page 12
Sun wants the city to pay for road improvements, and proposes to deposit $3.65M in an escrow account to help the city pay its share of these improvements but does not spell out the details of how, when, and at what rate the city is to repay the developer. The idea that the city should foot the bill for road improvements is a true cause for concern, given the cost and the fact the impacts to the city due to traffic will be 100% a result of the developer's proposal. Interestingly, the developer states on page 7 "The entrance area of the Recreational Resort is designed to accommodate without impact to traffic (or traffic queueing) on Bullfrog Road" which completely ignores the fact that a continuous series of trucks each pulling a thirty foot travel trailer will most certainly result in a backup on Bullfrog Road.

* II - Procedural History Section C.3 Conditions Imposed without any Evidentiary Support in the FEIS - omission - page 18
The developer "remains committed" to the concepts presented but does not categorically state they will adhere to them. This is essentially a loophole allowing them to bypass these conditions at will. They further state they don't feel obliged to comply with the conditions due to lack of legal standing behind the conditions. They quote RCW 82.02.020(3) erroneously - this RCW ("State preempts certain tax fields—Fees prohibited for the development of land or buildings—Voluntary payments by developers authorized—Limitations—Exceptions.") has absolutely nothing to do with upholding the conditions. Again, an error of this magnitude in the application is indicative of the sloppy nature of this entity and makes one wonder if Sun can be trusted to do all they are required to do, and do it correctly.

III - Application Components Section A.i Affordable Housing Program - CEMC 17.45.080(C) - page 26
When discussing affordable housing, two terms (and their definitions) often get intertwined and misused: "Affordable Housing" and "Low-Income" According to US Department of Housing and Urban Development (HUD), the term "affordable housing" is defined as "housing with monthly costs, including utilities other than telephone, that do not exceed 30% of a household's gross

monthly income" while a "low-income" family refers to families whose combined income does not exceed 80 percent of the "Median Family Income" for the region.

* In section III.A.i (...detailed affordable housing program...) the applicant clearly shows they do not understand the difference between "affordable housing" and "low income" housing. Sun states they will construct 50 units of "affordable housing where rent/housing costs will be capped for a term of twenty (20) years after receipt of a certificate of occupancy so that the *costs are affordable to a household making eighty percent (80%) of the prevailing area median income for the County*" (emphasis added). Here they have chosen to create their own definition of "affordable housing" by stating it is housing for a family that makes 80 percent of the median county income. When using the term as they have, they ignore the true math: "affordable housing" (per HUD) means it is affordable because the expenses are no more than 30 percent of the gross family income. Sun also misses the mark by neglecting to mention that the *maximum* family monthly income is 80 percent of the median county income.

* Sun also fails to adhere to the premise of the CEMC 17.45.080(C) by neglecting to mention how they will "assure continuation as affordable units". In fact, they oppose the requirement by stating they will only allow affordable housing to exist for twenty years. What will become of the residents in these units in year twenty one? Will they be evicted because Sun decides to triple the rent to match market rates?

NOTE: the same incorrect application of the term "affordable housing" is used later in this document:, see LU Policy 1.9 (page 48), Housing Element H-1.2 (page 60), and Housing Element H-19 (page 61).

IV Planned Mixed Use Final Plat Application Section A.1.B Objective 9 "To maintain Old Town as the principal retail center for the City of Cle Elum" - CEMC 17.45.010(B)(9) - page 35
Here Sun completely avoids the objective and distorts the truth entirely. Old Town (including the Gateway center) have had numerous continuous vacancies - short term and long term - over the years, despite being the only "game" in town. Sun claims their 25-acre "commercial center" is "smaller-scale" and "will not be large enough to supplant Old Town as the City's principal retail center". I'm not sure how they figure that their 25-acres (which exceeds the land size of the gateway commercial center) is "smaller". They further mention (not the first time in their proposal) a "second grocery store" without providing any evidence of its viability. One does not need to look very hard to see and understand that a grocery store requires approximately 5,000 residents to support it, hence Ellensburg's 18,000+ residents enjoy three grocery stores while Cle Elum's 2,300 support one.

* IV Planned Mixed Use Final Plat Application Section A.2 CEMC 17.16 Residential Districts - page 38
Per CEMC the purpose of the Residential District zone is to "create and maintain stable and attractive residential neighborhoods, while providing diversity in housing types and *maintaining affordable housing.*"The developer has stated they will only cap the affordable housing units costs for twenty years - this is in direct violation of CEMC 17.16.

* IV Planned Mixed Use Final Plat Application Section A.5 CEMC 17.51 Recreational Vehicle Parks - page 39
Generally speaking, the purpose of CEMC 17.51 is to "ensure that recreational vehicle parks are located, developed and occupied in accordance with standards and regulations which will protect the health, safety, general welfare" of the citizens of Cle Elum and the occupants of the RV Park. The developer states their RV resort will "achieve and enhance the health, safety, and welfare of both the City's residents as well as its guests" with zero proof or further explanation.

This is a completely empty statement - it simply has no substance, no proof, no backing. Sun does not explain how their RV park operations will protect the health, safety, and general welfare of the residents of the city, they simply state it as fact. Simply put, the developer's input here is mere eyewash.

IV Planned Mixed Use Final Plat Application Section A.5.c RV Park Design Standard 13 - CEMC 17.51.010(H) - page 45

There is a requirement for "at least one restroom facility with laundry room including washers and dryers" yet the developer only commits to providing "at least one structure for the provision of laundry services" and fails to mention their compliance with the restroom requirement.

* IV Planned Mixed Use Final Plat Application Section A5d RV Park Accessory Uses Criteria 1 -CEMC 17.51.010(I) - page 47

The criteria states "..additional establishments and the parking areas primarily related to their operations shall not occupy more than five percent of the gross area of the RV park." The response from the applicant states they "may exceed" five percent of the Recreational Resort Parcel and "any required relief from this Code requirement should be granted given the design flexibility inherent in development within the PMU District zone." Apparently Sun feels they can demand the City relieve them of this requirement. The city is under no obligation to meet "demands" of the developer.

IV Planned Mixed Use Final Plat Application Section B.1.a Land Use Element Goal LU-5.1 - error - page 51

Developer again incorrectly states their proposed commercial center will not take "away from downtown Cle Elum as the principal commercial center of the town" when in fact it is larger than the Gateway center which has yet to be fully occupied. Additionally the developer mentions their "desire" (no assurances obviously) that the commercial center will be anchored by a grocery store....

* IV Planned Mixed Use Final Plat Application Section B.1.d. Housing Element Goal H-1.4 -error - page 60

The developer issues a complete and utter falsehood when they state "The Single-Family Community offers the opportunity for home ownership of manufactured homes that are more affordable than traditionally built homes ". As previously mentioned, these homes have higher mortgage rates than traditional homes, suffer annual declines in value, sit on leased land, and are subject to rental increase at the whim of Sun. This is hardly "more affordable" in the long term for a family.

* IV Planned Mixed Use Final Plat Application Section B.2 Approval Criteria 1e Schools - CEMC 17.45.090(2) - page 65

Developer states "The Proposed Conditions provide for adequate mitigation of impacts to schools, as memorialized in the Cle-Elum Roslyn School District—Sun Mitigation Agreement (Proposed Condition 69)." yet the proposed Condition 69 HAS NOT BEEN WRITTEN YET let alone proposed (same for the Hospital District Mitigation Plan - it is unwritten). This is another example of the sloppiness and incompleteness of the applicant's proposal.

* IV Planned Mixed Use Final Plat Application Section B.2 Approval Criteria 1f Affordable Housing - CEMC 17.45.090(2) - page 65

Developer proposes to only permit the housing units to be "affordable" for twenty years. This is unacceptable, there should be no time limit whatsoever.

The final point I'd like to make is actually the most significant. Cle Elum Municipal Code 16.12A.050 sets forth eleven approval criteria for any proposed preliminary subdivision in the city, but I will focus on Criteria 1: "The preliminary plat must be in the public interest".

In response to this requirement, the developer attempts to use the omission of an official definition of "in the public interest" to sway the city into believing the Single-Family Residential Parcel is *subjectively* "in the public interest interest" because it "will provide 527 additional lots for single family housing within the City and will enable the responsible growth of the City while simultaneously preserving the City's traditional small town, mountain character.

Allow me to shred this into some smaller pieces....

1. While the proposal does include 527 additional "single family residential parcels" these are not parcels that you or I or most homeowners in the city are familiar with - these parcels are minuscule in size, offer extremely limited space for a family to recreate, offer little to no privacy, and are not owned by the resident.

2. The developer states these parcels "will enable the responsible growth of the city". Is it really "responsible" to add 527 housing units - units that do not pay property taxes - over a 4-5 year period without ensuring there is adequate funding and infrastructure in place beforehand to accommodate such a rapid expansion? Many would call this careless and irresponsible, and certainly *not in the "public interest"*. It is not in the public interest to bankrupt the city by forcing more people to use the same services without additional funding. The public interest is best served by taxable housing units that are added at a pace that our infrastructure improvements can keep up with.

3. A reasonable person would observe the term "in the public interest" and deduce the meaning quite easily: the item or issue is something that the public is interested in and the item or issue is beneficial to the the public at large. It is clear from the vast public outcry over the proposed project that THE PUBLIC IS NOT INTERESTED. It is clear from the vast public outcry that the public at large finds the proposal does not benefit us.

I ask that you now go back and re-read this letter and add "Is this in the public interest?" to the end of every paragraph that has an * at the beginning of it.

The Sun Communities proposal fails to comply with CEMC 16.12A.050 Criteria 1 - it is NOT in the public interest. For this reason alone, the City Council should stand by their Municipal Code, enforce their Municipal Code, and reject the proposal outright.

[EXTERNAL EMAIL] DO NOT CLICK links or attachments unless you recognize the sender and know the content is safe.

I'll cut right to the chase this time. Here are some obvious reasons to reject the Sun Communities recent proposal:

1. There is no obligation for the City Council to approve the plan, period. There is an existing plan in place that meets the needs of the community.

2. Proposed plan does not comply with Cle Elum Municipal Code on many levels, the most important and obvious one being the proposal is not "in the public interest" and the CEMC specifically states a proposal such as this must be "in the public interest".

3. Sun was well aware their business model was not compatible with the current plan for the Bull Frog Flats UGA but purchased it anyway - they have nothing to lose if their new proposal is denied.

4. Sun's business model does not permit the operation of "affordable housing" in the form of the ten three-story apartment buildings they propose to construct. They fail to identify how they will manage this asset and monitor the qualifications of those occupying the "affordable housing".

5. The expected property tax and sales tax revenue to the city from the proposed development will NEVER occur. Since RV spaces and Manufactured Home lots are not property owned by those occupying them, you are only going to have revenue from one entity - Sun - and it won't nearly be as much as it could be if the UGA contained 1300+ actual homes. The proposed "commercial center" will also fail to produce meaningful tax revenue due to low occupancy rates (they'll remain low as long as there is unoccupied real estate available in downtown which there ALWAYS is).

6. The proposal is full of holes (no pre-approved completed Development agreement, no mitigation proposed for impacts on health care/ emergency devices, no mitigation proposal for impacts on local school district) as well as numerous inconsistencies and blatant lies.

This proposal as submitted should be rejected. Period.

Re: 47 Degrees North Major Amendment proposal

I am writing to inform the city of my very strong opposition to the Sun Communities 47° North proposal for the Bullfrog flats property. The proposed manufactured home / RV community:

- Is in clear violation of the vision for the property adopted by the city and presented to the public as a condition for annexing Bullfrog Flats into the city. It's not in character with the City of Cle Elum and does not comply with fundamental requirements of the city's comprehensive plan, the development agreement, or zoning for the property.

- Instead of traditional neighborhoods that were planned to be connected to and a natural extension of the city, supporting the rest of the city, 47 Degrees North would create a private for-profit community and tourist resort with gates, private roads and utilities which will be separated from the rest of the city. It will create a private city within a city, forever.

- Fiscal studies of 47 Degrees North show that it will not create sufficient tax revenue to cover the city's cost to serve it. Unless the developer agrees to financially cover the substantial deficits, forever, existing city taxpayers will be required to subsidize Sun's development and taxes will go up.

- Sun's 47 Degrees North will be in its entirety a private business not a natural neighborhood (no lots sold, all spots leased), wholly owned by a massive out-of-state publicly traded corporation whose fiduciary duty is to its shareholders, not city taxpayers. Any subsidies of the project would be a gift of public funds to a private entity.

- Is not housing as contemplated for the Bullfrog UGA. It will displace half of the actual housing planned for the area and replace it with a private park designed as a transient playground.

- Will be the largest manufactured home/RV park on the West Coast and will double the population of Cle Elum. Parks of this magnitude have no place in a town as small as Cle Elum. Wrong Place, Wrong Size.

- Sun has eliminated the industrial park component of the approved plan and is proposing a major new retail center to the project which would compete with existing city businesses and will seriously damage Cle Elum's downtown, which the city has invested millions of dollars to reinvigorate. The retail center is in direct conflict with the city's comprehensive plan which states that the Bullfrog Flats Master Plan...."is intended to elevate the DTC (downtown core) as the primary retail and activity nexus for Cle Elum". Current rules for the Bullfrog Flats property prohibit a retail center on the property.

- Provides no significant benefits to city or UKC residents, but creates serious and significant impacts on roads, police, fire, schools, emergency services, hospitals and other public services that can't be (or won't be) fully mitigated by the developer.

- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for. Any such increase in taxes will effectively translate to a subsidy for a private business,

- Denial of 47 Degrees North will not take away or reduce underlying property rights. It will simply require Sun Communities to comply with city's current rules, regulations and comprehensive plan for the property. The original underlying zoning approval and development agreement already allows development of this site, just not as a private resort/manufactured home community/retail center.

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Respectfully,

JL Breitenstein

119 West First Street, Cle Elum, WA 98922
Re: 47 Degrees North Major Amendment proposal

We are writing to inform the city of our very strong opposition to the Sun Communities 47° North proposal for the Bullfrog flats property. The proposed manufactured home / RV community:

□ Is in clear violation of the vision for the property adopted by the city and presented to the public as a condition for annexing Bullfrog Flats into the city. It's not in character with the City of Cle Elum and does not comply with fundamental requirements of the city's comprehensive plan, the development agreement, or zoning for the property.

□ Instead of traditional neighborhoods that were planned to be connected to and a natural extension of the city, supporting the rest of the city, 47 Degrees North would create a private for-profit community and tourist resort with gates, private roads and utilities which will be separated from the rest of the city. It will create a private city within a city, forever.

□ Fiscal studies of 47 Degrees North show that it will not create sufficient tax revenue to cover the city's cost to serve it. Unless the developer agrees to financially cover the substantial deficits, forever, existing city taxpayers will be required to subsidize Sun's development and taxes will go up.

□ Sun's 47 Degrees North will be in its entirety a private business not a natural neighborhood (no lots sold, all spots leased), wholly owned by a massive out-of-state publicly traded corporation whose fiduciary duty is to its shareholders, not city taxpayers. Any subsidies of the project would be a gift of public funds to a private entity.

□ Is not housing as contemplated for the Bullfrog UGA. It will displace half of the actual housing planned for the area and replace it with a private park designed as a transient playground.

□ Will be the largest manufactured home/RV park on the West Coast and will double the population of Cle Elum. Parks of this magnitude have no place in a town as small as Cle Elum. Wrong Place Wrong Size.

□ Sun has eliminated the industrial park component of the approved plan and is proposing a major new retail center to the project which would compete with existing city businesses and will seriously damage Cle Elum's downtown, which the city has invested millions of dollars to reinvigorate. The retail center is in direct conflict with the city's comprehensive plan which states that the Bullfrog Flats Master Plan...."is intended to elevate the DTC (downtown core) as the primary retail and activity nexus for Cle Elum". Current rules for the Bullfrog Flats property prohibit a retail center on the property.

□ Provides no significant benefits to city or UKC residents, but creates serious and significant impacts on roads, police, fire, schools, emergency services, hospitals and other public services that can't be (or won't be) fully mitigated by the developer, and,

□ Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for. Any such increase in taxes will effectively translate to a subsidy for a private business,

□ Denial of 47 Degrees North will not take away or reduce underlying property rights. It will simply require Sun Communities to comply with the city's current rules, regulations and comprehensive plan for the property. The original underlying zoning approval and development agreement already allows development of this site, but not as a private resort/manufactured home community/retail center.

For all of the above stated reasons, and others too numerous to mention, we implore the City to **DENY** this proposed amendment and retain the current approved land use for the property.

Respectfully,

James E Moran & Diane J Moran

My name is Jim Dameron and I live at 200 Just In Time Lane in Cle Elum. I was general counsel for a real estate development company on the East Coast for most of my life. I have seen many projects that enhance the community where it is located. This project is not a positive for the Cle Elum community. I will not go into all the reasons why .....for they have been stated hundreds of times to you. Do not approve this project for it will have multiple unintended consequences and change forever the character of our community. Thanks. Jim Dameron AirPod.

RE: 47 Degrees North.

To whom it may concern:

I am writing to voice my concern and opposition to the proposed 47 Degrees north project. This project looks to have mostly bad effects on our community. The town of Cle Elum, even with the significant recent development, has always been a small town. Our current retail, health, and civil infrastructure are barely able to accommodate the town's current population, much less a new influx of residents that could increase the population by a factor of 3 or 4. In addition, this proposed development of manufactured and mobile homes on leased land are certainly not one that will create a stable and prosperous community. One of the foundations of America's prosperous economy and society has been the ability of citizens to build their wealth through equity value in their homes. This will not happen in a community of leased homes.

The infrastructure upgrades necessary to support this large increase in population will not be supported by a transient and non- owning population nor will it be supported by the developers. These costs will have to be borne by increases to the already high property taxes of the existing residents. One of the side effects of a large scale commercial and civic build out will likely be the destruction of the area's small town and rural character.

Sincerely:

Jim and Judith Fordham, South Cle Elum

[EXTERNAL EMAIL] DO NOT CLICK links or attachments unless you recognize the sender and know the content is safe.

We are opposed to the development for the following reasons:
The city does not have the proper infrastructure to support what is being proposed. Water, sewer, roads, schools, fire, emergency, are all considerations that are sadly lacking and the tax structures will not be enough to support this endeavor. We need low income housing and we need housing where people actually own the land that their houses sit on, more than we need RV opportunities in this county. We agree and support the opinions of the Stop 47 Degrees North citizens group and ask that you deny this development.

- Is not housing as contemplated for the Bullfrog UGA. It will displace half of the actual housing planned for the area and replace it with a private park designed as a transient playground.

- Will be the largest manufactured home/RV park on the West Coast and will double the population of Cle Elum. Parks of this magnitude have no place in a town as small as Cle Elum. Wrong Place, Wrong Size.

- Sun has eliminated the industrial park component of the approved plan and is proposing a major new retail center to the project which would compete with existing city businesses and will seriously damage Cle Elum's downtown, which the city has invested millions of dollars to reinvigorate. The retail center is in direct conflict with the city's comprehensive plan which states that the Bullfrog Flats Master Plan...."is intended to elevate the DTC (downtown core) as the primary retail and activity nexus for Cle Elum". Current rules for the Bullfrog Flats property prohibit a retail center on the property.

- Provides no significant benefits to city or UKC residents, but creates serious and significant impacts on roads, police, fire, schools, emergency services, hospitals and other public services that can't be (or won't be) fully mitigated by the developer.

- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for. Any such increase in taxes will effectively translate to a subsidy for a private business,

- Denial of 47 Degrees North will not take away or reduce underlying property rights. It will simply require Sun Communities to comply with city's current rules, regulations and comprehensive plan for the property. The original underlying zoning approval and development agreement already allows development of this site, just not as a private resort/manufactured home community/retail center.

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Respectfully,

Jamee Bradley

Re: 47 Degrees North Major Amendment proposal

I am writing to inform the city of my very strong opposition to the Sun Communities 47° North proposal for the Bullfrog flats property. The proposed manufactured home / RV community:

- Is in clear violation of the vision for the property adopted by the city and presented to the public as a condition for annexing Bullfrog Flats into the city. It's not in character with the City of Cle Elum and does not comply with fundamental requirements of the city's comprehensive plan, the development agreement, or zoning for the property.
- Instead of traditional neighborhoods that were planned to be connected to and a natural extension of the city, supporting the rest of the city, 47 Degrees North would create a private for-profit community and tourist resort with gates, private roads and utilities which will be separated from the rest of the city. It will create a private city within a city, forever.

- Fiscal studies of 47 Degrees North show that it will not create sufficient tax revenue to cover the city's cost to serve it. Unless the developer agrees to financially cover the substantial deficits, forever, existing city taxpayers will be required to subsidize Sun's development and taxes will go up.

- Sun's 47 Degrees North will be in its entirety a private business not a natural neighborhood (no lots sold, all spots leased), wholly owned by a massive out-of-state publicly traded corporation who's fiduciary duty is to its shareholders, not city taxpayers. Any subsidies of the project would be a gift of public funds to a private entity.

- Is not housing as contemplated for the Bullfrog UGA. It will displace half of the actual housing planned for the area and replace it with a private park designed as a transient playground.

- Will be the largest manufactured home/RV park on the West Coast and will double the population of Cle Elum. Parks of this magnitude have no place in a town as small as Cle Elum. Wrong Place Wrong Size.

June 23, 2023

Mayor Jay McGowan, City of Cle Elum
119 West First Street
Cle Elum, WA 98922
cc City Planner; Councilors Bay-Hansen, Glondo, Harper, Lackey, Lundh, Ratliff and Williams

Re:47 Degrees North

Dear Mayor McGowan:

I implore you to deny Sun Communities application to "amend, modify, and restate the existing land use approvals for the property commonly known as the Bullfrog Flats Urban Growth Area."

In his March l2 letter to Mayor McGowan Bill Raffoul (Senior Vice President, Development Sun Communities, Inc.) claims that this development project that will *enhance the City's reputation as the Heart of the Cascades and result in infrastructure improvements that will benefit all City residents, create new and affordable housing options in the City, and attract new outdoor recreational tourists and visitors to Cle Elum that will bolster the local economy.*

These are promises that cannot be kept.

Specifically, the application requests (1) a major modification of the Bullfrog Flats UGA Master Site Plan approved by the City in 2003; (2) a boundary line adjustment/lot consolidation; (3) a preliminary subdivision for a new single-family residential community; and (4) an amendment and restatement of the existing development agreement between Sun Communities.

In 2002, the Cle Elum City Council approved a Master Site Plan and an Annexation and Development Agreement to guide the development of approximately 1,100 acres bounded by I-90, Bullfrog Road, SR-903, the City Cemetery, and the Washington State Horse Park. Sun Communities accepted those contract terms, but now seeks to amend the contract to allow a completely different land use plan.

True, Sun Communities can request contract amendments, but that does not obligate the City of Cle Elum to agree with them. The city council gets to choose.

Sun Communities proposes a total of 757 single family units and 627 recreational resort sites. Those units could bring in an additional 4,500 people to Cle Elum. The combined population of Cle Elum, Roslyn and South Cle Elum is about 3,800. Doubling our population would incredibly change the nature of this rural community.

Please seriously consider how this glut of people – some permanent, some seasonal – is in direct conflict with the Land Use Goals and Policies in the Cle Elum Comprehensive Plan.

The Bullfrog Flats land use approval was written into the city's comprehensive plan and other long range planning documents. Please review these responsibilities:

- The City of Cle Elum's Planning Department is responsible for implementation of the Cle Elum Comprehensive Plan and the adopted development regulations.

- The Cle Elum City Council is the only body which can adopt or amend an ordinance, which includes amendments to the City Comprehensive Plan and Development Regulations.

- Citizen participation and stakeholder involvement in long-range City planning efforts is necessary for the successful implementation of those community plans.

I implore you as a leader of the Cle Elum community to carefully review your own comprehensive plan, in particular:

Land Use Goal #2: Maintain residential quality and livability suitable for a rural town.
Land Use Policy #2: Land use changes should be guided by topography, soils conditions, adjacent land uses, and the ability of the City to provide facilities and services.

The current Bullfrog Flats approval encourages neighborhoods with a wide range of housing and ownership choices suitable for a wide range of incomes and ages. Written into the approval was a specific desire to promote fee simple ownership. Fee simple ownership involves paying real estate taxes which in turn supports services.
The 47°N proposal provides only two housing types: single family detached and multi-family. None, not a single one, of the 47°N housing choices will include fee simple ownership.

Land Use Goal #3: Preserve Cle Elum's natural environment while allowing for growth and development.
Land Use Policy #3: Ensure that new development does not outpace the City's ability to provide and maintain adequate public facilities and services by allowing new development to occur only when and where adequate facilities exist or can be provided.

The Bullfrog Flats housing supply was anticipated to accommodate 20 to 30 years of normal city growth, while Sun Communities projects that their 47°N housing supply will be gone in five years. It defies logic to expect a small office staff in a small community with limited resources to maintain adequate facilities in a short period of time for that massive amount of infill.

Land Use Goal #5: Create Order and Energy in Commercial Areas.
Land Use Policy #5: The City will coordinate concurrency management review. Developers shall provide information relating to impacts that the proposed development will have on public facilities and services

The proposed retail space would severely inhibit the current growth of Cle Elum's commercial center – a project that has many shareholders and that has been in place for several years.
The 47 Degree North project would provide no significant benefits to residents and tax payers, but will create serious and significant impacts on roads, police, fire, schools, emergency services, hospitals and other public services that can't be fully mitigated by the developer.

Land Use Goal #9: Protect and preserve the character of Cle Elum's historic Downtown Goal Commercial Core
Land Use Policy #9: Seek to provide adequate and appropriate lands for development for all necessary uses to accommodate the City of Cle Elum 2025 Population Projections

The Bullfrog Flats master plan included a 75 acre Business/Light Industrial Park. No retail component was approved in the Bullfrog Flats master plan. This prohibition was included specifically to implement city comprehensive plan policies designating and supporting downtown Cle Elum as the city's retail and commercial focal point.

47°N proposes a 25 acre retail/commercial center with 150,000 square feet of space, about as large as the city's downtown core. The new retail center would clearly compete for business with the downtown core, a clear conflict with the city's comprehensive plan and policies. This is a major policy change the city must carefully consider.

The Sun Communities application:

- is not in character with the City of Cle Elum or the upper valley.
- would create a new and separate private tourist resort and rather than a natural extension of city neighborhoods as originally envisioned/required by city zoning and current approvals,
- will create serious and significant impacts on roads, police, fire, schools, emergency services, hospitals and other public services that can't (or won't) be fully mitigated by the developer, and therefore,
- will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for, essentially a subsidy for a private business.

The current Bullfrog Flats master plan, policies and DA were adopted with widespread public input and support as the blueprint for future city expansion. 47°North has literally no public support which is evidenced by the number of letters and emails Cle Elum city leaders have received opposing this development.

I have some knowledge about how important adherence to a city's Comprehensive Plan is for rural communities to retain their livability and ambiance. I chaired Roslyn's Planning and Historical Preservation Commission for ten years and helped develop our 2008 Comprehensive Plan. I am currently a Roslyn City Councilor.

I implore the City to DENY this proposed major amendment and retain the current approved land use for the property.

Janine Brodine
301 North B Street
Roslyn WA 98941

City of Cle Elum – Mayor, City Council members, Planning Department,

Re: 47 Degrees North Major Amendment proposal

I am writing to provide the city with my very strong concerns about the Sun Communities 47° North proposal for the Bullfrog flats property. The proposed manufactured home / RV community:

– is not in character with the City of Ce Elum or the upper valley (a fundamental requirement of the current zoning for the property),
– would create a new and separate private tourist resort and not a natural extension of city neighborhoods as originally envisioned/required by city zoning and current approvals,
– is in its entirety a private business not a neighborhood (no lots will be created or sold, all spots will be leased, and the project will be private), wholly owned by a large out-of-state publically traded corporation who's fiduciary duty is to its shareholders,
– provides no significant benefits to upper valley residents and tax payers, but
– will create serious and significant impacts on roads, police, fire, schools, emergency services, hospitals and other public services that can't (or won't) be fully mitigated by the developer, and therefore,
– will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to

pay for, essentially a subsidy for a private business,

– Denial of the Sun Communities proposal would not take away or reduce underlying property rights. The original underlying zoning approval would still allow development of this site, just not as a private resort/manufactured home community.

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Respectfully,

Jared Bassetti

Dear Planning,
I am a Cle Elum resident and I am writing to you to inform you of my opposition to the 47 North proposal. We are in support of affordable housing but the size and scale of this development is just mind boggling. The proposed construction type of "trailers" and their general longevity compared to more traditional structures will certainly become an issue that our City will forever be chasing. We feel that this decision will lead to a lower quality of life for those residence here and then over time reduce the property values for the community as these units are not designed for longevity, especially in our environment.

We are opposing this based on these areas;

- The size and scale of this development for a mobile home park is unprecedented, and our City should not be the poster child for this sort of development.
- Support from our volunteer fire department and the police would need to be increased as well as resources at the planning department on how to approve and sign off on so many "temporary' structures. I also suspect that the current building codes and planning approvals will need to be revised as I don't believe they contemplate the magnitude and number of these sort of structures.
- I would imagine that the utility support infrastructure for this, outside of the development's boundaries, will need to be upgraded as well. If this development were to proceed, I do not believe the City can force the developer to share in the costs of upgrading these systems to address there needs. If by chance they are adequate, the capacity taken away will make it harder for the smaller developer and or residence to tap into these utilities as we grow.
- The proposed benefits of this community will bring an increased number of off-road vehicles to our community and these impacts will need to be addressed by the City to ensure the safety of current residence. The location of this development adjacent to the school needs to be closely reviewed on how to manage such a huge number of second home residence and how we ensure they keep these vehicles in designated areas.
- It appears that the tax revenue being generated by this development is actually a cost negative for the City, so the items address above will need to be supplemented by current residence. This is not fair to us and the planning department to should inform us on how this gap will be closed.
- The sheer number of potential 2nd home people may also negatively affect any levy's or future tax proposals furthering the funding gap in our community.

For these reasons we ask the City to deny the 47 North Project in its current configuration.

I would like to be kept updated on the progress of this process with the City. Please add my email or address (60 Yarrow Court Cle Elum WA 98922) to the system.

To: City of Cle Elum – Mayor, City Council members, Planning Department,

We have owned two different homes in the Cle Elum area for the past 10+ years and enjoy the community, amenities, town character, restaurants, local merchants and wonderful outdoor activities. Both of our boys love all seasons in Cle Elum, be it sledding in the winter, mountain biking through the woods, exploring the rivers, watching deer, elk, turkeys and other animals, trail runs while training for cross country, Friday night prime rib dinner at the Sunset Cafe or just a trip to DQ on a hot day.

I am writing to inform the city of my very strong opposition to the Sun Communities 47° North proposal for the Bullfrog flats property. The proposed manufactured home / RV community:

- Is in clear violation of the vision for the property adopted by the city and presented to the public as a condition for annexing Bullfrog Flats into the city. It's not in character with the City of Cle Elum and does not comply with fundamental requirements of the city's comprehensive plan, the development agreement, or zoning for the property.

- Instead of traditional neighborhoods that were planned to be connected to and a natural extension of the city, supporting the rest of the city, 47 Degrees North would create a private for-profit community and tourist resort with gates, private roads and utilities which will be separated from the rest of the city. It will create a private city within a city, forever.

- Fiscal studies of 47 Degrees North show that it will not create sufficient tax revenue to cover the city's cost to serve it. Unless the developer agrees to financially cover the substantial deficits, forever, existing city taxpayers will be required to subsidize Sun's development and taxes will go up.

- Sun's 47 Degrees North will be in its entirety a private business not a natural neighborhood (no lots sold, all spots leased), wholly owned by a massive out-of-state publicly traded corporation who's fiduciary duty is to its shareholders, not city taxpayers. Any subsidies of the project would be a gift of public funds to a private entity.

- Is not housing as contemplated for the Bullfrog UGA. It will displace half of the actual housing planned for the area and replace it with a private park designed as a transient playground.

- Will be the largest manufactured home/RV park on the West Coast and will double the population of Cle Elum. Parks of this magnitude have no place in a town as small as Cle Elum. Wrong Place Wrong Size.

- Sun has eliminated the industrial park component of the approved plan and is proposing a major new retail center to the project which would compete with existing city businesses and will seriously damage Cle Elum's downtown, which the city has invested millions of dollars to reinvigorate. The retail center is in direct conflict with the city's comprehensive plan which states that the Bullfrog Flats Master Plan...."is intended to elevate the DTC (downtown core) as the primary retail and activity nexus for Cle Elum". Current rules for the Bullfrog Flats property prohibit a retail center on the property.

- Provides no significant benefits to city or UKC residents, but creates serious and significant impacts on roads, police, fire, schools, emergency services, hospitals and other public services that can't be (or won't be) fully mitigated by the developer, and,

- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for. Any such increase in taxes will effectively translate to a subsidy for a private business,

- Denial of 47 Degrees North will not take away or reduce underlying property rights. It will simply require Sun Communities to comply with city's current rules, regulations and comprehensive plan for the property. The original underlying zoning approval and development agreement already allows development of this site, just not as a private resort/manufactured home community/retail center.

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

I am opposed to 47 North development for the following reasons:

The impact it will have on our schools.

Each school bus Hwy 903 traffic in case of fire or just daily traffic load

Increase in taxes.

We will need additional police officers and fire fighters

Increased in crime

TO WHOM IT MAY CONCERN,

FIRST OF ALL, I CANNOT SEE ONE SINGLE REASON THAT SUN COMMUNITIES AND 47 DEGREES NORTH WILL BENEFIT THE CLE ELUM COMMUNITY! I HAVE 3 MAJOR ISSUES:

1...NEARLY 6 YEARS AGO (LABOR DAY), I WAS EVACUATED AT MIDNIGHT; FIRE IS COMING…15 MINUTES TO GET OUT! I LIVE NEAR LAKE CLE ELUM ON SR 903. ONE WAY IN AND ONE WAY OUT TO I-90. IF THERE IS A FIRE, WILL BULLFROG ROAD BE ACCESSABLE TO PEOPLE WHERE I LIVE? WILL IT BE FULL OF 47 DEGREES NORTH PEOPLE? DOES SUN PLAN ON WIDENING BULLFROG?

2...HOW MANY PORTA-POTTIES WILL THE CAMPGROUND HAVE & WHO WILL MAINTAIN THEM? I ENVISION MANY OF THE HOMELESS IN SEATTLE COMING TO THIS BEAUTIFUL PLACE TO LIVE TEMPORARILY…HOW EVER LONG CAN THEY STAY? IF ANY OF THE COUNCIL MEMBERS KNOW WHAT SALMON LA SAC AND THE LAKE IS LIKE DURING THE SUMMER, THEY'LL UNDERSTAND MY CONCERN. I HAVE A CAMPER FRIEND WHO HAS TO TAKE A GARBAGE BAG TO CLEAN UP HUMAN WASTE & GARBAGE BEFORE THEY SET UP CAMP. WHO WILL KEEP THE CAMPGROUND CLEAN? THE FOREST SERVICE? THE CITY? THE HOMELESS WON'T.

3...WHERE WILL OUR BEAUTIFUL WILDLIFE GO? IT'S ONE OF THE REASONS WE LIVE HERE; TO CATCH A GLIMPSE OF NATURE ONCE IN AWHILE.

I HAVE TO ADMONISH SUNCADIA GOLF ASSOC. FOR ALLOWING SUN COMMUNITIES TO SPONSOR THEIR GOLF TOURNEMENT. I HAVE ALSO TO ADMONISH THE CITY COUNCIL FOR LINING THEIR POCKETS WITH GIFTS FROM SUN IN ORDER TO WEASEL SUN'S WAY INTO OUR COMMUNITY. IT AMAZES ME THAT THE COUNCIL CAN SPIN THINGS TO MAKE IT SEEM LIKE THIS WILL BENEFIT CLE ELUM. IT'S REALLY AN INSULT TO THE INTELLIGENCE OF OUR RESIDENTS.

Re: 47 Degrees North Major Amendment proposal

Good Afternoon. I am writing to provide the city with my very strong concerns about the Sun Communities 47° North proposal for the Bullfrog flats property.

Cle Elum and the surrounding areas have already turned significantly into a VBRO community. People with no connection to the community come for a few days, party, overwhelm the local infrastructure, and surrounding natural environment. 47° North will greatly exacerbate the problem and will be a further destroy the fabric of the community. Since this has development has been proposed I have not spoken to one resident of the area that supports it.

- It clearly violates the vision for the property adopted by the city and presented to the public as a condition for annexing Bullfrog Flats into the city. It's not in character with the City of Cle Elum and does not comply with fundamental requirements of the city's comprehensive plan, the development agreement, or zoning for the property.

- Will be the largest manufactured home/RV park on the West Coast and will double the population of Cle Elum. Parks of this magnitude have no place in a town as small as Cle Elum. Wrong Place Wrong Size.
- Sun has eliminated the industrial park component of the approved plan and is proposing a major new retail center to the project which would compete with existing city businesses and will seriously damage Cle Elum's downtown, which the city has invested millions of dollars to reinvigorate. The retail center is in direct conflict with the city's comprehensive plan which states that the Bullfrog Flats Master Plan...."is intended to elevate the DTC (downtown core) as the primary retail and activity nexus for Cle Elum". Current rules for the Bullfrog Flats property prohibit a retail center on the property.
- Provides no significant benefits to city or UKC residents, but creates serious and significant impacts on roads, police, fire, schools, emergency services, hospitals and other public services that can't be (or won't be) fully mitigated by the developer, and,
- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for. Any such increase in taxes will effectively translate to a subsidy for a private business,
- Denial of 47 Degrees North will not take away or reduce underlying property rights. It will simply require Sun Communities to comply with city's current rules, regulations, and comprehensive plan for the property. The original underlying zoning approval and development agreement already allows development of this site, just not as a private resort/manufactured home community/retail center.

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Respectfully,

Jeff Mallula

Re: 47 Degrees North Major Amendment proposal

I am writing to inform the city of my very strong opposition to the Sun Communities 47° North proposal for the Bullfrog flats property. The proposed manufactured home / RV community:

- Is in clear violation of the vision for the property adopted by the city and presented to the public as a condition for annexing Bullfrog Flats into the city. It's not in character with the City of Cle Elum and does not comply with fundamental requirements of the city's comprehensive plan, the development agreement, or zoning for the property.

- Instead of traditional neighborhoods that were planned to be connected to and a natural extension of the city, supporting the rest of the city, 47 Degrees North would create a private for-profit community and tourist resort with gates, private roads and utilities which will be separated from the rest of the city. It will create a private city within a city, forever.

- Fiscal studies of 47 Degrees North show that it will not create sufficient tax revenue to cover the city's cost to serve it. Unless the developer agrees to financially cover the substantial deficits, forever, existing city taxpayers will be required to subsidize Sun's development and taxes will go up.

- Sun's 47 Degrees North will be in its entirety a private business not a natural neighborhood (no lots sold, all spots leased), wholly owned by a massive out-of-state publicly traded corporation who's fiduciary duty is to its shareholders, not city taxpayers. Any subsidies of the project would be a gift of public funds to a private entity.

- Is not housing as contemplated for the Bullfrog UGA. It will displace half of the actual housing planned for the area and replace it with a private park designed as a transient playground.

- Will be the largest manufactured home/RV park on the West Coast and will double the population of Cle Elum. Parks of this magnitude have no place in a town as small as Cle Elum. Wrong Place Wrong Size.

- Sun has eliminated the industrial park component of the approved plan and is proposing a major new retail center to the project which would compete with existing city businesses and will seriously damage Cle Elum's downtown, which the city has invested millions of dollars to reinvigorate. The retail center is in direct conflict with the city's comprehensive plan which states that the Bullfrog Flats Master Plan…."is intended to elevate the DTC (downtown core) as the primary retail and activity nexus for Cle Elum". Attached is a PDF containing two separate letters (one from myself and one from my wife) expressing our strong opposition to the 47 Degrees North Development. This development has no place in Cle Elum and would detract, not add, to the lifestyle and tranquility of the area. Please do not allow this travesty to occur.

Thank you!

RE: 47 Degrees North Major Amendment Proposal

I am writing to inform the city of my very strong opposition to the Sun Communities 47° North proposal for the Bullfrog flats property. The proposed manufactured home / RV community will result in negative impacts:

o Traffic gridlock with high volume of transient visitors in large recreational vehicles
o Decreased level of service for emergency medical services
o Decreased level of service for police protection
o Decreased level of service for fire protection
o Increased tax burden on existing property owners to pay for aging infrastructure (water, sewer, power, roads)
o Potential to increase jobs yet does little to offer adequate affordable housing options in relationship to number of workers necessary to support multiple resorts in the area.
o Potential to require additional city resources to manage and address concerns by a high volume of transient visitors.
o High volume of short-term rentals (STRs) tax revenue by law are applied tourism rather than infrastructure upgrades.
o 90% of profits will be, by law, sent out of our community to Wall Street investors.

Even though I see significant growth in the area to come, I don't believe this amendment for land use is the right path for this growth. For these reasons, I implore the City to DENY this proposed major amendment and retain the current approved land use for the property.

119 West First Street, Cle Elum, WA 98922

I am writing to inform the City of Cle Elum of my very strong opposition to the Retail Component of the Sun Communities 47 Degrees North Proposal. I am also requesting that the City initiate a new Environmental Impact Review that studies and compares the impact of the 47 Degrees North Retail against the backdrop of the current retail that exists within the Downtown Core.

I represent the aforementioned business that is located within the Cle Elum Downtown Core. Cle Elum has had a decades long policy of supporting the Downtown Core and the Downtown Master Plan by prohibiting retail on the Bullfrog Flats Property, specifically so that it won't compete with Downtown businesses. The City's Comprehensive Plan, Pre-Annexation Agreement, Subarea Plan, and the Development Agreement all specifically and excruciatingly exclude retail from the Bullfrog Flats Property, so as to maintain and enhance the existing retail core of the City of Cle Elum.

Any retail development created within the Bullfrog Flats Property will certainly have the effect of diverting customers and revenues. Excess storefront capacity currently and historically exists within our Downtown Core. Efforts to revitalize our City need to focus on building up the Old Town portion of Cle Elum rather than breaking it apart and effectively allocating 50% of the City's retail space to what would be the largest landlord in the county.

Sincerely,

Jeffrey Dantzler

Attn: Cle Elum City Council, Mayor & City Planning Commission

From: Jennifer E. Rogers

This letter is in regards to the 47 Degrees North project that is proposed to go in to the City of Cle Elum. I have many concerns regarding this project.

The first of my concerns is the impact it will have on City of Cle Elum infrastructure. From what has been discussed, the project will essentially double the size of the City of Cle Elum. If the City is going to double in size, it will need proper infrastructure and supports, such as; police, fire, and ambulance service. It will also heavily impact the school, water system, roadways, and retail locations. I don't see where 47 Degrees North is running realistic numbers on these impacts and providing proper budgets and staffing to lessen/mitigate these impacts.

Previous developments that have come into the area have promised police and police vehicles. These items have never come to fruition for one reason or another. I have strong beliefs that 47 Degrees North will do the same thing. The local police department cannot take on any extra developments/housing without proper budgeting. The residents of this development will most likely recreate in the local forests, which is covered by Forest Service Law Enforcement and the Kittitas County Sheriff's Office. I don't see in any of the plans to provide extra funding to either of these entities.

The current Cle Elum Fire Department is volunteer only. There will need to be a budget to fully fund and staff a career fire department if this development goes in. Ambulance services will also need to be expanded. I don't believe these high dollar budget items are being properly accounted for.

Another of my concerns is the negative impact this development will have on the Washington State Horse Park. The Horse Park has worked very hard to develop a trail system through the wooded areas that is used by thousands of equestrians annually. These activities are very beneficial to the community's economy due to the riders staying in local hotels, eating at restaurants and having a very low impact on schools, police, and fire services.

I would request the City preserve the 75 acres and 8-acre buffer zone and let it be included permanently in with the horse park. This will provide a safe environment for riders and maintain the positive economic impact that the equestrian community has on the City.

There are also a lot of wildlife who call the Bullfrog Flats area "home". This development will negatively impact wildlife in the area. The wildlife are already struggling from recent forest fires and being moved out of their normal territories by other developments. By preserving as much forested/wooded land as possible, this will lessen the impact on wildlife in the area.

In closing, please vote "no" on the proposed 47 Degrees North project. Putting a trailer park style housing development within City limits will negatively impact the City, its residents, wildlife, and many others. Thank you for your consideration.

Sincerely,

Jennifer E. Rogers

Re: 47 Degrees North Major Amendment proposal

I am writing to inform the city of my very strong opposition to the Sun Communities 47° North proposal for the Bullfrog flats property. The proposed manufactured home / RV community:

- Is in clear violation of the vision for the property adopted by the city and presented to the public as a condition for annexing Bullfrog Flats into the city. It's not in character with the City of Cle Elum and does not comply with fundamental requirements of the city's comprehensive plan, the development agreement, or zoning for the property.

- Instead of traditional neighborhoods that were planned to be connected to and a natural extension of the city, supporting the rest of the city, 47 Degrees North would create a private for-profit community and tourist resort with gates, private roads and utilities which will be separated from the rest of the city. It will create a private city within a city, forever.

- Fiscal studies of 47 Degrees North show that it will not create sufficient tax revenue to cover the city's cost to serve it. Unless the developer agrees to financially cover the substantial deficits, forever, existing city taxpayers will be required to subsidize Sun's development and taxes will go up.

- Sun's 47 Degrees North will be in its entirety a private business not a natural neighborhood (no lots sold, all spots leased), wholly owned by a massive out-of-state publicly traded corporation whose fiduciary duty is to its shareholders, not city taxpayers. Any subsidies of the project would be a gift of public funds to a private entity.

- Is not housing as contemplated for the Bullfrog UGA. It will displace half of the actual housing planned for the area and replace it with a private park designed as a transient playground.

- Will be the largest manufactured home/RV park on the West Coast and will double the population of Cle Elum. Parks of this magnitude have no place in a town as small as Cle Elum. Wrong Place, Wrong Size.

- Sun has eliminated the industrial park component of the approved plan and is proposing a major new retail center to the project which would compete with existing city businesses and will seriously damage Cle Elum's downtown, which the city has invested millions of dollars to reinvigorate. The retail center is in direct conflict with the city's comprehensive plan which states that the Bullfrog Flats Master Plan…."is intended to elevate the DTC (downtown core) as the primary retail and activity nexus for Cle Elum". Current rules for the Bullfrog Flats property prohibit a retail center on the property.

- Provides no significant benefits to city or UKC residents, but creates serious and significant impacts on roads, police, fire, schools, emergency services, hospitals and other public services that can't be (or won't be) fully mitigated by the developer.

- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for. Any such increase in taxes will effectively translate to a subsidy for a private business,

- Denial of 47 Degrees North will not take away or reduce underlying property rights. It will simply require Sun Communities to comply with city's current rules, regulations and comprehensive plan for the property. The original underlying zoning approval and development agreement already allows development of this site, just not as a private resort/manufactured home community/retail center.

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Subject: Oppose 47° North

[EXTERNAL EMAIL] DO NOT CLICK links or attachments unless you recognize the sender and know the content is safe.

We are writing in total opposition to the 47° North development. Nothing - I repeat nothing - about this proposal will do anything beneficial for Upper Kittitas County! Both of us were born, raised, lived, educated and worked in Roslyn and Cle Elum. Our families lived and worked in UKC since the early 1900's...some owned and operated businesses and served in local groups and politics.

First of all, the company proposing the development does not have a good record of completing their projects without serious problems being dropped on the communities.

Second, the development is touted as being "affordable" housing. How? The price for a manufactured home is starting at $350k. The buyer will not own the property and they will be subject to unlimited maintenance fees in addition to their house payment! Affordable?

Third, the UKC already has serious traffic and service issues due to the huge influx of people seeking to leave the west side! Yet there is no provision or budget for the necessary increase in police, fire and emergency medical services, all of which are currently strained without the addition of this woefully lacking development. There are not enough county or city services to provide infrastructure maintenance. Limited ingress and egress via local roads already could cause a disaster in case of a large fire or other natural disaster. Is it realistic to add hundreds more cars to that mess? And one grocery store? Seriously?

From watching this development progress and the absolutely ridiculous agreement given by the Cle Elum mayor and council, it appears every one of them is sadly influenced only by the promise of the almighty dollar rather than common sense and concern for the residents of the UKC! Disgusting!

Stop this development and any more like it!

Subject: 47 Degrees North Project Comments

[EXTERNAL EMAIL] DO NOT CLICK links or attachments unless you recognize the sender and know the content is safe.

Thank you for considering our comments. Our home is located at 1731 Coal Mine Way, Cle Elum, WA 98922. Being part of the Cle Elum community has surpassed our expectations in terms of recreational diversity, safety and welcoming business/community resources. When we purchased our home in 2020, we were not aware of the possibility of a 47 Degrees North Project. We now are familiar with the presently proposed development; and, that it has evolved from a project that was introduced over 20 years ago. We can only imagine the growth that has physically occurred over the ensuing years in Cle Elum, including: Suncadia and Tumble Creek, plus the Roslyn, Ronald to Salmon La Sac corridor. While we did not live through these changes and their impacts, allow us to share our present day comments and concerns.

- We appreciate the need for affordable housing that complements Cle Elum's neighborhoods in terms of density, design and safety to perpetuate the integrity of Cle Elem.
- We question the ability of the community to sustain the resulting demands on the local roads, power grid, water and sewer systems which the 47 Degree North Project could create.
- Can the local public safety apparatus scale up to accommodate the scale of this non-permanent/fixed population?
- We are concerned by the consequent increase of traffic on Bullfrog Road including the I90 entrances. The summer Sunday afternoon experiences already include traffic driving around I 90 congestion and utilizing Bullfrog as the final link in a "Waze" shortcut strategy. Add to this the flow of cars from the communities west of Cle Elum and the present volume appears to tax the capacity of Bullfrog Road and adjoining arterials. Can the Cle Elum weekend road system accommodate additionally hundreds of motor homes?
- We are very concerned what the evacuation experience would be like during a natural disaster, like a forest fire.
- We are in awe of the elk and deer herds that frequent our area, especially in close proximity to Bullfrog Road. How would a new large scale development impact their existence and habitat?

Reflecting these concerns, we ask that you not allow the revised 47 Degrees North Project to proceed.

Regards,
Jerry & Ruthann Martin

Re: 47 Degrees North Major Amendment proposal

I am writing to inform the city of my very strong opposition to the Sun Communities 47° North proposal for the Bullfrog flats property. The proposed manufactured home / RV community:

- Is in clear violation of the vision for the property adopted by the city and presented to the public as a condition for annexing Bullfrog Flats into the city. It's not in character with the City of Cle Elum and does not comply with fundamental requirements of the city's comprehensive plan, the development agreement, or zoning for the property.

- Instead of traditional neighborhoods that were planned to be connected to and a natural extension of the city, supporting the rest of the city, 47 Degrees North would create a private for-profit community and tourist resort with gates, private roads and utilities which will be separated from the rest of the city. It will create a private city within a city, forever.

- Fiscal studies of 47 Degrees North show that it will not create sufficient tax revenue to cover the city's cost to serve it. Unless the developer agrees to financially cover the substantial deficits, forever, existing city taxpayers will be required to subsidize Sun's development and taxes will go up.

- Sun's 47 Degrees North will be in its entirety a private business not a natural neighborhood (no lots sold, all spots leased), wholly owned by a massive out-of-state publicly traded corporation whose fiduciary duty is to its shareholders, not city taxpayers. Any subsidies of the project would be a gift of public funds to a private entity.

- Is not housing as contemplated for the Bullfrog UGA. It will displace half of the actual housing planned for the area and replace it with a private park designed as a transient playground.

- Will be the largest manufactured home/RV park on the West Coast and will double the population of Cle Elum. Parks of this magnitude have no place in a town as small as Cle Elum. Wrong Place, Wrong Size.

- Sun has eliminated the industrial park component of the approved plan and is proposing a major new retail center to the project which would compete with existing city businesses and will seriously damage Cle Elum's downtown, which the city has invested millions of dollars to reinvigorate. The retail center is in direct conflict with the city's comprehensive plan which states that the Bullfrog Flats Master Plan...."is intended to elevate the DTC (downtown core) as the primary retail and activity nexus for Cle Elum". Current rules for the Bullfrog Flats property prohibit a retail center on the property.

- Provides no significant benefits to city or UKC residents, but creates serious and significant impacts on roads, police, fire, schools, emergency services, hospitals and other public services that can't be (or won't be) fully mitigated by the developer.

- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for. Any such increase in taxes will effectively translate to a subsidy for a private business,

- Denial of 47 Degrees North will not take away or reduce underlying property rights. It will simply require Sun Communities to comply with city's current rules, regulations and comprehensive plan for the property. The original underlying zoning approval and development agreement already allows development of this site, just not as a private resort/manufactured home community/retail center.

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Respectfully,

How do I speak for the trees, the Elk, the songbirds & bats
For the bear or for the children that have not been born yet.

Dear Reader & City of Cle Elum
This is my single cry that you do not allow 47 degrees North Housing Development to go forward, And I know I am not alone.

Our forests are critical for the survival of so many, including us.
The trees that carry Rain from the Ocean inland to us and beyond. We should not cut off the water cycle, We All need it.

It is true we need affordable housing
But we also need a healthy forest to cool, shelter, & bring the rain.

47° North Housing Development does not ensure future affordable housing.
But it will displace more wildlife that truly need it.
We have been experiencing heat events that threaten the forests and our basic health
We need the collective biodiverse wild forest to help cool this valley. Please take a walk and feel the forest, and then compare this to town where the open Sunny concrete is at least 10° warmer & drier.

Please consider how fortunate we are to have our forests and act to protect them.

How will we act as ancestors
For the people, animals and plants that come after us.

Thank you for your time & thoughtful consideration

Jessica Simpson
7491 Lower Peoh Pt. Rd.
Cle Elum, WA
98922

While I did not focus on the impact on town a few thoughts:
- Garbage increase
- Traffic increase
- water consumption increase
- Evacuation Plans in case of Fire
- Schools
- And many other Resources
- Social Consequences of Doubling Population in one Development Rather than thoughtful Steady slow growth.

RE: Objection to the Latitude 47 project

Dear Cle Elum Planning Department,

I am writing today regarding my objections to pending permit application submitted for the proposed 47 Degrees North project.

I am the fourth generation of Roslyn and Cle Elum residence. All 4 of my grandparents were brought her from Europe by their parents who came for jobs in the mines ((Carolo, Arstonic, Rushton & Pasquin). All of my great grandparents were laid to rest in the Roslyn Cemetery. My grandparents still live on Pennsylvania Street in Roslyn.

This proposed development would create a hardship for long time (and mostly elderly) residents who already struggle with the traffic and just getting in and out of the Safeway most days. The roads aren't ready for it, the environment isn't ready for it and as far as I can tell by talking to many local residents and business owners, the people of this area are not ready for it.

Sincerely,

Jessica Rushton-Sternberg

Re: 47 Degrees North Major Amendment proposal

I am writing to inform the city of my very strong opposition to the Sun Communities 47° North proposal for the Bullfrog flats property. The proposed manufactured home / RV community:

- Is in clear violation of the vision for the property adopted by the city and presented to the public as a condition for annexing Bullfrog Flats into the city. It's not in character with the City of Cle Elum and does not comply with fundamental requirements of the city's comprehensive plan, the development agreement, or zoning for the property.

- Instead of traditional neighborhoods that were planned to be connected to and a natural extension of the city, supporting the rest of the city, 47 Degrees North would create a private for-profit community and tourist resort with gates, private roads and utilities which will be separated from the rest of the city. It will create a private city within a city, forever.

- Fiscal studies of 47 Degrees North show that it will not create sufficient tax revenue to cover the city's cost to serve it. Unless the developer agrees to financially cover the substantial deficits, forever, existing city taxpayers will be required to subsidize Sun's development and taxes will go up.

- Sun's 47 Degrees North will be in its entirety a private business not a natural neighborhood (no lots sold, all spots leased), wholly owned by a massive out-of-state publicly traded corporation who's fiduciary duty is to its shareholders, not city taxpayers. Any subsidies of the project would be a gift of public funds to a private entity.

- Is not housing as contemplated for the Bullfrog UGA. It will displace half of the actual housing planned for the area and replace it with a private park designed as a transient playground.

- Will be the largest manufactured home/RV park on the West Coast and will double the population of Cle Elum. Parks of this magnitude have no place in a town as small as Cle Elum. Wrong Place Wrong Size.

- Sun has eliminated the industrial park component of the approved plan and is proposing a major new retail center to the project which would compete with existing city businesses and will seriously damage Cle Elum's downtown, which the city has invested millions of dollars to reinvigorate. The retail center is in direct conflict with the city's comprehensive plan which states that the Bullfrog Flats Master Plan...."is intended to elevate the DTC (downtown core) as the primary retail and activity nexus for Cle Elum". Current rules for the Bullfrog Flats property prohibit a retail center on the property.

- Provides no significant benefits to city or UKC residents, but creates serious and significant impacts on roads, police, fire, schools, emergency services, hospitals and other public services that can't be (or won't be) fully mitigated by the developer, and,

- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for. Any such increase in taxes will effectively translate to a subsidy for a private business,

- Denial of 47 Degrees North will not take away or reduce underlying property rights. It will simply require Sun Communities to comply with city's current rules, regulations and comprehensive plan for the property. The original underlying zoning approval and development agreement already allows development of this site, not just as a private resort/manufactured home community/retail center.

A few additional thoughts related to the approval of the Sun Communities 47° North proposal. The decision will have long-lasting impact on the area. Cle Elum is on an upward trajectory. Ever increasing pride in the community and of home ownership, upgrades to the downtown business area, good communications infrastructure, along with the continuing efforts to improve the already quality education offered by the local schools, to name a few. Considering the: improvements to Interstate 90 heading into the Seattle area and the paradigm shift of businesses offering well-paid opportunities for employment, which only requires being in the office a few days a week or even periodically each month will increase demand for home ownership from professionals seeking a rural quality of life along with all the other advantages such as quality schools and well-planned city infrastructure Cle Elum has to offer. The original program for the expansion of the area proposed for the Sun Communities 47° North project was much better aligned with goals that support this potential and result in a long-lasting legacy fitting to the spirt and aspirations of this wonderful community.
Lastly, having continually studied the response from the Cle Elum community over the past few years, in the minutes from the local community council meetings and in the local newspaper, it is obvious that the responses have been overwhelming negative, so, should the project be granted approval to proceed, many questions would arise which would warrant further investigation, for example:

- At inception what was promised to the original stakeholders of Sun Country Communities related to the management of any overwhelming negative response to the project proposal from the people of Cle Elum and surrounding communities?

- Why was the community's response not given proper priority in the decision to approve or not approve the Sun Communities 47° North proposal?

For all these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Respectfully,

To the City of Cle Elum: Mayor, City Council Members, Planning Department

Re: 47 Degrees North Major Amendment Proposal

I am writing to provide the city with my very strong concerns about the Sun Communities 47°N proposal for the Bullfrog Flats property. The proposed manufactured home/RV community:

- Is not in character with the City of Cle Elum or the upper Kittitas Valley (a fundamental requirement of the current zoning for the property),
- Would create a new and separate private tourist resort instead of the natural extension of city neighborhoods originally envisioned by city zoning and current approvals,
- Is in its entirety a private business not a neighborhood (no lots will be created or sold, all spots will be leased, and the project will be private), wholly owned by a large out-of-state publicly traded corporation whose fiduciary duty is to its shareholders,
- Provides no significant benefits to upper valley residents and tax payers,
- Will create serious and significant impacts on roads, police, fire, schools, emergency services, hospitals, and other public services that can't (or won't) be fully mitigated by the developer, and therefore,
- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for, essentially a subsidy for a private business,
- Denial of the Sun Communities proposal would not take away or reduce underlying property rights. The original underlying zoning approval would still allow development of this site, just not as a private resort/manufactured home community.

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Jim & Kathy Rayborn (name)

411 Beaver Ln, Cle Elum (address)

(over)

47° N is not a project (as required by City Policy) that is dedicated to the city "at no cost." It is not a public asset that generates net revenue.

It worsens the affordable housing problem & does not support downtown business.

Please, prayfully consider the impact this will have on our community...

Vote NO!

Subject: 47* North objections

[EXTERNAL EMAIL] DO NOT CLICK links or attachments unless you recognize the sender and know the content is safe.

Upper county has already seen an enormous influx of inhabitants from all around the country.
Infrastructure is inadequate NOW. This many new residents would cause a huge demand for non-existent water resources. It would further crowd the small town of Cle Elum to the point that it would no longer be livable for the current inhabitants who already have inadequate grocery supply. Inadequate job opportunities and over use of recreational facilities.
Businesses are closing at a rapid rate. Remember M&M hardware? Remember Coast to Coast? Now Bator Lumber is closing shop. It is too expensive to operate a business when so many residents commute, thus shopping on the West side before traveling the pass to their homes.
The Cle Elum area is losing the people whose names are on the road signs. Mastersons, Markovich, etc.
There just isn't room for this many new dwellings. There would need to be stop lights at every intersection.
What I loved about this town is gone now. 47* would destroy what is left.

Jim French
Long time resident and business owner.

- Is in clear violation of the vision for the property adopted by the city and presented to the public as a condition for annexing Bullfrog Flats into the city. It's not in character with the City of Ce Elum and does not comply with fundamental requirements of the city's comprehensive plan, the development agreement, or zoning for the property.

- Instead of traditional neighborhoods that were planned to be connected to and a natural extension of the city, supporting the rest of the city, 47 Degrees North would create a private for-profit community and tourist resort with gates, private roads and utilities which will be separated from the rest of the city. It will create a private city within a city, forever.

- Fiscal studies of 47 Degrees North show that it will not create sufficient tax revenue to cover the city's cost to serve it. Unless the developer agrees to financially cover the substantial deficits, forever, existing city taxpayers will be required to subsidize Sun's development and taxes will go up.

- Sun's 47 Degrees North will be in its entirety a private business not a natural neighborhood (no lots sold, all spots leased), wholly owned by a massive out-of-state publicly traded corporation who's fiduciary duty is to its shareholders, not city taxpayers. Any subsidies of the project would be a gift of public funds to a private entity.

- Is not housing as contemplated for the Bullfrog UGA. It will displace half of the actual housing planned for the area and replace it with a private park designed as a transient playground.

- Will be the largest manufactured home/RV park on the West Coast and will double the population of Cle Elum. Parks of this magnitude have no place in a town as small as Cle Elum. Wrong Place Wrong Size.

- Sun has eliminated the industrial park component of the approved plan and is proposing a major new retail center to the project which would compete with existing city businesses and will seriously damage Cle Elum's downtown, which the city has invested millions of dollars to reinvigorate. The retail center is in direct conflict with the city's comprehensive plan which states that the Bullfrog Flats Master Plan...."is intended to elevate the DTC (downtown core) as the primary retail and activity nexus for Cle Elum". Current rules for the Bullfrog Flats property prohibit a retail center on the property.

- Provides no significant benefits to city or UKC residents, but creates serious and significant impacts on roads, police, fire, schools, emergency services, hospitals and other public services that can't be (or won't be) fully mitigated by the developer, and,

- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for. Any such increase in taxes will effectively translate to a subsidy for a private business,

- Denial of 47 Degrees North will not take away or reduce underlying property rights. It will simply require Sun Communities to comply with city's current rules, regulations and comprehensive plan for the property. The original underlying zoning approval and development agreement already allows development of this site, just not as a private resort/manufactured home community/retail center.

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

RE: 47 Degrees North Major Amendment Proposal

I am writing to inform the city of my **very strong opposition** to the Sun Communities 47° North proposal for the Bullfrog flats property. The proposed manufactured home / RV community will result in negative impacts to our community:

- Traffic congestion with high volume of transient visitors
- Decreased level of service for emergency medical services and possible life threatening If unable to provide timely services to our area.
- Stretching and decreased level of service for police protection
- Fire protection is at risk for an area that has high stakes and risks of fire.
- Additional tax burden on existing property owners to pay for aging infrastructure (water, sewer, power, roads)
- Potential to increase jobs yet this plan does little to offer adequate affordable housing options in relation to the number of workers necessary to support multiple resorts in the area.
- Potential to require additional city resources to manage and address concerns by a high volume of transient visitors.
- High volumes of short-term rentals (STRs) tax revenue by law are applied to tourism rather than infrastructure upgrades.
- 90% of profits will be, by law, sent out of our community to large investment company.

For these reasons, I implore the City to DENY this proposed major amendment and retain the current approved land use for the property.

Respectfully,

JoAnne McDaniels

Re: 47 Degrees North Proposal
I am writing to provide the city with my very strong concerns about the Sun Communities 47°N proposal for the Bullfrog Flats property. The proposed manufactured home/RV community:
· Is not in character with the City of Cle Elum or the upper Kittitas Valley (a fundamental requirement of the current zoning for the property),
· Would create a new and separate private tourist resort instead of the natural extension of city neighborhoods originally envisioned by city zoning and current approvals,
· Is in its entirety a private business not a neighborhood (no lots will be created or sold, all spots will be leased, and the project will be private), wholly owned by a large out-of-state publicly traded corporation whose fiduciary duty is to its shareholders,
· Provides no significant benefits to upper valley residents and tax payers,
· Will create serious and significant impacts on roads, police, fire, schools, emergency services, hospitals, and other public services that can't (or won't) be fully mitigated by the developer, and therefore,
· Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for, essentially a subsidy for a private business,
· Denial of the Sun Communities proposal would not take away or reduce underlying property rights. The original underlying zoning approval would still allow development of this site, just not as a private resort/manufactured home community.
For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

To whom it may concern,
My Husband and I are in opposition to the development being proposed for a number of reasons. The point of time this was first being considered was many years ago before there was such a real estate boom as there as been in the last so many years. The grocery store, the roads and the traffic are already bursting at the seams. The infostructure of CleElum cannot support such an inflex of people. Not only do we see this as a concern but also this was originally proposed as a way for workers in and around the area to have affordable housing but now more of a recreation people coming and going situation. For the people who live in and around the area, as well as the wild life this will be even more crowded. The city of CleElum has infostructure that is already at the end of its useful life. The Wiring and plumbing are in need of updates as it is. Our vote is NO! Thank you for your consideration,
Bill and Joanne Stewart

ADDITIONAL COMMENTS: First of all, thank you for taking the time to read this and for counting me among the many others opposed to the 47 North project. I appreciate all you do for this community. I own a vacation home in Cle Elum, so I do understand why people want to be here for recreation. As a property owner I see a vast contrast in my connection to the community and someone who may come for a short time. The 47 North project would be disasterous for the greater Cle Elum/Roslyn area. I urge you to take the long view on this development as the cost-benefit ratio seems very favorably tilted toward the developer. Costs would eventually be shouldered by local property owners, and without any real benefit to UKC as a whole. I think there are better plans for growth in our community that would be beneficial and sustainable. Thank you for considering this view. Jolly

Re: 47 Degrees North

The Facts
On May 5, 2021, the City of Cle Elum issued Sun Communities a Temporary Use Authorization in connection with building permits relating to five (5) model manufactured homes to be used for public display. The location of the site is 4240 Bullfrog Road, Cle Elum WA.

That Temporary Use Authorization specifically states:

1) This temporary use shall be limited for a period of not to exceed two years from the date of issuance of the first building permit, provided that the authorization may be extended for one additional year, at the City's sole discretion.
2) The Project Sponsor shall apply, receive, and maintain in good standing a City Business License.
3) Prior to the expiration of this use authorization, the model homes, the temporary garage type structure, and all signage shall be removed, and the Project Sponsor shall return the site to its previous condition.

Sun Communities is in direct violation of the Temporary Use Authorization due to the following:

1) It has failed to remove the units or before May 5, 2023, as required; and
2) No business license was applied for, received or maintained

Relief Requested
The City of Cle Elum should require immediate removal of the structures and not elect to extend the non-conforming so-called Temporary Use Authorization.

General Comments
The Cle Elum Municipal Code does not contemplate such a thing as a Temporary Use Authorization. The code does allow for Special Use Permits and Conditional Use Permits, but each of these have specific qualifiers and conditions of approval. The Zoning associated with the location of these model homes is that of General Commercial. That zone contemplates commerce and general uses that serve the community. The trailers are simply staged in an attempt to fool the public into believing that the 47 Degrees North Development has been approved, which it has not.

On the City's website, under the Recent Planning News page, the City has been actively advertising for the model homes for Sun Communities. Statements such as these indicate to the public that the 47 Degrees North development has been approved and is a done deal, which it is not.

Did you know? Sun Communities is currently displaying models of the manufactured homes proposed for the 47 Degrees North project at 4240 Bullfrog Road near the School District Administration Building!

The community has voiced its opposition to the 47 Degrees North development in a loud and clear manner. Following the public comment period, when the tally is over, the City will likely receive close to 1,000 letters of condemnation associated with the project.

I understand that there is a process in play as it relates to the Sun Communities application. However, the City should not be making up new rules favoring the applicant and thumbing its nose at the community in the process.

You have my request and my comments. Please reply to this correspondence identifying what the City's intentions are.

RE: 47 Degrees North Major Amendment Proposal

I am writing to inform the city of my extraordinarily strong opposition to the Sun Communities 47° North proposal for the Bullfrog flats property. The proposed manufactured home / RV community will result in negative impacts:

- Traffic gridlock with high volume of transient visitors in large recreational vehicles
- Decreased level of service for emergency medical services
- Decreased level of service for police protection
- Decreased level of service for fire protection
- Increased tax burden on existing property owners to pay for aging infrastructure (water, sewer, power, roads)
- Increased 2nd home ownership within a private resort adversely impacting many throughout the community.
- Adverse impact to downtown core businesses as resort environment will drive dollars to remain at the resort.
- Potential to increase jobs yet does little to offer adequate affordable housing options in relationship to number of workers necessary to support multiple resorts in the area.
- Potential to require additional city resources to manage and address concerns by a high volume of transient visitors.
- High volume of short-term rentals (STRs) tax revenue by law are applied to tourism rather than infrastructure upgrades.
- 90% of profits will be, by law, sent out of our community to Wall Street investors.

For these reasons, I implore the City to DENY this proposed major amendment and retain the current approved land use for the property.

Re: 47 Degrees North Major Amendment proposal

I am writing to inform the city of my very strong opposition to the Sun Communities 47° North proposal for the Bullfrog flats property. The proposed manufactured home / RV community:

- Is in clear violation of the vision for the property adopted by the city and presented to the public as a condition for annexing Bullfrog Flats into the city. It's not in character with the City of Ce Elum and does not comply with fundamental requirements of the city's comprehensive plan, the development agreement and zoning for the property.

- Instead of traditional neighborhoods that were planned to be connected to and a natural extension of the city, supporting the rest of the city, 47 Degrees North would create a private for-profit community and tourist resort with gates, private roads and utilities which will be separated from the rest of the city. It will create a private city within a city, forever.

- Fiscal studies of 47 Degrees North show that it will not create enough tax revenue to cover the city's cost to serve it. Unless the developer agrees to financially cover the substantial deficits, forever, existing city taxpayers will be required to subsidize Sun's development and taxes will go up.

- Sun's 47 Degrees North will be in its entirety a private business not a natural neighborhood (no lots sold, all spots leased), wholly owned by a massive out-of-state publicly traded corporation who's fiduciary duty is to its shareholders, not city taxpayers. Any subsidies of the project would be a gift of public funds to a private entity.

- Is not housing as contemplated for the Bullfrog UGA. It will displace half of the actual housing planned for the area and replace it with a private park designed as a transient playground.

- Will be the largest manufactured home/RV park on the West Coast and will double the population of Cle Elum. Parks of this magnitude have no place in a town as small as Cle Elum. Wrong Place Wrong Size.

- Sun has proposed a major new retail center in the project which would compete with existing city businesses and will seriously damage Cle Elum's downtown, which the city has invested millions of dollars to reinvigorate. This is totally opposite of the city's comprehensive plan which states that the Bullfrog Flats Master Plan...."is intended to elevate the DTC (downtown core) as the primary retail and activity nexus for Cle Elum". Current rules for the Bullfrog Flats property prohibit a retail center on the property.

- Provides no significant benefits to city or UKC residents, but creates serious and significant impacts on roads, police, fire, schools, emergency services, hospitals and other public services that can't be (or won't be) fully mitigated by the developer, and,

- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for, which will be a subsidy for a private business,

- Denial of 47 Degrees North will not take away or reduce underlying property rights. It will simply require Sun Communities to comply with city's current rules, regulations and comprehensive plan for the property. The original underlying zoning approval and development agreement already allows development of this site, just not as a private resort/manufactured home community/retail center.

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Respectfully,

Re: 47 Degrees North Major Amendment proposal

I am writing to inform the city of my very strong opposition to the Sun Communities 47° North proposal for the Bullfrog flats property. The proposed manufactured home / RV community:

- Is in clear violation of the vision for the property adopted by the city and presented to the public as a condition for annexing Bullfrog Flats into the city. It's not in character with the City of Cle Elum and does not comply with fundamental requirements of the city's comprehensive plan, the development agreement, or zoning for the property.

- Instead of traditional neighborhoods that were planned to be connected to and a natural extension of the city, supporting the rest of the city, 47 Degrees North would create a private for-profit community and tourist resort with gates, private roads and utilities which will be separated from the rest of the city. It will create a private city within a city, FOREVER.

- Fiscal studies of 47 Degrees North show that it will not create sufficient tax revenue to cover the city's cost to serve it. Unless the developer agrees to financially cover the substantial deficits, FOREVER, existing city taxpayers will be required to subsidize Sun's development and taxes will go up.

- Sun's 47 Degrees North will be, in its entirety, a private business, not a natural neighborhood (no lots sold, all spots leased), wholly owned by a massive out-of-state publicly traded corporation whose fiduciary duty is to its shareholders, not city taxpayers. Any subsidies of the project would be a gift of public funds to a private entity.

- Is not housing as contemplated for the Bullfrog UGA. It will displace half of the actual housing planned for the area and replace it with a private park designed as a transient playground.

- Will be the largest manufactured home/RV park on the West Coast and will double the population of Cle Elum. Parks of this magnitude have no place in a town as small as Cle Elum. Wrong Place Wrong Size.

- Sun has eliminated the industrial park component of the approved plan and is proposing a major new retail center to the project which would compete with existing city businesses and will seriously damage Cle Elum's downtown, which the city has invested millions of dollars to reinvigorate. The retail center is in direct conflict with the city's comprehensive plan which states that the Bullfrog Flats Master Plan…."is intended to elevate the DTC (downtown core) as the primary retail and activity nexus for Cle Elum". Current rules for the Bullfrog Flats property prohibit a retail center on the property.

- Provides no significant benefits to city or UKC residents, but creates serious and significant impacts on roads, police, fire, schools, emergency services, hospitals and other public services that can't be (or won't be) fully mitigated by the developer, and,

- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for. Any such increase in taxes will effectively translate to a subsidy for a private business,

- Denial of 47 Degrees North will not take away or reduce underlying property rights. It will simply require Sun Communities to comply with the city's current rules, regulations, and comprehensive plan for the property. The original underlying zoning approval and development agreement already allows development of this site, but not as a private resort/manufactured home community/retail center.

For all these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

RE: 47 Degrees North Major Amendment Proposal

I am writing to inform the city of my extraordinarily strong opposition to the Sun Communities 47° North proposal for the Bullfrog flats property. The proposed manufactured home / RV community will result in negative impacts:

- Traffic gridlock with high volume of transient visitors in large recreational vehicles
- Decreased level of service for emergency medical services
- Decreased level of service for police protection
- Decreased level of service for fire protection
- Increased tax burden on existing property owners to pay for aging infrastructure (water, sewer, power, roads)
- Increased 2nd home ownership within a private resort adversely impacting many throughout the community.
- Adverse impact to downtown core businesses as resort environment will drive dollars to remain at the resort.
- Potential to increase jobs yet does little to offer adequate affordable housing options in relationship to number of workers necessary to support multiple resorts in the area.
- Potential to require additional city resources to manage and address concerns by a high volume of transient visitors.
- High volume of short-term rentals (STRs) tax revenue by law are applied to tourism rather than infrastructure upgrades.
- 90% of profits will be, by law, sent out of our community to Wall Street investors.

For these reasons, I implore the City to DENY this proposed major amendment and retain the current approved land use for the property.

Re: 47 Degrees North

The Facts
On May 5, 2021, the City of Cle Elum issued Sun Communities a Temporary Use Authorization in connection with building permits relating to five (5) model manufactured homes to be used for public display. The location of the site is 4240 Bullfrog Road, Cle Elum WA.

That Temporary Use Authorization specifically states:

1) This temporary use shall be limited for a period of not to exceed two years from the date of issuance of the first building permit, provided that the authorization may be extended for one additional year, at the City's sole discretion.
2) The Project Sponsor shall apply, receive, and maintain in good standing a City Business License.
3) Prior to the expiration of this use authorization, the model homes, the temporary garage type structure, and all signage shall be removed, and the Project Sponsor shall return the site to its previous condition.

Sun Communities is in direct violation of the Temporary Use Authorization due to the following:

1) It has failed to remove the units or before May 5, 2023, as required; and
2) No business license was applied for, received or maintained

Relief Requested
The City of Cle Elum should require immediate removal of the structures and not elect to extend the non-conforming so-called Temporary Use Authorization.

General Comments
The Cle Elum Municipal Code does not contemplate such a thing as a Temporary Use Authorization. The code does allow for Special Use Permits and Conditional Use Permits, but each of these have specific qualifiers and conditions of approval. The Zoning associated with the location of these model homes is that of General Commercial. That zone contemplates commerce and general uses that serve the community. The trailers are simply staged in an attempt to fool the public into believing that the 47 Degrees North Development has been approved, which it has not.

On the City's website, under the Recent Planning News page, the City has been actively advertising for the model homes for Sun Communities. Statements such as these indicate to the public that the 47 Degrees North development has been approved and is a done deal, which it is not.

Did you know? Sun Communities is currently displaying models of the manufactured homes proposed for the 47 Degrees North project at 4240 Bullfrog Road near the School District Administration Building!

The community has voiced its opposition to the 47 Degrees North development in a loud and clear manner. Following the public comment period, when the tally is over, the City will likely receive close to 1,000 letters of condemnation associated with the project.

I understand that there is a process in play as it relates to the Sun Communities application. However, the City should not be making up new rules favoring the applicant and thumbing its nose at the community in the process.

You have my request and my comments. Please reply to this correspondence identifying what the City's intentions are.

Re: 47 Degrees North Major Amendment proposal

I oppose Sun Communities 47° North proposal for the Bullfrog flats property. I am in agreeance with my community members and concur that your proposed development is detrimental to Cle Elum as follows:

- It is in clear violation of the vision for the property adopted by the city and presented to the public as a condition for annexing Bullfrog Flats into the city. It's not in character with the City of Cle Elum and does not comply with fundamental requirements of the city's comprehensive plan, the development agreement, or zoning for the property.
- Instead of traditional neighborhoods that were planned to be connected to and a natural extension of the city, supporting the rest of the city, 47 Degrees North would create a private for-profit community and tourist resort with gates, private roads and utilities which will be separated from the rest of the city. It will create a private city within a city, forever.
- Fiscal studies of 47 Degrees North show that it will not create sufficient tax revenue to cover the city's cost to serve it. Unless the developer agrees to financially cover the substantial deficits, forever, existing city taxpayers will be required to subsidize Sun's development and taxes will go up.
- Sun's 47 Degrees North will be in its entirety a private business not a natural neighborhood (no lots sold, all spots leased), wholly owned by a massive out-of-state publicly traded corporation who's fiduciary duty is to its shareholders, not city taxpayers. Any subsidies of the project would be a gift of public funds to a private entity.
- It is not housing as contemplated for the Bullfrog UGA. It will displace half of the actual housing planned for the area and replace it with a private park designed as a transient playground.
- Will be the largest manufactured home/RV park on the West Coast and will double the population of Cle Elum. Parks of this magnitude have no place in a town as small as Cle Elum. Wrong Place Wrong Size.
- Sun has eliminated the industrial park component of the approved plan and is proposing a major new retail center to the project which would compete with existing city businesses and will seriously damage Cle Elum's downtown, which the city has invested millions of dollars to reinvigorate. The retail center is in direct conflict with the city's comprehensive plan which states that the Bullfrog Flats Master Plan…."is intended to elevate the DTC (downtown core) as the primary retail and activity nexus for Cle Elum". Current rules for the Bullfrog Flats property prohibit a retail center on the property.
- Provides no significant benefits to city or UKC residents, but creates serious and significant impacts on roads, police, fire, schools, emergency services, hospitals and other public services that can't be (or won't be) fully mitigated by the developer, and,
- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for. Any such increase in taxes will effectively translate to a subsidy for a private business,
- Denial of 47 Degrees North will not take away or reduce underlying property rights. It will simply require Sun Communities to comply with city's current rules, regulations and comprehensive plan for the property. The original underlying zoning approval and development agreement already allows development of this site, just not as a private resort/manufactured home community/retail center.

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Sirs

What is the plan to permit and build a new grocery store.? Who is in charge of locating a chain to build here? As everyone knows our Safeway is stressed and especially on summer weekends. The influx of tourists on top of local needs is huge.

Will it be started as the development is started because other developments are in process for the last few years in the upper valley right now and are adding many full and part time residents.

I would strongly oppose that a grocery store be planned a year or longer after final approval of 47N and I think many residents feel the same of the lack of clarity on this issue.

This note is my written opposition to the Sun Communities 47 Degrees North proposal for the Bullfrog Flats property. The type of development proposed is NOT in Cle Elum's best interest to allow. This proposed manufactured home / RV Community will impact Cle Elum negatively,, the following are just some of the impacts:

- Traffic gridlock with a high volume of transient visitors in large recreational vehicles
- Transient visitors traveling and residing in close proximity to local schools
- Decreased level of service for emergency medical services, impacted

- by transient visitors

- Decreased level of service for police protection, impacted by transient visitors

- Decreased level of service for fire protection, impacted by transient visitors

- Increased tax burden on existing property owners for upgrading infrastructure- water, sewer, power, roads, etc

- Adverse impact to local and downtown business as the 'resort' financial plan, will have transient visitor spend remaining mainly with and at the resort

- Impact of local affordable housing with Resort Support staff hiring

- Current 'Short Term Rental' tax revenue is applied to tourism, NOT impacted infrastructure

- Resort profits will be mainly funneled out of the Cle Elum community

For these and many other reasons not listed, I emphatically request the City DENY this proposed major amendment and retain the current approved land use for the property. We really love our Cle Elum community and hope you can prove your love with a strong decision not to approve.

Respectfully,
John and Ellen Kovacevich

Re: 47 Degrees North Proposal

I am writing to provide the city with my very strong concerns about the Sun Communities 47°N proposal for the Bullfrog Flats property. The proposed manufactured home/RV community:

· Is not in character with the City of Cle Elum or the upper Kittitas Valley (a fundamental requirement of the current zoning for the property),

· Would create a new and separate private tourist resort instead of the natural extension of city neighborhoods originally envisioned by city zoning and current approvals,

· Is in its entirety a private business not a neighborhood (no lots will be created or sold, all spots will be leased, and the project will be private), wholly owned by a large out-of-state publicly traded corporation whose fiduciary duty is to its shareholders,

· Provides no significant benefits to upper valley residents and tax payers,

· Will create serious and significant impacts on roads, police, fire, schools, emergency services, hospitals, and other public services that can't (or won't) be fully mitigated by the developer, and therefore,

· Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for, essentially a subsidy for a private business,

· Denial of the Sun Communities proposal would not take away or reduce underlying property rights. The original underlying zoning approval would still allow development of this site, just not as a private resort/manufactured home community.

For all of these reasons, and others, I implore the City to DENY this proposed major amendment and retain the current approved land use for the property.

Dear Council and Mayor

To: City of Cle Elum - Mayor, City Council members, Planning Department,
119 West First Street, Cle Elum, WA 98922
Re: 47 Degrees North Major Amendment proposal

From: Bales family
681 Cabin Trail Drive, Cle Elum, WA

I am writing to inform the city of my very strong opposition to the Sun Communities 47° North proposal for the Bullfrog flats property. The proposed manufactured home / RV community:

- Is in clear violation of the vision for the property adopted by the city and presented to the public as a condition for annexing Bullfrog Flats into the city. It's not in character with the City of Cle Elum and does not comply with fundamental requirements of the city's comprehensive plan, the development agreement, or zoning for the property.

- Instead of traditional neighborhoods that were planned to be connected to and a natural extension of the city, supporting the rest of the city, 47 Degrees North would create a private for-profit community and tourist resort with gates, private roads and utilities which will be separated from the rest of the city. It will create a private city within a city, forever.

- Fiscal studies of 47 Degrees North show that it will not create sufficient tax revenue to cover the city's cost to serve it. Unless the developer agrees to financially cover the substantial deficits, forever, existing city taxpayers will be required to subsidize Sun's development and taxes will go up.

- Sun's 47 Degrees North will be in its entirety a private business not a natural neighborhood (no lots sold, all spots leased), wholly owned by a massive out-of-state publicly traded corporation who's fiduciary duty is to its shareholders, not city taxpayers. Any subsidies of the project would be a gift of public funds to a private entity.

- Is not housing as contemplated for the Bullfrog UGA. It will displace half of the actual housing planned for the area and replace it with a private park designed as a transient playground.

- Will be the largest manufactured home/RV park on the West Coast and will double the population of Cle Elum. Parks of this magnitude have no place in a town as small as Cle Elum. Wrong Place Wrong Size.

- Sun has eliminated the industrial park component of the approved plan and is proposing a major new retail center to the project which would compete with existing city businesses and will seriously damage Cle Elum's downtown, which the city has invested millions of dollars to reinvigorate. The retail center is in direct conflict with the city's comprehensive plan which states that the Bullfrog Flats Master Plan…."is intended to elevate the DTC (downtown core) as the primary retail and activity nexus for Cle Elum". Current rules for the Bullfrog Flats property prohibit a retail center on the property.

- Provides no significant benefits to city or UKC residents, but creates serious and significant impacts on roads, police, fire, schools, emergency services, hospitals and other public services that can't be (or won't be) fully mitigated by the developer, and,

- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for. Any such increase in taxes will effectively translate to a subsidy for a private business,

- Denial of 47 Degrees North will not take away or reduce underlying property rights. It will simply require Sun Communities to comply with city's current rules, regulationsand comprehensive plan for the property. The

original underlying zoning approval and development agreement already allows development of this site, just not as a private resort/manufactured home community/retail center.

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Respectfully,
Josh Bales

I am writing this letter as a very concerned citizen of Upper Kittitas County. My wife and I moved to Cle Elum about 5 years ago to start to raise our family. We loved the area, the friendly small town vibe, the schools, the community, the neighbors, etc. I know growth is inevitable (everyone who moves here always wants to be the last), but to make such a large population jump with the addition of thousands of families between the 2 new proposed developments (the one on Cle Elum ridge along with 47 degrees north) just seems very irresponsible. Cle Elum already has infrastructure problems. Our roads, our health care, law enforcement, fire fighters, grocery stores are going to be stressed to the max daily, let alone what will happen when summer comes and the flood gates of people flock to our county to recreate. The roads that are already backed up for hours on weekends will be a daily occurrence. Our 1 small Grocery store already can't keep up especially in the summer.

My main concern with the addition to the new developments is the schools. I have a child in elementary, middle school and high school. With the addition of a few hundred more kids where are these kids going to go to school? No way will the current schools be able to handle this many extra students, without building new buildings. To think the residents will approve new school bonds and levies for more and new schools after the city created this problem is wishful thinking, it won't happen.

Please don't allow this development to come in and ruin our great City, there is too much at risk.

Thank you,

Josh Matson

Dear Planning Department,

I'm writing to inform the city of my very strong opposition to the Sun Communities 47° North proposal for the Bullfrog flats property. I have owned in Cle Elum for 4 years, and plan to build my retirement home in Cle Elum. We plan to retire here to enjoy the small-town feel, gracious residents and the tremendous opportunities for recreation and simply enjoying our quiet outdoors.

What is being proposed in the current 47 Degrees North plan is going to permanently scar this beautiful place, cause irreparable harm to our shared lands, swamp the area with a new "instant city" of visitors with their RVs, motorcycles, boats and snow machines and is completely out of step with the character of Cle Elum and the surrounding areas. This is not the legacy you would be proud to leave behind.

These are the key issues that I strongly object to:

1. This project will be the largest manufactured home/RV park on the West Coast. Pouring thousands of visitors to our already overcrowded rivers, lakes, campsites and playgrounds. This proposed project is way too much too fast. A slow growing community like the original plan makes so much more sense for handling infrastructure, creating meaningful jobs. A measured slow and steady growth is welcome.

2. This proposed development provides no significant benefits to city or UKC residents, but creates serious and significant impacts on roads, police, fire, schools, emergency services, medical facilities and other public services that can't be (or won't be) fully mitigated by the developer.

3. I-90 in both directions on a Sunday afternoon is currently gridlock.....adding 600+ RVs towing boats, motorcycles, snow machines etc. will make I-90 impassable. If this project happens, we can add Friday afternoon I-90 gridlock to the mix.

4. Wildfires are inevitable - God forbid one rips through our community we will be forced to compete with thousands of people evacuating RVs on one two lane road. We've seen it before in Paradise California- complete pandemonium and disaster. Not to mention an impassable gridlock for the firefighters.

5. As I'm sure you are aware, Fiscal studies of 47 Degrees North show that it will not create sufficient tax revenue to cover the city's cost to serve it.

For these reasons, and many more, I implore the City to DENY this proposed major amendment and retain the current approved land use for the property.

Respectfully,

Joy Mendes

To Whom It May Concern:

Please stop 47 degrees North Project

The Cle Elum area was built upon hard work and effort and protecting the historical roots of this community is essential by keeping the standards that our ancestors also laboured to preserve.

This is not a "transient" community. Please stop the 47 degrees North Project from proceeding, and protect our Community from dealing with "short term housing" and the increased traffic and policing it would require.

We value the tourists that choose to vacation here because it is a safe and secure environment and they too value the history that has been preserved that they may share with future generations

Thank you

Re: 47 Degrees North Major Amendment Proposal
I am writing to provide the city with my very strong concerns about the Sun Communities 47°N proposal for the Bullfrog Flats property. The proposed manufactured home/RV community:

- Is not in character with the City of Cle Elum or the upper Kittitas Valley (a fundamental requirement of the current zoning for the property),
- Would create a new and separate private tourist resort instead of the natural extension of city neighborhoods originally envisioned by city zoning and current approvals,
- Is in its entirety a private business not a neighborhood (no lots will be created or sold, all spots will be leased, and the project will be private), wholly owned by a large out-of-state publicly traded corporation whose fiduciary duty is to its shareholders,
- Provides no significant benefits to upper valley residents and tax payers,
- Will create serious and significant impacts on roads, police, fire, schools, emergency services, hospitals, and other public services that can't (or won't) be fully mitigated by the developer, and therefore,
- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for, essentially a subsidy for a private business,
- Denial of the Sun Communities proposal would not take away or reduce underlying property rights. The original underlying zoning approval would still allow development of this site, just not as a private resort/manufactured home community.

For all of these reasons, and others, I implore the City to DENY this proposed

major amendment and retain the current approved land use for the property.

To the City of Cle Elum: Mayor, City Council Members, and Planning Department

I am writing to provide the city with my very strong concerns about the Sun Communities 47°N proposal for the Bullfrog Flats property. The proposed manufactured home/RV community:

· Is not in character with the City of Cle Elum or the upper Kittitas Valley (a fundamental requirement of the current zoning for the property),

· Would create a new and separate private tourist resort instead of the natural extension of city neighborhoods originally envisioned by city zoning and current approvals,

· Is in its entirety a private business not a neighborhood (no lots will be created or sold, all spots will be leased, and the project will be private), wholly owned by a large out-of-state publicly traded corporation whose fiduciary duty is to its shareholders,

· Provides no significant benefits to upper valley residents and tax payers,

· Will create serious and significant impacts on roads, police, fire, schools, emergency services, hospitals, and other public services that can't (or won't) be fully mitigated by the developer, and therefore,

· Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for, essentially a subsidy for a private business,

· Denial of the Sun Communities proposal would not take away or reduce underlying property rights. The original underlying zoning approval would still allow development of this site, just not as a private resort/manufactured home community.

To whom it may concern:

We are adamantly opposed to the 47 Degrees North project.

Is in clear violation of the vision for the property adopted by the city and presented to the public as a condition for annexing Bullfrog Flats into the city. It's not in character with the City of Cle Elum and does not comply with fundamental requirements of the city's comprehensive plan, the development agreement, or zoning for the property.

Instead of traditional neighborhoods that were planned to be connected to and a natural extension of the city, supporting the rest of the city, 47 Degrees North would create a private for-profit community and tourist resort with gates, private roads and utilities which will be separated from the rest of the city. It will create a private city within a city, forever.

Fiscal studies of 47 Degrees North show that it will not create sufficient tax revenue to cover the city's cost to serve it. Unless the developer agrees to financially cover the substantial deficits, forever, existing city taxpayers will be required to subsidize Sun's development and taxes will go up.

Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for.

For all of these reasons, and others, I implore the City to DENY this proposed major amendment and retain the current approved land use for the property.

Re: 47 Degrees North Major Amendment proposal

I am writing to inform the city of my very strong opposition to the Sun Communities 47° North proposal for the Bullfrog flats property. The proposed manufactured home / RV community:

- Is in clear violation of the vision for the property adopted by the city and presented to the public as a condition for annexing Bullfrog Flats into the city. It's not in character with the City of Cle Elum and does not comply with fundamental requirements of the city's comprehensive plan, the development agreement, or zoning for the property.

- Instead of traditional neighborhoods that were planned to be connected to and a natural extension of the city, supporting the rest of the city, 47 Degrees North would create a private for-profit community and tourist resort with gates, private roads and utilities which will be separated from the rest of the city. It will create a private city within a city, forever.

- Fiscal studies of 47 Degrees North show that it will not create sufficient tax revenue to cover the city's cost to serve it. Unless the developer agrees to financially cover the substantial deficits, forever, existing city taxpayers will be required to subsidize Sun's development and taxes will go up.

- Sun's 47 Degrees North will be in its entirety a private business not a natural neighborhood (no lots sold, all spots leased), wholly owned by a massive out-of-state publicly traded corporation whose fiduciary duty is to its shareholders, not city taxpayers. Any subsidies of the project would be a gift of public funds to a private entity.

- Is not housing as contemplated for the Bullfrog UGA. It will displace half of the actual housing planned for the area and replace it with a private park designed as a transient playground.

- Will be the largest manufactured home/RV park on the West Coast and will double the population of Cle Elum. Parks of this magnitude have no place in a town as small as Cle Elum. Wrong Place, Wrong Size.

- Sun has eliminated the industrial park component of the approved plan and is proposing a major new retail center to the project which would compete with existing city businesses and will seriously damage Cle Elum's downtown, which the city has invested millions of dollars to reinvigorate. The retail center is in direct conflict with the city's comprehensive plan which states that the Bullfrog Flats Master Plan…."is intended to elevate the DTC (downtown core) as the primary retail and activity nexus for Cle Elum". Current rules for the Bullfrog Flats property prohibit a retail center on the property.

- Provides no significant benefits to city or UKC residents, but creates serious and significant impacts on roads, police, fire, schools, emergency services, hospitals and other public services that can't be (or won't be) fully mitigated by the developer.

- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for. Any such increase in taxes will effectively translate to a subsidy for a private business,

- Denial of 47 Degrees North will not take away or reduce underlying property rights. It will simply require Sun Communities to comply with city's current rules, regulations and comprehensive plan for the property. The original underlying zoning approval and development agreement already allows development of this site, just not as a private resort/manufactured home community/retail center.

For all of these reasons, and others, I implore the City to DENY this proposed major amendment and retain the current approved land use for the property.

Respectfully,

Julie Stevens

Mayor McGowan, City Council Members:

I am writing to express my strong opposition to the Sun Communities proposal for the Bullfrog flats property. The decision will be in your hands, but the people of Upper Kittitas County are clearly opposed to the project. In truth, I believe it will impact Roslyn, Ronald, Suncadia, and those of us who live west of the Cle Elum City core, more than the actual city of Cle Elum. I implore you to consider the points of opposition that Roslyn officials and the county Sheriff have brought forth to you in their letters of opposition.

Clearly, our infrastructure will not support this community and, as a resident who travels Bullfrog Road frequently, the traffic that this development will bring is of great concern to me. Already on Sunday afternoons in summer, my husband and I do not leave our home in Sun Country because of the backups on I90, let alone 903 and Bullfrog Road. The Farmer's Market in Roslyn? Nope, we don't want to fight the traffic at the roundabouts to get home. When wildfire happens, there will be one way out...this should be a major concern here!

Beyond traffic, this community will simply ruin the lifestyle that we enjoy now. I equate the project with the 55+ community we travel to in winter in the Phoenix area. Manufactured homes that people buy, but don't own the property, with rents going up annually until they are no longer affordable. Hundreds of RV spaces where people come and go, with no real feeling of belonging to the community. The difference is, in Phoenix the infrastructure is there already! Even then, the people who live there year-round are relieved when we all go home because of the added traffic. So, I expect 47 Degrees North will become the summer place for Arizonans, and others, who want to escape summer heat, Sunbirds, if you will. They will come and go with no feeling for the community and no care for what they do to it. Will they bring added business to Cle Elum? Some, but how much, really, has Suncadia brought? Certainly, we can expect to pay more for everything we have here. Especially in restaurants, just as we've seen happen with the weekend warriors that come here now. Safeway caters to them too, and my understanding is that our Safeway has one of the highest price points in their system. People who have lived here all their lives are being priced out of buying property and even the food they eat! That will only get worse, in my opinion.

Wildlife and the beauty of our landscape will be decimated in the area. The beauty and serenity of Upper County will be forever changed. And how, exactly, will we be benefitted by this development? Ask yourselves, who is benefitting???? Sun Communities will be making money, and probably lots of it, from ruining our environment and lifestyle.

We simply do not have the services in place to support this type of rapid growth, and my understanding is that Sun Communities will have no obligation to provide anything in support of them. Roads, police, fire, schools, emergency services will all need to be paid for and who will be footing that bill? We, the residents of Upper County! And I ask again, what is the benefit to those who already live here and oppose this development? None that I can see.

Please do not let this happen to this beautiful place we all call home! Please!!

Respectfully,

The Honorable Jay McGowan, Mayor
The Honorable City Council
119 West First Street, Cle Elum, WA 98922

May 5, 2023

Dear Mayor McGowan and Cle Elum City Council,

I am writing to express my strongly held belief that the Sun Communities 47° North proposal for the Bullfrog flats property is a horrible idea for our community. As someone who is in favor of business, economic development, affordable housing and sensible development, I see nothing positive and nothing supporting those values in the Sun Communities Proposal.

We know based on their track record that Sun Communities is a bully and is predatory in all of their dealing, with their residents, their hosting communities and everyone else. I know that they have a history of dirty tricks and legal maneuvering. I commend you as a City Government for not falling for their antics or traps to date.

Now that a vote is upon you, I urge you to send these folks packing and to protect our community from all of the awful things that Sun Communities would bring to our lovely little towns. You have the support of the community, the moral high ground and all of the political incentives to deny all that Sun Communities is proposing. I have yet to meet a person in the Upper County who is in favor of 47° North.

I trust you will do the right thing and deny the 47° North proposal.

Respectfully,

ADDITIONAL COMMENTS:

Upper Kittitas County is on a growth trajectory, but growth needs to be planned and supported in a thoughtful manner. My husband and I are both first responders (volunteer) in our community, and the insane burden to our emergency services that the 47 Degrees North project represents is appalling and untenable. Our first responders are already struggling to manage the 800+ calls a year we currently receive, and ~~more~~ more than doubling the population of Cle Elum will further jeopardize all UKC residents. The business practices (or lack thereof) demonstrated by Sun Communities (here and at their other builds) should be enough for a reasonable city government to refuse. They have already broken both rules and promises in UKC—why would we give them the opportunity to continue, in a way that could utterly break our community. Additionally, our schools, stores, and other community assets (parks etc) are simply not large enough to accommodate this kind of rapid growth. Please protect our community, your neighbors, and all the things we love about living in Upper Kittitas County. Say NO to 47° North. Thank you.

Re: 47 Degrees North Major Amendment proposal

I am writing to inform the city of my very strong opposition to the Sun Communities 47° North proposal for the Bullfrog flats property. The proposed manufactured home / RV community:

- The proposed development is a clear violation of the vision for the property adopted by the city and presented to the public as a condition for annexing Bullfrog Flats into the city. It's not in character with the City of Ce Elum and does not comply with fundamental requirements of the city's comprehensive

plan, the development agreement, or zoning for the property. I am not against development, I'm simply against Sun Communities and this proposed plan.

- Instead of traditional neighborhoods that were planned to be connected to and a natural extension of the city, supporting the rest of the city, 47 Degrees North would create a private for-profit community and tourist resort with gates, private roads and utilities which will be separated from the rest of the city. It will create a private city within a city, forever.

- Fiscal studies of 47 Degrees North show that it will not create sufficient tax revenue to cover the city's cost to serve it. Unless the developer agrees to financially cover the substantial deficits, forever, existing city taxpayers will be required to subsidize Sun's development and taxes will go up.

- Sun's 47 Degrees North will be in its entirety a private business not a natural neighborhood (no lots sold, all spots leased), wholly owned by a massive out-of-state publicly traded corporation who's fiduciary duty is to its shareholders, not city taxpayers.

- The proposal does not include any mention of how the manufactured homes/lots and RV's will be maintained from a safety and esthetics point of view and or how Sun will manage these aspects of the development. It has the potential to be an eyesore in the community. Furthermore, there is no mention of what the maximum stay duration will be for the RV's - they say it is an 'RV Resort' and the word resort sounds like it would be short duration. But since there is no mention of the stay duration, it is highly likely the 'resort' will evolve into a transient, trash riddled trailer park where 'guests' can stay as long as they continue to pay rent or worse, become a place where Seattle can house their homeless population.

- It is not housing as contemplated for the Bullfrog UGA. It will displace half of the actual housing planned for the area and replace it with a private park designed as a transient playground.

- It will be the largest manufactured home/RV park on the West Coast and will double the population of Cle Elum practically overnight. Parks of this magnitude have no place in a town as small as Cle Elum.

- Sun has eliminated the industrial park component of the approved plan and is proposing a major new retail center to the project which would compete with existing city businesses and will seriously damage Cle Elum's downtown, which the city has invested millions of dollars to reinvigorate. The retail center is in direct conflict with the city's comprehensive plan which states that the Bullfrog Flats Master Plan...."is intended to elevate the DTC (downtown core) as the primary retail and activity nexus for Cle Elum". Current rules for the Bullfrog Flats property prohibit a retail center on the property.

- There are no significant benefits to city or UKC residents, but creates serious and significant impacts on roads, police, fire, schools, emergency services, hospitals and other public services that can't be (or won't be) fully mitigated by the developer.

- It will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for. Any such increase in taxes will effectively translate to a subsidy for a private business. There are no plans to increase the number of public roads and or to widen the roads so as to mitigate the increased amount of traffic.

- Denial of 47 Degrees North will not take away or reduce underlying property rights. It will simply require Sun Communities to comply with city's current rules, regulations and comprehensive plan for the property. The original underlying zoning approval and development agreement already allows development of this site, just not as a private resort/manufactured home community/retail center.

- This development and its effects on the community will significantly reduce home values in the area, particularly for Suncadia and Tumble Creek home owners who live directly across Bullfrog Road. If this development is approved, we will immediately put our house on the market for sale. We have neighbors that will be doing the same.

- Sun Communities is a billion dollar publicly traded company and they can afford to walk away from this project, now and or at any time in the future. If this project is declined, they can sell the property to a more traditional builder/developer like Lennar, Pulte, Toll Brothers and D.R. Horton and still generate a sizable return to their investors. Those more traditional builders would adhere to the original plan and

generate more tax revenue for the city and grow at a pace that the county and city could absorb. However, if this project is approved by your team and the development goes in, they will have the biggest say in what happens in the city/community - essentially muting your power. And should they choose to abandon and or sell at any time, to whomever, the city and the community will be left with the mess that will take generations to recover from.

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Thank you and regards,

Karen Gray

Re: 47 Degrees North Major Amendment proposal

I am writing to inform the city of my very strong opposition to the Sun Communities 47° North proposal for the Bullfrog flats property. The proposed manufactured home / RV community:

- Is in clear violation of the vision for the property adopted by the city and presented to the public as a condition for annexing Bullfrog Flats into the city. It's not in character with the City of Cle Elum and does not comply with fundamental requirements of the city's comprehensive plan, the development agreement, or zoning for the property.

- Instead of traditional neighborhoods that were planned to be connected to and a natural extension of the city, supporting the rest of the city, 47 Degrees North would create a private for-profit community and tourist resort with gates, private roads and utilities which will be separated from the rest of the city. It will create a private city within a city, forever.

- Fiscal studies of 47 Degrees North show that it will not create sufficient tax revenue to cover the city's cost to serve it. Unless the developer agrees to financially cover the substantial deficits, forever, existing city taxpayers will be required to subsidize Sun's development and taxes will go up.

- Sun's 47 Degrees North will be in its entirety a private business not a natural neighborhood (no lots sold, all spots leased), wholly owned by a massive out-of-state publicly traded corporation whose fiduciary duty is to its shareholders, not city taxpayers. Any subsidies of the project would be a gift of public funds to a private entity.

- Is not housing as contemplated for the Bullfrog UGA. It will displace half of the actual housing planned for the area and replace it with a private park designed as a transient playground.

- Will be the largest manufactured home/RV park on the West Coast and will double the population of Cle Elum. Parks of this magnitude have no place in a town as small as Cle Elum. Wrong Place, Wrong Size.

- Sun has eliminated the industrial park component of the approved plan and is proposing a major new retail center to the project which would compete with existing city businesses and will seriously damage Cle Elum's downtown, which the city has invested millions of dollars to reinvigorate. The retail center is in direct conflict with the city's comprehensive plan which states that the Bullfrog Flats Master Plan…."is intended to elevate the DTC (downtown core) as the primary retail and activity nexus for Cle Elum". Dear City of Cle Elum,

I have been a resident of Cle Elum, in city since 1989. I worked and raised my son here. I am attaching my objection letter to this latest proposal development. As a single parent on one income, it has been a struggle to even keep up with the increased property taxes due to the influx of new homeowners coming from affluent communities.

My question to you, what benefit will this bring to the city? We are already feeling the bite, and with the other new development progressing above my residence, it appears thoughtful consideration was evasive.

Please think about your residents and the negative long-term effects this will create.

Respectfully,
Karen Otto

ADDITIONAL COMMENTS:

I am a mother of 2 young boys, My husband is from Roslyn along with his father and grandfather. We live in Cle Elum and are already impacted by the growth. We are on wait lists to get childcare and our 4 year old into preschool as they are maxed out! A year out. We are very concerned about this HUGE addition to our beautiful town. Wait times at the small clinic, not too mention how much of a NIGHTMARE it is to go to our ONE grocery store in town along with all of the travellers just passing through. Traffic is getting worse and worse each year. My husband drives to Bellevue for work and the increased traffic is a huge issue for those that commute. Where are all of those people going to shop, emergency services, public services, waste management and schools?? When everything is maxed out already, this is a recipe for disaster for the people of Cle Elum and Roslyn, Police, Firefighters, SCHOOLS, land our roads.

Mayor and City Council Members;

I urge you to vote "NO" on 47 degrees north.

Reasons:

1. We need affordable housing but this is not the way to get it. I hold a doctorate in psychology, but common sense also tells us that personal investment in something one owns increases it's psychological value. Psychological value increases the protection and care one shows for any kind of property. The development model for this project, as well as the development company, are predatory, as was referenced at the recent council meeting. They are designed to make the investors wealthier with little to no responsibility for the land they are leasing and the house they are selling.

My property borders an abandoned piece of property that was taken over by drug addicted squatters. They were homeless. I was and as a result have become more interested in the issues of homelessness and affordable housing in the county. However, the squatters completely trashed the property by dumping raw sewage and toxic waste onto the land and into the stream that runs through it. They moved over 40 vehicles onto the property. They trespassed on our property, and threatened us when we confronted them. They burned trash affecting the air quality instead of disposing of it properly. What they didn't burn they stuffed into the abandoned cars, left in piles or shoved onto our property. They shot at one another with guns and bows and arrows. I had a half naked man run up to my doorstep seeking protection and asking me to call the police for him while I was caring for my 11 month old grandson. It has taken the county sherrif and code enforcement department years, as well as massive amounts of resources, to move the squatters off this piece of property so the owners can reclaim it.

The development model and the company proposing it, under the project name "47 degrees North", has a history of creating abandoned properties in other places where it has been tried. With no personal ownership or investment, the city is setting itself up for massive problems without the resources to deal with them. Free housing is not the way to handle homelessness, as demonstrated by the squatters referenced above, and 47 degrees North is not the way to handle affordable housing because neither one creates psychological value in home ownership or community participation.

2. We do not have the infastructure to support this project in terms of roads, sewer, water. Not even interstate 90 at the Roslyn and Cle Elum exits can support this traffic. I live off of Westside road, which during the summer, and as we just experienced over the Memorial Day holiday, has now become the I90 bypass when the freeway has a two hour wait line.

3. We do not have the medical facilities or personnel, or the educational resources to support this kind of growth especially since City Heights is already moving forward, and 47 degrees North will not provide the property taxes necessary to pay for needed improvements.

I know you have heard all of this and more at the council meeting held at the Sr. Center. In all the time this project has been considered, I have not heard one thing in support of it.

Please VOTE NO on this proposal.

Thank you,

Kate Regan, PhD

City of Cle Elum
Attention: Planning Department/47 Degrees North
119 West First Street, Cle Elum, WA 98922

My husband David and I have recently moved into our home in the area and have rapidly become engaged citizens of the Cle Elum community. As we've become more familiar with the details of the Sun Community proposal, we are very puzzledwhy this proposal has gotten this far, why it is even is under consideration, and have numerous questions that need to be considered and answered:

If you are to accept this proposal:

1. What are the benefits to the City of Cle Elum? The proposal states the benefits provided are in the "best interest of the community." The community has and is demonstrating very strong opposition to the Sun Community proposal.
2. What are the benefits to the residents of Cle Elum and surrounding region of Upper Kittitas County?
3. What are the benefits to the Cle Elum downtown businesses and retailers?
4. What are benefits to the potential owners of the manufactured homes, which doesn't appear to fit the original Suncadia vision of affordable home ownership and living for the Bullfrog property? The proposal does not include "affordable home ownership" in truth, the proposal doesn't include the opportunity for potential buyers to own the land on which the dwelling sits, preventing true equity opportunities for the buyer.

If you are to accept this proposal:

5. How will the City, County, State, and Federal entities fund and address the necessary infrastructure of the expected rapid growth, such as transportation and traffic control, police, fire and emergency services, postal services, schools, roads, water and utilities.

As the sitting Mayor and City Council of the City of Cle Elum, you owe detailed answers to these questions. You are responsible and will be held accountable if you chose not to address these critical issues and questions and address the best interest of the community. As residents of Cle Elum, we remain skeptical and do not identify any benefit to the Cle Elum region and community and strongly oppose this Sun Community proposal.

Sincerely,
Katherine Gusdorf

Re: 47 Degrees North Major Amendment proposal

I am writing to inform the city of my very strong opposition to the Sun Communities 47° North proposal for the Bullfrog flats property. The proposed manufactured home / RV community:

- Is in clear violation of the vision for the property adopted by the city and presented to the public as a condition for annexing Bullfrog Flats into the city. It's not in character with the City of Cle Elum and does not comply with fundamental requirements of the city's comprehensive plan, the development agreement, or zoning for the property.
- Instead of traditional neighborhoods that were planned to be connected to and a natural extension of the city, supporting the rest of the city, 47 Degrees North would create a private for-profit community and tourist resort with gates, private roads and utilities which will be separated from the rest of the city. It will create a private city within a city, forever.
- Fiscal studies of 47 Degrees North show that it will not create sufficient tax revenue to cover the city's cost to serve it. Unless the developer agrees to financially cover the substantial deficits, forever, existing city taxpayers will be required to subsidize Sun's development and taxes will go up.
- Sun's 47 Degrees North will be in its entirety a private business not a natural neighborhood (no lots sold, all spots leased), wholly owned by a massive out-of-state publicly traded corporation who's fiduciary duty is to its shareholders, not city taxpayers. Any subsidies of the project would be a gift of public funds to a private entity.
- Is not housing as contemplated for the Bullfrog UGA. It will displace half of the actual housing planned for the area and replace it with a private park designed as a transient playground.
- Will be the largest manufactured home/RV park on the West Coast and will double the population of Cle Elum. Parks of this magnitude have no place in a town as small as Cle Elum. Wrong Place Wrong Size.
- Sun has eliminated the industrial park component of the approved plan and is proposing a major new retail center to the project which would compete with existing city businesses and will seriously damage Cle Elum's downtown, which the city has invested millions of dollars to reinvigorate. The retail center is in direct conflict with the city's comprehensive plan which states that the Bullfrog Flats Master Plan...."is intended to elevate the DTC (downtown core) as the primary retail and activity nexus for Cle Elum". Current rules for the Bullfrog Flats property prohibit a retail center on the property.
- Provides no significant benefits to city or UKC residents, but creates serious and significant impacts on roads, police, fire, schools, emergency services, hospitals and other public services that can't be (or won't be) fully mitigated by the developer, and,
- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for. Any such increase in taxes will effectively translate to a subsidy for a private business,
- Denial of 47 Degrees North will not take away or reduce underlying property rights. It will simply require Sun Communities to comply with city's current rules, regulations and comprehensive plan for the property. The original underlying zoning approval and development agreement already allows development of this site, just not as a private resort/manufactured home community/retail center.

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Respectfully,

Katherine O Hinton

Re: 47 Degrees North Major Amendment proposal

I am writing to inform the city of **my strong opposition** to the Sun Communities 47° North proposal for the Bullfrog flats property. The proposed manufactured home / RV community is clearly wrong for the city in so many ways, it is hard to put it all in a letter

Ruins the Natural Environment of the Area. It is in clear violation of the vision for the property adopted by the city and presented to the public as a condition for annexing Bullfrog Flats into the city. It's not in character with the City of Cle Elum and does not comply with fundamental requirements of the city's comprehensive plan, the development agreement, or zoning for the property. Simply put, it will take a wonderful area and make it a rundown trailer park. Given all the lawsuits against Sun communities for property neglect, this is inevitable!! **Cle Elum will be known for its trailer park instead of its beauty**. This will discourage tourists from visiting the area and will hurt the local economy. Yes, you will have tourists who live in their mobile homes but you will lose the higher rent Suncadia renters who have added a significant amount to the Cle Elum economy.

Creates a Private City Run by a Billion Dollar PUBLIC Company with no Local Ties. Instead of traditional neighborhoods that were planned to be connected to and a natural extension of the city, supporting the rest of the city, 47 Degrees North would create a private for-profit community and tourist resort with gates, private roads and utilities which will be separated from the rest of the city. It will create a private city within a city, forever. This city will not add to Cle Elum financially but rather use its sources to destroy it.

Does not Provide Sufficient Tax Revenue. Fiscal studies of 47 Degrees North show that it will not create sufficient tax revenue to cover the city's cost to serve it. Unless the developer agrees to financially cover the substantial deficits, forever, existing city taxpayers will be required to subsidize Sun's development and taxes will go up. Rising taxes on a community already struggling with rising housing costs just adds salt to the wound and force more locals out.

SUN COMMUNITIES IS A PUBLICITY TRADED COMPANY WITH NO LOCAL TIES. As an individual who has worked in finance and understands how the its duty is to the shareholders, I feel this is the MOST important fact. Sun Communities is out to make a profit and increase shareholder value. They have no obligation to Cle Elum. It is their duty to make as much money as possible. They will not do things like put in a retail center unless they can make money. Cle Elum is the little guy in this relationship. They are worth $17 billion dollars and have the financial resources to do what ever they want if Cle Elum allows them to build this project!! They don't care about the lawsuits and maintaining properties-they are too strong to care. Why do you think the attorney general is investigating them?

It is not the Housing as Contemplated for the Bullfrog UGA. It will displace half of the actual housing planned for the area and replace it with a private park designed as a transient playground.

We will lose Valuable Tourists if we become known as the Trailer Park Town. Cle Elum will be the largest manufactured home/RV park on the West Coast and will double the population of Cle Elum. Parks of this magnitude have no place in a town as small as Cle Elum. Wrong Place Wrong Size.

Retail Center will hurt Local Businesses. Sun has eliminated the industrial park component of the approved plan and is proposing a major new retail center to the project which would compete with existing city businesses and will seriously damage Cle Elum's downtown, which the city has invested millions of dollars to reinvigorate. The retail center is in direct conflict with the city's comprehensive plan which states that the Bullfrog Flats Master Plan...."is intended to elevate the DTC (downtown core) as the primary retail and activity nexus for Cle Elum". Current rules for the Bullfrog Flats property prohibit a retail center on the property. Plus, they may not build it since it was not required and that will impact city revenue.

Provides no significant benefits to Cle Elum or UKC residents. Instead, it creates serious and significant impacts on roads, police, fire, schools, emergency services, hospitals and other public services that can't be (or won't be) fully mitigated by the developer, and,

We do not have the Roads to Support the Increase Traffic. It will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for.

In summary, approving this project would change the future of Cle Elum forever. It will destroy the beauty of it and make it a large trailer park community without the funds to support it. My family loves Cle Elum and we do not want the City Council to approve this project and destroy it.

Sincerely,

Kathleen Perkins

PLEASE STOP 47° North!!
I am absolutely opposed to the proposed 47° N. project on the Bullfrog flats property!!
This proposed development is absolutely antithetical to the friendly rural town that we have loved and lived in, full-time, for the past 15 years. Prior to moving closer to town, we owned acreage off West Nelsonsiding Rd.
Granted, we need to allow for the natural growth that accompanies people like ourselves moving away from the frantic pace and ugly culture of the cities, however, the mega growth and proposed influx of thousands of transients within a five-year period would devastate our lovely town and everything it stands for.
We need PERMANENT RESIDENTS, like ourselves, who live here 365 days a year, raise our children here, go to church here, pay our taxes here, and are of benefit to the community as a whole.
We need more traditional neighborhoods built around the natural beauty of this area.
How can you possibly consider a glorified trailer park, larger than anything else statewide, that will double the population of Cle Elum and replace residents with transients?
A transient population has no benefit to our city. It creates serious and significant impacts on the an already fragile infrastructure-water, roads, sewer, the police, not to mention the already high risk of fire and crime.
What we need are people who are committed to Cle Elum; people who work here, have shops and businesses here, who live in real homes, who will raise their children here, attend school here and be solid citizens with a vested interest and purchase in our community.
Please don't look at this plan as a way to 'get' upgraded infrastructure. Selling the soul of Cle Elum for some promises of new roads and a grocery store is astoundingly short sided. More concrete at the sacrifice of our beautiful forests; higher crime, paralyzing traffic and smog on those hot summer days... other large housing developments already slated to be built as our economy and property values begin to plummet... 47° North as currently planned would kill Cle Elum.

Sincerely,
Kathleen Woodward

[EXTERNAL EMAIL] DO NOT CLICK links or attachments unless you recognize the sender and know the content is safe.

City of Cle Elum - Mayor, City Council members, Planning Department,

Re: 47 Degrees North Major Amendment, SEPA and Development Agreement

Thank you for the opportunity to provide my comments on the Sun Communities 47 Degrees North Major Amendment, SEPA Addendum/SEIS and Draft Development Agreement. This email contains my comments on traffic only. Future emails will address other aspects of the application.

Comments on the SEIS/Addendum Traffic Analysis

The SEPA Traffic analysis has a number of major flaws which result in significantly understating the amount of congestion on the city and county road system both with and without 47 Degree North. These flaws significantly overestimate the road capacity that's available for 47 Degrees North traffic. SEPA should not be closed until the traffic analysis is corrected.

Specifically:

1. The 47°N traffic study doesn't include the full buildout traffic of major developments already approved, vested and in the pipeline (Suncadia, City Heights and Ronald PUD/Hotel). Because Sun assumed such a short buildout period for 47 Degrees North (5 years), the project is essentially trying to "cut the line" by getting its traffic in the road system before other approved major developments are completed. 47 Degrees North is essentially proposing to use up road capacity that is already allocated to others. Full buildout of approved, but

not yet completed, developments cannot be ignored. They have legal vested rights to complete their projects and add their traffic. 47°N traffic will be added to that, not replace it.

The significance of this error is that if all the traffic from approved developments is included we are likely to find that the city and UKC road systems are already significantly beyond their max capacity and there is little or no capacity for 47 Degrees North without massive investments in infrastructure that will take many years to complete.

2. The Addendum traffic study ignores peak summer weekends (Friday evening through Sunday evening) for mitigation purposes.

Roughly half of 47 Degrees North is an RV resort, a business that will operate at maximum capacity on summer weekends, and the other half is a manufactured home community assumed to have a high percentage of 2nd homes that will be weekend getaways or short-term weekend rentals, again, operating at maximum capacity on summer weekends. Sun's business plan will clearly be to maximize summer weekend occupancy. Yet the traffic report uses weekday evenings as the basis for mitigation.

This is a flawed assumption for assessing impacts. We who live here know the traffic patterns; our businesses and emergency responders know the patterns. On summer weekends our UKC streets are packed and on weekday evenings the streets are largely empty. Irrespective of any comp plan policy, best practices for traffic studies require that mitigations be applied to the impacts of a project whenever that might be. Sun should be required to mitigate its full impacts... which are on weekends.

3. It does not appear that Large RV's and travel trailers (oversize vehicles) are fully accounted for in the traffic analysis. It appears they were counted as if they were trips from a typical passenger car. Standard traffic analysis protocol is that oversize vehicles count as more than one passenger vehicle trip because they occupy more space (and time) on the roadway. Given that Sun's RV resort will introduce a very large number of oversize vehicles, improperly accounting for them significantly understates the real impacts from the project.

4. The traffic analysis didn't study the need for road widening on Bullfrog Rd or SR 903 (i.e. a corridor study). The study only looked at intersections. With the large amount of traffic added by 47 Degrees North onto Bullfrog Rd and SR 903, together with the large amount of traffic already drawn to these roads by the school campus, Suncadia, future City Heights access, transfer station etc., it is essential to analyze whether these

roadway corridors will be over capacity and will need to be widened or lanes added. The fact that this wasn't studied is a major oversight.

5. The traffic analysis of the I-90 Exit 80 ramps is flawed because it does not reflect the gridlock effects from the freeway during peak summer weekend periods. We who live here know that on peak summer weekends traffic backs up past the weigh station onto Bullfrog Rd. often past the Tumble Creek entrance. And that's before adding the additional background from Suncadia, City Heights and other major projects vested and in the pipeline.

During peak summer periods no mitigation at the ramps can be effective until if/when the freeway itself is fixed. Adding the 47 Degree North traffic will simply make peak backups worse, perhaps extending all the way to the Suncadia Trail main entrance or further.

6. There is no analysis of cut through or bypass traffic when the freeway is in gridlock condition. We who live here know that on peak summer weekends significant bypass traffic occurs on Cle Elum 1st and 2nd Streets, SR 903 and Bullfrog Rd. How will the proposed 47 Degrees North collector arterial (connecting SR 903 to Bullfrog Rd.) function during bypass events and how will this affect queues and backups at exit 80?

7. The studies didn't analyze the impact of major congestion on the ability of our emergency responders and law enforcement to respond to accidents and emergencies, nor the impact of congestion on wildfire evacuation. We who live here know that emergency vehicle access is currently a major issue and it can only be expected to worsen. The fact that this wasn't studied is a major oversight. The city committed to looking at emergency evacuation during scoping.

Conclusion - The 47 Degree North traffic analysis doesn't accurately report traffic from 47°N. It significantly understates congestion on the city and UKC road network both with and without 47 Degrees North and so it is flawed. No further action should be taken until the Addendum traffic analysis is corrected.

Comments on the Draft Development Agreement

Until the SEPA traffic analysis is updated to correctly reflect expected congestion and impacts no action should be taken on the development agreement because it will be based on flawed data. However, since the Draft agreement is a part of the application materials, I provide my initial comments on the Exhibit D - 47 North Transportation Impact Mitigation Plan.

When reviewing the agreement, I ask the city to think about recent experiences with the City Heights Development Agreement. Many provisions in Development Agreements may seem simple and benign at first but carry interpretations that have impacts far beyond original intents and understandings. Yet they obligate the city to accept responsibilities, costs and risks regardless of the passage of time. The 47 Degree North Development Agreement carries far more significant risks and potential costs for the city than any previous development agreement.

I also ask the city to think about recent experiences on the 1st Street Downtown Revitalization Project, the difficulties and uncertainties of securing funding, the length of time to completion, the uncertainty of cost estimates and unforeseen circumstances that arise. 1st Street is just one project, albeit a very large (and important) one. The 47 Degrees North agreement as written would obligate the City to build 14 or more intersection projects and potential road corridor widening of uncertain scope and cost with little help from Sun Communities.

This draft Development Agreement is clearly very "developer friendly", and a very unfair deal for the city. In many, if not most, jurisdictions in Washington, 47 Degrees North would be a non-starter, and rejected on its face because it doesn't meet concurrency requirements.

Concurrency is a state law which says if roadways are congested and failing from existing traffic and/or developments already approved and vested, a city can deny new development until enough capacity is added. It is a significant tool small cities can use to manage growth and leverage greater developer participation in road improvements. Under this Development Agreement as written the city would waive its rights under concurrency, taking away that tool and allowing Sun Communities to add more traffic to roads already over capacity.

Even under the current traffic analysis in the Addendum (which understates traffic) much of the city's and UKC's primary road systems will be at failure (gridlock) by 2031 during peak periods, even without 47 Degrees North. When the traffic analysis is updated to include the correct background traffic from Suncadia and City Heights it's likely the entire system will be at failure (gridlock) by 2031. The fact is, there is simply no excess road capacity available for 47 Degrees North in the current system. All available capacity has been used up and/or allocated to the other large developments the city and the county have approved.

The road improvements that would be needed to add capacity for 47 Degrees North are massive and system wide. Just looking at intersections in the current traffic study, it shows about 14 intersections in the city and

UKC that need to be upgraded. And the traffic report significantly understates what's needed because it only looked at intersections, not at corridors. When corridors are included in the updated traffic analysis it's likely that the total cost to upgrade the road system could easily be well more than $20 million.

With the city facing massive costs for road system expansion, Sun proposes the city allow them to add all of the 47 Degrees North traffic onto the already gridlocked failing road system in exchange for a fee of just $1.0 million and a "loan" of $3.6 million which has to be paid back under uncertain terms (but it definitely has to be paid back). Sun would have no responsibility to make any offsite road improvements anywhere. Simply pay the fee and go. All the responsibility would be passed to the city and UKC taxpayers.

This development agreement as written is a recipe for years of gridlock because most of the road system won't be upgraded for decades because every single intersection and roadway will have to wait on city (or county) funding, band width, priorities and grant availability. The city knows well how grant funding cycles operate, they are lengthy and uncertain and never yield as much as is needed. And as the years go on the cost of road improvements will continue to rise (they always do) but with this agreement Sun's responsibility won't rise. It will be capped.

My specific comments on the development agreement are:

1. The Recitals (A. thru E.) require the city to accept the results of the flawed traffic analysis. If the DA is signed as written the city will have no future legal recourse to contest the inaccurate traffic studies.

2. The agreement should include a "concurrency plan" which restricts the pace of development to actual available capacity in the road system. Mitigation occurs when a project is built, not when a fee is paid. The developer should not be allowed to pay a small fee and add traffic to already failing roads.

Section 3 of the DA contains a clause that appears to exempt 47 Degrees North from WA state concurrency law. This clause should be removed, no development should be allowed to add traffic to already failing roads.

3. The developer's estimates of project costs are very very preliminary and understate the true cost of what it will actually take to build projects. None of the road system improvements in the study are on any CIP/TIP list; there are no preliminary design plans, surveys, or engineering cost estimates; there are no studies of utility relocations, soils conditions or ROW acquisition; no studies of number of lanes, lane lengths, impacts on adjacent properties.

The developers' "estimates" are described in their application material as "notional"....in other words, not based on any site-specific real-world data. As the agreement is currently written the city will be accepting responsibility for a huge black box of unknown scope, cost or schedule and inevitable cost overruns.

5. As the agreement is currently written, the city would be accepting a fee for improvements to County and WSDOT facilities (Bullfrog Rd and I-90 ramps). Without an Interlocal Agreement the city cannot accept payments or responsibility for improving County and/or WSDOT facilities. But even if the city could, it's not in the city's interest to take responsibility for other jurisdictions. It should be the developer's sole responsibility to negotiate mitigation with the county and WSDOT and any agreements reached with them should be incorporated into this development agreement.

Request

I respectfully request that the city halt this process and require that the traffic studies be redone to correct the serious flaws that have been identified, and that the city review its options under concurrency law and not spinning traffic and risk onto the city and UKC taxpayers.

Thanks for all the hard work you're putting in on this project and taking the time to make the right decision for you your children grandchildren our community and the citizens of upper Kittitas countUpper Kittitas county county. Thank you for denying the major modification from 47° north and considering excepting the original application of design for 47° north.

Thank you,

Kathy Kratzer

RE: 47 Degrees North Major Amendment Proposal

I am writing to inform the city of my extraordinarily strong opposition to the Sun Communities 47° North proposal for the Bullfrog flats property. The proposed manufactured home / RV community will result in negative impacts:

- Traffic gridlock with high volume of transient visitors in large recreational vehicles
- Decreased level of service for emergency medical services
- Decreased level of service for police protection
- Decreased level of service for fire protection
- Increased tax burden on existing property owners to pay for aging infrastructure (water, sewer, power, roads)
- Increased 2nd home ownership within a private resort adversely impacting many throughout the community.
- Adverse impact to downtown core businesses as resort environment will drive dollars to remain at the resort.
- Potential to increase jobs yet does little to offer adequate affordable housing options in relationship to number of workers necessary to support multiple resorts in the area.
- Potential to require additional city resources to manage and address concerns by a high volume of transient visitors.
- High volume of short-term rentals (STRs) tax revenue by law are applied to tourism rather than infrastructure upgrades.
- 90% of profits will be, by law, sent out of our community to Wall Street investors.

For these reasons, I implore the City to DENY this proposed major amendment and retain the current approved land use for the property.

Respectfully,

Kathy Kratzer

Re: 47 Degrees North

The Facts
On May 5, 2021, the City of Cle Elum issued Sun Communities a Temporary Use Authorization in connection with building permits relating to five (5) model manufactured homes to be used for public display. The location of the site is 4240 Bullfrog Road, Cle Elum WA.

That Temporary Use Authorization specifically states:

1) This temporary use shall be limited for a period of not to exceed two years from the date of issuance of the first building permit, provided that the authorization may be extended for one additional year, at the City's sole discretion.
2) The Project Sponsor shall apply, receive, and maintain in good standing a City Business License.
3) Prior to the expiration of this use authorization, the model homes, the temporary garage type structure, and all signage shall be removed, and the Project Sponsor shall return the site to its previous condition.

Sun Communities is in direct violation of the Temporary Use Authorization due to the following:

1) It has failed to remove the units or before May 5, 2023, as required; and
2) No business license was applied for, received or maintained

Relief Requested
The City of Cle Elum should require immediate removal of the structures and not elect to extend the non-conforming so-called Temporary Use Authorization.

General Comments
The Cle Elum Municipal Code does not contemplate such a thing as a Temporary Use Authorization. The code does allow for Special Use Permits and Conditional Use Permits, but each of these have specific qualifiers and conditions of approval. The Zoning associated with the location of these model homes is that of General Commercial. That zone contemplates commerce and general uses that serve the community. The trailers are simply staged in an attempt to fool the public into believing that the 47 Degrees North Development has been approved, which it has not.

On the City's website, under the Recent Planning News page, the City has been actively advertising for the model homes for Sun Communities. Statements such as these indicate to the public that the 47 Degrees North development has been approved and is a done deal, which it is not.

Did you know? Sun Communities is currently displaying models of the manufactured homes proposed for the 47 Degrees North project at 4240 Bullfrog Road near the School District Administration Building!

The community has voiced its opposition to the 47 Degrees North development in a loud and clear manner. Following the public comment period, when the tally is over, the City will likely receive close to 1,000 letters of condemnation associated with the project.

I understand that there is a process in play as it relates to the Sun Communities application. However, the City should not be making up new rules favoring the applicant and thumbing its nose at the community in the process.

You have my request and my comments. Please reply to this correspondence identifying what the City's intentions are.

RE: 47 Degrees North plan

Attention: Planning Department/47 Degrees North

We cannot believe the leadership in Cle Elum would even consider a project such as this. The world has changed a great deal for the worse from when this project was first proposed. We moved from Seattle to get away from the problems this sort of project will certainly bring to the area. Some issues will be more traffic, drugs not to mention all the other crime. The current plus for living in Cle Elum is that we are somewhat isolated from the negative impacts of what this kind of development will bring to our area.

Police, fire, medical and other services would have to expand significantly to support this community. The developer makes his profit, and moves onto the next project, leaving the City to deal with all the expenses for the community with little increase in tax revenues.

1. Our roads are already at capacity. I-90 cannot support anymore traffic on the weekends. Many of those on I-90 use Cle Elum as a by pass.
2. The proposal for a dense community is not in keeping with the neighboring communities. We could understand a small fractional commitment to affordable housing but not a development of this size. This project will be the largest manufactured home/RV park on the West Coast. Pouring thousands of visitors to our already overcrowded services plus using our rivers, lakes, camp sites and playgrounds. The proposed project is way too big and much too fast. A slow growing community like the original plan would be manageable for the City and the services the City provides.
3. This proposed development has no significant benefits to city or UKC residents. It creates serious and significant impacts on roads, police, fire, schools, emergency services, medical facilities and other public services that can't be (or won't be) fully mitigated by the developer. In fact a project such as this will bring down the value of the surrounding community.

For these reasons, and many more, we implore the City to DENY this proposed major amendment and retain the current approved land use for the property.

Respectfully,

Kathy Lucas

To the City of Cle Elum: Mayor, City Council Members, and Planning Department

We are strongly opposed to the 47N proposal. Here are just a few of our reasons:

Traffic impacts. There has been no adequate assessment made of the double trouble we will get from the two huge developments we are facing, one of which has already been approved. And anyone can see that on weekends and during the summer, we already are in very big trouble. Sun Communities will not adequately mitigate for the traffic congestion they will cause and, if we as a community are being honest with ourselves, we know we don't even have the space to create the kind of infrastructure that will be needed.

As a corollary to that concern, we live in an extremely fire-prone area. This development would significantly and dangerously affect the ability of those living in Roslyn, Ronald and beyond to evacuate in the event of a fire AND the overflow, traffic jams, congestion and panic would quickly spread to "old" parts of the City of Cle Elum as well. Perhaps the most dangerous thing we face right now is that, except in the case of Bullfrog Road, all of that traffic will be funneling into the Cle Elum downtown. It would be a disaster for Cle Elum residents and for our neighbors above us. We should care about our neighbors and not make a decision that endangers their lives, as well as our own.

Sun Communities presents itself as a low-income option, but I submit that any persons purchasing a home where they do not own the land beneath it, and are subject to (rising) rent / HOA fees, are not being helped. They are building little or no equity. This is closer to the exploitation of low-income earners than it is to a solution.

The tax disadvantages to the city, and to the citizens of this city, have been talked about at length. One entity will pay taxes on the entire parcel. How much power does that give to that one entity to set policy? To pressure city officials to do it their way? To place the economic burden of their for-profit business on the existing citizens of Cle Elum? Sun Communities has NO stake in the well-being of the city of Cle Elum or its citizens. Its interest is in satisfying its shareholders.

What about the impact on fire, police, city services? We have recent experience to see that any proposed mitigation in this regard is woefully inadequate, with the burden falling on the city taxpayers.

We ask you, our elected officials: What possible advantage is this development to the citizens you have been elected to represent? I cannot think of one way in which our community will be made better by allowing this behemoth to exploit our already over-taxed citizens. The citizens of this city are being impoverished, both financially and in quality of life, by the developments that are already approved. This poorly conceived proposal by Sun Communities will only magnify that. Your duty is to the citizens who live here NOW. WE elected you. Do the right thing and deny this proposal.

Re: 47 Degrees North Proposal

I am writing to provide the city with my very strong concerns about the Sun Communities 47°N proposal for the Bullfrog Flats property. The proposed manufactured home/RV community:

· Is not in character with the City of Cle Elum or the upper Kittitas Valley (a fundamental requirement of the current zoning for the property),

· Would create a new and separate private tourist resort instead of the natural extension of city neighborhoods originally envisioned by city zoning and current approvals,

· Is in its entirety a private business not a neighborhood (no lots will be created or sold, all spots will be leased, and the project will be private), wholly owned by a large out-of-state publicly traded corporation whose fiduciary duty is to its shareholders,

· Provides no significant benefits to upper valley residents and tax payers,

· Will create serious and significant impacts on roads, police, fire, schools, emergency services, hospitals, and other public services that can't (or won't) be fully mitigated by the developer, and therefore,

· Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for, essentially a subsidy for a private business,

· Denial of the Sun Communities proposal would not take away or reduce underlying property rights. The original underlying zoning approval would still allow development of this site, just not as a private resort/manufactured home community.

For all of these reasons, and others, I implore the City to DENY this proposed major amendment and retain the current approved land use for the property.

Regards,
Kathie Varney

Hello,

I am writing to inform the city of my very strong opposition to the Sun Communities 47° North proposal for the Bullfrog flats property. The proposed manufactured home / RV community:

- Is in clear violation of the vision for the property adopted by the city and presented to the public as a condition for annexing Bullfrog Flats into the city. It's not in character with the City of Cle Elum and does not comply with fundamental requirements of the city's comprehensive plan, the development agreement, or zoning for the property.
- Instead of traditional neighborhoods that were planned to be connected to and a natural extension of the city, supporting the rest of the city, 47 Degrees North would create a private for-profit community and tourist resort with gates, private roads and utilities which will be separated from the rest of the city. It will create a private city within a city, forever.
- Fiscal studies of 47 Degrees North show that it will not create sufficient tax revenue to cover the city's cost to serve it. Unless the developer agrees to financially cover the substantial deficits, forever, existing city taxpayers will be required to subsidize Sun's development and taxes will go up.
- Sun's 47 Degrees North will be in its entirety a private business not a natural neighborhood (no lots sold, all spots leased), wholly owned by a massive out-of-state publicly traded corporation who's fiduciary duty is to its shareholders, not city taxpayers. Any subsidies of the project would be a gift of public funds to a private entity.
- Is not housing as contemplated for the Bullfrog UGA. It will displace half of the actual housing planned for the area and replace it with a private park designed as a transient playground.
- Will be the largest manufactured home/RV park on the West Coast and will double the population of Cle Elum. Parks of this magnitude have no place in a town as small as Cle Elum. Wrong Place Wrong Size.
- Sun has eliminated the industrial park component of the approved plan and is proposing a major new retail center to the project which would compete with existing city businesses and will seriously damage Cle Elum's downtown, which the city has invested millions of dollars to reinvigorate. The retail center is in direct conflict with the city's comprehensive plan which states that the Bullfrog Flats Master Plan…."is intended to elevate the DTC (downtown core) as the primary retail and activity nexus for Cle Elum". Current rules for the Bullfrog Flats property prohibit a retail center on the property.
- Provides no significant benefits to city or UKC residents, but creates serious and significant impacts on roads, police, fire, schools, emergency services, hospitals and other public services that can't be (or won't be) fully mitigated by the developer, and,
- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for. Any such increase in taxes will effectively translate to a subsidy for a private business,

- Denial of 47 Degrees North will not take away or reduce underlying property rights. It will simply require Sun Communities to comply with city's current rules, regulations and comprehensive plan for the property. The original underlying zoning approval and development agreement already allows development of this site, just not as a private resort/manufactured home community/retail center.

For all of these reasons, and others, I implore the City to DENY this proposed major amendment and retain the current approved land use for the property.

Sincerely,

Katie Rossmeissl

ADDITIONAL COMMENTS: My husband of 45 years was born and raised in Cle Elum. I have lived here most of my life and this is home. In the almost 50 years I have lived here, I have seen many changes and much growth. Always before, that growth has seen people come here to share in what makes Cle Elum special and have become true members of the community. Sun Communities (as the property owners) would have no such ties. In addition our infrastructure cannot support what is being proposed.

RE: 47 Degrees North Major Amendment Proposal

I am writing to express my concerns and strong opposition to the Sun Communities 47 Degree North proposal for the Bullfrog Flats property.

The size and scope of this development is too large for Cle Elum. The strain it will put on roads, traffic, police, fire and emergency services, schools, hospitals, and utilities is immense. Sun Communities is not contributing to improvements to these services and, instead, will end up being financed by the local taxpayer for years to come. Cle Elum is currently experiencing growth pains due to the continued development of Suncadia and Tumble Creek, and Trailside Homes' Ederra and Skyline Ridge projects. Cle Elum should be focusing on the strain the current projects are adding to the City's infrastructure instead of adding additional stress to the system.

Sun Communities has no interest in improving the life experience of the residents of Cle Elum. Sun Communities is interested only in Sun Communities and their responsibility to their shareholders – not the people of Cle Elum who live here.

Please vote NO on the 47 Degrees North Major Amendment Proposal. Please enforce the original approved development proposal.

Sincerely,

Kellene Gilbrough

It will create a private city within a city, forever.

• Fiscal studies of 47 Degrees North show that it will not create sufficient tax revenue to cover the city's cost to serve it. Unless the developer agrees to financially cover the substantial deficits, forever, existing city taxpayers will be required to subsidize Sun's development and taxes will go up.

• Sun's 47 Degrees North will be in its entirety a private business not a natural neighborhood (no lots sold, all spots leased), wholly owned by a massive out-of-state publicly traded corporation who's fiduciary duty is to its shareholders, not city taxpayers. Any subsidies of the project would be a gift of public funds to a private entity.

• Is not housing as contemplated for the Bullfrog UGA. It will displace half of the actual housing planned for the area and replace it with a private park designed as a transient playground.

• Will be the largest manufactured home/RV park on the West Coast and will double the population of Cle Elum. Parks of this magnitude have no place in a town as small as Cle Elum. Wrong Place Wrong Size.

• Sun has eliminated the industrial park component of the approved plan and is proposing a major new retail center to the project which would compete with existing city businesses and will seriously damage Cle Elum's downtown, which the city has invested millions of dollars to reinvigorate. The retail center is in direct conflict with the city's comprehensive plan which states that the Bullfrog Flats Master Plan...."is intended to elevate the DTC (downtown core) as the primary retail and activity nexus for Cle Elum". Current rules for the Bullfrog Flats property prohibit a retail center on the property.

• Provides no significant benefits to city or UKC residents, but creates serious and significant impacts on roads, police, fire, schools, emergency services, hospitals and other public services that can't be (or won't be) fully mitigated by the developer, and,

• Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for. Any such increase in taxes will effectively translate to a subsidy for a private business,

• Denial of 47 Degrees North will not take away or reduce underlying property rights. It will simply require Sun Communities to comply with city's current rules, regulations and comprehensive plan for the property. The original underlying zoning approval and development agreement already allows development of this site, just not as a private resort/manufactured home community/retail center.

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Respectfully,

Kelly Titus

Dear Mr. McGowan and planning and council members

I am writing to inform the city of my very strong opposition to the Sun Communities 47° North proposal for the Bullfrog flats property. The proposed manufactured home / RV community:

- Is in clear violation of the vision for the property adopted by the city and presented to the public as a condition for annexing Bullfrog Flats into the city. It's not in character with the City of Cle Elum and does not comply with fundamental requirements of the city's comprehensive plan, the development agreement, or zoning for the property.
- Instead of traditional neighborhoods that were planned to be connected to and a natural extension of the city, supporting the rest of the city, 47 Degrees North would create a private for-profit community and tourist resort with gates, private roads and utilities which will be separated from the rest of the city. It will create a private city within a city, forever.
- Fiscal studies of 47 Degrees North show that it will not create sufficient tax revenue to cover the city's cost to serve it. Unless the developer agrees to financially cover the substantial deficits, forever, existing city taxpayers will be required to subsidize Sun's development and taxes will go up.
- Sun's 47 Degrees North will be in its entirety a private business not a natural neighborhood (no lots sold, all spots leased), wholly owned by a massive out-of-state publicly traded corporation who's fiduciary duty is to its shareholders, not city taxpayers. Any subsidies of the project would be a gift of public funds to a private entity.

- Is not housing as contemplated for the Bullfrog UGA. It will displace half of the actual housing planned for the area and replace it with a private park designed as a transient playground.

Re: 47 Degrees North Major Amendment proposal

This is to inform the city of our very strong opposition to the Sun Communities 47° North proposal for the Bullfrog flats property. The proposed manufactured home / RV community:

- Is in clear violation of the vision for the property adopted by the city and presented to the public as a condition for annexing Bullfrog Flats into the city. It's not in character with the City of Cle Elum and does not comply with fundamental requirements of the city's comprehensive plan, the development agreement, or zoning for the property.

- Instead of traditional neighborhoods that were planned to be connected to and a natural extension of the city, supporting the rest of the city, 47 Degrees North would create a private for-profit community and tourist resort with gates, private roads and utilities which will be separated from the rest of the city. It will create a private city within a city, forever. For people who do not contribute to the betterment of the city through support for schools. They will be a blight on our community not a positive. This will turn into long-term tenants that only suck from this already burdened budget short falls. People who are not here permanently don't contribute to the long-term well-being of the community. I.e. School system that relies heavily on community donation as it and will add to the city's budget deficits.

- Fiscal studies of 47 Degrees North show that it will not create sufficient tax revenue to cover the city's cost to serve it. Unless the developer agrees to financially cover the substantial deficits, forever, existing city taxpayers will be required to subsidize Sun's development and taxes will go up. Do they agree to putting in a new school? NO, they are not!

- Sun's 47 Degrees North will be in its entirety a private business not a natural neighborhood (no lots sold, all spots leased), wholly owned by a massive out-of-state publicly traded corporation whose fiduciary duty is to its shareholders, not city taxpayers. Any subsidies of the project would be a gift of public funds to a private entity.

- This is not housing as contemplated for the Bullfrog UGA. It will displace half of the actual housing planned for the area and replace it with a private park designed as a transient playground. With no benefit to the TAXPAYERS!

- Will be the largest manufactured home/RV park on the West Coast and will double the population of Cle Elum. Parks of this magnitude have no place in a town as small as Cle Elum and a burden on the infrastructure of the committee. Wrong Place Wrong Size.

- Sun has eliminated the industrial park component of the approved plan and is proposing a major new retail center to the project which would compete with existing city businesses and will seriously damage Cle Elum's downtown, which the city has invested millions of dollars to reinvigorate. The retail center is in direct conflict with the city's comprehensive plan which states that the Bullfrog Flats Master Plan…."is intended to elevate the DTC (downtown core) as the primary retail and activity nexus for Cle Elum". Current rules for the Bullfrog Flats property prohibit a retail center on the property.

- Provides no significant benefits to city or UKC residents, but creates serious and significant impacts on roads, police, fire, schools, emergency services, hospitals and other public services that can't be (or won't be) fully mitigated by the developer, and never will.

- This will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for. Any such increase in taxes will effectively translate to a subsidy for a private business venture,

- Denial of 47 Degrees North will not take away or reduce underlying property rights. It will simply require Sun Communities to comply with city's current rules, regulations and comprehensive plan for the property. The original underlying zoning approval and development agreement already allows development of this site, not just as a private resort/manufactured home community/retail center.

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Attention: City of Cle Elum

We have been residents of Cle Elum since 2008. We were drawn to the area because of its natural beautiful area and numerous outdoor activities. We enjoy the solitude and quieter lifestyle that Cle Elum and the surrounding areas offer. We feel the amendment by 47 Degree North to further expand their development goes beyond reasonable planning and development. There have been a number of big developments in the area recently and we worry that the natural resources and infrastructure would be overly burdened. The additional traffic that would come with the proposed amendment would overly burden the existing roads and the traffic noise would be constant.
We would like to officially go on record as being against the proposed amendment by 47 Degree North and hope that the City of Cle Elum sees fit to turn the proposal down.

Sincerely,
Kevin and Roiann Daly

Re: 47 Degrees North Proposal

I am writing to provide the city with my very strong concerns about the Sun Communities 47°N proposal for the Bullfrog Flats property. The proposed manufactured home/RV community:

· Is not in character with the City of Cle Elum or the upper Kittitas Valley (a fundamental requirement of the current zoning for the property),

· Would create a new and separate private tourist resort instead of the natural extension of city neighborhoods originally envisioned by city zoning and current approvals,

· Is in its entirety a private business not a neighborhood (no lots will be created or sold, all spots will be leased, and the project will be private), wholly owned by a large out-of-state publicly traded corporation whose fiduciary duty is to its shareholders,

· Provides no significant benefits to upper valley residents and tax payers,

· Will create serious and significant impacts on roads, police, fire, schools, emergency services, hospitals, and other public services that can't (or won't) be fully mitigated by the developer, and therefore,

· Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for, essentially a subsidy for a private business,

· Denial of the Sun Communities proposal would not take away or reduce underlying property rights. The original underlying zoning approval would still allow development of this site, just not as a private resort/manufactured home community.

For all of these reasons, and others, I implore the City to DENY this proposed major amendment and retain the current approved land use for the property.

Subject: 47 degrees north...

[EXTERNAL EMAIL] DO NOT CLICK links or attachments unless you recognize the sender and know the content is safe.

Dear City of Cle Elum Planning Department,

As a homeowner in downtown Cle Elum (424 E 1st Street) as well as a rural homeowner (870 Scott Drive and 321 Book Lane in Cle Elum) and as a resident purchasing my first home here in 1998, I have several concerns about this 47 degrees north project coming to our once sweet little town.

As a local Real Estate Professional, I understand progress and people wanting to live here as it is and has been a very popular recreation and home living destination. As cities on the west side of the mountains continue to populate, more and more people are coming this direction to get away from the dirt and filth those once nice cities now house.

My main concerns for our wonderful community would consist of lack of health care (which we are already experiencing) for humans and animals, schools at current capacity taking on more growth (the proposed project would bring so many more children into the picture), lack of food sources within our upper county area (most people, especially the elderly, cannot make the drive to Ellensburg often for groceries and Safeway is MAXED out), police and fire response will be even worse as well as traffic on Bull Frog road (especially in the winter months when it is already a hazard).

As an active member of the Washington State Horse Park, I am highly concerned about the counter affects this project will have against a wonderful, beautiful venue that SO many people have worked so hard to accomplish over the past years. I do not see 47 North adding anything positive to this great achievement.

One final issue I have with this project is that these "manufactured homes" are not financeable except to 47 North. Not only will 47 North procure the sale agreements for these homes since they are on leased land, but they also procure the lease rents from people purchasing these homes. What happens when a buyer goes to sell them? They are only financeable again to 47 North? Plus what happens when these people default on their payments on these homes? I also would not expect that people who own these homes would be very respectful to the land they sit upon since they do not own that land. I see this project looking very bleak after some years go by. I do not see one good reason to allow this type of community to come to our pristine upper county area.

It is my understanding that originally there were going to be stick built homes on owned land where this project is taking place. My vote if something were going to take place, would be to keep with the original proposal. Progress is always going to keep coming, but let's keep it a nice place to continue to live, for everyone here in our beautiful community.

I attended the council meeting last Monday evening. There were over 200 people present, all of which were against this project. To me, that was a huge showing of what most everyone in our area seems to be feeling about this project. I have not talked to one person in our upper county area that is "for" this project. There are people in lower county talking against this project as well.

Hope you make the "right" decision for ALL the people of this beautiful area.

Warm regards,

Re: 47 Degrees North Major Amendment proposal

I am writing to inform the city of my very strong opposition to the Sun Communities 47° North proposal for the Bullfrog flats property. The proposed manufactured home / RV community:

- Is in clear violation of the vision for the property adopted by the city and presented to the public as a condition for annexing Bullfrog Flats into the city. It's not in character with the City of Cle Elum and does not comply with fundamental requirements of the city's comprehensive plan, the development agreement, or zoning for the property.

- Instead of traditional neighborhoods that were planned to be connected to and a natural extension of the city, supporting the rest of the city, 47 Degrees North would create a private for-profit community and tourist resort with gates, private roads and utilities which will be separated from the rest of the city. It will create a private city within a city, forever.

- Fiscal studies of 47 Degrees North show that it will not create sufficient tax revenue to cover the city's cost to serve it. Unless the developer agrees to financially cover the substantial deficits, forever, existing city taxpayers will be required to subsidize Sun's development and taxes will go up.

- Sun's 47 Degrees North will be in its entirety a private business not a natural neighborhood (no lots sold, all spots leased), wholly owned by a massive out-of-state publicly traded corporation whose fiduciary duty is to its shareholders, not city taxpayers. Any subsidies of the project would be a gift of public funds to a private entity.

- Is not housing as contemplated for the Bullfrog UGA. It will displace half of the actual housing planned for the area and replace it with a private park designed as a transient playground.

- Will be the largest manufactured home/RV park on the West Coast and will double the population of Cle Elum. Parks of this magnitude have no place in a town as small as Cle Elum. Wrong Place, Wrong Size.

- Sun has eliminated the industrial park component of the approved plan and is proposing a major new retail center to the project which would compete with existing city businesses and will seriously damage Cle Elum's downtown, which the city has invested millions of dollars to reinvigorate. The retail center is in direct conflict with the city's comprehensive plan which states that the Bullfrog Flats Master Plan…."is intended to elevate the DTC (downtown core) as the primary retail and activity nexus for Cle Elum". Current rules for the Bullfrog Flats property prohibit a retail center on the property.

- Provides no significant benefits to city or UKC residents, but creates serious and significant impacts on roads, police, fire, schools, emergency services, hospitals and other public services that can't be (or won't be) fully mitigated by the developer.

- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for. Any such increase in taxes will effectively translate to a subsidy for a private business,

- Denial of 47 Degrees North will not take away or reduce underlying property rights. It will simply require Sun Communities to comply with city's current rules, regulations and comprehensive plan for the property. The original underlying zoning approval and development agreement already allows development of this site, just not as a private resort/manufactured home community/retail center.

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Respectfully,

K Rentko

ADDITIONAL COMMENTS:

As a new resident of Cle Elum, the thing I love most is the whole community vibe. People helping people. I also love the small town feel.
I work at a Safeway in Renton, and we are sorely understaffed. If the population of Cle Elum doubles, who is going to work at Safeway? What will happen to the charm of Downtown Cle Elum?

- Will this create year round employment for ACTUAL residents of Cle Elum?
- Will Cle Elum need to build another elementary school?
- Will Cle Elum have a dozen more traffic lights installed to deal with transient fun seekers?
- Will the Cle Elum* be able to keep up with the increase in crime issues?
- Will the people living @ 47° pay taxes to the city of Cle Elum?
- WHY would we give up a part of our town to some huge company that isn't local?

*police

To whom it may concern in the Cle Elum city, planners office,
I am writing to express my extreme opposition to moving forward with the 47° north project. My family owns a home in Roslyn and I feel that the 47° north project would fundamentally change the feel of the entire area. Growth is happening already. We are seeing developments on many parts of the ridge and expansion in the towns of Ronald and Roslyn as well. Are these additional housing units will add population to an area that is already feeling strapped for resources. I know there are many form letters out there detailing the significant impacts the project will have, with a lot more history, and detail to the specifics than I knew. As a local homeowner, I worry about how an increase of this magnitude will affect the quality of life of those of us who live and enjoyed the Cle Elum Roslyn area. We have a unique, beautiful, small town place in our state, that is thriving and growing at a rate where we can be thoughtful and make wise decisions about the direction we want to take it in. This is a crucial moment to keep it that way. You have a responsibility to make a decision in the best interest of the people who live here. Please think about the area as you would like it to see in 20 years, 30 years. You cannot take back a decision such as this, so we need you to make the right choice and to deny this proposed major amendment and retain the current approved land use for the property

I am writing to inform the city of my very strong opposition to the Sun Communities 47° North proposal for the Bullfrog flats property. The proposed manufactured home / RV community will result in negative impacts:
o Traffic gridlock with high volume of transient visitors in large recreational vehicles
o Decreased level of service for emergency medical services
o Decreased level of service for police protection
o Decreased level of service for fire protection
o Increased tax burden on existing property owners to pay for aging infrastructure (water, sewer, power, roads)
o Increased 2nd home ownership within a private resort adversely impacting many throughout the community.
o Adverse impact to downtown core businesses as resort environment will drive dollars to remain at the resort.
o Potential to increase jobs yet does little to offer adequate affordable housing options in relationship to number of workers necessary to support multiple resorts in the area.
o Potential to require additional city resources to manage and address concerns by a high volume of transient visitors.
o High volume of short-term rentals (STRs) tax revenue by law are applied tourism rather than infrastructure upgrades.
o 90% of profits will be, by law, sent out of our community to Wall Street investors.
For these reasons, I implore the City to DENY this proposed major amendment and retain the current approved land use for the property.
Respectfully,

Please do not allow Sun Communities to ruin the lovely community that is Cle Elum. It will only benefit the corporation and not the community. In these turbulent times we do not need more growth and the destruction of more forest next to rivers will not benefit any of us.

Sincerely,

Kirk Copple

Re: 47 Degrees North Major Amendment proposal

I am writing to inform the city of my very strong opposition to the Sun Communities 47° North proposal for the Bullfrog flats property. The proposed manufactured home / RV community:

- Is in clear violation of the vision for the property adopted by the city and presented to the public as a condition for annexing Bullfrog Flats into the city. It's not in character with the City of Cle Elum and does not comply with fundamental requirements of the city's comprehensive plan, the development agreement, or zoning for the property.
- Instead of traditional neighborhoods that were planned to be connected to and a natural extension of the city, supporting the rest of the city, 47 Degrees North would create a private for-profit community and tourist resort with gates, private roads and utilities which will be separated from the rest of the city. It will create a private city within a city, forever.
- Fiscal studies of 47 Degrees North show that it will not create sufficient tax revenue to cover the city's cost to serve it. Unless the developer agrees to financially cover the substantial deficits, forever, existing city taxpayers will be required to subsidize Sun's development and taxes will go up.
- Sun's 47 Degrees North will be in its entirety a private business not a natural neighborhood (no lots sold, all spots leased), wholly owned by a massive out-of-state publicly traded corporation who's fiduciary duty is to its shareholders, not city taxpayers. Any subsidies of the project would be a gift of public funds to a private entity.
- Is not housing as contemplated for the Bullfrog UGA. It will displace half of the actual housing planned for the area and replace it with a private park designed as a transient playground.
- Will be the largest manufactured home/RV park on the West Coast and will double the population of Cle Elum. Parks of this magnitude have no place in a town as small as Cle Elum. Wrong Place Wrong Size.
- Sun has eliminated the industrial park component of the approved plan and is proposing a major new retail center to the project which would compete with existing city businesses and will seriously damage Cle Elum's downtown, which the city has invested millions of dollars to reinvigorate. The retail center is in direct conflict with the city's comprehensive plan which states that the Bullfrog Flats Master Plan...."is intended to elevate the DTC (downtown core) as the primary retail and activity nexus for Cle Elum". Current rules for the Bullfrog Flats property prohibit a retail center on the property.
- Provides no significant benefits to city or UKC residents, but creates serious and significant impacts on roads, police, fire, schools, emergency services, hospitals and other public services that can't be (or won't be) fully mitigated by the developer, and,
- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for. Any such increase in taxes will effectively translate to a subsidy for a private business,
- Denial of 47 Degrees North will not take away or reduce underlying property rights. It will simply require Sun Communities to comply with city's current rules, regulations and comprehensive plan for the property. To: City of Cle Elum - Mayor, City Council members, Planning Department,

119 West First Street, Cle Elum, WA 98922

We are writing to inform the City of our very strong opposition to the Sun Communities 47° North proposal for the Bullfrog flats property.

We do not have the infrastructure to support a development of this size. Our roads, grocery stores, gas stations, and emergency services already struggle to keep up during the busy summer weekends which run at a minimum, May – September. As a resident, I know that I shouldn't plan to buy groceries or gas in town between Friday – Monday during these busy months because the traffic, lines, and lack of parking make it extremely difficult. The shelves at Safeway are often bare by Saturday afternoon.

This development will ruin the fabric of our community. It will bring in thousands of transient residents. People who don't call this home. People who don't care about respecting our community, our services, our beautiful space. People who won't think twice about speeding through school zones or shooting off fireworks

during our peak fire season. We already have many visitors here each weekend and I understand that visitors are important to our local economy, however, a development of this size is not something that will benefit our community in any way.

We have a major housing issue here. Upper County has gotten increasingly expensive and it is harder than ever for many people who work here to afford to live here. If the City of Cle Elum wants to do something that would have a positive impact on the community at large as well as those residents who are being priced out of the area, they would work with a developer to build affordable housing. Not manufactured homes on leased land where the "owners" will never build equity because they will never own the land their homes are built on. How about building affordable housing that is truly affordable and will give people the opportunity to own a home and also build equity? How about building more apartments so that renters are able to secure housing that they can actually afford? How about we make sure that the people who work here – teachers, police officers, fire fighters, restaurant and grocery store workers – the people who keep our city going and protect our safety – can actually afford to live here? Sun Communities will not help our housing situation. It will create more of a housing problem because it will create more low wage jobs which means more people who will work here but not be able to afford to live here.

I have scoured the internet, looking at reviews of different Sun Communities developments and I have found nothing but complaints revealing a pattern of discriminatory housing practices, negligent maintenance, problems with aggressive dogs, unreliable maintenance workers, significant rent increases, and predatory practices.

This project will not generate enough additional tax revenue to pay for itself and it is likely that the public – all of us here – will end up subsidizing this project through increased property and sales taxes.

I am deeply concerned with how this development will impact our local businesses, our residents and our community. For all of these reasons, I ask the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Respectfully,

Kristin Sanderson & John MacKenzie

To the City of Cle Elum: Mayor, City Council Members, and Planning Department

Re: 47 Degrees North Proposal

I am writing to provide the city with my very strong concerns about the Sun Communities 47°N proposal for the Bullfrog Flats property. The proposed manufactured home/RV community:

· Is not in character with the City of Cle Elum or the upper Kittitas Valley (a fundamental requirement of the current zoning for the property),

· Would create a new and separate private tourist resort instead of the natural extension of city neighborhoods originally envisioned by city zoning and current approvals,

· Is in its entirety a private business not a neighborhood (no lots will be created or sold, all spots will be leased, and the project will be private), wholly owned by a large out-of-state publicly traded corporation whose fiduciary duty is to its shareholders,

· Provides no significant benefits to upper valley residents and tax payers,

· Will create serious and significant impacts on roads, police, fire, schools, emergency services, hospitals, and other public services that can't (or won't) be fully mitigated by the developer, and therefore,

· Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for, essentially a subsidy for a private business,

· Denial of the Sun Communities proposal would not take away or reduce underlying property rights. The original underlying zoning approval would still allow development of this site, just not as a private resort/manufactured home community.

*For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.*

Re: 47 Degrees North Major Amendment proposal

We are writing to inform the city of our very strong opposition to the Sun Communities 47° North proposal for the Bullfrog flats property. The proposed manufactured home / RV community:

- Is in clear violation of the vision for the property adopted by the city and presented to the public as a condition for annexing Bullfrog Flats into the city. It's not in character with the City of Cle Elum and does not comply with fundamental requirements of the city's comprehensive plan, the development agreement, or zoning for the property.
- Instead of traditional neighborhoods that were planned to be connected to and a natural extension of the city, supporting the rest of the city, 47 Degrees North would create a private for-profit community and tourist resort with gates, private roads and utilities which will be separated from the rest of the city. It will create a private city within a city, forever.
- Fiscal studies of 47 Degrees North show that it will not create sufficient tax revenue to cover the city's cost to serve it. Unless the developer agrees to financially cover the substantial deficits, forever, existing city taxpayers will be required to subsidize Sun's development and taxes will go up. We own two rental properties in the city limits of Cle Elum and this will be a huge impact for us and the reasonable rent rate we currently offer our tenants.
- Sun's 47 Degrees North will be in its entirety a private business not a natural neighborhood (no lots sold, all spots leased), wholly owned by a massive out-of-state publicly traded corporation whose fiduciary duty is to its shareholders, not city taxpayers. Any subsidies of the project would be a gift of public funds to a private entity.
- This is not housing as contemplated for the Bullfrog UGA. It will displace half of the actual housing planned for the area and replace it with a private park designed as a transient playground.

- Will be the largest manufactured home/RV park on the West Coast and will double the population of Cle Elum. Parks of this magnitude have no place in a town as small as Cle Elum. Wrong Place Wrong Size.

- Sun has eliminated the industrial park component of the approved plan and is proposing a major new retail center to the project which would compete with existing city businesses and will seriously damage Cle Elum's downtown, which the city has invested millions of dollars to reinvigorate. The retail center is in direct conflict with the city's comprehensive plan which states that the Bullfrog Flats Master Plan...."is intended to elevate the DTC (downtown core) as the primary retail and activity nexus for Cle Elum". Current rules for the Bullfrog Flats property prohibit a retail center on the property.

- Provides no significant benefits to city or UKC residents, but creates serious and significant impacts on roads, police, fire, schools, emergency services, hospitals and other public services that can't be (or won't be) fully mitigated by the developer, and,

- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for. Any such increase in taxes will effectively translate to a subsidy for a private business,

- Denial of 47 Degrees North will not take away or reduce underlying property rights. It will simply require Sun Communities to comply with city's current rules, regulations and comprehensive plan for the property. The original underlying zoning approval and development agreement already allows development of this site, just not as a private resort/manufactured home community/retail center.

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

- Is in clear violation of the vision for the property adopted by the city and presented to the public as a condition for annexing Bullfrog Flats into the city. It's not in character with the City of Cle Elum and does not comply with fundamental requirements of the city's comprehensive plan, the development agreement, or zoning for the property.
- Instead of traditional neighborhoods that were planned to be connected to and a natural extension of the city, supporting the rest of the city, 47 Degrees North would create a private for-profit community

and tourist resort with gates, private roads and utilities which will be separated from the rest of the city. It will create a private city within a city, forever.

- Fiscal studies of 47 Degrees North show that it will not create sufficient tax revenue to cover the city's cost to serve it. Unless the developer agrees to financially cover the substantial deficits, forever, existing city taxpayers will be required to subsidize Sun's development and taxes will go up.

- Sun's 47 Degrees North will be in its entirety a private business not a natural neighborhood (no lots sold, all spots leased), wholly owned by a massive out-of-state publicly traded corporation who's fiduciary duty is to its shareholders, not city taxpayers. Any subsidies of the project would be a gift of public funds to a private entity.

- Is not housing as contemplated for the Bullfrog UGA. It will displace half of the actual housing planned for the area and replace it with a private park designed as a transient playground.

- Will be the largest manufactured home/RV park on the West Coast and will double the population of Cle Elum. Parks of this magnitude have no place in a town as small as Cle Elum. Wrong Place Wrong Size.

- Sun has eliminated the industrial park component of the approved plan and is proposing a major new retail center to the project which would compete with existing city businesses and will seriously damage Cle Elum's downtown, which the city has invested millions of dollars to reinvigorate. The retail center is in direct conflict with the city's comprehensive plan which states that the Bullfrog Flats Master Plan…."is intended to elevate the DTC (downtown core) as the primary retail and activity nexus for Cle Elum". Current rules for the Bullfrog Flats property prohibit a retail center on the property.

- Provides no significant benefits to city or UKC residents, but creates serious and significant impacts on roads, police, fire, schools, emergency services, hospitals and other public services that can't be (or won't be) fully mitigated by the developer, and,

- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for. Any such increase in taxes will effectively translate to a subsidy for a private business,

- Denial of 47 Degrees North will not take away or reduce underlying property rights. It will simply require Sun Communities to comply with city's current rules, regulations and comprehensive plan for the property. The original underlying zoning approval and development agreement already allows development of this site, just not as a private resort/manufactured home community/retail center.

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Respectfully,

~Lace

Re: 47 Degrees North Major Amendment proposal

I am writing to inform the city of my very strong opposition to the Sun Communities 47° North proposal for the Bullfrog flats property. The proposed manufactured home / RV community:

- Is in clear violation of the vision for the property adopted by the city and presented to the public as a condition for annexing Bullfrog Flats into the city. It's not in character with the City of Cle Elum and does not comply with fundamental requirements of the city's comprehensive plan, the development agreement, or zoning for the property.

- Instead of traditional neighborhoods that were planned to be connected to and a natural extension of the city, supporting the rest of the city, 47 Degrees North would create a private for-profit community and tourist resort with gates, private roads and utilities which will be separated from the rest of the city. It will create a private city within a city, forever.

- Fiscal studies of 47 Degrees North show that it will not create sufficient tax revenue to cover the city's cost to serve it. Unless the developer agrees to financially cover the substantial deficits, forever, existing city taxpayers will be required to subsidize Sun's development and taxes will go up.

- Sun's 47 Degrees North will be in its entirety a private business not a natural neighborhood (no lots sold, all spots leased), wholly owned by a massive out-of-state publicly traded corporation whose fiduciary duty is to its shareholders, not city taxpayers. Any subsidies of the project would be a gift of public funds to a private entity.

- Is not housing as contemplated for the Bullfrog UGA. It will displace half of the actual housing planned for the area and replace it with a private park designed as a transient playground.

- Will be the largest manufactured home/RV park on the West Coast and will double the population of Cle Elum. Parks of this magnitude have no place in a town as small as Cle Elum. Wrong Place, Wrong Size.

- Sun has eliminated the industrial park component of the approved plan and is proposing a major new retail center to the project which would compete with existing city businesses and will seriously damage Cle Elum's downtown, which the city has invested millions of dollars to reinvigorate. The retail center is in direct conflict with the city's comprehensive plan which states that the Bullfrog Flats Master Plan...."is intended to elevate the DTC (downtown core) as the primary retail and activity nexus for Cle Elum". Current rules for the Bullfrog Flats property prohibit a retail center on the property.

- Provides no significant benefits to city or UKC residents, but creates serious and significant impacts on roads, police, fire, schools, emergency services, hospitals and other public services that can't be (or won't be) fully mitigated by the developer.

- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for. Any such increase in taxes will effectively translate to a subsidy for a private business,

- Denial of 47 Degrees North will not take away or reduce underlying property rights. It will simply require Sun Communities to comply with city's current rules, regulations and comprehensive plan for the property. The original underlying zoning approval and development agreement already allows development of this site, just not as a private resort/manufactured home community/retail center.

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Dear City Council, 6/09/2023

As a member of the community and a student at the local high school, my engineering class has been researching and learning all about the project 47 degrees north. The more I learned about this project the more concerned I became for my community. Kids spend 50 percent of the year at school so I decided to focus on how this project will impact our school for my research.

The effects of this project will be district wide. The school district will be over 20% over capacity, this means 12 or more teachers will be needed and up to 5 more buses. Additionally the maximum number of students that can fit in the high school is 440 people, that's 30 teenagers per classroom which is more students than some of the classrooms allow.

According to current population rates, the project would almost double the high school population to 401 students. Currently there are 848 students district wide and 47 degrees north would bring in an estimated 620 new students, district wide. Although the classrooms in the high school can fit 30 people it doesn't mean the other facilities in the school can. This means a new parking lot for the students and visitors. A new cafeteria would be needed and the gym wouldn't be able to hold the whole school for events and assemblies. Essentially this means a whole new school and that arises even more issues including funding and affects student learning.

These are just some of the effects of this project and as a local student and community member I will not support it.

Sincerely,

Landon Stone

Subject: 47 Degrees North helps a Wall Street firm, not Cle Elum

[EXTERNAL EMAIL] DO NOT CLICK links or attachments unless you recognize the sender and know the content is safe.

Please vote no on this development as it competes with downtown retail, will be a drain on our resources, and create long term blight on what now is incredibly beautiful land. The area would benefit economically from other options by pumping up taxes, jobs, home ownership while not turning our area into a Wall Street long term risk. This land use could instead be used as normal lower priced (than Suncadia) home development without a huge retail center, plus preserve 1/3 of land like other desirable communities.

The towns of Cle Elum and Roslyn are awesome, historic and valuable to preserve/strengthen. We have soooo many empty retail buildings now. We don't want ghost towns and communities build that cause unpredictable undesirable outcomes.

Re: 47 Degrees North

This Comment Letter has been prepared to address Both the Application for the proposed major modification to the Bullfrog UGA Master Site Plan and Development Agreement, and the Addendum to the SEIS.

I have been fighting against Sun Communities' 47 Degrees North Proposal for years. During that time, I have spent countless hours trying to figure out why the City of Cle Elum administration would entertain the prospect of what Sun has proposed. The only reason that makes any kind of sense is that The City needs the money.

People do silly things when they are short of money. Mostly, they make bad investment decisions. They try to make up for lost opportunity by investing long-term money into short term investments.

Jack (of the beanstalk fame) learned the hard way that he shouldn't have purchased those beans...

Plenty of developers would be happy to purchase the Bullfrog Flats property and develop it in a manner consistent with the currently approved plan. The City should not look upon the Sun proposal as its only option. If the Sun proposal is rejected, Sun will sell the land and a much better outcome will evolve.

This comment letter is submitted for the record through the process implemented by the City. My comments however are directed to the Hearing Examiner rather than the City and its consultant "Staff". Although I hope that the individuals involved in creating the staff report associated with the proposed development consider the detail contained herein, prior evidence indicates that is unlikely. The hearing examiner is likely our only shot at stopping this nightmare.

Sun Communities has chosen to proceed with its application for development approval through the means of a Major Modification of an approved plan that has no reasonable similarity to the development being proposed. Any and every reasonable person would conclude that the proposal submitted by Sun Communities is unrecognizable when compared with the approved plan. The single similarity is that both plans include an element of housing. It is a grotesque failure on the part of the City

of Cle Elum administration to have allowed this farce to continue to this point. The application should have been rejected by the City and a completely new development proposal should have been required.

Cle Elum and the adjacent upper portion of Kittitas County is recognized as a gem by those that live here and others that simply visit and/or recreate amongst us. This place cannot be allowed to be destroyed as a result of short-sighted planning.

Opening Narrative

Details associated with the development of the Bullfrog UGA were negotiated and agreed to between the City of Cle Elum and Trendwest on the 30th of October 2002. The terms outlined in the Master Plan and Development Agreement and its associated Conditions of Approval were the result of a combined effort to determine the best use of the area resulting in a profitable return for the developer, and a net positive result for the City of Cle Elum and the upper county community as a whole.

The final details were assembled in an evolutionary manner as documented in (i) the 1998 amendments to both the Kittitas County and City of Cle Elum Comprehensive Plans, (ii) the adoption of the Bull Frog Urban Growth Area Study (Green Book), (iii) the Final Environmental Impact Statement associated with the development issued on March 18, 2002, (iv) adoption of the Bullfrog UGA Subarea Plan on October 8, 2002, and (v) the execution of the Development Agreement on October 30, 2002. The Bullfrog UGA was annexed by the City in 2002.

Key components of the Original Master Plan and Development Agreement include the following:

1) 1,334 dwelling units
2) 75 acre Business Park, minimum of 37.5, Commercial/light Industrial-limited retail
3) All streets and alleys in the UGA to be public
4) Open housing with access to the city
5) Phasing, 20-30 year organic buildout
6) One residence per single legal lot, for the single family residential
7) Fee simple land ownership, for the single family residential
8) Developing a mix of housing uses throughout the property
9) Mitigation, Monitoring & fiscal Neutrality
10) Maximum 100 temporary RV sites to house contractors during construction only
11) Developer to actively recruit & hire from the existing local labor pool
12) Public (city) ownership of utility systems and roads

Sun Communities has since purchased the property encompassing the Bullfrog UGA from Suncadia, the successors in interest to the original project sponsor, Trendwest. Sun Communities purchased the land including all of the rights, responsibilities and commitments that were assigned to it. Sun has the option of terminating certain agreements associated with the development of the property, but instead is attempting to hijack the intent of the Agreements and reformat them in a manner that is wholly un-recognizable from their original form.

Key components of Sun's proposed Major Modification include the following:

1) The elimination of 661 dwellings
2) 661 slot private RV/Camping park
3) Elimination of the Business Park, replaced with 25 acres of retail
4) Primarily private non-contiguous streets and alleys
5) Private park, closed off from the city & the public
6) Phasing, 5-7 year build-out with no consideration for concurrency of service
7) Single ownership, leased land
8) Manufactured Housing Park with 10 three-story apartment buildings
9) Impact Fee based mitigation (i.e. pay up front and not be responsible for actuals)
10) Off-site construction of manufactured housing, eliminating local construction and supply jobs
11) Privately owned utilities and roads

The standing subarea plan and Development Agreement associated with the Bullfrog UGA has been designed primarily for permanent residential housing. Sun Communities is proposing the conversion of the subarea to a single owner destination manufactured housing/recreational vehicle park and resort, catering primarily to a transient population. Their proposal is the antithesis of the vision that Cle Elum has espoused, primarily a single integrated community in keeping with its traditional rural, small town and mountain character.

The Sun proposal should not be considered a Major Modification to the approved Development Agreement. It is a wholly new concept and should be considered as such. As a result, this Major Modification should be rejected in its entirety.

1. HOUSING

Sun's proposal relating to housing is in conflict with the Subarea Plan, the Development Agreement, the Comprehensive Plan, and City Zoning. The proposal eliminates 621 dwelling units and converts the remaining dwellings to primarily rental or resort occupancies in the form of a for-profit manufactured housing park.

A) Development Agreement

The Land Use Summary contained within the Conditions of Approval specified that the Residential Uses were to be built in the quantities stipulated, namely:

The Conditions of Approval (COA) to the Master Site Plan specifies:
Land uses shall be the types, densities and amounts (or within the ranges) as shown in the Master Site Plan and the Land Use Summary Table.

Single Family Residential	810
Multi-Family Residential	524
Low Income Housing	50
	1,334 + 50

Sun's proposal	
Single Family Residential	493
Multi-Family Residential	180
Low Income Housing	50
	673 + 50

Opening statement to the Conditions of Approval.....
While the number of residential units and commercial square footage may vary within the range indicated, the residential minimum densities shall be a maintained for the project as a whole and the overall master planned development shall maintain approximately a 60 percent to 40 percent split between single family and multifamily residential development as a means of protecting the overall mix of uses proposed in this development. The total number of single family or multi-family units may vary plus or minus 10 percent from the number shown in the Land Use Summary Table, provided the total number of residential units shall not exceed the maximum as specified in this Condition.

i. Sun proposes a reduction in housing units in excess of 50%. The COA allows for a reduction up to 10%
ii. Sun proposes a 73/27 split between single family and multifamily units. The COA requires an approximate 60/40 split.
iii. Sun proposes a density of 6.57 multifamily units per acre. The COA requires minimum densities of 8 units per acre.

B) Comprehensive Plan

According to the City of Cle Elum's Comprehensive Plan...
Cle Elum's evolving character will depend in large part upon the type of community the citizens will support through its land use policies. Future land use patterns will strive to reflect the small town qualities, rich cultural history and natural beauty that current residents expect and desire to preserve. Cle Elum strives to function as a 21st century city while retaining its 19th century feel.

i. Housing Element

The Comp Plan requires its UGA to accommodate 20 years of growth.
Housing Element, calculations evidence a demand for an additional 1,460 dwelling units by 2037 to accommodate the County's population projections for Cle Elum. The original Bullfrog UGA Master Plan reflected the City's vision for future growth and provided a vehicle to achieve those growth targets. The Sun proposal eliminates over half of the housing assigned to the UGA. In addition, it can be expected that half of the housing proposed by Sun will be utilized by a transient population including those taking advantage of the short-term-rental opportunity. With the net result of ensuring a future long term housing deficit.

Housing Element Goals and Policies
H-1: The City of Cle Elum includes a diverse mix of housing types that meets the needs and are affordable to all segments of its population, especially low and moderate income households. The range of housing types also reflect market conditions, the City's rural setting, and small-town character.

H – 1.14 Encourage a mix of housing types, including affordable housing types, to be dispersed throughout the City, rather than concentrated in a specific area(s)
H – 2.1 Promote diversity in style and cost by allowing innovative mixtures of housing types and creative approaches to housing design and development.
H – 2.6 Use zoning and building codes, where practicable, to encourage home ownership opportunities

Comment; The Sun proposal reflects a homogenized type of stamped-out housing, incongruous with the community's current housing types. The requirement for diversity of style, cost, and ownership opportunity has been ignored. In 2017, manufactured housing and mobile homes accounted for 6% of Cle Eum housing. If Sun was allowed to build its proposed Park, manufactured housing and mobile homes would account for approximately 35% of Cle Elum housing.

ii. Land Use Goals and Policies

LU – 1.3 Ensure that new development does not outpace the City's ability to provide and maintain adequate public facilities and services by allowing new development to occur only when and where adequate facilities exist or can be provided.
LU – 1.6 The City will take a more active role in interagency planning and coordination among local jurisdictions, including: Kittitas County, South Cle Elum and Roslyn.
LU – 2.12 Encourage the development of affordable housing that is "Fee Simple", either through development agreement [CEMC 17.140] or by code change.

Comment; The phasing for the initial Master Plan was 20-30 years. Sun proposes to build out its vision in 5-7 years. Local Service providers are not able to react to the increase in the type of growth that Sun proposes in the timeframe contemplated. "Fee Simple land" is a defining feature of our neighborhoods and is the cornerstone of ensuring a landed community with city-roots. The avoidance of the "Housing Trap" associated with leased-land trailer parks is critical.

2. ZONING

Sun Communities withdrew its prior application partially as a result of the City's indicated reluctance to accept a binding site plan for its "Park" within the PMU district. Sun's attempt to create a binding site plan associated with their manufactured home park was an attempt to sidestep the one house per legal lot requirement of Cle Elum's code. Because that plan failed, they are now back with a plan to create a subdivision. Sun is playing fast and loose with reality. They are painfully trying to contort this "Park'" into a subdivision simply to find some loop-hole to get it approved. However, Cle Elum's subdivision code was not written to accommodate hundreds of adjacent lots, with private roads and utilities, under the ownership of and management of a single part park developer, intending to provide rental space for the placement of removable housing units, owned by a combination of individuals and the Park developer.

There is such a thing as a manufactured housing subdivision. However, by definition, it is a subdivision in which fee simple lots are developed and sold to individuals for the placement of privately-owned manufactured housing. The lots are not rented to others by a common owner.

RCW 59.20.030(13) "Mobile home park subdivision" or "manufactured housing subdivision" means real property, whether it is called a subdivision, condominium, or planned unit

development, consisting of common areas and two or more lots held for placement of mobile homes, manufactured homes, or park models in which there is private ownership of the individual lots and common, undivided ownership of the common areas by owners of the individual lots;

Sun should not be allowed to develop a manufactured home subdivision for three primary reasons:

1) The City of Cle Elum zoning does not authorize manufactured housing subdivisions;
2) Sun's stated intention is not to make the individual lots available for private ownership; and
3) The development standards detailed in CEMC 16.12A.060 of the Subdivision code are in direct conflict with Sun's proposal. The size and frontage of the proposed housing blocks are non- conforming and the code states that all streets, curbs, gutters, sidewalks, and utilities will be built to city standards and will be publicly owned.

Sun's narrative description accompanying its current application for a Major Modification to the existing Development Approvals for the Bullfrog Flats UGA included several components, including a boundary line adjustment/lot consolidation and a preliminary subdivision for a new single-family residential community. Sun stated that it was interested in processing all three of the applications at the same time, however that was a red herring. The boundary line adjustment and the preliminary subdivisions are a significant part of Sun's scheme to find their way around City ordinances prohibiting manufactured housing parks. Their tortured plan is multi-layered. Sun has laid- out their intention but has intentionally failed to provide sufficient detail for the City to consider its requested applications for the boundary line adjustment and the preliminary subdivision. So, instead of considering all of the applications at one time, they are attempting to get an approval for the Major Modification prior to stepping into the process of approvals related to the subdivision.

A Major Modification approval could be made subject to the later approval of the subdivision, but the discretionary approvals associated with the preliminary subdivision will be much harder to deny after the majority of the project has been approved. I believe that this is a scam cooked-up between the City consultant "staff" and Sun Communities.

The City should require all three of the applications to be processes simultaneously.

A) Planned Mixed Use District (PMU) Regulations

i. CEMC 17.45.010, **PMU, Purposes and objectives**.
   a. Sec.A.3. To encourage building design that is in keeping with the climate and the traditional rural, small town, mountain character of the Cle Elum Area;
   b. Sec.A.5. To ensure that all development gives adequate consideration to and provides mitigation for the impacts it creates with respect to transportation, public utilities, open space, recreation and public facilities....
   c. Sec. B; Each proposal for development within the PMU district shall conform to the Cle Elum Comprehensive Plan, any applicable subarea plan and applicable annexation and/or development agreements.....
   d. Sec.B.2. To create attractive, pedestrian-oriented neighborhoods with a range of housing types, densities, costs and ownership patterns

The afore mentioned purposes and objectives stand in stark contrast to the proposal submitted by Sun Communities.

ii. CEMC 17.45.050, **PMU, Uses Permitted**
    a. Section A. All principally and conditionally permitted uses in this title may be allowed in the PMU district... Permitted uses include
        i. R-Residential District; and
        ii. RM- Multiple Family Residential District
    b. 17.16, R-Residential District; 17.16.010 Outright Permitted uses; Sec. A. One single-family dwelling per legal lot of record (including manufactured homes) and duplexes with not more than one duplex per street frontage per block.
    c. 17.20, RM Multiple Family Residential District; 17.20.010 Permitted uses; Sec. A. Single-family dwellings, multiple-unit dwellings and townhouses.

Single-family dwellings are allowed within the PMU District because they are allowed in both the Residential District and the Multiple Family District. However, the code clearly and unambiguously states that each single-family dwelling must be placed on a single tax parcel, ***"One single-family dwelling per legal lot of record (including manufactured homes)"***.

Sun was attempting to side-step Cle Elum Municipal Code by suggesting that it should be allowed to utilize a binding site plan in lieu of a formal subdivision because, under RCW 58.17.035, binding site plans are authorized for use when land is divided for the purpose of commercial leasing as provided for in RCW 58.17.040(5). However, RCW 58.17.035 merely allows a city to adopt "by ordinance" procedures for the divisions of land by use of a binding site plan. Cle Elum has chosen, "by ordinance" to allow for binding site plans to be used only in specific commercially and industrial zoned areas as allowed in RCW 58.17.040 (4), but chose not to allow for the divisions of property for lease as provided for in RCW 58.17.040(5).

In Sun's previous application Sun wanted to avoid applying for a formal subdivision because their plan was unlikely to qualify and the Cle Elum subdivision requirements conflicted significantly with their plan. However, they are now out of options and have to include a subdivision in the proposal.

B) Mobile/Manufactured Housing Parks Not allowed

The City of Cle Elum zoning ordinance does not authorize "mobile home parks" or manufactured home parks" in any zoning district. Neither land use is listed as a permitted or conditional use in any district. In the absence of specific authorization, the use is prohibited within the City.

RCW 35.63.161(1) states *After June 10, 2004, a city may designate a new manufactured housing community as a nonconforming use, but may not order the removal or phased elimination of an existing manufactured housing community because of its status as a nonconforming use*. This provision is consistent with the current Cle Elum zoning ordinance which recognizes that preexisting mobile home parks shall retain a status of nonconforming uses. It is also consistent with the current prohibition on new mobile home parks and manufactured housing communities since the City has not elected to designate such land uses as nonconforming use.

The reference to 'nonconforming use" is relevant. The courts have consistently recognized that "...nonconforming uses are uniformly disfavored..." and "...limit the effectiveness of land-use-controls, imperil the success of community plans and injure property values." *Rhod-A-Zalea & 35th Inc. v. Snohomish County*, 136 Wn.2d 1, 8, 959 P.2d 1024 (1998).

RCW 59.20.030(14) *"Mobile home park," "manufactured housing community," or "manufactured/mobile home community" means any real property which is rented or held out for rent to others for the placement of two or more mobile homes, manufactured homes, or park models* ***for the primary purpose of production of income*****.....**

3. BUSINESS PARK

The Business Park, as defined in the following agreements, is mandated. It is not a "Potential" use, such as the golf course, lodge etc. The Business Park was designed as a means of employment and job creation opportunities.

Sun proposes a 25-acre Retail/Restaurant Park. A large grocery store, retail, and restaurants are its only proposed uses. All of which are specifically and excruciatingly excluded by the Pre-Annexation Agreement, the Development Agreement, and the Subarea Plan. The proposed Retail Center is larger than the entire downtown core. Sun Communities proposes no commitment to build the Retail Center, other than a single structure, and has documented its intent to divest itself of the Retail Center following the buildout of the manufactured home/RV parks. Sun is relying on obnoxiously inflated sales tax figures associated with the Retail Center to support the City's fiscal economics and yet is making no commitment to build or operate it.

Most of the retailers in the Downtown Core have provided letters strongly condemning the Retail component of the Sun Communities 47 Degrees North Proposal. Those retailers are the engine that keeps the City of Cle Elum alive. Although the City consultant "Staff" may consider themselves the experts and all-knowing, those businesses owners are the real experts on the matter and they have spoken load and clear.

It is a significant failure that the Environmental review (Addendum to the SEIS) did not analyze the impact of the proposed Retail/Restaurant Park on the downtown core businesses.

A) Pre Annexation Agreement July 26, 2000

5.1.3.2 Business/Office Park of approximately 80 acres with limited retail and service uses designed to serve the convenience needs of employees in the UGA. The Business/Office park may be developed in phases and subphases, provided a **minimum** of 40 acres shall be identified in the first phase...

5.1.6 A limitation on the retail and service uses development in the UGA to only those described elsewhere in this Agreement, so as to maintain and enhance the existing downtown retail core of the City of Cle Elum.

B) Development Agreement, Conditions of Approval (COA)

COA, 12.E. *The Business Park may be developed in Phases, provided a* ***minimum*** *of 37.5 acres shall be identified in the first phase and an additional 37.5 acres shall be reserved for subsequent development unless or until Developer demonstrates there is insufficient market demand for this subsequent phase and obtains a modification pursuant to the Planned Mixed Use Ordinance.*

COA 17. Specifies that the Business Park is limited to the uses listed in CEMC17.34
CEMC 17.34.010 Permitted Uses,
No building premises shall be used, and no building shall hereafter be erected, moved into the district or structurally altered, unless otherwise provided in this title, except for one or more of the following uses:

A. Catalog or Internet sales;
B. Business and professional offices;
C. Commercial testing laboratories;
D. Research and development laboratories;
E. Research, financial or information processing offices;
F. Scientific research, testing, developmental and experimental laboratories;
G. Vocational/technical schools;
H. Manufacturing, processing, assembling and packaging of articles, products or merchandise from previously prepared natural or synthetic materials;
I. Manufacturing, processing, treating, assembling and packaging of articles, products or merchandise from previously prepared ferrous, nonferrous or alloyed metals (such as bar stock sheets, tubes, and wire and other extrusions);
J. Printing, publishing and allied industries;
K. Warehousing and distribution facilities, when enclosed within a building;
L. Wireless communication facilities.
(Ord. 1163 § 1 (part), 2001)

COA, 34. *The only retail uses that are permitted within the UGA are those small-scale retail uses that are sized and operate to serve the convenience needs of the UGA residents and business park employees. Such uses may include things like deli or other small predominately take-out food service, small convenience grocery or mini-market, dry cleaners, shoe repair, copier or mailing services and shall not include any freeway-oriented uses such as gas stations, hotels or motels. To ensure that the retail uses are sized and located to appropriately serve the site and not a broader clientele, the retail uses shall be limited to 10 percent of the total floor area within the business park at the time that the retail is being proposed and no individual retail use shall contain greater than 5,000 square feet of floor are devoted to display area, seating area or other portion of the facility that is open to the public and shall not be located with a primary orientation to SR 903 or Bullfrog Road.*

C) Ordinance 1180, Bullfrog Subarea Plan

Page 22
Limited retail and commercial accessory uses may be allowed as a convenience for the employees and residents of this area, but they should not be of a size to conflict with the city's goal of re-establishing and maintaining the Old Town area as the city's commercial business core.

D) PMU, Planned Mixed Use District

CEMC 17.45.010(B)(9); (B) *Each proposal for development within the PMU district shall conform to the Cle Elum comprehensive plan, any applicable subarea plan and applicable annexation and/or development agreements, and will advance the achievement of the foregoing purposes of the PMU*

district as well as the following objectives: (9) To maintain Old Town as the principle retail center for the City of Cle Elum.

There is no better example of the lack of consistency with the approved plan than Sun's requested modification to the Business Park. Their proposal reflects the direct antithesis of what was envisioned by City leaders and the original project sponsor.

4. RV/CAMP GROUND PARK

In 2002, the City adopted a master plan for the Bullfrog Flats UGA. The land use authorization was based upon an Environmental Impact Statement (EIS) dated March 18, 2002. The 2002 EIS considered five (5) alternatives. Three of the alternatives included development of a portion of the property as "RV Campground". Those alternatives were rejected and the preferred alternative (Alternative 5) focused on community housing (single-family and multi-family) and a business park. Sun is proposing to ignore the City's prior planning decisions and develop 661 RV/Camping sites to support an entirely transient population.

A) RV/Camp Ground Parks not allowed

i. Development Agreement, Conditions of Approval

COA 1

States that the Land uses shall be the types, densities and amounts (or within the ranges) as shown on the Approved Master Site Plan and the Land Use Summary Table. No reference to RV/Camp ground parks.

ii. Bullfrog Subarea Plan

Page(s) 21 & 27-*Range of Uses*

There are a number of public and private land uses that are considered appropriate for the Bullfrog Subarea. These include

1) *A variety of residential types and densities*
2) *Business/Office Park*
3) *Community Facilities*
4) *Retail and commercial services limited to serving the residents or employees in their immediate area,*
5) *Golf course, with club house*
6) *Equestrian center*
7) *Open space and Greenbelts. And,*
8) *Lodge*

iii. Planned Mixed Use (PLU) District Regulations

17.45.010-B

Each proposal for development within the PMU district shall conform to the Cle Elum Comprehensive Plan, any applicable subarea plan and applicable annexation and/or development agreements.....

An RV/Camp Ground Park is not contemplated as a potential land use within the Development Agreement, the Bullfrog Sub area Plan, or the Planned Mixed Use District. The Development Plan specifically rejected alternative proposals that included proposed RV parks and transient housing.

B) Conditional Use Permit Required

CEMC 17.51.010, E

Conditional Use Permit Required. An RV park will be allowed only upon the issuance of a conditional use permit. The owner, operator, and occupants of an RV park must develop and use the RV park in strict compliance with the conditions imposed by the conditional use permit or those agreed to as part of an annexation agreement or development agreement.

Comprehensive Plan
Housing Element, Land Use

LU – 1.8 *Conditional Use Permits, street vacations, variances and other special applications shall only be permitted when there is an overriding permanent public benefit consistent with the goals and policies of this Comprehensive Plan.*

CMCU 17.80.050 Criteria For Granting Conditional Use permits

A conditional use permit shall be granted only after the city has reviewed the proposed use and determined that it complies with the standards and criteria set forth in this subsection. A conditional use permit shall be granted only if the applicant demonstrates that:

1. *The proposed use will be designed and operated in a manner which is compatible with the character, appearance, and operation of existing or proposed development in the vicinity of the subject property; and*
2. *The hours and manner of operation of the proposed use are not inconsistent with adjacent or nearby uses; and*
3. *The proposed use is compatible with the physical characteristics of the subject property and neighboring properties; and*
4. *The location, nature and intensity of outdoor lighting is such that it is consistent with the surrounding neighborhood and does not cast light or glare on adjoining properties; and*
5. *The proposed use is such in which pedestrian and vehicular traffic associated with the use will not be hazardous or conflict with existing and anticipated traffic in the neighborhood; and*
6. *The proposed use is capable of being served by public facilities and services, and will not adversely the level of service [sic] to surrounding areas; and*
7. *The proposed use is not detrimental to the public health, safety, or welfare; and*
8. *The proposed use is consistent with the goals and policies of the comprehensive plan; and*
9. *The subject site can accommodate the proposed use considering the size, shape, topography and drainage.*

(Ord. 1163 § 1 (part), 2001)

C) Temporary RV Park

The only mention of any kind of RV park within the Development Agreement was to allow for temporary housing of the construction workers that were expected to be used during the development of the housing and business park.

Development Agreement,
Conditions of Approval, Section 23; and
Development Standards, Section 7
Allows for only a Temporary RV Park

1) *Purpose is to provide temporary housing for construction workers*
2) *RV Park must be located in the Business Park*
3) *RV Park must be removed after 10 years*
4) *Maximum density 10 units per acre*
5) *Maximum number of units shall be 100*
6) *Only street legal RVs allowed, no Mobile Homes, park models or camping allowed.*
7) *No accessory structures shall be permitted.*

5. ROADS AND UTILITIES

The controlling agreements contemplate development that will transfer ownership of all infrastructure, roads and utilities to the City of Cle Elum following buildout. City's such as Cle Elum rely upon newly constructed roadways and utilities as a means of off-setting the maintenance cost associated with aging infrastructure. Newly built infrastructure requires orders of magnitude less maintenance and replacement than older infrastructure currently supporting the City population. Charging each housing unit in the UGA in a manner consistent with Cle Elum's published rates for water and sewer, ensures Citywide equality in charges and a maximization of revenue.

Sun proposes to maintain private ownership of roads, water and sanitary sewer infrastructure. Sun is proposing three connection points to its Park(s) with master meters at each connection point. Sun further proposes that the City should bill Sun directly for all water and Sewer usage at a rate to be determined. The single roadway that Sun proposes to be a public street, is the cut-off road between Bullfrog and 903.

Development Agreement, Conditions of Approval
Section 16. *In general, all streets and alleys in the UGA shall be public.*

Development Agreement, Construction Standards, Utility System Transfer
Section 10. *The Developer shall complete a Transfer of Ownership of Utility System Form upon completion of the construction of the public works improvements.*

Chapter 5 Water System Improvements
All new lots and developments shall be served by a public water supply line maintained by the City of Cle Elum and located adjacent to the lot or development site.
Chapter 6- Sanitary Sewer System Improvements
All new lots and developments shall be served by a public sanitary sewer line adjacent to the lot or development site.

(Subdivisions) CMCU 16.12A060A.10, 16.12A060A.11, 16.12A060C & 16.12A060D; require all streets and utilities to be public and constructed to public standards.

6. FISCAL

PRE-ANNEXATION AGREEMENT- July 26, 2000
3.2 On August 10, 1999, the Cle Elum City Council adopted, by oral motion, a resolution, which provides that the City's existing citizens and ratepayers shall suffer no negative financial impacts as a result of dealing with Trendwest development activities within the UGA. This oral resolution was reduced to writing as appears in Resolution 2/8/2000-1.

EIS
The fiscal analysis contained within the EIS, SEIS, and the Addendum to the SEIS all evidence significant shortfalls of non-restricted revenues (taxes) when comparing the original approved plan with the plan that Sun is now proposing. It is a failure of the EIS process that a direct comparison of the approved plan with Sun's current plan was not made and provided in the SEIS Addendum. However, the differences are stark and reflect a 3 to 4 times reduction in revenue to the City. Additionally, the SEIS Addendum made adjustments to many of the underlying assumptions affecting the fiscal results of the newly proposed plan. Those adjustments were not made to the original assumptions of the approved plan. Therefore, no reasonable fiscal comparison can be made by the public between what Sun is proposing and what was originally approved.

Sun's current plan relies heavily on potential revenue generated in the form of sales tax from its proposed retail center. If the retail center is not built out (Sun has made no commitment), or if the volume of sales is not generated, or if the proposed retail center simply moves sales tax revenue from the downtown core to 47 Degrees North and doesn't grow the overall pie, the Manufactured Housing & RV parks are FISCALLY underwater from almost the beginning.

The fiscal analysis contained within the SEIS Addendum assumed that the retail center would generate $36,000,000 in annual sales. $2,000,000 of those sales are proposed to be generated by occupants of the parks. The other $34,000,000 then is generated through some kind of magical "new" money coming into the city. If portions of that proposed revenue is generated as a result of a redistribution of sales from existing retail within the city limits, which is certain to happen, then the revenue number becomes even more bogus. The SEIS review provided no analysis as to how or why the magic money would arrive, and without it, the project completely falls apart from a monetary perspective.

7. TRAFFIC

A) Comprehensive Plan
Policy T-3 Transportation plans should be phased concurrently with growth.

Policy T-22 The City shall not issue development permits where the project requires transportation improvements that exceed the City's ability to provide these in accordance with the adopted Level of Service standard, unless the developer accepts full responsibility for such improvements.

Policy T-23 New development shall be allowed only when and where all transportation facilities are adequate at the time of development, or unless a financial commitment is in place to complete the necessary improvements or strategies which will accommodate the impacts within six years; and only

when and where such development can be adequately served by essential transportation facilities without reducing level of service elsewhere.

Policy T-58 To support economic development, growth related traffic improvements should be funded by impact fees or as a condition of development approval.

Policy T-63 A sub-regional transportation system should be designed and implemented in cooperation with neighboring jurisdictions including: WSDOT, Roslyn, So. Cle Elum and Kittitas County.

Policy T-64 Work more directly with Kittitas County to ensure that County policies regarding transportation consistency/concurrency in Cle Elum's potential annexation areas are compatible with Cle Elum's transportation plans and goals and with GMA requirements.

B) Countywide Planning Policies

CWPP-Policy 4.4 The County and cities shall cooperate in the analysis of, and response to, any proposed major regional industrial, retail/commercial, recreation, or residential development proposals that may impact the transportation system in Kittitas County.

Policy 4.5 Transportation plans and project prioritization shall be developed in active consultation with the public.

Policy 4.8 Transportation improvements which are necessary to maintain the identified level of service standards shall be implemented concurrent with new development so that improvements are in place at the time of development, or that a financial commitment is provided to ensure completion of the improvements within six years.

C) TENW Transportation Analysis

The transportation analysis performed by TENW provided no indication of the types and sizes of vehicles that were considered in its analysis. Since a major component of the Sun proposal includes an RV park, the assumptions relative to vehicle count and size are of significant importance. RVs towing passenger vehicles or boats impact a roadway and traffic in a manner significantly different than a passenger car. According to Jeff Schramm, principle of TENW, in an email addressed to Richard Weinman on April 6, 2023, Mr. Schramm stated the following " *the traffic analysis did not account for separate vehicle classification for the RV Park*". Based upon Mr. Schramm's comments alone, the transportation element of the SEIS should be invalidated. No reasonable assumptions related to the traffic impact of Sun's proposal can be drawn from an analysis that failed to consider the effects of RV size and driving characteristics.

D) Mitigation

Sun Communities should be required to mitigate for the weekend summer traffic impacts of its proposed project. According to the Mayor in his letter of May 22, 2023 addressed to the Kittitas County Commissioners, "*Current Cle Elum policy provides the City with the necessary discretion to identify the most appropriate peak hour for traffic analysis for an individual project, considering land use, project size, traffic generation and other appropriate factors*". If the City fails to require Sun to mitigate for its

impacts on weekend traffic, several of the City's intersections will have LOS failures from the very moment that the development is built.

According to TENW:

- Their Trip Generation Model identifies new Sunday trips for Alternative 5 (Approved Plan) at 977. Sun's newly proposed plan generates 1,328.
- Using weekend summer peak periods would increase mitigation requirements at 8 additional intersections:

Without mitigating for weekend traffic impacts, the City will be designing a system of gridlock and creating an escape hazard that could result in significant loss of life for those upper county residents attempting to flee a wildfire or some other catastrophe.

All mitigation related to traffic should be required to be built prior to or concurrent with the proposed development. Mitigation related to required transportation improvements should be realized in the form of completed improvements rather than as payments for estimated expenses associated with those required improvements. The Environmental Documents discuss two methodologies for satisfying Sun's obligations to pay its fair share of the Total Transportation Mitigation Cost, Method A and Method B. Sun's mitigation expense should be apportioned using Method A (Developer Responsibility). If they break it, they should fix it!

8. AFFORDABLE HOUSING

The U.S. Department of Housing and Urban Development (HUD) defines affordable housing as housing for which the occupants are paying no more than 30 percent of their income on housing costs, including utilities.

The approved Development Agreement required the Developer to convey to the City, 7.5 usable acres to develop a minimum of 50 for sale and/or units of housing that are affordable to households earning less than 60 percent of the median income for Kittitas County. Assuming Kittitas County median household income of $65,000, 60% of that is $39,000. 30% of that figure on a monthly basis generates a monthly housing cost of $975.00

Sun has proposed including 50 affordable housing units within its Multi-Family area. They further propose that the rent/housing cost will be capped at 80% of the prevailing area median income for the county. Sun's proposal is nonsensical. Assuming Kittitas County median household income of $65,000, 80% of that is $52,000. So, sun is capping the cost at a monthly rate of $4,333.33? I do not expect that is Sun's intent, but it is how their proposal reads.

9. THE COMMUNITY

The Community has voiced its concerns about Sun's proposal load and clear. There is an overwhelming level of disgust associated with the project. The City administration's primary responsibility is to look after the community's best interests. It is critically important that neither the city administrators or their consultants fall into the trap of thinking that they know better about what is best for the community than the actual members of the community. Unfortunately, the consultant "Staff" driving the train at this point in our history are three outsiders with no attachment to this community and who see this project as just another paycheck.

10. UNINTENDED CONSEQUENCES

In the event that Sun's proposal is approved, it will open-up the landscape for other developers to propose similar Trailer Park/ RV Park developments within the City. Pumping the breaks on this Sun proposal will allow the City the opportunity to catch its breath, update policy and forge a path forward that will provide for coordinated growth and improved income generation.

In Conclusion

The City should stop the presses and re-initiate the Environmental review. A direct comparison between the current version of the development that Sun Communities is proposing should be made against the original approved Master Plan. The primary points of comparison should be focused on Traffic and the Fiscal impacts.

The next step in the process is the creation of the City's Staff report. It is hard for me to imagine that the three individuals tasked with writing the "Staff" report will take any of what I have put forth into consideration. I hope that I am wrong, but I do fear "the fix is in".

Throughout the process of compiling the facts contained within this comment letter, I have been struck by the sheer weight of reasoning to reject Sun's requested Major Modification approval. I am certainly anxious to see what the "Staff" recommends. My singular ask is for those involved in preparing the staff report to give as much consideration to the community and its arguments against the Sun Communities proposal as it has to Sun throughout this multi-year process. The City has been provided enough reasoning to put a stop to the proposal. The question is whether or not the will is there to make the right decisions.

Sincerely

Larry Stauffer

Re: 47 Degrees North Major Amendment proposal

I am writing to inform the city of my very strong opposition to the Sun Communities 47° North proposal for the Bullfrog flats property. The proposed manufactured home / RV community:

- Is in clear violation of the vision for the property adopted by the city and presented to the public as a condition for annexing Bullfrog Flats into the city. It's not in character with the City of Cle Elum and does not comply with fundamental requirements of the city's comprehensive plan, the development agreement, or zoning for the property.

- Instead of traditional neighborhoods that were planned to be connected to and a natural extension of the city, supporting the rest of the city, 47 Degrees North would create a private for-profit community and tourist resort with gates, private roads and utilities which will be separated from the rest of the city. It will create a private city within a city, forever.

- Fiscal studies of 47 Degrees North show that it will not create sufficient tax revenue to cover the city's cost to serve it. Unless the developer agrees to financially cover the substantial deficits, forever, existing city taxpayers will be required to subsidize Sun's development and taxes will go up.

- Sun's 47 Degrees North will be in its entirety a private business not a natural neighborhood (no lots sold, all spots leased), wholly owned by a massive out-of-state publicly traded corporation whose fiduciary duty is to its shareholders, not city taxpayers. Any subsidies of the project would be a gift of public funds to a private entity.

- Is not housing as contemplated for the Bullfrog UGA. It will displace half of the actual housing planned for the area and replace it with a private park designed as a transient playground.

- Will be the largest manufactured home/RV park on the West Coast and will double the population of Cle Elum. Parks of this magnitude have no place in a town as small as Cle Elum. Wrong Place, Wrong Size.

- Sun has eliminated the industrial park component of the approved plan and is proposing a major new retail center to the project which would compete with existing city businesses and will seriously damage Cle Elum's downtown, which the city has invested millions of dollars to reinvigorate. The retail center is in direct conflict with the city's comprehensive plan which states that the Bullfrog Flats Master Plan…."is intended to elevate the DTC (downtown core) as the primary retail and activity nexus for Cle Elum". Current rules for the Bullfrog Flats property prohibit a retail center on the property.

- Provides no significant benefits to city or UKC residents, but creates serious and significant impacts on roads, police, fire, schools, emergency services, hospitals and other public services that can't be (or won't be) fully mitigated by the developer.

- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for. Any such increase in taxes will effectively translate to a subsidy for a private business,

- Denial of 47 Degrees North will not take away or reduce underlying property rights. It will simply require Sun Communities to comply with city's current rules, regulations and comprehensive plan for the property. The original underlying zoning approval and development agreement already allows development of this site, just not as a private resort/manufactured home community/retail center.

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Respectfully,

Larry Tritt

Dear Planning Commission, Mayor, and Members of the City Council,

I would first like to sincerely thank you for your service to the community. I know serving the public is often a thankless task and I appreciate your commitment.

I attended the public meeting 5/8/23 but did not speak at the podium. I am opposed to the 47 degrees north project. I am in support of affordable housing but this proposal will not accomplish that goal because the tenants will not own the property they live on. I see no public benefit. I urge you to vote down the 47 degree North project.

Respectfully,

- Sun's 47 Degrees North will be in its entirety a private business not a natural neighborhood (no lots sold, all spots leased), wholly owned by a massive out-of-state publicly traded corporation whose fiduciary duty is to its shareholders, not city taxpayers. Any subsidies of the project would be a gift of public funds to a private entity.

- Is not housing as contemplated for the Bullfrog UGA. It will displace half of the actual housing planned for the area and replace it with a private park designed as a transient playground.

- Will be the largest manufactured home/RV park on the West Coast and will double the population of Cle Elum. Parks of this magnitude have no place in a town as small as Cle Elum. Wrong Place, Wrong Size.

- Sun has eliminated the industrial park component of the approved plan and is proposing a major new retail center to the project which would compete with existing city businesses and will seriously damage Cle Elum's downtown, which the city has invested millions of dollars to reinvigorate. The retail center is in direct conflict with the city's comprehensive plan which states that the Bullfrog Flats Master Plan…."is intended to elevate the DTC (downtown core) as the primary retail and activity nexus for Cle Elum". Current rules for the Bullfrog Flats property prohibit a retail center on the property.

- Provides no significant benefits to city or UKC residents, but creates serious and significant impacts on roads, police, fire, schools, emergency services, hospitals and other public services that can't be (or won't be) fully mitigated by the developer.

- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for. Any such increase in taxes will effectively translate to a subsidy for a private business,

- Denial of 47 Degrees North will not take away or reduce underlying property rights. It will simply require Sun Communities to comply with city's current rules, regulations and comprehensive plan for the property. The original underlying zoning approval and development agreement already allows development of this site, just not as a private resort/manufactured home community/retail center.

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Respectfully,

Laura L Snider

Re: 47 Degrees North Major Amendment proposal

I am writing to inform the city of my very strong opposition to the Sun Communities 47° North proposal for the Bullfrog flats property. The proposed manufactured home / RV community:

- Is in clear violation of the vision for the property adopted by the city and presented to the public as a condition for annexing Bullfrog Flats into the city. It's not in character with the City of Cle Elum and does not comply with fundamental requirements of the city's comprehensive plan, the development agreement, or zoning for the property.

- Instead of traditional neighborhoods that were planned to be connected to and a natural extension of the city, supporting the rest of the city, 47 Degrees North would create a private for-profit community and tourist resort with gates, private roads and utilities which will be separated from the rest of the city. It will create a private city within a city, forever.

- Fiscal studies of 47 Degrees North show that it will not create sufficient tax revenue to cover the city's cost to serve it. Unless the developer agrees to financially cover the substantial deficits, forever, existing city taxpayers will be required to subsidize Sun's development and taxes will go up.

- Sun's 47 Degrees North will be in its entirety a private business not a natural neighborhood (no lots sold, all spots leased), wholly owned by a massive out-of-state publicly traded corporation whose fiduciary duty is to its shareholders, not city taxpayers. Any subsidies of the project would be a gift of public funds to a private entity.

- Is not housing as contemplated for the Bullfrog UGA. It will displace half of the actual housing planned for the area and replace it with a private park designed as a transient playground.

- Will be the largest manufactured home/RV park on the West Coast and will double the population of Cle Elum. Parks of this magnitude have no place in a town as small as Cle Elum. Wrong Place Wrong Size.

- Sun has eliminated the industrial park component of the approved plan and is proposing a major new retail center to the project which would compete with existing city businesses and will seriously damage Cle Elum's downtown, which the city has invested millions of dollars to reinvigorate. The retail center is in direct conflict with the city's comprehensive plan which states that the Bullfrog Flats Master Plan...."is intended to elevate the DTC (downtown core) as the primary retail and activity nexus for Cle Elum". Current rules for the Bullfrog Flats property prohibit a retail center on the property.

- Provides no significant benefits to city or UKC residents, but creates serious and significant impacts on roads, police, fire, schools, emergency services, hospitals and other public services that can't be (or won't be) fully mitigated by the developer, and,

- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for. Any such increase in taxes will effectively translate to a subsidy for a private business,

    - I am including a modified copy of a letter already submitted by another community member, as I believe it succinctly summarizes & highlights the traffic issues and concerns associated with Sun Communities' planned development.

- Denial of 47 Degrees North will not take away or reduce underlying property rights. It will simply require Sun Communities to comply with city's current rules, regulations and comprehensive plan for the property. The original underlying zoning approval and development agreement already allows development of this site, just not as a private resort/manufactured home community/retail center.

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Respectfully,
Laura Trimingham

Subject: 47 Degrees North Major Amendment, SEPA and Development Agreement - Traffic Comments
City of Cle Elum - Mayor, City Council members, Planning Department,
Re: 47 Degrees North Major Amendment, SEPA and Development Agreement

Comments on the SEIS/Addendum Traffic Analysis

The SEPA Traffic analysis has a number of major flaws which result in significantly understating the amount of congestion on the city and county road system both with and without 47 Degree North. These flaws significantly overestimate the road capacity that's available for 47 Degrees North traffic. SEPA should not be closed until the traffic analysis is corrected.

Specifically:

1. The 47°N traffic study doesn't include the full buildout traffic of major developments already approved, vested and in the pipeline (Suncadia, City Heights and Ronald PUD/Hotel). Because Sun assumed such a short buildout period for 47 Degrees North (5 years), the project is essentially trying to "cut the line" by getting its traffic in the road system before other approved major developments are completed. 47 Degrees North is essentially proposing to use up road capacity that is already allocated to others. Full buildout of approved, but not yet completed, developments cannot be ignored. They have legal vested rights to complete their projects and add their traffic. 47°N traffic will be added to that, not replace it.

The significance of this error is that if all the traffic from approved developments is included we are likely to find that the city and UKC road systems are already significantly beyond their max capacity and there is little or no capacity for 47 Degrees North without massive investments in infrastructure that will take many years to complete.

2. The Addendum traffic study ignores peak summer weekends (Friday evening through Sunday evening) for mitigation purposes.

Roughly half of 47 Degrees North is an RV resort, a business that will operate at maximum capacity on summer weekends, and the other half is a manufactured home community assumed to have a high percentage of 2nd homes

that will be weekend getaways or short-term weekend rentals, again, operating at maximum capacity on summer weekends. Sun's business plan will clearly be to maximize summer weekend occupancy. Yet the traffic report uses weekday evenings as the basis for mitigation.

This is a flawed assumption for assessing impacts. We who live here know the traffic patterns; our businesses and emergency responders know the patterns. On summer weekends our UKC streets are packed and on weekday evenings the streets are largely empty. Irrespective of any comp plan policy, best practices for traffic studies require that mitigations be applied to the impacts of a project whenever that might be. Sun should be required to mitigate its full impacts... which are on weekends.

3. It does not appear that Large RV's and travel trailers (oversize vehicles) are fully accounted for in the traffic analysis. It appears they were counted as if they were trips from a typical passenger car. Standard traffic analysis protocol is that oversize vehicles count as more than one passenger vehicle trip because they occupy more space (and time) on the roadway. Given that Sun's RV resort will introduce a very large number of oversize vehicles, improperly accounting for them significantly understates the real impacts from the project.

4. The traffic analysis didn't study the need for road widening on Bullfrog Rd or SR 903 (i.e. a corridor study). The study only looked at intersections. With the large amount of traffic added by 47 Degrees North onto Bullfrog Rd and SR 903, together with the large amount of traffic already drawn to these roads by the school campus, Suncadia, future City Heights access, transfer station etc., it is essential to analyze whether these roadway corridors will be over capacity and will need to be widened or lanes added. The fact that this wasn't studied is a major oversight.

5. The traffic analysis of the I-90 Exit 80 ramps is flawed because it does not reflect the gridlock effects from the freeway during peak summer weekend periods. We who live here know that on peak summer weekends traffic backs up past the weigh station onto Bullfrog Rd. often past the Tumble Creek entrance. And that's before adding the additional background from Suncadia, City Heights and other major projects vested and in the pipeline.

During peak summer periods no mitigation at the ramps can be effective until if/when the freeway itself is fixed. Adding the 47 Degree North traffic will simply make peak backups worse, perhaps extending all the way to the Suncadia Trail main entrance or further.

6. There is no analysis of cut through or bypass traffic when the freeway is in gridlock condition. We who live here know that on peak summer weekends significant bypass traffic occurs on Cle Elum 1st and 2nd Streets, SR 903 and Bullfrog Rd. How will the proposed 47 Degrees North collector arterial (connecting SR 903 to Bullfrog Rd.) function during bypass events and how will this affect queues and backups at exit 80?

7. The studies didn't analyze the impact of major congestion on the ability of our emergency responders and law enforcement to respond to accidents and emergencies, nor the impact of congestion on wildfire evacuation. We who live here know that emergency vehicle access is currently a major issue and it can only be expected to worsen. The fact that this wasn't studied is a major oversight. The city committed to looking at emergency evacuation during scoping.

Conclusion - The 47 Degree North traffic analysis doesn't accurately report traffic from 47°N. It significantly understates congestion on the city and UKC road network both with and without 47 Degrees North and so it is flawed. No further action should be taken until the Addendum traffic analysis is corrected.

Comments on the Draft Development Agreement

Until the SEPA traffic analysis is updated to correctly reflect expected congestion and impacts no action should be taken on the development agreement because it will be based on flawed data. However, since the Draft agreement is a part of the application materials, I provide my initial comments on the Exhibit D - 47 North Transportation Impact Mitigation Plan.

When reviewing the agreement, I ask the city to think about recent experiences with the City Heights Development Agreement. Many provisions in Development Agreements may seem simple and benign at first but carry interpretations that have impacts far beyond original intents and understandings. Yet they obligate the city to accept responsibilities,

costs and risks regardless of the passage of time. The 47 Degree North Development Agreement carries far more significant risks and potential costs for the city than any previous development agreement.

I also ask the city to think about recent experiences on the 1st Street Downtown Revitalization Project, the difficulties and uncertainties of securing funding, the length of time to completion, the uncertainty of cost estimates and unforeseen circumstances that arise. 1st Street is just one project, albeit a very large (and important) one. The 47 Degrees North agreement as written would obligate the City to build 14 or more intersection projects and potential road corridor widening of uncertain scope and cost with little help from Sun Communities.

This draft Development Agreement is clearly very "developer friendly", and a very unfair deal for the city. In many, if not most, jurisdictions in Washington, 47 Degrees North would be a non-starter, and rejected on its face because it doesn't meet concurrency requirements.

Concurrency is a state law which says if roadways are congested and failing from existing traffic and/or developments already approved and vested, a city can deny new development until enough capacity is added. It is a significant tool small cities can use to manage growth and leverage greater developer participation in road improvements. Under this Development Agreement as written the city would waive its rights under concurrency, taking away that tool and allowing Sun Communities to add more traffic to roads already over capacity.

Even under the current traffic analysis in the Addendum (which understates traffic) much of the city's and UKC's primary road systems will be at failure (gridlock) by 2031 during peak periods, even without 47 Degrees North. When the traffic analysis is updated to include the correct background traffic from Suncadia and City Heights it's likely the entire system will be at failure (gridlock) by 2031. The fact is, there is simply no excess road capacity available for 47 Degrees North in the current system. All available capacity has been used up and/or allocated to the other large developments the city and the county have approved.

The road improvements that would be needed to add capacity for 47 Degrees North are massive and system wide. Just looking at intersections in the current traffic study, it shows about 14 intersections in the city and UKC that need to be upgraded. And the traffic report significantly understates what's needed because it only looked at intersections, not at corridors. When corridors are included in the updated traffic analysis it's likely that the total cost to upgrade the road system could easily be well more than $20 million.

With the city facing massive costs for road system expansion, Sun proposes the city allow them to add all of the 47 Degrees North traffic onto the already gridlocked failing road system in exchange for a fee of just $1.0 million and a "loan" of $3.6 million which has to be paid back under uncertain terms (but it definitely has to be paid back). Sun would have no responsibility to make any offsite road improvements anywhere. Simply pay the fee and go. All the responsibility would be passed to the city and UKC taxpayers.

This development agreement as written is a recipe for years of gridlock because most of the road system won't be upgraded for decades because every single intersection and roadway will have to wait on city (or county) funding, band width, priorities and grant availability. The city knows well how grant funding cycles operate, they are lengthy and uncertain and never yield as much as is needed. And as the years go on the cost of road improvements will continue to rise (they always do) but with this agreement Sun's responsibility won't rise. It will be capped.

My specific comments on the development agreement are:
1. The Recitals (A. thru E.) require the city to accept the results of the flawed traffic analysis. If the DA is signed as written the city will have no future legal recourse to contest the inaccurate traffic studies.

2. The agreement should include a "concurrency plan" which restricts the pace of development to actual available capacity in the road system. Mitigation occurs when a project is built, not when a fee is paid. The developer should not be allowed to pay a small fee and add traffic to already failing roads.

Section 3 of the DA contains a clause that appears to exempt 47 Degrees North from WA state concurrency law. This clause should be removed, no development should be allowed to add traffic to already failing roads.

3. The developer's estimates of project costs are very very preliminary and understate the true cost of what it will actually take to build projects. None of the road system improvements in the study are on any CIP/TIP list; there are no preliminary design plans, surveys, or engineering cost estimates; there are no studies of utility relocations, soils conditions or ROW acquisition; no studies of number of lanes, lane lengths, impacts on adjacent properties.

The developers' "estimates" are described in their application material as "notional"....in other words, not based on any site-specific real-world data. As the agreement is currently written the city will be accepting responsibility for a huge black box of unknown scope, cost or schedule and inevitable cost overruns.

5. As the agreement is currently written, the city would be accepting a fee for improvements to County and WSDOT facilities (Bullfrog Rd and I-90 ramps). Without an Interlocal Agreement the city cannot accept payments or responsibility for improving County and/or WSDOT facilities. But even if the city could, it's not in the city's interest to take responsibility for other jurisdictions. It should be the developer's sole responsibility to negotiate mitigation with the county and WSDOT and any agreements reached with them should be incorporated into this development agreement.

Request
I respectfully request that the city halt this process and require that the traffic studies be redone to correct the serious flaws that have been identified, and that the city review its options under concurrency law and not spinning traffic and risk onto the city and UKC taxpayers.

Thanks for the opportunity to make these comments.

To the Honorable Mayor McGowan, City Council Members, and City Planners,

I am writing to share my thoughts about the Sun Communities 47 Degrees North Major Modification to the Bullfrog UGA Master Site Plan and Development Agreements application and Addendum to the SEIS.

As a person without the ability to cast a vote in this matter.

In other words, I speak as one of the others. One of the other 43,000 inhabitants of Kittitas County who will be impacted by your decision on this matter – who will bear the burdens of any decision other than a full denial of this application.

I am also one of the 1000's of 'others' who inhabit and recreate along Bullfrog Road and Hwy 903, all the way to Salmon Le Sac & beyond, who's safety, wellbeing, & quality of life is dependent on you not approving this project.

Whether an emergency evacuation or just weekend traffic, 47 Degree North would literally serve as a physical chokehold on a funnel of people who live & recreate in this area.

I have reviewed much of the application & its supporting materials. And I have struggled to find any benefits associated with this application or project.

In contrast, the number of reasons why this application should be rejected are numerous & clear.

I could go into numerous specific talking points, but I am sure you are acutely aware of all the many and very thoughtfully written, fact-based, intelligent reasons this application should be denied in its entirety. Some are reflected below. I urge you to listen to the voices of this region.

Growth is inevitable & can be good for communities when done well & in a thoughtful manner. It is one of those things you recognize when you see it laid out.

Good growth happens slowly & organically over decades.
It does not double the population of a town in less than a decade

It creates opportunities for residents.
Sun Communities won't help realtors, there's nothing sold

Sun Communities won't builders or tradesman because nothing is built on site

Sun Communities won't support Cle Elum's downtown because Sun proposes a retail center larger than Cle Elum's downtown which will compete with downtown businesses.

And helps small business owners & local businesses thrive, including the hearts & souls of cities – the downtown core.
Jay McGowan's own stated 2015 vision (Nov 4, 2015, *Daily Record* article) for the area's economic future included:

"'Small business — big time. Independent small business,' he said, adding that people come to Cle Elum to get something 'made in Cle Elum,' not something they can buy locally at a major retailer."

Sun has eliminated the industrial park component of the approved plan and is proposing a major new retail center to the project which would compete with existing city businesses and will seriously damage Cle Elum's downtown, which the city has invested millions of dollars to reinvigorate. The retail center is in direct conflict with the city's comprehensive plan which states that the Bullfrog Flats Master Plan...."is intended to elevate the DTC (downtown core) as the primary retail and activity nexus for Cle Elum". Current rules for the Bullfrog Flats property prohibit a retail center on the property.

Good growth doesn't strain infrastructure & public services, nor unfairly shift the burden of costs to others.
Sun Communities provides no significant benefits to city or UKC residents, but creates serious and significant impacts on roads, police, fire, schools, emergency services, hospitals and other public services that can't be (or won't be) fully mitigated by the developer.

Cle Elum Municipal code 17.51.010 states:

Access Points. *Entrances and exits to the RV park may be shared with any abutting or adjacent uses if approved by the city, so long as access is adequately designed for safe and convenient movement of vehicular traffic into and out of the RV park,* ***and there is minimal friction with free movement of traffic on adjacent city streets.***

The traffic analysis of the I-90 Exit 80 ramps is flawed because it does not reflect the gridlock effects from the freeway during peak summer weekend periods, the impact of any required road widening, the impact of RVs and travel trailers on traffic (for the 627 site RV Resort), the impact of congestion on emergency responders/police and/ or wildfire evacuation.

Sun proposes the city allow them to add all 47 Degrees North traffic onto the already gridlocked failing road system in exchange for a fee of just $1.0 million and a "loan" of $3.6 million which has to be paid back under uncertain terms (but it definitely has to be paid back). Sun would have no responsibility to make any offsite road improvements anywhere. Simply pay the fee and go. All the responsibility would be passed to the city and UKC taxpayers. Any such increase in taxes will effectively translate to a subsidy for a private business.

Instead, good growth generates real & ongoing revenue for present & future improvements.

Fiscal studies of 47 Degrees North show that it will not create sufficient tax revenue to cover the city's cost to serve it. Unless the developer agrees to financially cover the substantial deficits, forever, existing city taxpayers will be required to subsidize Sun's development and taxes will go up. Sun relies upon their retail center to generate revenue for Cle Elum, as the fiscal study shows the Manufactured Home/RV resort portion of 47°North is a net negative for the city meaning it will cost the city more to serve than the city will get back in taxes. However, there will be no actual legal obligation or city requirement for Sun to build anything in the retail center, any particular use, on any particular time frame (confirmed by the city's consultant). The actual buildout and timing will be "market based" (i.e. developer discretion).

Good growth pours its energy back into the community.

All the while retaining and supporting a way and quality of life consistent with what people know and love.

Good growth is in keeping with the character of the town.

Good growth doesn't cede 50% of the housing stock to one landlord or give undue political power to one entity.

Sun Communities is a corporate behemoth, much, much larger in size than the City of Cle Elum. Its reported yearly revenue was $1.4 Billion USD in 2020, but that was before their reported recent $1.5 Billion UK acquisition. Consider this, if 47°North is approved, this corporation will be the largest single landowner in the city, the single largest taxpayer, the single largest water and sewer customer, etc. Because the project will be set up as a one owner business entity, Sun Communities will in effect be the City's big silent (or perhaps not so silent) partner.

Rather it provides opportunities for real home ownership, which includes owning both the house and the land upon which it rests.

Sun Communities is proposing a 757-unit Manufactured Home community. They will own all the ground forever. Single family owners have to buy high end manufactured homes from Sun's approved vendor's, carry a mortgage for that, and then also pay monthly ground rent back to Sun...forever. All the water, sewer and roads will be private and owned by Sun, not by the city. Owners in 47°N will have to pay Sun for water and sewer, not the city.

And it provides for affordable housing that is reflective of local households' real incomes & needs.
Of the 757 units, only 50 will be classified as "Affordable". Sun's definition is affordable to a household making $48,000/yr. (Sun is changing the City's current definition of "affordable" from affordable by a household making $28,000/yr to $48,000/yr).

Good growth respects the voices of others in the region it impacts.
As Cle Elum's mayor, Jay McGowan was quoted in a Nov 4, 2015, *Daily Record* article:

"He said he wants to see a 'vibrant, family friendly community' that includes not just Cle Elum but all three towns — Cle Elum, Roslyn and South Cle Elum working together... Those communities also have 'another big partner — Suncadia,' he said, adding, 'all the communities have to work together.'"

And it is gentle on the earth.

Lastly, good growth doesn't pit communities against a city council, mayor, and planning team. Instead, it includes decisions that reflect the wishes of the community at large.

Indeed, the original Bullfrog UGA Master Site plan, created in 2002, took these sorts of factors & others into consideration when creating their roadmap for future growth in the region. The authors had a vision, one that allows for growth that is in keeping with the traditional rural, small town, mountain character of the Cle Elum area.

But what Sun Communities wants to build is none of these things. If there ever was an example of bad growth, Sun Communities would get an A+. It embodies the very essence of the wrong type of growth and stands in glaring opposition to the vision laid out in 2002.

At the end of the day, Sun Communities is attempting to rapidly deploy their business model in this region. One that is ultimately focused on creating as much revenue it can,

and not sending it to Cle Elum, but rather back to a for-profit, publicly traded entity that is focused on maximizing returns for itself and its investors. This is what they care about.

I think it is readily apparent that if Sun Community Developments were good stewards of the land, to the people who live in them, and their neighbors, they would not seemingly be embroiled in numerous lawsuits around the county. A simple search on Google for "Sun Communities lawsuits" yields a startlingly long list.

While I am sure there is someone in the local community who stands to benefit from this relative to the original plan, I, for the life of me, can't imagine who they might be.

More so, community loss from this potential project should far outweigh any individual gain.

To be fair, none of us know what any of you are thinking about this project & application at this point. But I can't imagine a single one of you could, in good faith, think this project is even remotely close to being a good thing for the people, character, and lands of Cle Elum & its neighbors. Not now, not in the future.

To quote Jay McGowan from the 2015 article one last time:

"Without someone 'who is very savvy we will have no one to protect the city'."

To be very clear, this is a hyper-local decision, but one with profound and deeply negative regional impacts. Sun Communities may want Cle Elum for their bottom line, but Cle Elum and the region do not need, nor want Sun Communities in return.

Sun's request is like a Comp Plan Amendment or a rezone, it's a discretionary action and the city council can vote no if they don't want it changed for a large range of rational reasons.

I urge the City Council to do the right thing for Cle Elum and its neighbors; **be "savvy"** and reject Sun Communities 47 Degrees North Major application in its entirety.

Let the original Bullfrog UGA Master Site plan stand as written and continue to be the guiding vision for this region.

Thank you for your time, your consideration, and care for this community,

Laura Trimingham

Re: 47 Degrees North Major Amendment proposal

I am writing to inform the city of my very strong opposition to the Sun Communities 47° North proposal for the Bullfrog flats property. The proposed manufactured home / RV community:

- Is in clear violation of the vision for the property adopted by the city and presented to the public as a condition for annexing Bullfrog Flats into the city. It's not in character with the City of Cle Elum and does not comply with fundamental requirements of the city's comprehensive plan, the development agreement, or zoning for the property.
- Instead of traditional neighborhoods that were planned to be connected to and a natural extension of the city, supporting the rest of the city, 47 Degrees North would create a private for-profit community and tourist resort with gates, private roads and utilities which will be separated from the rest of the city. It will create a private city within a city, forever.
- Fiscal studies of 47 Degrees North show that it will not create sufficient tax revenue to cover the city's cost to serve it. Unless the developer agrees to financially cover the substantial deficits, forever, existing city taxpayers will be required to subsidize Sun's development and taxes will go up.
- Sun's 47 Degrees North will be in its entirety a private business not a natural neighborhood (no lots sold, all spots leased), wholly owned by a massive out-of-state publicly traded corporation who's fiduciary duty is to its shareholders, not city taxpayers. Any subsidies of the project would be a gift of public funds to a private entity.
- Is not housing as contemplated for the Bullfrog UGA. It will displace half of the actual housing planned for the area and replace it with a private park designed as a transient playground.
- Will be the largest manufactured home/RV park on the West Coast and will double the population of Cle Elum. Parks of this magnitude have no place in a town as small as Cle Elum. Wrong Place Wrong Size.
- Sun has eliminated the industrial park component of the approved plan and is proposing a major new retail center to the project which would compete with existing city businesses and will seriously damage Cle Elum's downtown, which the city has invested millions of dollars to reinvigorate. The retail center is in direct conflict with the city's comprehensive plan which states that the Bullfrog Flats Master Plan…."is intended to elevate the DTC (downtown core) as the primary retail and activity nexus for Cle Elum". Current rules for the Bullfrog Flats property prohibit a retail center on the property.
- Provides no significant benefits to city or UKC residents, but creates serious and significant impacts on roads, police, fire, schools, emergency services, hospitals and other public services that can't be (or won't be) fully mitigated by the developer, and,
- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for. Any such increase in taxes will effectively translate to a subsidy for a private business,
- Denial of 47 Degrees North will not take away or reduce underlying property rights. It will simply require Sun Communities to comply with city's current rules, regulations and comprehensive plan for the property. The original underlying zoning approval and development agreement already allows development of this site, just not as a private resort/manufactured home community/retail center.

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Respectfully,

To: City of Cle Elum Mayor, City Council members & Planning department

I am writing the city to let you know I am VERY STRONGLY opposed to the Sun Communities 47° North proposal for the Bullfrog flats property that is proposing a manufactured home an RV Community.

I would like the council to vote NO on this project and keep the land use as it stands for houses, that will provide homes and a sence of community. What Sun Communities is proposing will destroy our community here in Cle Elum. They will turn one of the last beautiful parcels of land that the city has left

to build houses and a neighborhood into a trailor park. It will be a transient city within our community. We will be inundated with RV's, trailors, boats, SUV's, snow mobiles the likes we have never seen before. Our city will be overrun with rowdy crowds every single weekend and holiday and our roads will become a traffic jam which will be a nightmare for our police & fire department, EMT's and local residence, not to mention what it could do to I-90 traffic trying to enter & exit off and onto a one lane road. The manufactured homes don't provide the same tax base as a house and the people buying them don't even own the land which makes them vunerable to payment increases that Sun Communities can impose on them.

These manufactured homes do not increase in value like a home does either. With no true ownership you are once again creating a transient community instead of a home owner that can set down roots and become a productive member of our community with The Eagles, The Schools, The Churches and a tax base to support Cle Elum. This proposal provides no significant advantage to our community so please please, VOTE NO to this proposal!

Thank you,

LeAnne Case

Re: 47 Degrees North Major Amendment proposal

I am writing to inform the city of my very strong opposition to the Sun Communities 47° North proposal for the Bullfrog flats property. The proposed manufactured home / RV community:

- Is in clear violation of the vision for the property adopted by the city and presented to the public as a condition for annexing Bullfrog Flats into the city. It's not in character with the City of Cle Elum and does not comply with fundamental requirements of the city's comprehensive plan, the development agreement, or zoning for the property.
- Instead of traditional neighborhoods that were planned to be connected to and a natural extension of the city, supporting the rest of the city, 47 Degrees North would create a private for-profit community and tourist resort with gates, private roads and utilities which will be separated from the rest of the city. It will create a private city within a city, forever.
- Fiscal studies of 47 Degrees North show that it will not create sufficient tax revenue to cover the city's cost to serve it. Unless the developer agrees to financially cover the substantial deficits, forever, existing city taxpayers will be required to subsidize Sun's development and taxes will go up.
- Sun's 47 Degrees North will be in its entirety a private business not a natural neighborhood (no lots sold, all spots leased), wholly owned by a massive out-of-state publicly traded corporation who's fiduciary duty is to its shareholders, not city taxpayers. Any subsidies of the project would be a gift of public funds to a private entity.
- Is not housing as contemplated for the Bullfrog UGA. It will displace half of the actual housing planned for the area and replace it with a private park designed as a transient playground.
- Will be the largest manufactured home/RV park on the West Coast and will double the population of Cle Elum. Parks of this magnitude have no place in a town as small as Cle Elum. Wrong Place Wrong Size.
- Sun has eliminated the industrial park component of the approved plan and is proposing a major new retail center to the project which would compete with existing city businesses and will seriously damage Cle Elum's downtown, which the city has invested millions of dollars to reinvigorate. The retail center is in direct conflict with the city's comprehensive plan which states that the Bullfrog Flats Master Plan…."is intended to elevate the DTC (downtown core) as the primary retail and activity nexus for Cle Elum". Current rules for the Bullfrog Flats property prohibit a retail center on the property.
- Provides no significant benefits to city or UKC residents, but creates serious and significant impacts on roads, police, fire, schools, emergency services, hospitals and other public services that can't be (or won't be) fully mitigated by the developer, and,
- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for. Any such increase in taxes will effectively translate to a subsidy for a private business,
- Denial of 47 Degrees North will not take away or reduce underlying property rights. It will simply require Sun Communities to comply with the city's current rules, regulations and comprehensive plan for the property. The original underlying zoning approval and development agreement already allows development of this site, just not as a private resort/manufactured home community/retail center.

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Respectfully,

Leilani Espitia

Re: 47 Degrees North Major Amendment proposal

I am writing to inform the city of my very strong opposition to the Sun Communities 47° North proposal for the Bullfrog flats property. The proposed manufactured home / RV community will result in negative impacts:

- Traffic gridlock with high volume of transient visitors in large recreational vehicles
- Decreased level of service for emergency medical services
- Decreased level of service for police protection
- Decreased level of service for fire protection
- Increased tax burden on existing property owners to pay for aging infrastructure (water, sewer, power, roads)
- Increased 2nd home ownership within a private resort adversely impacting many throughout the community
- Adverse impact to downtown core businesses as resort environment will drive dollars to remain at the resort
- Potential to increase jobs yet does little to offer adequate affordable housing options in relationship to amount of workers necessary to support multiple resorts in the area
- Potential to require additional city resources to manage and address concerns by a high volume of transient visitors
- High volume of short term rentals (STRs) tax revenue by law are applied tourism rather than infrastructure upgrades
- 90% of profits will be, by law, sent out of our community to Wall Street investors

For these reasons, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Respectfully,

Linda Barker

Dear Cle Elum City Council Member:

I am writing during the comment period to protest the 47 Degrees North development. I am a Ronald resident, and my biggest concerns with such a big development is road access during a fire and access to other services. Currently, our community is at capacity in regards to roads, schools, emergency services, etc. With such a quick build up, I question getting up to speed in time. The amount of money needed to do this is not going to be small and will not be provided by Sun Communities. Even our county has major concerns about this development. Sun Communities rating is poor. They do not take care of their properties and there have been horror stories from their residents in the past. Overall, this development will be a disaster.

Development is inevitable, but there will be another project, sooner or later, that will be much better for our community.

Please do not approve 47 Degrees North!

Sincerely,

Linda Cooper

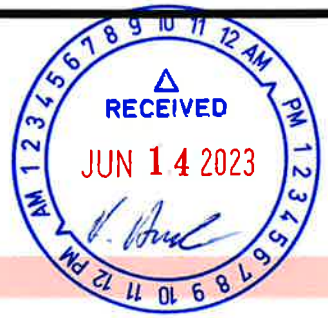
Subject: 47 Degrees North



[EXTERNAL EMAIL] DO NOT CLICK links or attachments unless you recognize the sender and know the content is safe.

Hello -
I'm writing in opposition to the 47 Degrees North project. As a homeowner and resident in Suncadia, I'm very concerned about what this development will mean for our infrastructure, traffic, and emergency access to the communities around the area.

As you no doubt are aware, the Cle Elum area is already overflowing with traffic in the summer and other times of the year. Add to that 600 new homesites, and motorhomes/trailers, and it's a recipe for gridlock.

Additionally, there is significant infrastructure work that needs to be done on the water/sewer system as it exists today. It is not capable of supporting the massive quantity of new homes over such a short time frame. The quality of service (I do not receive service from this system) is unquestionably going to deteriorate and then where will the City get the funds to repair/improve it? Not from revenue provided by the new community.

Few people are talking about the impacts on the environment which must be substantial. To bring that many people so close to the river will no doubt hurt the many ecosystems that rely on its good health.

I understand that this property will be developed at some point. However, this is not the right development for the community.

Thank you,
Lindsay Sovde

Re: 47 Degrees North Proposal

I am writing to provide the city with my very strong concerns about the Sun Communities 47°N proposal for the Bullfrog Flats property. The proposed manufactured home/RV community:

· Is not in character with the City of Cle Elum or the upper Kittitas Valley (a fundamental requirement of the current zoning for the property),

· Would create a new and separate private tourist resort instead of the natural extension of city neighborhoods originally envisioned by city zoning and current approvals,

· Is in its entirety a private business not a neighborhood (no lots will be created or sold, all spots will be leased, and the project will be private), wholly owned by a large out-of-state publicly traded corporation whose fiduciary duty is to its shareholders,

· Provides no significant benefits to upper valley residents and tax payers,

· Will create serious and significant impacts on roads, police, fire, **schools**, emergency services, hospitals, and other public services that can't (or won't) be fully mitigated by the developer, and therefore,

· Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for, essentially a subsidy for a private business,

· Denial of the Sun Communities proposal would not take away or reduce underlying property rights. The original underlying zoning approval would still allow development of this site, just not as a private resort/manufactured home community.

For all of these reasons, and others, I implore the City to DENY this proposed major amendment and retain the current approved land use for the property.

RE: 47 Degrees North
Major Amendment Proposal

I am writing to inform the city of my very strong opposition to the Sun Community's 47° North proposal for the Bullfrog Flats property, the proposed manufactured home / RV community.

Greedy profits for a "17 Billion Super Predatory International Company.
Make No promises, reserve the right to change.
We have seen their lowsy ratings.
We DONT want them here!
Its not our responsibility to make their milliare shareholders richer! They don't care what our community price will be to pay for their greed and profit.

Why would you want to destroy our beautiful community? Adding 47° N to City Heights and White Rd, and other new developments. We are already inundated by campers, and rental properties, etc. Our streets are flooded. Locals can't even leave their homes on the weekends. No one will shop in town due to the traffic. Then where will the revenue be? Ellensburg, Yakima?
Allowing 47° N would make I-90, city streets, and 903 just like Seattle. Gridlock, Overburdened.
Sun Communities wants to "maximize summer weekend occupancy", yet they don't include weekend traffic in their proposal.
This would make the upper Kittitas County like Memorial weekend, 4th of July weekend, and Labor Day Weekend combined ALL OF THE TIME!
It is crazy enough as it is! The weekenders don't respect what they don't own. They come here thinking they are "out in the country", and rules don't apply to them. They disregard burnbans, having campfires, fireworks - Noise, flying up and down 903 all night long. We don't need 2000 more

vehicles in the UKC.

What is the advantage of 47° N to the citizens of the UKC? How is adding thousands of more people and vehicles going to help us? Having our roads, fire dept, police Dept, medical facilities, schools, postal service, water, sewer all overburdened. Not to mention we will have to pay for them to come into our beautiful community and destroy it, building the largest trailer park in the west! WE DONT WANT IT!!!

1100 acres of wildlife habitat from Bullfrog to the cemetary DISTROYED! The Elk, Deer and other animal population, DISPLACED! Where are they to go? Out onto I-90 to be killed, causing accidents, injuring people. Where is the U.S. Fish and Wildlife Service? Have they approved this?

Allowing 47° N would be very irresponsible! Listen to the people! None of us want 47° N! Do the right thing! Stop 47° N! FOLLOW The Law! Only 8 people get to determine our future. Why can't we, the citizens of the UKC vote on this? We are going to be the ones destroyed by this.

Who is going to live in Sun Community? anyone who can afford the monthly payments would NOT live in a trailer park!

47° North has ZERO benefits to our community. How do you expect your people of UKC to pay for all of the increases in taxes, water, sewer, etc., and absorb these expenses? Not everyone here can afford a first home, let alone a vacation home. Many are elderly, living on a fixed income and can't even afford food. A lot of people here live paycheck to paycheck, as it is. Shoemaker employees, food workers, Safeway, etc. There is no industry here. You expect all of us to pay for these billionares to make more billions, and be inundated by all of the extra people in our little UKC. Tell them NO! GO TO YAKIMA! Build your trailer park in Yakima! They wouldn't even notice it there. ~~After all they are~~ "The Palm Springs of WA!" Better weather there, also. They DON'T BELONG HERE!

These high roller international developers come into our beautiful, sweet community seeing that they can take advantage of the inexperienced people of this city. Make a quick buck, putting millions of more dollars into their RICH shareholders pockets, and leave us holding the bag. They don't care about any one of us, or how they will destroy our beautiful community. Only the money that they worship. Making their shareholders richer IS NOT our responsibility!

My husband's grandparents lived here for many decades, and he loved this area growing up. Forty two years ago we bought our property up at the lake. We loved the beauty and serenity of the area, and moved over 26 years ago and built our home. This area has always been special to us.

We have seen many changes in the LKC over the past 42 years. Some good, some not so good, but A7°N is NOT a good change. It would be total destruction for all of us in the LKC!

Do you remember the Jolly Mt. fire in 2017? Although it was started by lightening, it easily could have been fireworks, or a campfire. Up at the lake we only have one way out. No Evacuation System in place.

During the fire it was very unnerving knowing that we could be evacuated at one time. In the begining it was not an emergency situation. Nearly everyone left, except some homeowners. 903 was closed to traffic.

The fire had been burning for some time. One night the fire exploded and turned toward us and went to a Level 3 Evacuation. We were evacuated in the middle of the night. Luckily everyone got out safely, and the awesome firefighters were able to put out the fire, and save our homes.

This could have been a completely different scenario, had it been a sudden emergency in either direction of 903. By adding thousands of more people up here, on any given day, we would have all been trapped with NO WAY OUT! It would be like the Paradise CA fire of 2020. Many people were burned to death.
The same situation, adding thousands of vehicles to this already over populated area (lake) is pure insanity! Of course they will all come up here. Spelei and the boat launch at Wish Poosh are always crowded. It would be total chaos.

The Mayor's own words:
"I also have another vision, I really want to see Bullfrog Flats area developed into some kinds of Research campus that will have spin offs. How these development agreements are implicated is crucial.

Without someone who is very savvy, we will have no one to protect the city."

For all of these reasons that I have stated, and many others, I emplore you and the city to DO THE RIGHT THING! FOLLOW THE LAW! DENY 47° N! NO ONE WANTS THIS! GIVE US WHAT WE WANT

Sincerely,
Linnea Hartman

RE: 47 Degrees North Major Amendment Proposal

I am writing to inform the city of my very strong opposition to the Sun Communities 47° North proposal for the Bullfrog flats property. The proposed manufactured home / RV community will result in negative impacts:

- Decreased level of service for emergency medical services
- Decreased level of service for police protection
- Decreased level of service for fire protection
- Traffic gridlock with high volume of transient visitors in large recreational vehicles
- Increased tax burden on existing property owners to pay for aging infrastructure (water, sewer, power, roads)
- Increased 2nd home ownership within a private resort adversely impacting many throughout the community.
- Adverse impact to downtown core businesses as resort environment will drive dollars to remain at the resort.
- Potential to increase jobs yet does little to offer adequate affordable housing options in relationship to number of workers necessary to support multiple resorts in the area.
- Potential to require additional city resources to manage and address concerns by a high volume of transient visitors.
- High volume of short-term rentals (STRs) tax revenue by law are applied tourism rather than infrastructure upgrades.
- 90% of profits will be, by law, sent out of our community to Wall Street investors.

For these reasons, I implore the City to DENY this proposed major amendment and retain the current approved land use for the property.

Respectfully,

Linwood Rose Cle Elum

Re: 47 Degrees North Major Amendment proposal

I am writing to inform the city of my very strong opposition to the Sun Communities 47° North proposal for the Bullfrog flats property. The proposed manufactured home / RV community:

- Is in clear violation of the vision for the property adopted by the city and presented to the public as a condition for annexing Bullfrog Flats into the city. It's not in character with the City of Cle Elum and does not comply with fundamental requirements of the city's comprehensive plan, the development agreement, or zoning for the property.

- Instead of traditional neighborhoods that were planned to be connected to and a natural extension of the city, supporting the rest of the city, 47 Degrees North would create a private for-profit community and tourist resort with gates, private roads and utilities which will be separated from the rest of the city. It will create a private city within a city, forever.

- Fiscal studies of 47 Degrees North show that it will not create sufficient tax revenue to cover the city's cost to serve it. Unless the developer agrees to financially cover the substantial deficits, forever, existing city taxpayers will be required to subsidize Sun's development and taxes will go up.

- Sun's 47 Degrees North will be in its entirety a private business not a natural neighborhood (no lots sold, all spots leased), wholly owned by a massive out-of-state publicly traded corporation whose fiduciary duty is to its shareholders, not city taxpayers. Any subsidies of the project would be a gift of public funds to a private entity.

- Is not housing as contemplated for the Bullfrog UGA. It will displace half of the actual housing planned for the area and replace it with a private park designed as a transient playground.

- Will be the largest manufactured home/RV park on the West Coast and will double the population of Cle Elum. Parks of this magnitude have no place in a town as small as Cle Elum. Wrong Place, Wrong Size.

- Sun has eliminated the industrial park component of the approved plan and is proposing a major new retail center to the project which would compete with existing city businesses and will seriously damage Cle Elum's downtown, which the city has invested millions of dollars to reinvigorate. The retail center is in direct conflict with the city's comprehensive plan which states that the Bullfrog Flats Master Plan…."is intended to elevate the DTC (downtown core) as the primary retail and activity nexus for Cle Elum". Current rules for the Bullfrog Flats property prohibit a retail center on the property.

- Provides no significant benefits to city or UKC residents, but creates serious and significant impacts on roads, police, fire, schools, emergency services, hospitals and other public services that can't be (or won't be) fully mitigated by the developer.

- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for. Any such increase in taxes will effectively translate to a subsidy for a private business,

- Denial of 47 Degrees North will not take away or reduce underlying property rights. It will simply require Sun Communities to comply with city's current rules, regulations and comprehensive plan for the property. The original underlying zoning approval and development agreement already allows development of this site, just not as a private resort/manufactured home community/retail center.

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Subject: Say NO to Sun Communities proposal

[EXTERNAL EMAIL] DO NOT CLICK links or attachments unless you recognize the sender and know the content is safe.

I'm writing to inform the city of my very strong opposition to the Sun Communities 47° North proposal for the Bullfrog flats property. I've have a home in Suncadia that I use on the weekends. I love the area and the small town feel. The locals are charming and I support all the small businesses. It is peaceful and relaxing and at the same time so much to do in the great outdoors.

What is being proposed in the current 47 Degrees North plan is going to permanently scar this beautiful place, cause irreparable harm to our shared lands, swamp the area with a new "instant city" of visitors with their RVs, motorcycles, boats and snow machines and is completely out of step with the character of Cle Elum and the surrounding areas. This is not the legacy you would be proud to leave behind.

These are the key issues that I strongly object to:

1. This project will be the largest manufactured home/RV park on the West Coast. Pouring thousands of visitors to our already overcrowded rivers, lakes, camp sites and playgrounds. This proposed project is way too much too fast. A slow growing community like the original plan makes so much more sense for handling infrastructure, creating meaningful jobs. A measured slow and steady growth is welcome.

2. This proposed development provides no significant benefits to city or UKC residents, but creates serious and significant impacts on roads, police, fire, schools, emergency services, medical facilities and other public services that can't be (or won't be) fully mitigated by the developer.

3. I-90 in both directions on a Sunday afternoon is currently gridlock.....adding 600+ RVs towing boats, motorcycles, snow machines etc. will make I-90 impassable. If this project happens, we can add Friday afternoon I-90 gridlock to the mix.

4. Wildfires are inevitable - God forbid one rips though our community we will be forced to compete with thousands of people evacuating RVs on one two lane road. Weve seen it before in Paradise California- complete pandemonium and disaster. Not to mention an impassable gridlock for the firefighters.

5. As I'm sure you are aware, Fiscal studies of 47 Degrees North show that it will not create sufficient tax revenue to cover the city's cost to serve it.

For these reasons, and many more, I implore the City to DENY this proposed major amendment and retain the current approved land use for the property.

Respectfully,

Virgil Amick

Dear City of Cle Elum and BOCC,
I'm writing to you today to inform you that the current Residents of this County will not fund the infrastructure for a trailer park on my watch. Not today and not without demanding every single one of you resign if your fail this one.

Where is our Community Center from Suncadia? Because if that's any example of how you plan to mismanage this development agreement? Every single one of you will be held accountable to your voters for the destruction of your community!!

We've waited nearly 20 years for you people to do your job and enforce Suncadia's contractual obligations to this community. You've all failed your constituents or we'd have the promised Community Center.

Your obligations to the current residents of this community are clear - WE SAID NO 47 DEGREES NORTH! We meant it! Now tell me how you plan to hold this developer accountable or resign immediately.

Put your faces on this! Use your elected Voices! TELL THEM WE SAID NO!!!

Represent us like you were elected to do or your legacy will be how you allowed your community to be destroyed at the expense of your own neighbors.

We are watching and we will hold you accountable, so I expect you to do your job and represent us to the fullest extent of your authority granted by us, your Voters and tell 47 Degrees North to fund their own community.

Every single one of you have failed us to date, or we'd already have a Suncadia funded Community Center! You cannot be trusted to hold anyone accountable so get busy and stop 47 Degrees North!

Disgusted Voter,
Lisa Pearson

Attn: Cle Elum Planning Dept. &
Cle Elum City Council:

To Begin with we are not opposed to change—
we support responsible growth of our Community. We would love nothing more than to have another grocery store and more shopping options, but 47° North is not the way to get it.

Cle Elum needs development that helps to pay for the necessary improvements, infrastructure and services which will be required as we grow. We support home ownership (land & structure) that brings in the required revenue for such growth. Ownership that inspires pride and a desire to be part of our Community.

47° North is none of these. They come in, make lots of money and walk away contributing nothing to the Community. The citizens of Cle Elum will be left with the bill for the infrastructure/services and the fallout from such a development.

We can't think of anything positive that 47° North brings to our Community. 47° North are a predatory Company who comes in, makes lots of money, leaves behind a mess, many complaints & lawsuits. They have done this in 100's of communities and we will be no different as this is their business model and practice.

We urge the City Council to listen to your citizens and tell 47° North NO!!! A yes vote will have devastating consequences for our Community for years to come. As the sitting City Council you

will leave behind a legacy that will be nothing to be proud of.

Letter Opposing 47° N ! ! !

Dear Cle Elum City Council,

I wanted to submit comments on the proposed 47° North Trailer Park Project. In reality this is a trailer park lipsticked as some fancy mobile housing development. It will change the course of Cle Elum, most likely, from its image as a renovating eastern Wa town of a loudly historical town to a Company Town owned in 1/3 by a mega developer of low end non-durable rental land. A Company Town, with an absentee owner, is interested in the revenue it will generate to pad their own lifestyle in a far off location. Cle Elum had it right all these years while it disallowed trailer/mobile homes. Its the permanent homes and home owners that are invested and committed to the ongoing health and viability of The town of Cle Elum and its associated neighboring towns

and communities. We moved here to enjoy a type of place that is disappearing. With a drug epidemic attempting to dismantle the cohesive bonds of lasting neighbors, neighborhoods, and ~~com~~ community, Cle Elum seemed well placed to resist that trend. Making 1/3 of the town a transient comp consisting of lower end mobile units can affect that resilience.

In a nutshell, Cle Elum city council needs to maintain is current course and regulation it has imposed on all other landowners in Cle Elum.. NO MOBILE Home Units on city land. Single family residences owned by the individual occupants. Lower Density, higher quality living larger lots, with higher tax value should only be allowed as currently allowed and was originally agreed upon in the original plans that allowed the current Suncadia Resort Development to Occur!

Loreley Roach 2023

Additionally. 47° North appears to be removing highly valued recreational use land from the Wa State Horse Park. This will seorely affect the future use and enjoyment of horse people and walkers. This park is an amazing resource for not only Cle Elum and Kittitas County, but also for the State of Washington and greater PNW region. As the Park continues to be improved it will become ~~be~~ more of a destination. The trailer park/RV trailer park as proposed will have profound negative impact on it into the future.

My comments only address ~~all of~~ a portion of my concerns. Other serious concerns are tax deficit, roading, sewer, and water, as well as the social and well being impacts on Cle Elum and surrounds. Thank you, please make the best logical and legal course and deny the appicaton.

City of Cle Elum – Mayor, City Council members, Planning Department,

Re: 47 Degrees North Major Amendment proposal

I am writing to provide the city with my very strong concerns about the Sun Communities 47° North proposal for the Bullfrog flats property. The proposed manufactured home / RV community:

– is not in character with the City of Cle Elum or the upper valley (a fundamental requirement of the current zoning for the property),
– would create a new and separate private tourist resort and not a natural extension of city neighborhoods as originally envisioned/required by city zoning and current approvals,
– is in its entirety a private business not a neighborhood (no lots will be created or sold, all spots will be leased, and the project will be private), wholly owned by a large out-of-state publicly traded corporation who's fiduciary duty is to its shareholders,
– provides no significant benefits to upper valley residents and taxpayers, but
– will create serious and significant impacts on roads, police, fire, schools, emergency services, hospitals and other public services that can't (or won't) be fully mitigated by the developer, and therefore,
– will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of

service of upper county services which will require public expenditures and increased upper county taxes to pay for, essentially a subsidy for a private business,

– Denial of the Sun Communities proposal would not take away or reduce underlying property rights. The original underlying zoning approval would still allow development of this site, just not as a private resort/manufactured home community.

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

It will create a private city within a city, forever.

- Fiscal studies of 47 Degrees North show that it will not create sufficient tax revenue to cover the city's cost to serve it. Unless the developer agrees to financially cover the substantial deficits, forever, existing city taxpayers will be required to subsidize Sun's development and taxes will go up.

- Sun's 47 Degrees North will be in its entirety a private business not a natural neighborhood (no lots sold, all spots leased), wholly owned by a massive out-of-state publicly traded corporation whose fiduciary duty is to its shareholders, not city taxpayers. Any subsidies of the project would be a gift of public funds to a private entity.

- Is not housing as contemplated for the Bullfrog UGA. It will displace half of the actual housing planned for the area and replace it with a private park designed as a transient playground.

- Will be the largest manufactured home/RV park on the West Coast and will double the population of Cle Elum. Parks of this magnitude have no place in a town as small as Cle Elum. Wrong Place, Wrong Size.

- Sun has eliminated the industrial park component of the approved plan and is proposing a major new retail center to the project which would compete with existing city businesses and will seriously damage Cle Elum's downtown, which the city has invested millions of dollars to reinvigorate. The retail center is in direct conflict with the city's comprehensive plan which states that the Bullfrog Flats Master Plan…."is intended to elevate the DTC (downtown core) as the primary retail and activity nexus for Cle Elum". Current rules for the Bullfrog Flats property prohibit a retail center on the property.

- Provides no significant benefits to city or UKC residents, but creates serious and significant impacts on roads, police, fire, schools, emergency services, hospitals and other public services that can't be (or won't be) fully mitigated by the developer.

- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for. Any such increase in taxes will effectively translate to a subsidy for a private business,

- Denial of 47 Degrees North will not take away or reduce underlying property rights. It will simply require Sun Communities to comply with city's current rules, regulations and comprehensive plan for the property. The original underlying zoning approval and development agreement already allows development of this site, just not as a private resort/manufactured home community/retail center.

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Respectfully,

Lori Stringfellow

Re: 47 Degrees North Project

After reviewing the pros and cons regarding Sun Communities 47 Degrees North proposal for the Bullfrog flats property, I'm requesting the City of Cle Elum to deny their proposal. As a taxpayer and recognizing you as our representatives in this matter, I am sharing my strong opposition.

You have received numerous correspondence and are all too familiar with the specific community concerns regarding the Sun Communities 47 Degrees North proposal. As a taxpayer, my question becomes do those we have representing the City truly represent the taxpayers and the interests of our small community. While I support business and managed growth, it behooves us to learn from our past and apply sound judgement as we continue to grow.

I'm hoping the City embraces the original vision we thought for Bullfrog Flats; growth that is an extension of our City and not a separate for-profit community; for me as a taxpayer not to be penalized by taxes that promote big business profit; and the traffic issues and services that we currently struggle with without adding this proposal. These examples are just to name a few.

I submit this letter representing my views and with the intent to represent my daughter who is the next generation Cle Elum resident and will inherit your decisions.

Sincerely,

Lorraine Chavez

Re: 47 Degrees North Major Amendment proposal

I am writing to inform the city of my very strong opposition to the Sun Communities 47° North proposal for the Bullfrog flats property. The proposed manufactured home / RV community:

- Is in clear violation of the vision for the property adopted by the city and presented to the public as a condition for annexing Bullfrog Flats into the city. It's not in character with the City of Cle Elum and does not comply with fundamental requirements of the city's comprehensive plan, the development agreement, or zoning for the property.

- Instead of traditional neighborhoods that were planned to be connected to and a natural extension of the city, supporting the rest of the city, 47 Degrees North would create a private for-profit community and tourist resort with gates, private roads and utilities which will be separated from the rest of the city. It will create a private city within a city, forever.

- Fiscal studies of 47 Degrees North show that it will not create sufficient tax revenue to cover the city's cost to serve it. Unless the developer agrees to financially cover the substantial deficits, forever, existing city taxpayers will be required to subsidize Sun's development and taxes will go up.

- Sun's 47 Degrees North will be in its entirety a private business not a natural neighborhood (no lots sold, all spots leased), wholly owned by a massive out-of-state publicly traded corporation whose fiduciary duty is to its shareholders, not city taxpayers. Any subsidies of the project would be a gift of public funds to a private entity.

- Is not housing as contemplated for the Bullfrog UGA. It will displace half of the actual housing planned for the area and replace it with a private park designed as a transient playground.

One question I have: Have you as the City of Cle Elum, already taken any monies, at all, from this developer/Sun 47 Degrees North for property or in acknowledgement of the proposed to come to fruition?

Regards,

Lynn Julin

I am asking you to DENY the 47 degrees north development!

The local infrastructure will not handle a development of that magnitude. The impact on Bullfrog would be unacceptable.

The negative impact on Roslyn would be beyond tolerance. The traffic Is already too much.

Any subsidies of the project would be a gift of public funds to a private entity.

- Is not housing as contemplated for the Bullfrog UGA. It will displace half of the actual housing planned for the area and replace it with a private park designed as a transient playground.

- Will be the largest manufactured home/RV park on the West Coast and will double the population of Cle Elum. Parks of this magnitude have no place in a town as small as Cle Elum. Wrong Place Wrong Size.

- Sun has eliminated the industrial park component of the approved plan and is proposing a major new retail center to the project which would compete with existing city businesses and will seriously damage Cle Elum's downtown, which the city has invested millions of dollars to reinvigorate. The retail center is in direct conflict with the city's comprehensive plan which states that the Bullfrog Flats Master Plan…."is intended to elevate the DTC (downtown core) as the primary retail and activity nexus for Cle Elum". Current rules for the Bullfrog Flats property prohibit a retail center on the property.

- Provides no significant benefits to city or UKC residents, but creates serious and significant impacts on roads, police, fire, schools, emergency services, hospitals and other public services that can't be (or won't be) fully mitigated by the developer, and,

- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for. Any such increase in taxes will effectively translate to a subsidy for a private business,

- Denial of 47 Degrees North will not take away or reduce underlying property rights. It will simply require Sun Communities to comply with city's current rules, regulations and comprehensive plan for the property. The original underlying zoning approval and development agreement already allows development of this site, just not as a private resort/manufactured home community/retail center.

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Respectfully,

Margaret "Maggie" Nicolino

Re: 47 Degrees North Major Amendment proposal

I am writing to inform the city of my very strong opposition to the Sun Communities 47° North proposal for the Bullfrog flats property. The proposed manufactured home / RV community:

- Is in clear violation of the vision for the property adopted by the city and presented to the public as a condition for annexing Bullfrog Flats into the city. It's not in character with the City of Ce Elum and does not comply with fundamental requirements of the city's comprehensive plan, the development agreement, or zoning for the property.
- Instead of traditional neighborhoods that were planned to be connected to and a natural extension of the city, supporting the rest of the city, 47 Degrees North would create a private for-profit community and tourist resort with gates, private roads and utilities which will be separated from the rest of the city. It will create a private city within a city, forever.
- Fiscal studies of 47 Degrees North show that it will not create sufficient tax revenue to cover the city's cost to serve it. Unless the developer agrees to financially cover the substantial deficits, forever, existing city taxpayers will be required to subsidize Sun's development and taxes will go up.
- Sun's 47 Degrees North will be in its entirety a private business not a natural neighborhood (no lots sold, all spots leased), wholly owned by a massive out-of-state publicly traded corporation who's fiduciary duty is to its shareholders, not city taxpayers. Any subsidies of the project would be a gift of public funds to a private entity.
- Is not housing as contemplated for the Bullfrog UGA. It will displace half of the actual housing planned for the area and replace it with a private park designed as a transient playground.
- Will be the largest manufactured home/RV park on the West Coast and will double the population of Cle Elum. Parks of this magnitude have no place in a town as small as Cle Elum. Wrong Place Wrong Size.

June 23, 2023

Mayor City of Cle Elum
City of Cle Elum Planning Department,
119 West First Street
Cle Elum, WA 98922
Cc: Cle Elum City Council

Mayor Jay McGowan;

I request that the Cle Elum City Council deny the Sun Communities application *to amend, modify, and restate the existing land use approvals for the property commonly known as the Bullfrog Flats Urban Growth Area.*

Sun Communities ***claims*** that this development that will enhance the City's reputation as the *"Heart of the Cascades," result in infrastructure improvements that will benefit all City residents, create new and affordable housing options in the City, and attract new outdoor recreational tourists and visitors to Cle Elum that will bolster the local economy.*

Sun Comminutes plans on creating a total of 1384 new dwelling units. Those units could bring in an additional 4,500 people to Cle Elum (current population 2,300). Cle Elum's neighboring communities of Roslyn and South Cle Elum would also be adversely affected. South Cle Elum has a population of 577 and Roslyn has 918 people. Those numbers are dwarfed by the people that Sun Communities would add, more than doubling the population in the Upper County, almost tripling Cle Elum's population.

Is Sun Communities promising to triple the tax revenue to the city and county? Has it committed to paying its full share of the costs of all city and county services? Are there any legal, binding commitments that will make Sun Communities live up to its promises in the event of a dispute?

This project is not in character with the City of Cle Elum nor the upper valley It would create a new and separate private tourist resort and not a natural extension of city neighborhoods as originally envisioned and required by city zoning and current approvals,

On behalf of our Upper County Communities, please deny this application.
Sincerely,
Marc Brodine

RE: 47 Degrees North Major Amendment Proposal

I am writing to encourage each and every one of you to **OPPOSE and DENY** the currently proposed development from Sun Communities/47 Degrees North and vote **NO** to this amended plan. This development does not suit our community nor the surrounding areas of Kittitas County. This development as it is amended will severely negatively impact the City of Cle Elum and the cities of Roslyn, Ronald, Easton and unincorporated Upper Kittitas County. The health, welfare and safety of the people in these communities must be protected by each of you by **denying** this proposed development.

Our family has been in this area since 1989 and we have recently opened a business in downtown Cle Elum. We have invested in Cle Elum and do not feel this development would benefit our business nor the other businesses of the downtown area. The traffic is already a problem with little foresight for bringing in hundreds of transient camping vehicles for which there is little to no on street parking so shopping in the downtown corridor will not be significantly increased.

Having lived in the area and been evacuated due to the Jolly Mountain fire, we understand the mess this development would play in the safety of evacuating in the future. The potential gridlock from hundreds of Motorhomes and vehicles towing Trailers on bullfrog or through Cle Elum could be the death of one of our loved ones or yours.

There are many legal reasons why this amended proposal by Sun Communities/47 Degrees North should be **denied**. This amended plan will not benefit anyone other than Sun Communities and their investors. The risks of quick overdevelopment of the small community of Cle Elum could destroy the city. There is already a lack of affordable housing and this development does not fix nor help this problem. The hired Cle Elum City Planner should be able to expose and address these issues to **deny** this amended proposal. I have not heard one single person in the Cle Elum area who approves of this development as proposed.

In closing, I encourage each and every one of you to **OPPOSE and DENY** the currently proposed development from Sun Communities/47 Degrees North and vote **NO** to this amended plan.

Respectfully,

Marcia Estell

Re: 47 Degrees North Proposal

I am writing to provide the city with my very strong concerns about the Sun Communities 47°N proposal for the Bullfrog Flats property. The proposed manufactured home/RV community:

· Is not in character with the City of Cle Elum or the upper Kittitas Valley (a fundamental requirement of the current zoning for the property),

· Would create a new and separate private tourist resort instead of the natural extension of city neighborhoods originally envisioned by city zoning and current approvals,

· Is in its entirety a private business not a neighborhood (no lots will be created or sold, all spots will be leased, and the project will be private), wholly owned by a large out-of-state publicly traded corporation whose fiduciary duty is to its shareholders,

· Provides no significant benefits to upper valley residents and tax payers,

· Will create serious and significant impacts on roads, police, fire, schools, emergency services, hospitals, and other public services that can't (or won't) be fully mitigated by the developer, and therefore,

· Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for, essentially a subsidy for a private business,

· Denial of the Sun Communities proposal would not take away or reduce underlying property rights. The original underlying zoning approval would still allow development of this site, just not as a private resort/manufactured home community.

For all of these reasons, and others, I implore the City to DENY this proposed major amendment and retain the current approved land use for the property.

I am writing on behalf of my husband and myself to add to the discussion and to provide our strong opposition regarding the Sun Communities 47 Degrees North proposal for Bullfrog Flats property.

I appreciate that you are receiving these comments and appreciate the opportunity you gave the public at the meeting last evening.

I am in awe of this community. We have been here only 1 1/2 years and I thought I knew what a small town community would be like but I'm blown away by the quality of the people and the pride and compassion this community has for one another.
The Cle Elum/Roslyn community is a gem in its beauty and character. It is truly the HEART OF THE CASCADES! Please do not give this away to Sun Communities. You will never recover and get back what you now have.

I urge you to dig deep into the details of the proposal and dig deep into the character of the Sun Communities Corporation and REJECT their proposal.

I understand Cle Elum needs to expand the tax revenue base in order to provide updates to the infrastructure and provide for the needs of the community. I understand there are important and urgent financial needs. However, long-term, slow, planned and intentional growth will be best. Not a fast instant city that at the end of the day will drain the city of resources and drain the heart and spirit of this beautiful area. Sun Communities is not partnering with you; their priority is their shareholders.

Keep in mind the negative impacts of fast growth:
-traffic, police, fire, schools, emergency services, hospitals, etc.

-fiscal studies show this will not create the tax revenue you need.

Cle Elum boasts to be the 'Heart of the Cascades' and IT IS!! Do you want this to be replaced by Cle Elum having the 'Largest manufactured home/RV park on the West Coast'???

There are so many reasons to reject this proposal from Sun Communities and I urge you to DENY the proposed major amendment and retain the current approved land use for the property.

Thank you,

Marianne Kaluza

To: City of Cle Elum, planning department:

This is my letter requesting

the City of Cle Elum

DENY, DENY, DENY!!!

47 Degree North Project.

This property should be used for an Urban Forrest.

A place for our community to have close in outdoor opportunity...to protect the mental health of our next generation and combat Climate Change. Keep the trees around the power lines! Protect from light pollution, protect our community.

This urban Forrest should be a place for community education on how to create and maintain a healthy fire

resilient forrest.

This land is for the people of Cle Elum to protect...
but this Urban Forrest should be used and enjoyed by all of upper Kittitas county...

Roslyn, Ronald , Easton.... including all the landowners in Suncadia and Tumblecreek.

This land should become an Urban Forrest.
What should this look like????

A place that the Yakama Nation would be proud of flanking their Headwaters.

A place that the Roslyn Cle Elum outdoor preschool could use as their classrooms.

A place next to our public school where all our kids could learn and practice healthy environmental hygiene.
How about Earning college credit in the urban Forrest???
Real Science!!

A mountain bike trail, picnic areas.. hiking.

How about a dog park???
Outdoor amphitheater?

Environmental education...for the good of our community , our children and for our Future.

A place where a small portion could be developed with AFFORDABLE low income proper housing. With Tax Revenue to cover the expense of infrastructure and maintenance,

NOT for THIS real estate investment company With For profit shady operation.

Please protect Cle Elum.
An Urban Forrest. Period.

- Is not housing as contemplated for the Bullfrog UGA. It will displace half of the actual housing planned for the area and replace it with a private park designed as a transient playground.

- Will be the largest manufactured home/RV park on the West Coast and will double the population of Cle Elum. Parks of this magnitude have no place in a town as small as Cle Elum. Wrong Place, Wrong Size.

- Sun has eliminated the industrial park component of the approved plan and is proposing a major new retail center to the project which would compete with existing city businesses and will seriously damage Cle Elum's downtown, which the city has invested millions of dollars to reinvigorate. The retail center is in direct conflict with the city's comprehensive plan which states that the Bullfrog Flats Master Plan…."is intended to elevate the DTC (downtown core) as the primary retail and activity nexus for Cle Elum". Current rules for the Bullfrog Flats property prohibit a retail center on the property.

- Provides no significant benefits to city or UKC residents, but creates serious and significant impacts on roads, police, fire, schools, emergency services, hospitals and other public services that can't be (or won't be) fully mitigated by the developer.

- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for. Any such increase in taxes will effectively translate to a subsidy for a private business,

- Denial of 47 Degrees North will not take away or reduce underlying property rights. It will simply require Sun Communities to comply with city's current rules, regulations and comprehensive plan for the property. The original underlying zoning approval and development agreement already allows development of this site, just not as a private resort/manufactured home community/retail center.

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Respectfully,

_____

Dear Cle Elum Planning,

We do not need this project in our small community. It doesn't benefit anyone. The city, current residents etc. It will over extend our current city services and schools. Please vote this down and DO NOT ruin another nice little town!

Re: 47 Degrees North Major Amendment proposal

I am writing to inform the city of my very strong opposition to the Sun Communities 47° North proposal for the Bullfrog flats property. The proposed manufactured home / RV community:

- Is in clear violation of the vision for the property adopted by the city and presented to the public as a condition for annexing Bullfrog Flats into the city. It's not in character with the City of Cle Elum and does not comply with fundamental requirements of the city's comprehensive plan, the development agreement, or zoning for the property.

- Instead of traditional neighborhoods that were planned to be connected to and a natural extension of the city, supporting the rest of the city, 47 Degrees North would create a private for-profit community and tourist resort with gates, private roads and utilities which will be separated from the rest of the city. It will create a private city within a city, forever.

- Fiscal studies of 47 Degrees North show that it will not create sufficient tax revenue to cover the city's cost to serve it. Unless the developer agrees to financially cover the substantial deficits, forever, existing city taxpayers will be required to subsidize Sun's development and taxes will go up.

- Sun's 47 Degrees North will be in its entirety a private business not a natural neighborhood (no lots sold, all spots leased), wholly owned by a massive out-of-state publicly traded corporation whose fiduciary duty is to its shareholders, not city taxpayers. Any subsidies of the project would be a gift of public funds to a private entity.

- Is not housing as contemplated for the Bullfrog UGA. It will displace half of the actual housing planned for the area and replace it with a private park designed as a transient playground.

- Will be the largest manufactured home/RV park on the West Coast and will double the population of Cle Elum. Parks of this magnitude have no place in a town as small as Cle Elum. Wrong Place, Wrong Size.

RE: 47 Degrees North plan

Attention: Planning Department/47 Degrees North

We cannot believe the leadership in Cle Elum would even consider a project such as this. The world has changed a great deal for the worse from when this project was first proposed. We moved from Seattle to get away from the problems this sort of project will certainly bring to the area. Some issues will be more traffic, drugs not to mention all the other crime. The current plus for living in Cle Elum is that we are somewhat isolated from the negative impacts of what this kind of development will bring to our area.

Police, fire, medical and other services would have to expand significantly to support this community. The developer makes his profit, and moves onto the next project, leaving the City to deal with all the expenses for the community with little increase in tax revenues.

1. Our roads are already at capacity. I-90 cannot support anymore traffic on the weekends. Many of those on I-90 use Cle Elum as a by pass.
2. The proposal for a dense community is not in keeping with the neighboring communities. We could understand a small fractional commitment to affordable housing but not a development of this size. This project will be the largest manufactured home/RV park on the West Coast. Pouring thousands of visitors to our already overcrowded services plus using our rivers, lakes, camp sites and playgrounds. The proposed project is way too big and much too fast. A slow growing community like the original plan would be manageable for the City and the services the City provides.
3. This proposed development has no significant benefits to city or UKC residents. It creates serious and significant impacts on roads, police, fire, schools, emergency services, medical facilities and other public services that can't be (or won't be) fully mitigated by the developer. In fact a project such as this will bring down the value of the surrounding community.

For these reasons, and many more, we implore the City to DENY this proposed major amendment and retain the current approved land use for the property.

I have reviewed this matter and agree with the majority of engaged community members, and our community leaders, with regard to the 47 Degrees North Proposal--as a matter of common sense it should be stopped for the reasons enumerated below.

To the City of Cle Elum: Mayor, City Council Members, and Planning Department

Re: 47 Degrees North Proposal

I am writing to provide the city with my very strong concerns about the Sun Communities 47°N proposal for the Bullfrog Flats property. The proposed manufactured home/RV community:

· Is not in character with the City of Cle Elum or the upper Kittitas Valley (a fundamental requirement of the current zoning for the property),

· Would create a new and separate private tourist resort instead of the natural extension of city neighborhoods originally envisioned by city zoning and current approvals,

· Is in its entirety a private business not a neighborhood (no lots will be created or sold, all spots will be leased, and the project will be private), wholly owned by a large out-of-state publicly traded corporation whose fiduciary duty is to its shareholders,

· Provides no significant benefits to upper valley residents and taxpayers,

· Will create serious and significant impacts on roads, police, fire, schools, emergency services, hospitals, and other public services that can't (or won't) be fully mitigated by the developer, and therefore,

· Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for, essentially a subsidy for a private business,

· Denial of the Sun Communities proposal would not take away or reduce underlying property rights. The original underlying zoning approval would still allow development of this site, just not as a private resort/manufactured home community.

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

I am 4th generation of Roslyn (since 1889), and I am totally against this project! Seems to me that the only person at the last Council meeting that supports this project is Mayor Jay McGowan. I also have my doubts that Greg Dohrn is truly neutral on this project.
The State Environmental Policy Act (SEPA), was enacted in 1971 to in part, to assess the environmental impact (good, bad, or otherwise) would be on the environment any given project, development, etc. I am quite skeptical about any SEPA determination. Please remember that Trendwest/Morningstar/Suncadia (which I totally opposed to) ultimately passed the SEPA process!! Ask any local that remembers what the Bullfrog area was like before Suncadia and the subsequent impact on the environment.
47 Degrees North is nothing like Suncadia for like it or not, Suncadia has built what I've heard called a "World Class" Resort where if you can afford it, you can own the land you buy and build on. Suncadia is also always actively supporting and contributing to various projects and activities in our local community. In comparison, 47 Degrees North wants to build a trailer park with them owning the land forever! I also have not heard one good thing about them so do you believe they will contribute and support our local community in the future? Does anyone other than McGowan support them? Does this honestly make any sense??
Put an end to this madness and say no to 47 Degrees North!
Sincerely
Mark P. Reed
Roslyn

My name is Mark Selin – and I'm a long time recreator and Kittitas county property owner. I am writing this letter to express my personal opposition to the 47 Degrees North development.

The proposed manufactured home / RV community:
– is not in character with the City of Ce Elum or the upper valley (a fundamental requirement of the current zoning for the property),
– would create a new and separate private tourist resort and not a natural extension of city neighborhoods as originally envisioned/required by city zoning and current approvals,
– is in its entirety a private business not a neighborhood (no lots will be created or sold, all spots will be leased, and the project will be private), wholly owned by a large out-of-state publicly traded corporation who's fiduciary duty is to its shareholders,
– provides no significant benefits to upper valley residents and tax payers, but
– will create serious and significant impacts on roads, police, fire, schools, emergency services, hospitals and other public services that can't (or won't) be fully mitigated by the developer, and therefore,
– will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for, essentially a subsidy for a private business,
– Denial of the Sun Communities proposal would not take away or reduce underlying property rights. The original underlying zoning approval would still allow development of this site, just not as a private resort/manufactured home community.

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Respectfully,

Mark Selin

MARK & JAMIE STONE
861 KOKANEE LOOP, CLE ELUM, WA 98922
mrstone5t@gmail.com; jamie.k.stone@gmail.com

April 27, 2023

Mayor Jay McGowan & Council Members
119 West First Street
Cle Elum, WA 98922

Dear Mayor & Council Members:

We have been residents of Cle Elum and upper Kittitas County for about three years. First, on Sagebrook Lane while building a house in Suncadia and presently on Kokanne Loop in our recently completed home. It is our permanent residence and we feel very fortunate to live in Suncadia and be a part of the broader community through involvement with the Cle Elum Eagles, Rotary and friendships throughout the area.

We understand that our opposition to 47°North can easily be dismissed as the selfish ("not in my back yard") grumblings of a Suncadia resident. We hope you will consider our perspective as we have come to understand and experience what makes this area so desirable and successful.

As has been recently reported in the Seattle Times on the growth of Roslyn and Suncadia, not everyone is pleased with the influx of affluent homeowners that are seen as wanting to radically change the character of the area. However, the Cle Elum Comprehensive Plan adopted many years ago recognized the economic importance of tourism for the future. We imagine that the crafters of that plan would be very satisfied with where things stand today. Many jobs, business opportunities and tax revenues have been created and, based upon recent momentum, it appears that past successes are only building on themselves. Increasingly, people want to visit and live in this area for what it is, not to change it.

How does 47°North fit into this picture? Does it compliment or detract from what is already here? Will the "west siders" be more, or less likely to want to visit here? We think the answers are obvious. Like it or not, the luxury home market and resort rentals have become a vital part of the local economy. If 47°North is bad for those sectors of the economy, then it is bad for Cle Elum. We recognize that the housing stock needs diversity and must include affordable options. The original plan for the Bullfrog Road area accomplishes that and does not need to be changed.

For Cle Elum, 47°North is a risky, vastly disproportionate commitment to transient housing in the form of manufactured homes and RVs that can only detract from the successes that have been achieved in recent years. The luxury home and resort businesses have generated a lot of new taxes for the area without putting a burden on the schools and other important services. 47°North will do exactly the opposite. It may "kill the goose that lays golden eggs".

We urge you to reject the Sun Communities application. Thank you for your consideration.

Respectfully,

Mark & Jamie Stone

From Martha Wyckoff
RE: Sun Communities 47° North proposal

For the past 35 years, I have observed Cle Elum and the upper county to be a place that wants dearly to remain local. As change and growth occur here, that sense of place continues to mostly hold true for this community of people who have been here a long time and, also for the new residents. There is pride in the local. There is an energized commitment to quality and civic good.
The Sun Communities 47° North proposal does not bring quality or whole community benefit to Cle Elum and surrounds.

Plenty of "new" folks continues to arrive in this area and much of it is very good and adds positively to this fine town. Growth and change has generally brought in energy, fresh ways to address common challenges and people who love Kittitas County as a special place.

Sun Communities wants to develop in a way that significantly and negatively impacts our community on many levels without full participation or paying the true costs of being a part of Cle Elum and upper Kittitas County:
-infrastructure (all elements from roads, schools, medical etc.)
-services and fire preparedness,
-distracting and drawing business away from the core of downtown Cle Elum.
-the natural and environmental elements of this place including habitat and wildlife.

Has Sun Communities convinced or demonstrated in good faith to the city leaders and the residents, how it will be a local contributor to our community?
There is a strong local voice saying "No" to the proposed amendment. This is not NIMBY, this is about imagining a better plan and future for Cle Elum. 47° North does not fit the community vision.
Please listen and act with the long term good of Cle Elum and the residents.
Please for the good of the people, the city of Cle Elum, and the sense of community ---

--Deny the proposed amendment for the Sun Communities 47° North for the Bullfrog Flats property.
Sincerely,
Martha Wyckoff

From Martha Wyckoff
RE: Sun Communities 47° North proposal

For the past 35 years, I have observed Cle Elum and the upper county to be a place that wants dearly to remain local. As change and growth occur here, that sense of place continues to mostly hold true for this community of people who have been here a long time and, also for the new residents. There is pride in the local. There is an energized commitment to quality and civic good.
The Sun Communities 47° North proposal does not bring quality or whole community benefit to Cle Elum and surrounds.

Plenty of "new" folks continues to arrive in this area and much of it is very good and adds positively to this fine town. Growth and change has generally brought in energy, fresh ways to address common challenges and people who love Kittitas County as a special place.

Sun Communities wants to develop in a way that significantly and negatively impacts our community on many levels without full participation or paying the true costs of being a part of Cle Elum and upper Kittitas County:
-infrastructure (all elements from roads, schools, medical etc.)
-services and fire preparedness,
-distracting and drawing business away from the core of downtown Cle Elum.
-the natural and environmental elements of this place including habitat and wildlife.

Has Sun Communities convinced or demonstrated in good faith to the city leaders and the residents, how it will be a local contributor to our community?

There is a strong local voice saying "No" to the proposed amendment. This is not NIMBY, this is about imagining a better plan and future for Cle Elum. 47° North does not fit the community vision.

Please listen and act with the long term good of Cle Elum and the residents.

Please for the good of the people, the city of Cle Elum, and the sense of community ---

--Deny the proposed amendment for the Sun Communities 47° North for the Bullfrog Flats property.

Sincerely,
Martha Wyckoff

Re: 47 Degrees North Major Amendment proposal

I am writing to inform the city of my very strong opposition to the Sun Communities 47° North proposal for the Bullfrog flats property. The proposed manufactured home / RV community:

- Is in clear violation of the vision for the property adopted by the city and presented to the public as a condition for annexing Bullfrog Flats into the city. It's not in character with the City of Cle Elum and does not comply with fundamental requirements of the city's comprehensive plan, the development agreement, or zoning for the property.
- Instead of traditional neighborhoods that were planned to be connected to and a natural extension of the city, supporting the *rest of the city, 47 Degrees North would create a private for-profit community and tourist resort with gates, private roads and* utilities which will be separated from the rest of the city. It will create a private city within a city, <u>forever</u>.
- Fiscal studies of 47 Degrees North show that it will not create sufficient tax revenue to cover the city's cost to serve it. Unless the developer agrees to financially cover the substantial deficits, <u>forever</u>, existing city taxpayers will be required to subsidize Sun's development and taxes will go up.
- Sun's 47 Degrees North will be in its entirety a private business not a natural neighborhood (no lots sold, all spots leased), wholly owned by a massive out-of-state publicly traded corporation who's fiduciary duty is to its shareholders, not city taxpayers. Any subsidies of the project would be a gift of public funds to a private entity.
- Is not housing as contemplated for the Bullfrog UGA. It will displace half of the actual housing planned for the area and replace it with a private park designed as a transient playground.
- Will be the largest manufactured home/RV park on the West Coast and will double the population of Cle Elum. Parks of this magnitude have no place in a town as small as Cle Elum. Wrong Place Wrong Size.
- Sun has eliminated the industrial park component of the approved plan and is proposing a major new retail center to the project which would compete with existing city businesses and will seriously damage Cle Elum's downtown, which the city has *invested millions of dollars to reinvigorate. The retail center is in direct conflict with the city's comprehensive plan which states* that the Bullfrog Flats Master Plan...."is intended to elevate the DTC (downtown core) as the primary retail and activity nexus for Cle Elum". Current rules for the Bullfrog Flats property prohibit a retail center on the property.
- Provides no significant benefits to city or UKC residents, but creates serious and significant impacts on roads, police, fire, schools, emergency services, hospitals and other public services that can't be (or won't be) fully mitigated by the developer, and,
- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for. Any such increase in taxes will effectively translate to a subsidy for a private business,
- <u>Denial</u> of 47 Degrees North will not take away or reduce underlying property rights. It will simply require Sun Communities to comply with city's current rules, regulations and comprehensive plan for the property. The original underlying zoning approval and development agreement already allows development of this site, just not as a private resort/manufactured home community/retail center.

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Respectfully,

Dear City of Cle Elum Mayor, City Council members, and Planning Department,

I attended the City Council meeting earlier this month on May 8th, 2023 and was very happy to see so many people show up and speak out against the 47 Degrees North proposal by Sun Communities. You all were put in a very difficult situation and I truly hope the requirement for a public comments period was just that - a mandatory event and formality - and NOT an indication that any of you are in favor of this development happening in Cle Elum or any of our neighboring communities.

I hope and trust that each of you will search your heart and use your sound mind, as a neighbor and trusted community leader, to vote against this development and any/all requests for modification to the original plans for this land. I hope that every one of you knows and deeply understands the negative impacts a development like this would have on our beautiful, cherished community and we need your votes to stop Sun Communities from proceeding with any development of this land.

Please don't get me wrong, I am not against growth and development in Cle Elum and the surrounding communities, but the development plans that Sun Communities has for this land is NOT the kind of growth we want or need here. As stated in the attached letter, which comprehensively states all of the points I would like to make against the plan and Sun Communities overall, this is not the proper or intended use of this land and I strongly feel that it goes against everything the city intended when it drafted it's comprehensive plan, development agreement, and zoning for this property many years ago.

Please do the right thing for your neighbors, your community, and for yourselves as a member and homeowner in this community by voting **NO** on this horrible plan. Thank you.

Very respectfully,
Martin Marino

ADDITIONAL COMMENTS:

AS A PART TIME EMPLOYEE OF PIERCE COUNTY EMERGENCY MANAGEMENT, I AM CONCERNED WITH THE 47 DEGREES NORTH AMENDMENT. I FEEL THE CURRENT INFRASTRUCTURE IN PLACE IN CLE ELUM, IS NOT ROBUST NOR LARGE ENOUGH TO SUPPORT THE CITIZENS OF CLE ELUM AND SURROUNDING COMMUNITIES OF RONALD AND ROSLYN. IN THE EVENT OF SOME TYPE OF DISASTER REQUIRING A LARGE EVACUATION, THE ROADWAY INFRASTRUCTURE AS IT CURRENTLY STANDS, WOULD NOT ALLOW FOR A SAFE AND EFFECTIVE EVACUATION. THE PASSING OF 47 DEGREES NORTH IS PLACING THE "BUGGY BEFORE THE HORSE". A LONGER EVACUATION FEASIBILITY STUDY NEEDS TO BE ACCOMPLISHED.

THANK YOU.

- Will be the largest manufactured home/RV park on the West Coast and will double the population of Cle Elum. Parks of this magnitude have no place in a town as small as Cle Elum. Wrong Place, Wrong Size.

- Sun has eliminated the industrial park component of the approved plan and is proposing a major new retail center to the project which would compete with existing city businesses and will seriously damage Cle Elum's downtown, which the city has invested millions of dollars to reinvigorate. The retail center is in direct conflict with the city's comprehensive plan which states that the Bullfrog Flats Master Plan…."is intended to elevate the DTC (downtown core) as the primary retail and activity nexus for Cle Elum". Current rules for the Bullfrog Flats property prohibit a retail center on the property.

- Provides no significant benefits to city or UKC residents, but creates serious and significant impacts on roads, police, fire, schools, emergency services, hospitals and other public services that can't be (or won't be) fully mitigated by the developer.

- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for. Any such increase in taxes will effectively translate to a subsidy for a private business,

- Denial of 47 Degrees North will not take away or reduce underlying property rights. It will simply require Sun Communities to comply with city's current rules, regulations and comprehensive plan for the property. The original underlying zoning approval and development agreement already allows development of this site, just not as a private resort/manufactured home community/retail center.

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Respectfully,

Dear Cle Elum City Council-

I'm writing to inform the city of my strong opposition to the Sun Communities 47° North proposal for the Bullfrog flats property. I've been a Cle Elum resident for the last 4 years and own 2 properties in Suncadia. We moved here to enjoy the small-town feel, gracious residents, exceptional opportunities for recreation and simply enjoying our quiet outdoors.

What is being proposed in the current 47 Degrees North plan is going to permanently scar this beautiful place, cause irreparable harm to our shared lands, swamp the area with a new "instant city" of visitors with their RVs, motorcycles, boats, and snow machines and is completely out of step with the character of Cle Elum and the surrounding areas. This is not the legacy you would be proud to leave behind.

These are the key issues that I strongly object to:

1. This project will be the largest manufactured home/RV park on the West Coast pouring thousands of visitors to our already overcrowded rivers, lakes, camp sites and playgrounds. This growth of this proposed project is way too much too fast. A slow growing community like the original plan makes so much more sense for handling infrastructure, creating meaningful jobs. A measured slow and steady growth is welcome.

2. This proposed development provides no significant benefits to city or UKC residents, rather creates serious and significant impacts on roads, police, fire, schools, emergency services, medical facilities and other public services that can't be (or won't be) fully mitigated by the developer.

3. I-90 in both directions on a Sunday afternoon is currently gridlock.....adding 600+ RVs towing boats, motorcycles, snow machines etc. will make I-90 impassable. If this project happens, we can add Friday afternoon I-90 gridlock to the mix.

4. Wildfires are inevitable - God forbid one rips though our community we will be forced to compete with thousands of people evacuating RVs on one two lane road. Weve seen it before in Paradise California- complete pandemonium and disaster. Not to mention an impassable gridlock for the firefighters.

5. As I'm sure you are aware, Fiscal studies of 47 Degrees North show that it will not create sufficient tax revenue to cover the city's cost to serve it.

For these reasons, and many more, I implore the City to DENY this proposed major amendment and retain the current approved land use for the property.

Many thanks for your thoughtful review of this letter and the important decision at hand.

I am a resident in Cle Elum. I would like to see clarified the types of recreational vehicles that will be allowed and prohibited in the proposed 47 Degrees North.

Specifically, I would ask that all 2 stroke engine recreational vehicles and all off road motorcycles and ATVs prohibited for use in 47 Degrees North. Only street legal vehicles should be allowed for use in 47 Degrees North.

Is this the plan?

[EXTERNAL EMAIL] DO NOT CLICK links or attachments unless you recognize the sender and know the content is safe.

I am writing to inform the city of my very strong opposition to the Sun Communities 47° North proposal for the Bullfrog flats property. The proposed manufactured home / RV community:

- Is in clear violation of the vision for the property adopted by the city and presented to the public as a condition for annexing Bullfrog Flats into the city. It's not in character with the City of Cle Elum and does not comply with fundamental requirements of the city's comprehensive plan, the development agreement, or zoning for the property.
- Instead of traditional neighborhoods that were planned to be connected to and a natural extension of the city, supporting the rest of the city, 47 Degrees North would create a private for-profit community and tourist resort with gates, private roads and utilities which will be separated from the rest of the city. It will create a private city within a city, forever.
- Fiscal studies of 47 Degrees North show that it will not create sufficient tax revenue to cover the city's cost to serve it. Unless the developer agrees to financially cover the substantial deficits, forever, existing city taxpayers will be required to subsidize Sun's development and taxes will go up.
- Sun's 47 Degrees North will be in its entirety a private business not a natural neighborhood (no lots sold, all spots leased), wholly owned by a massive out-of-state publicly traded corporation who's fiduciary duty is to its shareholders, not city taxpayers. Any subsidies of the project would be a gift of public funds to a private entity.
- Is not housing as contemplated for the Bullfrog UGA. It will displace half of the actual housing planned for the area and replace it with a private park designed as a transient playground.

- Will be the largest manufactured home/RV park on the West Coast and will double the population of Cle Elum. Parks of this magnitude have no place in a town as small as Cle Elum. Wrong Place Wrong Size.

- Sun has eliminated the industrial park component of the approved plan and is proposing a major new retail center to the project which would compete with existing city businesses and will seriously damage Cle Elum's downtown, which the city has invested millions of dollars to reinvigorate. The retail center is in direct conflict with the city's comprehensive plan which states that the Bullfrog Flats Master Plan...."is intended to elevate the DTC (downtown core) as the primary retail and activity nexus for Cle Elum". Current rules for the Bullfrog Flats property prohibit a retail center on the property.

- Provides no significant benefits to city or UKC residents, but creates serious and significant impacts on roads, police, fire, schools, emergency services, hospitals and other public services that can't be (or won't be) fully mitigated by the developer, and,

- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for. Any such increase in taxes will effectively translate to a subsidy for a private business,

- Denial of 47 Degrees North will not take away or reduce underlying property rights. It will simply require Sun Communities to comply with city's current rules, regulations and comprehensive plan for the property. The original underlying zoning approval and development agreement already allows development of this site, just not as a private resort/manufactured home community/retail center.

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Re: 47 Degrees North

The Facts

On May 5, 2021, the City of Cle Elum issued Sun Communities a Temporary Use Authorization in connection with building permits relating to five (5) model manufactured homes to be used for public display. The location of the site is 4240 Bullfrog Road, Cle Elum WA.

That Temporary Use Authorization specifically states:

1) This temporary use shall be limited for a period of not to exceed two years from the date of issuance of the first building permit, provided that the authorization may be extended for one additional year, at the City's sole discretion.
2) The Project Sponsor shall apply, receive, and maintain in good standing a City Business License.
3) Prior to the expiration of this use authorization, the model homes, the temporary garage type structure, and all signage shall be removed, and the Project Sponsor shall return the site to its previous condition.

Sun Communities is in direct violation of the Temporary Use Authorization due to the following:

1) It has failed to remove the units or before May 5, 2023, as required; and
2) No business license was applied for, received or maintained

Relief Requested

The City of Cle Elum should require immediate removal of the structures and not elect to extend the non-conforming so-called Temporary Use Authorization.

General Comments

The Cle Elum Municipal Code does not contemplate such a thing as a Temporary Use Authorization. The code does allow for Special Use Permits and Conditional Use Permits, but each of these have specific qualifiers and conditions of approval. The Zoning associated with the location of these model homes is that of General Commercial. That zone contemplates commerce and general uses that serve the community. The trailers are simply staged in an attempt to fool the public into believing that the 47 Degrees North Development has been approved, which it has not.

On the City's website, under the Recent Planning News page, the City has been actively advertising for the model homes for Sun Communities. Statements such as these indicate to the public that the 47 Degrees North development has been approved and is a done deal, which it is not.

Did you know? Sun Communities is currently displaying models of the manufactured homes proposed for the 47 Degrees North project at 4240 Bullfrog Road near the School District Administration Building!

The community has voiced its opposition to the 47 Degrees North development in a loud and clear manner. Following the public comment period, when the tally is over, the City will likely receive close to 1,000 letters of condemnation associated with the project.

I understand that there is a process in play as it relates to the Sun Communities application. However, the City should not be making up new rules favoring the applicant and thumbing its nose at the community in the process.

You have my request and my comments. Please reply to this correspondence identifying what the City's intentions are.

RE: 47 Degrees North Major Amendment Proposal

I am writing to inform the city of my extraordinarily strong opposition to the Sun Communities 47° North proposal for the Bullfrog flats property. The proposed manufactured home / RV community will result in negative impacts:

- Traffic gridlock with high volume of transient visitors in large recreational vehicles
- Decreased level of service for emergency medical services
- Decreased level of service for police protection
- Decreased level of service for fire protection
- Increased tax burden on existing property owners to pay for aging infrastructure (water, sewer, power, roads)
- Increased 2nd home ownership within a private resort adversely impacting many throughout the community.
- Adverse impact to downtown core businesses as resort environment will drive dollars to remain at the resort.
- Potential to increase jobs yet does little to offer adequate affordable housing options in relationship to number of workers necessary to support multiple resorts in the area.
- Potential to require additional city resources to manage and address concerns by a high volume of transient visitors.
- High volume of short-term rentals (STRs) tax revenue by law are applied to tourism rather than infrastructure upgrades.
- 90% of profits will be, by law, sent out of our community to Wall Street investors.

For these reasons, I implore the City to DENY this proposed major amendment and retain the current approved land use for the property.

Subject: We oppose Sun Communities proposal for the development of Bullfrog Flats

[EXTERNAL EMAIL] DO NOT CLICK links or attachments unless you recognize the sender and know the content is safe.

Dear City Council members,

I am writing on behalf of my husband and myself to share our concern over the 47 degrees North proposal by Sun Communities to develop the Bullfrog Flats area.

We are very concerned about the impact it will have on City of Cle Elum and it's residents. We oppose the proposal for the following reasons:

1. The development does not provide enough affordable housing nor does it's structure of leased land provide an opportunity to acquire equity as a home owner. There is a potential for large increases in land lease costs, without the appreciation of the value of the modular home structures.

2. The proposed development and it's retail center will not provide enough tax revenue for the city of Cle Elum to support the infrastructure that is needed for the development. There is no clause guaranteeing the development of the retail space, nor what it would include, only a proposed breakdown of amenities and businesses. And if this retail space were to be developed as proposed, it goes against the Master plan for the city, developed years earlier. The square footage suggested for the retail area is significantly more than needed for the number of single family dwellings in the development, which will impact existing businesses in Cle Elum.

3. Likewise, the roads and emergency services are not enough to support a development of this size, nor does tax revenue from this development provide what is necessary to support the population growth. The potential for congestion on weekends is almost guaranteed.

Please reject Sun Communities proposal as it does not serve Cle Elum residents nor residents of the larger Upper Kittitas County.

Sincerely,
Meg and Scott Mylan

26 June, 2023
To the City of Cle Elum; Mayor McGowen, City Council Members, the Planning Dept. and the Hearings Examiner;

Please accept these comments regarding 47 Degrees North:

Having lived in Upper Kittitas County for more than 30 years, I attended many of the original hearings regarding the development of the JeldWen /Trendwest Master Planned Resort, as well as the subsequent Bullfrog UGA discussions. The 47 Degrees North project is anathema to the original intention behind the creation of the UGA. The UGA was created, in part, to retain control over the expected "induced development" generated by the Master Planned Resort.

Turning this property over to a publically traded company, beholden to shareholders, throws away this control, especially in light of the Sun Communities dismal track record in other states.

The flawed "affordable housing" aspect would be much the same as current mobile home parks; subject to the whims of the landlord with little recourse, potentially leading to housing insecurity and exacerbating the very problem this means to address. As the UGA is already designated for affordable housing, this can be attained without overwhelming the community by a rapid doubling of the population.

The circus-like atmosphere of other Sun Community projects are a jarring prospect for an area valued for its rural character. Vastly exceeding similar projects, 47 Degrees North really has no comparison as other projects are – more appropriately - adjacent to urban areas. This is a violation of the current zoning at a minimum, and a potential catastrophe without the urban infrastructure required.

The traffic congestion and gridlock will have devastating impacts for everyone in Upper Kittitas County, and quite possibly lethal consequences as wildfires regularly require evacuations. This situation will only escalate with the effects of climate change.

In addition to significant impacts on roads, the serious effects of doubling demand on Emergency Services (police, fire, ambulance service, hospitals – KVH Emergency Department is 30 miles to the east and Snoqualmie Hospital is 50+ miles to the west over a mountain pass) cannot be over stated. EMS services are already strained.

The upgrades to infrastructure that will be required will clearly fall onto the existing taxpayers that are adamantly against this proposal. All of the Cost of Community Services studies are clear: taxes generated from these types of residential projects do not cover the services required, burdening the existing system.

A development of this size would devastate the rural nature of the area, potentially driving away the ecotourism that brings in revenue without burdening essential services. Denying this project does not take away development of the property, but would allow for the appropriate, and intended, purpose that could enhance life in Upper Kittitas County.

While not a comprehensive list, it is clearly more than enough to deny the proposed 47 Degrees North project.

Sincerely,
Melissa Bates

Re: 47 Degrees North Major Amendment proposal

I am writing to inform the city of my very strong opposition to the Sun Communities 47° North proposal for the Bullfrog flats property. The proposed manufactured home / RV community:

- Is in clear violation of the vision for the property adopted by the city and presented to the public as a condition for annexing Bullfrog Flats into the city. It's not in character with the City of Cle Elum and does not comply with fundamental requirements of the city's comprehensive plan, the development agreement, or zoning for the property.

- Instead of traditional neighborhoods that were planned to be connected to and a natural extension of the city, supporting the rest of the city, 47 Degrees North would create a private for-profit community and tourist resort with gates, private roads and utilities which will be separated from the rest of the city. It will create a private city within a city, forever.

- Fiscal studies of 47 Degrees North show that it will not create sufficient tax revenue to cover the city's cost to serve it. Unless the developer agrees to financially cover the substantial deficits, forever, existing city taxpayers will be required to subsidize Sun's development and taxes will go up.

- Sun's 47 Degrees North will be in its entirety a private business not a natural neighborhood (no lots sold, all spots leased), wholly owned by a massive out-of-state publicly traded corporation whose fiduciary duty is to its shareholders, not city taxpayers. Any subsidies of the project would be a gift of public funds to a private entity.

- Is not housing as contemplated for the Bullfrog UGA. It will displace half of the actual housing planned for the area and replace it with a private park designed as a transient playground.

- Will be the largest manufactured home/RV park on the West Coast and will double the population of Cle Elum. Parks of this magnitude have no place in a town as small as Cle Elum. Wrong Place, Wrong Size.

- Sun has eliminated the industrial park component of the approved plan and is proposing a major new retail center to the project which would compete with existing city businesses and will seriously damage Cle Elum's downtown, which the city has invested millions of dollars to reinvigorate. The retail center is in direct conflict with the city's comprehensive plan which states that the Bullfrog Flats Master Plan…."is intended to elevate the DTC (downtown core) as the primary retail and activity nexus for Cle Elum". Current rules for the Bullfrog Flats property prohibit a retail center on the property.

- Provides no significant benefits to city or UKC residents, but creates serious and significant impacts on roads, police, fire, schools, emergency services, hospitals and other public services that can't be (or won't be) fully mitigated by the developer.

- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for. Any such increase in taxes will effectively translate to a subsidy for a private business,

- Denial of 47 Degrees North will not take away or reduce underlying property rights. It will simply require Sun Communities to comply with city's current rules, regulations and comprehensive plan for the property. The original underlying zoning approval and development agreement already allows development of this site, just not as a private resort/manufactured home community/retail center.

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Respectfully,

Merle L. Gapp

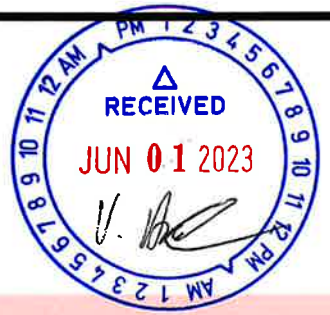
Subject: Opposition to 47 North



[EXTERNAL EMAIL] DO NOT CLICK links or attachments unless you recognize the sender and know the content is safe.

My wife, Beth Koetting, and I are full time Cle Elum residents and are writing to voice our opposition to the 47 North development as it is currently proposed.

We support the original development proposal to add low cost/affordable housing to the community, however the amended proposal and variance request deviates significantly from this and would instead very quickly create a huge transient community. The impact of quickly creating such a large transient population (and the associated RVs) will overwhelm existing infrastructure (schools, emergency services, roads, etc.) and dramatically alter the culture and identity of the Cle Elum, Rosly, Ronald and Upper Kittitas County. Likewise, the proposed financial contribution by the developer (Sun) to help mitigate these impacts is woefully inadequate. The transient aspect of the development should be significantly reduced (ie RV park), the pace of the development should be slowed and the short/long term financial contributions of Sun should be increased before development is allowed to continue.

To Jim McGowan & the Cle Elum Planning Committee,

I have lived in Cle Elum for over 4 years & I am writing to inform the city of my very strong opposition to the Sun Communities 47° North proposal for the Bullfrog flats property.

The proposed manufactured home / RV community:

- Is in clear violation of the vision for the property adopted by the city and presented to the public as a condition for annexing Bullfrog Flats into the city. It's not in character with the City of Cle Elum and does not comply with fundamental requirements of the city's comprehensive plan, the development agreement, or zoning for the property.
- Instead of traditional neighborhoods that were planned to be connected to and a natural extension of the city, supporting the rest of the city, 47 Degrees North would create a private for-profit community and tourist resort with gates, private roads and utilities which will be separated from the rest of the city. It will create a private city within a city, forever.
- Fiscal studies of 47 Degrees North show that it will not create sufficient tax revenue to cover the city's cost to serve it. Unless the developer agrees to financially cover the substantial deficits, forever, existing city taxpayers will be required to subsidize Sun's development and taxes will go up.

- Sun's 47 Degrees North will be in its entirety a private business not a natural neighborhood (no lots sold, all spots leased), wholly owned by a massive out-of-state publicly traded corporation who's fiduciary duty is to its shareholders, not city taxpayers. Any subsidies of the project would be a gift of public funds to a private entity.

- Is not housing as contemplated for the Bullfrog UGA. It will displace half of the actual housing planned for the area and replace it with a private park designed as a transient playground.

- Will be the largest manufactured home/RV park on the West Coast and will double the population of Cle Elum. Parks of this magnitude have no place in a town as small as Cle Elum. Wrong Place Wrong Size.

- Sun has eliminated the industrial park component of the approved plan and is proposing a major new retail center to the project which would compete with existing city businesses and will seriously damage Cle Elum's downtown, which the city has invested millions of dollars to reinvigorate. The retail center is in direct conflict with the city's comprehensive plan which states that the Bullfrog Flats Master Plan...."is intended to elevate the DTC (downtown core) as the primary retail and activity nexus for Cle Elum". Current rules for the Bullfrog Flats property prohibit a retail center on the property.

- Provides no significant benefits to city or UKC residents, but creates serious and significant impacts on roads, police, fire, schools, emergency services, hospitals and other public services that can't be (or won't be) fully mitigated by the developer, and,

- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for. Any such increase in taxes will effectively translate to a subsidy for a private business,

- Denial of 47 Degrees North will not take away or reduce underlying property rights. It will simply require Sun Communities to comply with city's current rules, regulations and comprehensive plan for the property. The original underlying zoning approval and development agreement already allows development of this site, just not as a private resort/manufactured home community/retail center.

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Respectfully,

Re: 47 Degrees North Proposal

I am writing to provide the city with my very strong concerns about the Sun Communities 47°N proposal for the Bullfrog Flats property. The proposed manufactured home/RV community:

- Is not in character with the City of Cle Elum or the upper Kittitas Valley (a fundamental requirement of the current zoning for the property),

- Would create a new and separate private tourist resort instead of the natural extension of city neighborhoods originally envisioned by city zoning and current approvals,

- Is in its entirety a private business not a neighborhood (no lots will be created or sold, all spots will be leased, and the project will be private), wholly owned by a large out-of-state publicly traded corporation whose fiduciary duty is to its shareholders,

- Provides no significant benefits to upper valley residents and tax payers,

- Will create serious and significant impacts on roads, police, fire, schools, emergency services, hospitals, and other public services that can't (or won't) be fully mitigated by the developer, and therefore,

- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for, essentially a subsidy for a private business,

- Denial of the Sun Communities proposal would not take away or reduce underlying property rights. The original underlying zoning approval would still allow development of this site, just not as a private resort/manufactured home community.

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

- Is in clear violation of the vision for the property adopted by the city and presented to the public as a condition for annexing Bullfrog Flats into the city. It's not in character with the City of Cle Elum and does not comply with fundamental requirements of the city's comprehensive plan, the development agreement, or zoning for the property.

- Instead of traditional neighborhoods that were planned to be connected to and a natural extension of the city, supporting the rest of the city, 47 Degrees North would create a private for-profit community and tourist resort with gates, private roads and utilities which will be separated from the rest of the city. It will create a private city within a city, forever.

- Fiscal studies of 47 Degrees North show that it will not create sufficient tax revenue to cover the city's cost to serve it. Unless the developer agrees to financially cover the substantial deficits, forever, existing city taxpayers will be required to subsidize Sun's development and taxes will go up.

- Sun's 47 Degrees North will be in its entirety a private business not a natural neighborhood (no lots sold, all spots leased), wholly owned by a massive out-of-state publicly traded corporation whose fiduciary duty is to its shareholders, not city taxpayers. Any subsidies of the project would be a gift of public funds to a private entity.

- Is not housing as contemplated for the Bullfrog UGA. It will displace half of the actual housing planned for the area and replace it with a private park designed as a transient playground.

- Will be the largest manufactured home/RV park on the West Coast and will double the population of Cle Elum. Parks of this magnitude have no place in a town as small as Cle Elum. Wrong Place, Wrong Size.

- Sun has eliminated the industrial park component of the approved plan and is proposing a major new retail center to the project which would compete with existing city businesses and will seriously damage Cle Elum's downtown, which the city has invested millions of dollars to reinvigorate. The retail center is in direct conflict with the city's comprehensive plan which states that the Bullfrog Flats Master Plan…."is intended to elevate the DTC (downtown core) as the primary retail and activity nexus for Cle Elum". Current rules for the Bullfrog Flats property prohibit a retail center on the property.

- Provides no significant benefits to city or UKC residents, but creates serious and significant impacts on roads, police, fire, schools, emergency services, hospitals and other public services that can't be (or won't be) fully mitigated by the developer.

- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for. Any such increase in taxes will effectively translate to a subsidy for a private business,

- Denial of 47 Degrees North will not take away or reduce underlying property rights. It will simply require Sun Communities to comply with city's current rules, regulations and comprehensive plan for the property. The original underlying zoning approval and development agreement already allows development of this site, just not as a private resort/manufactured home community/retail center.

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Respectfully,

Good Afternoon,

We are writing to you in opposition to the 47 Degrees North Development.

As it stands right now, We find the developers amended plans to be of great concern. Of the utmost concern is the fact that their development will double our population while putting nearly nothing into the infrastructure both at the development phase and after.

As residents of the Upper County for 25 years, We have seen our traffic and wildfire activity increase substantially. We find it horrifying that should there be a natural disaster we will be unable to evacuate in a timely manner due to a huge increase in population without an increase in roads providing egress routes. Bullfrog Road, SR903, and First Street in Cle Elum are simply unable to handle the weekend traffic we currently have, much less a doubled population. It scares us to think of trying to evacuate during a true emergency. Add to this the lack of services we are already struggling with: Lack of health care providers, veterinarians, supermarkets, overtaxed first responders, no public transportation, and lack of good paying jobs and affordable housing just to name a few. This development will completely overtax our community without adding ANYTHING of value.

We have read the letters from the Mayor of Roslyn, the Kittitas County Sheriff, the CWU Professor, Larry Stauffer and our County Commissioners and agree with their assessments wholeheartedly.

While growth is inevitable, it should be managed responsibly, with each new citizen and new home contributing to the tax base in order to provide the level of infrastructure and services needed to keep the community as a whole safe. This development as proposed will provide an incredibly limited tax base, no ownership of the land the homes sit on, a transitory population thru the RV portion who will have no stake in the community, increased crime, and negative impacts on our natural resources, among many other negative impacts.

Lastly, We are truly concerned about Sun Community as a whole, and the problems that have arisen in developments already run by them. A simple Google search shows that allowing this company which has absolutely no stake in our community, to move forward with this project as amended by them will bring nothing but trouble to both our community and those that "purchase homes" within it. They are predatory and in it for 1 thing, money for their stockholders. They are not, nor will they ever be, vested in this community like our local builders.

What concerns us most though, is that we are still having to write to you about this again, 2 years after our first letter. The fact that this council has mismanaged this process, has not taken the comments and valid concerns of the citizens of this community to heart is frankly, a dereliction of duty and in direct opposition to the wishes AND best interests of the community you vowed to serve.

For all these reasons and many others, We urge you to DENY the proposed major amendment to the 47 North Project.

Yours Truly,
Richard and Michelle Crone
202 W. Alaska Ave

Dear All

I am writing to inform the city of my very strong opposition to the Sun Communities 47° North proposal for the Bullfrog flats property. The proposed manufactured home / RV community:

- Is in clear violation of the vision for the property adopted by the city and presented to the public as a condition for annexing Bullfrog Flats into the city. It's not in character with the City of Ce Elum and does not comply with fundamental requirements of the city's comprehensive plan, the development agreement, or zoning for the property.

- Instead of traditional neighborhoods that were planned to be connected to and a natural extension of the city, supporting the rest of the city, 47 Degrees North would create a private for-profit community and tourist resort with gates, private roads and utilities which will be separated from the rest of the city. It will create a private city within a city, forever.

- Fiscal studies of 47 Degrees North show that it will not create sufficient tax revenue to cover the city's cost to serve it. Unless the developer agrees to financially cover the substantial deficits, forever, existing city taxpayers will be required to subsidize Sun's development and taxes will go up.

- Sun's 47 Degrees North will be in its entirety a private business not a natural neighborhood (no lots sold, all spots leased), wholly owned by a massive out-of-state publicly traded corporation who's fiduciary duty is to its shareholders, not city taxpayers. Any subsidies of the project would be a gift of public funds to a private entity.

- Is not housing as contemplated for the Bullfrog UGA. It will displace half of the actual housing planned for the area and replace it with a private park designed as a transient playground.

- Will be the largest manufactured home/RV park on the West Coast and will double the population of Cle Elum. Parks of this magnitude have no place in a town as small as Cle Elum. Wrong Place Wrong Size.

- Sun has eliminated the industrial park component of the approved plan and is proposing a major new retail center to the project which would compete with existing city businesses and will seriously damage Cle Elum's downtown, which the city has invested millions of dollars to reinvigorate. The retail center is in direct conflict with the city's comprehensive plan which states that the Bullfrog Flats Master Plan...."is intended to elevate the DTC (downtown core) as the primary retail and activity nexus for Cle Elum". Current rules for the Bullfrog Flats property prohibit a retail center on the property.

- Provides no significant benefits to city or UKC residents, but creates serious and significant impacts on roads, police, fire, schools, emergency services, hospitals and other public services that can't be (or won't be) fully mitigated by the developer, and,

- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for. Any such increase in taxes will effectively translate to a subsidy for a private business,

- Denial of 47 Degrees North will not take away or reduce underlying property rights. It will simply require Sun Communities to comply with city's current rules, regulations and comprehensive plan for the property. The original underlying zoning approval and development agreement already allows development of this site, just not as a private resort/manufactured home community/retail center.

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

- Sun's 47 Degrees North will be in its entirety a private business not a natural neighborhood (no lots sold, all spots leased), wholly owned by a massive out-of-state publicly traded corporation who's fiduciary duty is to its shareholders, not city taxpayers. Any subsidies of the project would be a gift of public funds to a private entity.
- Is not housing as contemplated for the Bullfrog UGA. It will displace half of the actual housing planned for the area and replace it with a private park designed as a transient playground.
- Will be the largest manufactured home/RV park on the West Coast and will double the population of Cle Elum. Parks of this magnitude have no place in a town as small as Cle Elum. Wrong Place Wrong Size.
- Sun has eliminated the industrial park component of the approved plan and is proposing a major new retail center to the project which would compete with existing city businesses and will seriously damage Cle Elum's downtown, which the city has invested millions of dollars to reinvigorate. The retail center is in direct conflict with the city's comprehensive plan which states that the Bullfrog Flats Master Plan...."is intended to elevate the DTC (downtown core) as the primary retail and activity nexus for Cle Elum". Current rules for the Bullfrog Flats property prohibit a retail center on the property.
- Provides no significant benefits to city or UKC residents, but creates serious and significant impacts on roads, police, fire, schools, emergency services, hospitals and other public services that can't be (or won't be) fully mitigated by the developer, and,
- The Grocery store and retail center, they state they will be bringing in, has no requirements of when or even if it has to be done.
- Most, if not all, of these supposed improvements, added neighborhood structures, housing with trailers, rv park community, retail center, are all against your city laws, that you developed and need to follow.
- All surrounding communities are against 47 degrees, why are you even toying with the thought of allowing them here?? Think about it!!
- County commissioners, fire, police, sheriffs, have all chimed and and are opposed!
- Where do we get the healthcare workers, doctors, clinics, hospitals, fire/ems, added police presense, school teachers, school space for extra kids, daycares, etc... to take care of all these extra bodies that won't be contributing financially to our communities, healthcare system, roads, fire, police, schooling etc??

- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for. Any such increase in taxes will effectively translate to a subsidy for a private business,

- The current residents only have One way out, don't clog up the already impossible traffic situation even more.

- Our full infrastructure in this and the surrounding communities needs to be addressed and repaired/improved before you should even be thinking about bringing that kind of a strain on all of us that live here or have a vested interest in this community.

- Denial of 47 Degrees North will not take away or reduce underlying property rights. It will simply require Sun Communities to comply with city's current rules, regulations and comprehensive plan for the property. The original underlying zoning approval and development agreement already allows development of this site, just not as a private resort/manufactured home community/retail center.

- Rezone as a recreational trail and forest area for everyone to enjoy.

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Respectfully,

Michelle Tigner

- Is in clear violation of the vision for the property adopted by the city and presented to the public as a condition for annexing Bullfrog Flats into the city. It's not in character with the City of Cle Elum and does not comply with fundamental requirements of the city's comprehensive plan, the development agreement, or zoning for the property.

- Instead of traditional neighborhoods that were planned to be connected to and a natural extension of the city, supporting the rest of the city, 47 Degrees North would create a private for-profit community and tourist resort with gates, private roads and utilities which will be separated from the rest of the city. It will create a private city within a city, forever.

- Fiscal studies of 47 Degrees North show that it will not create sufficient tax revenue to cover the city's cost to serve it. Unless the developer agrees to financially cover the substantial deficits, forever, existing city taxpayers will be required to subsidize Sun's development and taxes will go up.

- Sun's 47 Degrees North will be in its entirety a private business not a natural neighborhood (no lots sold, all spots leased), wholly owned by a massive out-of-state publicly traded corporation whose fiduciary duty is to its shareholders, not city taxpayers. Any subsidies of the project would be a gift of public funds to a private entity.

- Is not housing as contemplated for the Bullfrog UGA. It will displace half of the actual housing planned for the area and replace it with a private park designed as a transient playground.

- Will be the largest manufactured home/RV park on the West Coast and will double the population of Cle Elum. Parks of this magnitude have no place in a town as small as Cle Elum. Wrong Place, Wrong Size.

- Sun has eliminated the industrial park component of the approved plan and is proposing a major new retail center to the project which would compete with existing city businesses and will seriously damage Cle Elum's downtown, which the city has invested millions of dollars to reinvigorate. The retail center is in direct conflict with the city's comprehensive plan which states that the Bullfrog Flats Master Plan…."is intended to elevate the DTC (downtown core) as the primary retail and activity nexus for Cle Elum". Current rules for the Bullfrog Flats property prohibit a retail center on the property.

- Provides no significant benefits to city or UKC residents, but creates serious and significant impacts on roads, police, fire, schools, emergency services, hospitals and other public services that can't be (or won't be) fully mitigated by the developer.

- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for. Any such increase in taxes will effectively translate to a subsidy for a private business,

- Denial of 47 Degrees North will not take away or reduce underlying property rights. It will simply require Sun Communities to comply with city's current rules, regulations and comprehensive plan for the property. The original underlying zoning approval and development agreement already allows development of this site, just not as a private resort/manufactured home community/retail center.

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Respectfully,

Mike Read

Subject: 47 Degrees North- Comments on the applications for the proposed modifications to the Bullfrog UGA Master Site Plan and Development Agreement and Addendum to the SEIS

[EXTERNAL EMAIL] DO NOT CLICK links or attachments unless you recognize the sender and know the content is safe.

To: City of Cle Elum – Mayor, City Council members, Planning Department:

I am writing to inform the city of my very strong opposition to the Sun Communities 47° North proposal for the Bullfrog flats property. These are the key issues that I strongly object to:

The proposed manufactured home / RV community:

- Is in clear violation of the vision for the property adopted by the city and presented to the public as a condition for annexing Bullfrog Flats into the city. It's not in character with the City of Cle Elum and does not comply with fundamental requirements of the city's comprehensive plan, the development agreement, or zoning for the property.

- Instead of traditional neighborhoods that were planned to be connected to and a natural extension of the city, supporting the rest of the city, 47 Degrees North would create a private for-profit community and tourist resort with gates, private roads and utilities which will be separated from the rest of the city. It will create a private city within a city, forever.

- As I'm sure you are aware, Fiscal studies of 47 Degrees North show that it will not create sufficient tax revenue to cover the city's cost to serve it. Unless the developer agrees to financially cover the substantial deficits, forever, existing city taxpayers will be required to subsidize Sun's development and taxes will go up.

- Sun's 47 Degrees North will be in its entirety a private business not a natural neighborhood (no lots sold, all spots leased), wholly owned by a massive out-of-state publicly traded corporation who's fiduciary duty is to its shareholders, not city taxpayers. Any subsidies of the project would be a gift of public funds to a private entity.

- Is not housing as contemplated for the Bullfrog UGA. It will displace half of the actual housing planned for the area and replace it with a private park designed as a transient playground.

- This project will be the largest manufactured home/RV park on the West Coast. Pouring thousands of visitors to our already overcrowded rivers, lakes, camp sites and playgrounds. This proposed project is way too much too fast. A slow growing community like the original plan makes so much more sense for handling infrastructure, creating meaningful jobs. A measured slow and steady growth is welcome.

- Sun has eliminated the industrial park component of the approved plan and is proposing a major new retail center to the project which would compete with existing city businesses and will seriously damage Cle Elum's downtown, which the city has invested millions of dollars to reinvigorate. The retail center is in direct conflict with the city's comprehensive plan which states that the Bullfrog Flats Master

Plan...."is intended to elevate the DTC (downtown core) as the primary retail and activity nexus for Cle Elum". Current rules for the Bullfrog Flats property prohibit a retail center on the property.

- Provides no significant benefits to city or UKC residents, but creates serious and significant impacts on roads, police, fire, schools, emergency services, hospitals and other public services that can't be (or won't be) fully mitigated by the developer, and,

- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for. Any such increase in taxes will effectively translate to a subsidy for a private business.

- Wildfires are inevitable - God forbid one rips though our community. We will be forced to compete with thousands of people evacuating RVs on one two lane road. We've seen it before in Paradise California- complete pandemonium and disaster. Not to mention an impassable gridlock for the firefighters

- Denial of 47 Degrees North will not take away or reduce underlying property rights. It will simply require Sun Communities to comply with city's current rules, regulations and comprehensive plan for the property. The original underlying zoning approval and development agreement already allows development of this site, just not as a private resort/manufactured home community/retail center.

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

The developer is not proposing to actually build or expand any road or intersections outside of the Bullfrog Flats site, but rather asks to pay a "% share fee" to the city which would actually amount to a small percentage of the actual cost of what's needed to expand al the congested roads. And the developer has proposed to pay little, or even no, cost share for other needed capital facility expansions and budget shortfalls for Schools, emergency and hospital services, transfer station, etc. to accommodate the doubling of population.

The city commissioned fiscal studies on how the project would impact city and upper county budgets and how it would compare with the current approved land use plan. The studies show that over time the taxes collected from the Sun Communities project will be far less than what would have been collected from the currently approved traditional neighborhood, and collected tax revenue would not be nearly enough to offset either the City's increased cost for ongoing services (Police, Fire, Parks, Public Works) or the increased costs for schools, emergency services and other public services. The studies are more or less silent on where the rest of the funding will come from, or who exactly will be responsible to actually build or expand the needed facilities, but the study strongly implies it will fall on the general public and upper county taxpayers. If this project is approved as proposed, it's quite clear the choice facing the upper county will be to suffer congested roadways, overcrowded schools, reduced police and emergency services, etc., OR, increase taxes to pay for what's needed. Without a doubt, if approved by the city as currently proposed the residents of the upper county will be subsidizing this project and taxes will go up.

Instead of a residential community of individually owned homes with roots and financial stakes in the City of Cle Elum and the upper county, the Sun Communities project is, and will continue to be, a large private business owned by a publicly, traded company headquartered in Michigan. Sun Communities will retain ownership and control of all of the underlying land and all decision making on how to operate and manage the community will ultimately be subject to the approval of company headquarters. And, as currently proposed, we the public will be subsidizing this private resort business.

If the City determines to move forward with this project I request that the City:

- Condition the project in a strong legally enforceable way so that there are NO financial impacts to existing upper county residents; so that higher taxes aren't needed; so the residents of the upper county aren't required to subsidize a private business venture
- Provide legal mechanisms so the Sun Communities project pays for all special district (non-city) financial Impacts and funding shortfalls (schools, waste, transportation).
- Include a large, thick Buffer along Bullfrog Rd to obscure all view of the project from Bullfrog Road. None of the project should be visible from Bullfrog Road. This is what Suncadia was required to do, and it was effective.
- Infrastructure and concurrency – Condition the project so that infrastructure is built when it's needed and not after the project is built out and the developer is finished with little or no incentive to participate.
- Make the project responsible for funding/constructing any infrastructure needed to support it, or if the city were to accept some, or all, of the responsibility ("% share" method), the project should be required to wait until the city actually builds the infrastructure that's needed (concurrency).
- Condition the project with a concurrency agreement/phasing plan so that development is only allowed to proceed in phases as infrastructure is fully funded/constructed.
- The study of impacts for this project is largely based on modeling and assumptions from other regions which may not be accurate for this development in our unique location. The progress of the project should be tied to a monitoring plan as part of concurrency. No model is 100% accurate. If the project has more impacts than assumed by the models, more mitigation (more funding) should be required in future phases to make up for shortfalls

I appreciate the opportunity to submit these comments. I request being made of party of record and be a recipient of all notices, staff reports, findings, etc.

Respectfully submitted,

Mike and Gretchen Reimbold

- Sun has eliminated the industrial park component of the approved plan and is proposing a major new retail center to the project which would compete with existing city businesses and will seriously damage Cle Elum's downtown, which the city has invested millions of dollars to reinvigorate. The retail center is in direct conflict with the city's comprehensive plan which states that the Bullfrog Flats Master Plan...."is intended to elevate the DTC (downtown core) as the primary retail and activity nexus for Cle Elum". Current rules for the Bullfrog Flats property prohibit a retail center on the property.

- Provides no significant benefits to city or UKC residents, but creates serious and significant impacts on roads, police, fire, schools, emergency services, hospitals and other public services that can't be (or won't be) fully mitigated by the developer, and,

- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for. Any such increase in taxes will effectively translate to a subsidy for a private business,

- Denial of 47 Degrees North will not take away or reduce underlying property rights. It will simply require Sun Communities to comply with city's current rules, regulations and comprehensive plan for the property. The original underlying zoning approval and development agreement already allows development of this site, just not as a private resort/manufactured home community/retail center.
- There is already retail space that has been sitting for YEARS, next to Safeway, next to McDonalds, etc.
- My parents bought into a manufactured home park where they paid a monthly space rent. In a relatively short amount of time, the rent had increased by over $1000 per month, making their home unaffordable. Sun Communities already has a bad track record https://www.trustpilot.com/review/suncommunities.com

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Re: 47 Degrees North Major Amendment proposal

I am writing to inform the city of my very strong opposition to the Sun Communities 47° North proposal for the Bullfrog flats property. The proposed manufactured home / RV community:

- Is in clear violation of the vision for the property adopted by the city and presented to the public as a condition for annexing Bullfrog Flats into the city. It's not in character with the City of Cle Elum and does not comply with fundamental requirements of the city's comprehensive plan, the development agreement, or zoning for the property.

- Instead of traditional neighborhoods that were planned to be connected to and a natural extension of the city, supporting the rest of the city, 47 Degrees North would create a private for-profit community and tourist resort with gates, private roads and utilities which will be separated from the rest of the city. It will create a private city within a city, forever.

- Fiscal studies of 47 Degrees North show that it will not create sufficient tax revenue to cover the city's cost to serve it. Unless the developer agrees to financially cover the substantial deficits, forever, existing city taxpayers will be required to subsidize Sun's development and taxes will go up.

- Sun's 47 Degrees North will be in its entirety a private business not a natural neighborhood (no lots sold, all spots leased), wholly owned by a massive out-of-state publicly traded corporation who's fiduciary duty is to its shareholders, not city taxpayers. Any subsidies of the project would be a gift of public funds to a private entity.

- Is not housing as contemplated for the Bullfrog UGA. It will displace half of the actual housing planned for the area and replace it with a private park designed as a transient playground.

- Will be the largest manufactured home/RV park on the West Coast and will double the population of Cle Elum. Parks of this magnitude have no place in a town as small as Cle Elum. Wrong Place Wrong Size.

- Sun has eliminated the industrial park component of the approved plan and is proposing a major new retail center to the project which would compete with existing city businesses and will seriously damage Cle Elum's downtown, which the city has invested millions of dollars to reinvigorate. The retail center is in direct conflict with the city's comprehensive plan which states that the Bullfrog Flats Master Plan...."is intended to elevate the DTC (downtown core) as the primary retail and activity nexus for Cle Elum". Current rules for the Bullfrog Flats property prohibit a retail center on the property.

- Provides no significant benefits to city or UKC residents, but creates serious and significant impacts on roads, police, fire, schools, emergency services, hospitals and other public services that can't be (or won't be) fully mitigated by the developer, and,

- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for. Any such increase in taxes will effectively translate to a subsidy for a private business,

- Denial of 47 Degrees North will not take away or reduce underlying property rights. It will simply require Sun Communities to comply with city's current rules, regulations and comprehensive plan for the property. The original underlying zoning approval and development agreement already allows development of this site, just not as a private resort/manufactured home community/retail center.

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Respectfully,

Nancy Gore

To: City of Cle Elum – Mayor, City Council members, Planning Department

I'm writing to inform the city of my very strong opposition to the Sun Communities 47° North proposal for the Bullfrog flats property. We moved here to Suncadia Resort to enjoy the small-town feel, gracious residents and the tremendous opportunities for recreation and simply enjoying our quiet outdoors and wild life.

What is being proposed in the current 47 Degrees North plan is going to permanently scar this beautiful place, cause irreparable harm to our shared lands, swamp the area with a new "instant city" of visitors with their RVs, motorcycles, boats and snow machines and is completely out of step with the character of Cle Elum and the surrounding areas. This is not the legacy you would be proud to leave behind.

These are the key issues that I strongly object to:

1. This project will be the largest manufactured home/RV park on the West Coast. Pouring thousands of visitors to our already overcrowded rivers, lakes, camp sites and playgrounds. This proposed project is way too much too fast. A slow growing community like the original plan makes so much more sense for handling infrastructure, creating meaningful jobs. A measured slow and steady growth is welcome.

2. This proposed development provides no significant benefits to city or UKC residents, but creates serious and significant impacts on roads, police, fire, schools, emergency services, medical facilities and other public services that can't be (or won't be) fully mitigated by the developer.

3. I-90 in both directions on a Sunday afternoon is currently gridlock.....adding 600+ RVs towing boats, motorcycles, snow machines etc. will make I-90 impassable. If this project happens, we can add Friday afternoon I-90 gridlock to the mix.

4. Wildfires are inevitable - God forbid one rips though our community we will be forced to compete with thousands of people evacuating RVs on one two lane road. Weve seen it before in Paradise California- complete pandemonium and disaster. Not to mention an impassable gridlock for the firefighters.

5. As I'm sure you are aware, Fiscal studies of 47 Degrees North show that it will not create sufficient tax revenue to cover the city's cost to serve it.

For these reasons, and many more, I implore the City to DENY this proposed major amendment and retain the current approved land use for the property.

Respectfully,

Vladimir and Natalya Monich

Re: 47 Degrees North Major Amendment proposal

I am writing to inform the city of my very strong opposition to the Sun Communities 47° North proposal for the Bullfrog flats property. The proposed manufactured home / RV community:

- Is in clear violation of the vision for the property adopted by the city and presented to the public as a condition for annexing Bullfrog Flats into the city. It's not in character with the City of Cle Elum and does not comply with fundamental requirements of the city's comprehensive plan, the development agreement, or zoning for the property.

- Instead of traditional neighborhoods that were planned to be connected to and a natural extension of the city, supporting the rest of the city, 47 Degrees North would create a private for-profit community and tourist resort with gates, private roads and utilities which will be separated from the rest of the city. It will create a private city within a city, forever.

- Fiscal studies of 47 Degrees North show that it will not create sufficient tax revenue to cover the city's cost to serve it. Unless the developer agrees to financially cover the substantial deficits, forever, existing city taxpayers will be required to subsidize Sun's development and taxes will go up.

- Sun's 47 Degrees North will be in its entirety a private business not a natural neighborhood (no lots sold, all spots leased), wholly owned by a massive out-of-state publicly traded corporation who's fiduciary duty is to its shareholders, not city taxpayers. Any subsidies of the project would be a gift of public funds to a private entity.

- Is not housing as contemplated for the Bullfrog UGA. It will displace half of the actual housing planned for the area and replace it with a private park designed as a transient playground.

- Will be the largest manufactured home/RV park on the West Coast and will double the population of Cle Elum. Parks of this magnitude have no place in a town as small as Cle Elum. Wrong Place Wrong Size.

- Sun has eliminated the industrial park component of the approved plan and is proposing a major new retail center to the project which would compete with existing city businesses and will seriously damage Cle Elum's downtown, which the city has invested millions of dollars to reinvigorate. The retail center is in direct conflict with the city's comprehensive plan which states that the Bullfrog Flats Master Plan…."is intended to elevate the DTC (downtown core) as the primary retail and activity nexus for Cle Elum". Current rules for the Bullfrog Flats property prohibit a retail center on the property.

- Provides no significant benefits to city or UKC residents, but creates serious and significant impacts on roads, police, fire, schools, emergency services, hospitals and other public services that can't be (or won't be) fully mitigated by the developer, and,

- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for. Any such increase in taxes will effectively translate to a subsidy for a private business,

- Denial of 47 Degrees North will not take away or reduce underlying property rights. It will simply require Sun Communities to comply with city's current rules, regulations and comprehensive plan for the property. The original underlying zoning approval and development agreement already allows development of this site, just not as a private resort/manufactured home community/retail center.

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Respectfully,

Nicole Stoss

Re: 47 Degrees North Major Amendment proposal

I am writing to inform the city of my very strong opposition to the Sun Communities 47° North proposal for the Bullfrog flats property. The proposed manufactured home / RV community will result in negative impacts:

- Traffic gridlock with high volume of transient visitors in large recreational vehicles
- Decreased level of service for emergency medical services
- Decreased level of service for police protection
- Decreased level of service for fire protection
- Increased tax burden on existing property owners to pay for aging infrastructure (water, sewer, power, roads)
- Increased 2nd home ownership within a private resort adversely impacting many throughout the community
- Adverse impact to downtown core businesses as resort environment will drive dollars to remain at the resort
- Potential to increase jobs yet does little to offer adequate affordable housing options in relationship to amount of workers necessary to support multiple resorts in the area
- Potential to require additional city resources to manage and address concerns by a high volume of transient visitors
- High volume of short term rentals (STRs) tax revenue by law are applied tourism rather than infrastructure upgrades
- 90% of profits will be, by law, sent out of our community to Wall Street investors

For these reasons, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Respectfully,

Nikolas Linden

Dear Planning Department: This email opposes the size of the proposed 47 Degrees North development. We bought our property in Suncadia in 2005 because Cle Elum and the surrounding areas were quiet and beautiful. Instead of the noise and chaos of Seattle, we looked for a smaller area with a friendly town atmosphere and neighbors who knew each other. We are not opposed to some development, but are opposed to an increase in volume that will make the area like a crowded city and significantly change the character of the Cle Elum - Roslyn area.
Thank you for considering our views.
P.H. Char

Subject: 47 north

Nothing good will come from this development and if the retail part is built it will not have a good effect on the town center retail area that already looks half vacate and run down. This will have a negative impact on the greater area. This entire project should be shelved and put to rest!

- Provides no significant benefits to city or UKC residents, but creates serious and significant impacts on roads, police, fire, schools, emergency services, hospitals and other public services that can't be (or won't be) fully mitigated by the developer.

- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for. Any such increase in taxes will effectively translate to a subsidy for a private business,

- Denial of 47 Degrees North will not take away or reduce underlying property rights. It will simply require Sun Communities to comply with city's current rules, regulations and comprehensive plan for the property. The original underlying zoning approval and development agreement already allows development of this site, just not as a private resort/manufactured home community/retail center.

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Respectfully,

Patricia A Dowsett

Dear City Council and Mayor;

I write this letter, with the knowledge that there is a lot riding on the judiciousness, neutrality, and unequivocal fairness that the city of Cle Elum Staff, Council, and the Mayor must face during this time. A multibillion corporation that has the financial requiem to intimidate the city into doing as they want. They have already chosen to flout their muscle in not following the cities laws and ordinances in their requests for the changes in their proposal from the original plan. There are 10+ municipal ordinances their request doesn't follow. They have flouted and brazenly disregarded the Temporary Use Authorization that was specific about a limited time period, to remain in good standing with a City Business License, and have not removed the temporary structures and signage in a timely manner. Their previous practices towards other cities and counties have been predatory in nature and once installed into place and city ordinances/agreements have not been adhered to in Grandby, Colorado as an example of their corporate behavior. As a representative of the people, this should cause the entire mayor and council to reconsider ANY and ALL intentions of Sun Communities.

Sun Communities for the 47 Degrees North Project have and are not negotiating in good faith with the different entities for paying their fair share in taxes for schools, hospitals, water, roads, and different tax entities. This alone should cause the city council to pause at the economic impact to the city and surrounds to an estimated 30 + millions dollars for the tax payers for necessary services. In my own study of the police and the school district, the impact would be to about 15.5 million dollars, due to the population increases and using the US Census from 2020 for the state and county. There would be an added financial burden to residents, not just in the city, but the entire upper Kittitas County. If Sun Communities negotiated their taxes for water, sewer, property tax, county taxes, and any other portion of additional taxes that are included to 30% off of their fair share of the tax burden... this would create a deficit of about 13,000 dollars for each person living in the Cle Elum city limits to adjust for the services rendered for all (fire, police, schools, water, ems, sewer, hospital, transportation etc...) or about $7,500 per person in the entire Upper Kittitas County. When negotiating corporate entities with cities and counties, they usually look towards getting about 30% off of their tax burden to increase their corporate and stockholder financial benefits. These impact costs, do not include dangers of additional weekend traffic, bullfrog road and exit, and additional impact points at exits and entrances to the Cle Elum and Roslyn area.

The dangers and hazards for city police, fire, ems, and wildlands, are enormous. The Bullfrog road is already an impact point of contention for those people living above the 903/Bullfrog intersect. If there is a fire or a major emergency, many people will be adversely impacted and unable to get to safety. There is no other method for those people to get out of harms way in a high fire danger area. Environmental impact is incalculable, due to the nature of the requested development. The trees, river, water, animals will be impacted from the major development. They are already under stress, due to previously allowable developments in the Upper Kittitas Area. Newish residents complain about run-ins with bears, cougars, wolves, and fox, as they directly impact them in multiple ways. These animals are looking for ways to eat and provide for their young. They will come in and kill family's pets such as cats, dogs, and poultry. The unknowledgeable new person doesn't understand the necessity of keeping their garbage locked up and keeping their pets food etc. in a controlled area. Environmental runoff from chemicals, high traffic use, and constant use will cause generational damage to this part of the environment. 100-200 year old trees that have been long standing will either be cut down and logged off for the manicured lawns, manufactured homes, rv spots, roadways, and shopping centers will never be able to be replaced. The trees that are left will be impacted by additional traffic over their root systems from thousands of bikes, foot traffic, and motorized vehicles. Some of these people will be well meaning and stay on the trails, but many will bring their additional tools such as axes and hatchets to grab some firewood. When you have a multi-billion dollar company in charge of an area that is reasonably intact, you will see a major increase in crimes, litter, traffic, and community angst. The people using the RV areas and Manufactured home areas, have no investment in the land or the community that encompasses it. Our services simply keep up with influx of additional crimes. We've had an increase in theft and pedophilia actions, in the last few years. Businesses such as Sportland has been robbed through a truck crashing through the front doors, Roslyn grocery that they dragged the ATM

machine down the street. Additional problems include the graffiti on fences and building in Cle Elum proper. We've had predatory pedophiles target our elementary children, thinking they were easy targets, because we are a small town. Additional predatory issues is the business itself in the nature towards the innocent people hoping to live a better life, by buying a Manufactured Home and never getting to advance in equity or in value over the long term. This has been shown in previous statements I made to the city council. These Manufactured home parks are nothing more than a glorified trailer park; except they do not really benefit the people they purport to care for. Sun Communities has shown over and over across the nation and in multiple situations that they raise the lot rents above the COLA levels on a regular basis and have changed up to 30% plus, within a three year period in some places.

What can Cle Elum city council do in this situation? They can deny this amended proposal and require them go with the original plan or create a new one. The city can enact a new ordinance about sun setting previous building agreements that were not acted upon in a timely manner. The city can enforce the codes and laws that are already in place. The city has to look out for the citizens of Cle Elum and the Upper Kittitas County that are already here and have had a vested interest in the success of the community to succeed. I ask the Mayor McGown, City Council, and the hardworking city staff to listen to the unanimous outcry from not just the citizens of Cle Elum, but the entire Upper Kittitas County. This plan that Sun Communities has proposed is not sustainable for the city or the county, when everyone else will have to pay for the short falls of this proposal. The negotiations should NEVER require the city and the citizens of Cle Elum and the Upper Kittitas County to have to make up the difference that Sun Communities wants in their proposals. Their proposal does NOT address any of the long-term effects. Cle Elum also needs to eliminate certain verbiage on the City of Cle Elum's website that actively advertises the manufactured homes for sale, when Sun Communities does not have a business license and the city does not advertise for any other business. This shows a bias towards one business over another. In the past, there have been other large development companies that wanted to work with Cle Elum of the last couple of decades. These large corporations have made promises to the city of Cle Elum for entities such as swimming pools and other needs of the city. However, the city did not enforce those promises made. Large corporations are not known for keeping their word, unless they are forced to. This development is not sustainable for the current water resources that we have and the current usage that is being done on a regular basis. The city water resources are at a maximum and any stressors on the system can cause a shortage to a large portion of the city and its citizens as reported by the cities own water treatment staff.

Knowing that as the city council in this difficult situation you're in, you can prevail by following the codes already set in place and do NOT have to kowtow, to the machinations of Sun Communities. Remember in the end, you live with us as citizens of Cle Elum and the Upper Kittitas County. You will see us on a regular basis. If you vote this proposal, you will be reminded every day of your poor decisions, by the less than adequate police, water, sewer, ems, fire, education, hospital, roads, wildland protection, and angst of generations against you and those that follow you. This will create a split in the community for Cle Elum, including going to specific churches, businesses, socialization, friendships, and organizational participation. This development can and will affect the entire Upper Kittitas County for many decades to come. The city of Cle Elum has one chance to get this right. We as a people are often contentious and outspoken, rarely do we see eye to eye on things. In this, we are **UNITED** in the **DENIAL** OF THIS PROPOSAL AND THE MASSIVE FAST PACED DEVELOPMENT THAT SUN COMMUNITIES IS PROPOSING.

Re: 47 Degrees North Major Amendment proposal

I am writing to inform the city of my very strong opposition to the Sun Communities 47° North proposal for the Bullfrog flats property. The proposed manufactured home / RV community:

- Is in clear violation of the vision for the property adopted by the city and presented to the public as a condition for annexing Bullfrog Flats into the city. It's not in character with the City of Cle Elum and does not comply with fundamental requirements of the city's comprehensive plan, the development agreement, or zoning for the property.

- Instead of traditional neighborhoods that were planned to be connected to and a natural extension of the city, supporting the rest of the city, 47 Degrees North would create a private for-profit community and tourist resort with gates, private roads and utilities which will be separated from the rest of the city. It will create a private city within a city, forever.

- Fiscal studies of 47 Degrees North show that it will not create sufficient tax revenue to cover the city's cost to serve it. Unless the developer agrees to financially cover the substantial deficits, forever, existing city taxpayers will be required to subsidize Sun's development and taxes will go up.

- Sun's 47 Degrees North will be in its entirety a private business not a natural neighborhood (no lots sold, all spots leased), wholly owned by a massive out-of-state publicly traded corporation who's fiduciary duty is to its shareholders, not city taxpayers. Any subsidies of the project would be a gift of public funds to a private entity.

- Is not housing as contemplated for the Bullfrog UGA. It will displace half of the actual housing planned for the area and replace it with a private park designed as a transient playground.

- Will be the largest manufactured home/RV park on the West Coast and will double the population of Cle Elum. Parks of this magnitude have no place in a town as small as Cle Elum. Wrong Place Wrong Size.

- Sun has eliminated the industrial park component of the approved plan and is proposing a major new retail center to the project which would compete with existing city businesses and will seriously damage Cle Elum's downtown, which the city has invested millions of dollars to reinvigorate. The retail center is in direct conflict with the city's comprehensive plan which states that the Bullfrog Flats Master Plan…"is intended to elevate the DTC (downtown core) as the primary retail and activity nexus for Cle Elum". Current rules for the Bullfrog Flats property prohibit a retail center on the property.

- Provides no significant benefits to city or UKC residents, but creates serious and significant impacts on roads, police, fire, schools, emergency services, hospitals and other public services that can't be (or won't be) fully mitigated by the developer, and,

- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for. Any such increase in taxes will effectively translate to a subsidy for a private business,

- Denial of 47 Degrees North will not take away or reduce underlying property rights. It will simply require Sun Communities to comply with city's current rules, regulations and comprehensive plan for the property. The original underlying zoning approval and development agreement already allows development of this site, just not as a private resort/manufactured home community/retail center.

City of Cle Elum
Planning Department/47 Degrees North
119 West First Street
Cle Elum, WA 98922

Dear Planning Department,

I am writing to comment and ask questions regarding the revised master plan under review by the city for the potential 47 Degrees North development by Sun Communities.

We own three homes in the area, two are within the city limits of Cle Elum in the Cle Elum Pines neighborhood (owned by our company Cle-Ros Rentals, LLC), across from the proposed commercial site within the 47 Degrees North development. The third home is within the Suncadia community. We love the area and chose to relocate here full time several years ago. We are excited about the improvements being made by the City of Cle Elum, particularly in the downtown core and hope to see the continued growth of new businesses in the area as a result. We are also mindful of the need for additional, reasonably priced housing to allow people working in the area to be able to live in the area as well.

After reviewing the revised proposal from Sun Communities, I have a few comments and some questions below:

- The financial analysis is what I would call a "sunny day scenario" with fully built out and sold-out RV, residential, and commercial spaces over time. There is a more likely "middle of the road" scenario somewhere between the fully built-out and sold-out model and reality. This is particularly true of the commercial space, which is not a formal condition of the project, and has the potential to contribute zero if not executed. While the Cle-Elum area could certainly benefit from an additional grocery store, there is currently a large amount of unleased commercial space available in the area. Additionally, the new construction might attract businesses to move away from the downtown core. My concern is the commercial portion of the project, assuming it is executed, may not generate the additional employment demand or tax revenues as projected in the financial analysis and it may contribute to a reversal in the growth of businesses in the downtown core. I hope the city is developing a financial analysis that supports a more likely scenario to determine the financial feasibility of the project.
- Improvements and expansions to city and county services will be needed sooner than with the approved 2002 Master Plan. The new timeline needed to construct some of the infrastructure, such as water services, would require the city and county to begin to fund those activities right away. Given the forecast revenues to support those expansions are well into the future, how will the infrastructure be funded? Is there an existing pool of funding for the needed capital expansions/improvements?

- Mitigation agreements are discussed in several areas of the SEIS Addendum, and it is good to see that those discussions are taking place with the various service providers. Perhaps some of the improvements are needed regardless of the 47 Degrees North project and that is why there is potential cost sharing between the service provider and Sun Communities, but in my opinion the applicant should be responsible, up front, for most of the costs for any service expansions given they are the driving factor. Perhaps Sun Communities provides the funding up front and then receive tax credits as they realize their future revenues? That would move the risk of Sun Communities performance to their financial forecast away from the city and county and on to Sun Communities.

The next two points are made to ensure that future growth in the City of Cle Elum promotes a positive image of the city and area:

- We frequently travel the country in our RV and visit many different RV parks. The trend we have seen over the last few years has gone from most stays being short term, as indicated by Sun Communities assumptions, and has moved toward most people being long term stays, and many have families. Sun Communities proposed "seasonal" 9-month limit on stays suggests they also understand there will be a demand for long term stays. I believe the assumption that the RV park is not going to add additional demand on the schools is not accurate. Additionally, the RV parks we have visited that were once very nice but now have a large population of long-term stays have become run down and very unsightly and we, and other short-term visitors we know, do everything we can to avoid them which promotes companies like Sun Communities to pursue more long terms stays to maintain their occupancy rates. I would recommend adding additional conditions to the master plan to significantly limit the percentage of long-term stays (longer than 60-90 days). This also needs to include rules around the amount of time between stays or a maximum amount of time in a given period of time to avoid a short move out and move back in or moving from one space to another counting as a new stay.
- Similarly, we have been around multiple modular home communities in the Palm Desert area, also where Sun Communities operates. For some reason, the aesthetics of the modular home communities are significantly less than those communities with stick-built homes. Again, I would recommend adding additional conditions to the master plan to include agreements about the look and upkeep of community spaces as well as the look and upkeep of the modular homes and the leased spaces they are on with specific remedies for violations.

The 47 Degrees North project needs to make a positive impact on our community and good business sense for the city, county, etc. As the proposal is structured today, I believe most of the risk – both financial and physical image, falls to the city and county. I would urge you to reject the revised proposal and negotiate better terms that ensure a positive impact on our city and community.

Sincerely,

Patricia Thurman

Re: 47 Degrees North Proposal

I am writing to provide the city with my very strong concerns about the Sun Communities 47°N proposal for the Bullfrog Flats property. The proposed manufactured home/RV community:

· Is not in character with the City of Cle Elum or the upper Kittitas Valley (a fundamental requirement of the current zoning for the property),

· Would create a new and separate private tourist resort instead of the natural extension of city neighborhoods originally envisioned by city zoning and current approvals,

· Is in its entirety a private business not a neighborhood (no lots will be created or sold, all spots will be leased, and the project will be private), wholly owned by a large out-of-state publicly traded corporation whose fiduciary duty is to its shareholders,

· Provides no significant benefits to upper valley residents and tax payers,

· Will create serious and significant impacts on roads, police, fire, schools, emergency services, hospitals, and other public services that can't (or won't) be fully mitigated by the developer, and therefore,

· Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for, essentially a subsidy for a private business,

· Denial of the Sun Communities proposal would not take away or reduce underlying property rights. The original underlying zoning approval would still allow development of this site, just not as a private resort/manufactured home community.

For all of these reasons, and others, I implore the City to DENY this proposed major amendment and retain the current approved land use for the property.

City of Cle Elum Planning Department
119 W First Street
Cle Elem, WA 98922

To whom it may concern at the Planning Department,

I am writing today regarding my objections to pending permit application submitted for the proposed 47 Degrees North project.

I currently own a small business in the Roslyn Commercial Core and although some would argue that this huge, proposed development would be a boon for small, local business I believe the opposite to be true. The small, sleepy, Mayberry feel of Roslyn and Cle Elum are what draw visitors. A development this large would destroy that vibe and historical significance of the area.

Additionally, I think it's obvious that the infrastructure of the area is nowhere near ready for the influx of so many new commuters and residences.

Respectfully,

- Is in clear violation of the vision for the property adopted by the city and presented to the public as a condition for annexing Bullfrog Flats into the city. It's not in character with the City of Cle Elum and does not comply with fundamental requirements of the city's comprehensive plan, the development agreement, or zoning for the property.
- Instead of traditional neighborhoods that were planned to be connected to and a natural extension of the city, supporting the rest of the city, 47 Degrees North would create a private for-profit community and tourist resort with gates, private roads and utilities which will be separated from the rest of the city. It will create a private city within a city, forever.
- Fiscal studies of 47 Degrees North show that it will not create sufficient tax revenue to cover the city's cost to serve it. Unless the developer agrees to financially cover the substantial deficits, forever, existing city taxpayers will be required to subsidize Sun's development and taxes will go up.
- Sun's 47 Degrees North will be in its entirety a private business not a natural neighborhood (no lots sold, all spots leased), wholly owned by a massive out-of-state publicly traded corporation who's fiduciary duty is to its shareholders, not city taxpayers. Any subsidies of the project would be a gift of public funds to a private entity.
- Is not housing as contemplated for the Bullfrog UGA. It will displace half of the actual housing planned for the area and replace it with a private park designed as a transient playground.
- Will be the largest manufactured home/RV park on the West Coast and will double the population of Cle Elum. Parks of this magnitude have no place in a town as small as Cle Elum. Wrong Place Wrong Size.
- Sun has eliminated the industrial park component of the approved plan and is proposing a major new retail center to the project which would compete with existing city businesses and will seriously damage Cle Elum's downtown, which the city has invested millions of dollars to reinvigorate. The retail center is in direct conflict with the city's comprehensive plan which states that the Bullfrog Flats Master Plan…."is intended to elevate the DTC (downtown core) as the primary retail and activity nexus for Cle Elum". Current rules for the Bullfrog Flats property prohibit a retail center on the property.
- Provides no significant benefits to city or UKC residents, but creates serious and significant impacts on roads, police, fire, schools, emergency services, hospitals and other public services that can't be (or won't be) fully mitigated by the developer, and,
- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for. Any such increase in taxes will effectively translate to a subsidy for a private business,
- Denial of 47 Degrees North will not take away or reduce underlying property rights. It will simply require Sun Communities to comply with city's current rules, regulations and comprehensive plan for the property. The original underlying zoning approval and development agreement already allows development of this site, just not as a private resort/manufactured home community/retail center.

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Respectfully,

Signature

This letter is written to ask you to please take all of the comments in opposition to the development of 47 Degrees North seriously. Your job as public servants is to do what is in the best interests of the people. This project as you are well aware is not at all in the best interests of anyone or anything other than a developer and perhaps city officials who will gain financially.

Please do your job, listen to the people and take your oaths of office seriously. This development is damage to the city, the environment, and the place we call home that cannot be undone.

Do your job.

Re: 47 Degrees North Proposal

I am writing to provide the city with my very strong concerns about the Sun Communities 47°N proposal for the Bullfrog Flats property. The proposed manufactured home/RV community:

- Is not in character with the City of Cle Elum or the upper Kittitas Valley (a fundamental requirement of the current zoning for the property),
- Would create a new and separate private tourist resort instead of the natural extension of city neighborhoods originally envisioned by city zoning and current approvals,
- Is in its entirety a private business not a neighborhood (no lots will be created or sold, all spots will be leased, and the project will be private), wholly owned by a large out-of-state publicly traded corporation whose fiduciary duty is to its shareholders,
- Provides no significant benefits to upper valley residents and tax payers,
- Will create serious and significant impacts on roads, police, fire, schools, emergency services, hospitals, and other public services that can't (or won't) be fully mitigated by the developer, and therefore,
- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for, essentially a subsidy for a private business,

- Denial of the Sun Communities proposal would not take away or reduce underlying property rights. The original underlying zoning approval would still allow development of this site, just not as a private resort/manufactured home community.

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Re: 47 Degrees North Major Amendment proposal

I am writing to inform the city of my very strong opposition to the Sun Communities 47° North proposal for the Bullfrog flats property. The proposed manufactured home / RV community will result in negative impacts:

- Traffic gridlock with high volume of transient visitors in large recreational vehicles
- Decreased level of service for emergency medical services
- Decreased level of service for police protection
- Decreased level of service for fire protection
- Increased tax burden on existing property owners to pay for aging infrastructure (water, sewer, power, roads)
- Increased 2nd home ownership within a private resort adversely impacting many throughout the community
- Adverse impact to downtown core businesses as resort environment will drive dollars to remain at the resort
- Potential to increase jobs yet does little to offer adequate affordable housing options in relationship to amount of workers necessary to support multiple resorts in the area
- Potential to require additional city resources to manage and address concerns by a high volume of transient visitors
- High volume of short term rentals (STRs) tax revenue by law are applied tourism rather than infrastructure upgrades
- 90% of profits will be, by law, sent out of our community to Wall Street investors

For these reasons, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Respectfully,

I want to take a moment to write my sincere opposition for this plan in Cle Elum Washington.

Our community does not have the infrastructure in place to support this initiative.

There is little planning and foresight into the actual impact this will have for our upper county and I do not appreciate this. Having a young child in the elementary school, I'm sincerely worried about the type of volume that will come to our area and the safety of the small town neighborhood we've always had. In the recreation months we are already unable to sustain the weekend traffic volume, this will only get exponentially worse.
I am telling everyone that I know to write in and to attend the community meeting to oppose this.

As someone who has multiple properties in this small town I do not want to be driven out by someone who got too big for their britches. Just because you can build something doesn't mean you should. We need to shelter what we have left of this community and not become another statistic.

Sun Communities' new proposal for a large-scale retail/commercial center appears to be at odds with the City of Cle Elum's commitment to and investment in the downtown business community. The City has a long-standing regulatory commitment "[T]o maintain Old Town as the principal retail center for the City of Cle Elum" as stated in the City of Cle Elum Municipal Code Sec. 17.45.010 B.9 and other City governing regulations. Over the past several years this commitment has been evidenced by the tremendous financial investment to revitalize Cle Elum's downtown core through significant beautification and infrastructure improvements.

Therefore, I stand Strongly Opposed.

- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for. Any such increase in taxes will effectively translate to a subsidy for a private business,
- Denial of 47 Degrees North will not take away or reduce underlying property rights. It will simply require Sun Communities to comply with city's current rules, regulations and comprehensive plan for the property. The original underlying zoning approval and development agreement already allows development of this site, just not as a private resort/manufactured home community/retail center.

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Respectfully,

ADDITIONAL COMMENTS:

I moved here in 1997 to get away from the rat race my small town of Issaquah had become. I moved here for the small town atmosphere and the wild life and woods. The original developement of Suncadia has changed alot of this. The wildlife is being driven out and the woods totally mowed down. Our town is a mess of congestion now. We do not need a private camp ground for RV people, who do not even understand how not to create a wildfire. They throw out ~~C~~igarates, park on the grass, drive aggressively and speed. No commen curticy. I 90 is now an accident zone full of aggresive drivers who do not know how to drive in snow and tail gate, closing the pass due to spin outs. We do not need more of these people in town. All money need to go to our City funds. (Police, fire & schools) I cannot afford higher taxes! 67 years old!

Re: 47 Degrees North Major Amendment proposal

I am writing to inform the city of my very strong opposition to the Sun Communities 47° North proposal for the Bullfrog flats property. The proposed manufactured home / RV community:

- Is in clear violation of the vision for the property adopted by the city and presented to the public as a condition for annexing Bullfrog Flats into the city. It's not in character with the City of Cle Elum and does not comply with fundamental requirements of the city's comprehensive plan, the development agreement, or zoning for the property.

- Instead of traditional neighborhoods that were planned to be connected to and a natural extension of the city, supporting the rest of the city, 47 Degrees North would create a private for-profit community and tourist resort with gates, private roads and utilities which will be separated from the rest of the city. It will create a private city within a city, forever.

- Fiscal studies of 47 Degrees North show that it will not create sufficient tax revenue to cover the city's cost to serve it. Unless the developer agrees to financially cover the substantial deficits, forever, existing city taxpayers will be required to subsidize Sun's development and taxes will go up.

- Sun's 47 Degrees North will be in its entirety a private business not a natural neighborhood (no lots sold, all spots leased), wholly owned by a massive out-of-state publicly traded corporation whose fiduciary duty is to its shareholders, not city taxpayers. Any subsidies of the project would be a gift of public funds to a private entity.

- Is not housing as contemplated for the Bullfrog UGA. It will displace half of the actual housing planned for the area and replace it with a private park designed as a transient playground.

- Will be the largest manufactured home/RV park on the West Coast and will double the population of Cle Elum. Parks of this magnitude have no place in a town as small as Cle Elum. Wrong Place, Wrong Size.

- Sun has eliminated the industrial park component of the approved plan and is proposing a major new retail center to the project which would compete with existing city businesses and will seriously damage Cle Elum's downtown, which the city has invested millions of dollars to reinvigorate. The retail center is in direct conflict with the city's comprehensive plan which states that the Bullfrog Flats Master Plan…."is intended to elevate the DTC (downtown core) as the primary retail and activity nexus for Cle Elum". Current rules for the Bullfrog Flats property prohibit a retail center on the property.

- Provides no significant benefits to city or UKC residents, but creates serious and significant impacts on roads, police, fire, schools, emergency services, hospitals and other public services that can't be (or won't be) fully mitigated by the developer.

- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for. Any such increase in taxes will effectively translate to a subsidy for a private business,

- Denial of 47 Degrees North will not take away or reduce underlying property rights. It will simply require Sun Communities to comply with city's current rules, regulations and comprehensive plan for the property. The original underlying zoning approval and development agreement already allows development of this site, just not as a private resort/manufactured home community/retail center.

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

City of Cle Elum – Mayor, City Council members, Planning Department,

I am writing to provide the city with my very strong concerns about the Sun Communities 47° North proposal for the Bullfrog flats property. The proposed manufactured home / RV community:

– is not in character with the City of Ce Elum or the upper valley (a fundamental requirement of the current zoning for the property),
– would create a new and separate private tourist resort and not a natural extension of city neighborhoods as originally envisioned/required by city zoning and current approvals,
– is in its entirety a private business not a neighborhood (no lots will be created or sold, all spots will be leased, and the project will be private), wholly owned by a large out-of-state publically traded corporation who's fiduciary duty is to its shareholders,
– provides no significant benefits to upper valley residents and tax payers, but
– will create serious and significant impacts on roads, police, fire, schools, emergency services, hospitals and other public services that can't (or won't) be fully mitigated by the developer, and therefore,
– will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for, essentially a subsidy for a private business,
– Denial of the Sun Communities proposal would not take away or reduce underlying property rights. The original underlying zoning approval would still allow development of this site, just not as a private resort/manufactured home community.

For all of these reasons, and others, I implore the City to DENY this proposed major amendment and retain the current approved land use for the property.

Respectfully,

Rebecca McCurdy

RE: 47 Degrees North Major Amendment Proposal

The purpose of my letter today is to comment on the 47 Degrees North development agreement that is currently in the planning approval process.

I am not a resident of the City of Cle Elum proper. However, I, and my family "live" in Cle Elum, Washington. We are a 4-generation family who treasure our hometown and want only what's best for the city and its citizens –those of us in the surrounding areas are citizens of Cle Elum by the fact that Cle Elum is the city we have chosen to call home. The decision(s) you make regarding this development, and others that are in the works, affects all who call this area home.

You have received a great deal of input regarding this development. My concerns echo those comments you have already heard many, many times. I am opposed to the revised plans of this development and request you consider the impact of these revised plans to the Whole of the Upper County – the impact it will have on both the short term and the future well-being of our community. The path that is chosen now is irreversible.

While administratively there are commitments in place for this development; it is my understanding the revision submitted does not contain prior commitments the City is legally required to honor.

Thank you for considering my thoughts. As the elected representatives who make decisions for its citizens, careful consideration is paramount at this time.

Respectfully submitted,

Rebecca Montgomery

RE: 47 Degrees North Major Amendment, SEPA and Development Agreement

6/1/23

I live at 311 W Arizona Ave in Roslyn, WA. I drive SR 903 between Roslyn and Cle Elum every morning to work. The traffic coming into Roslyn or taking the roundabout to Suncadia is a steady stream of traffic, a solid line between the two cities. The traffic is even worse if you happen to be passing through just prior to the start of school with parents and school buses dropping off children in a 20 mph speed zone. The Revised 47 Degrees North SEIS Addendum dated March 9, 2023 doesn't address weekday morning traffic, only weekday PM, Friday PM and Sunday PM traffic patterns (see Table 3.6-4)

Given the current inadequacy of SR 903 to handle the current traffic patterns, I cannot fathom how much worse the traffic will be once Sun Communities locates the entrance to the retail center with a proposed grocery store and the entrance to their residential area on SR 903. Placing the entrance on SR903 or Bullfrog was prohibited in the original Master Site Plan. Why isn't the entrance placed in Cle Elum by the Horse Park? The SEIS Addendum proposes a roundabout on 903 at the entrance to 47 Degrees North. How will that help solve the traffic problem on a busy school morning? Oh that's right. The SEIS traffic study didn't look at morning school traffic on 903. They conducted their study in the month of July in the evening.

I do not believe that the SEIS has adequately addressed the reality of the traffic congestion in our growing communities. People traveling to work and children going to school during the weekdays and tourists on the weekends have our roads at capacity. Our little communities are growing faster than the necessary infrastructure to support the developments that have already been planned (Suncadia, City Heights and Ronald PUD) let alone the current congestion.

At the time the SEIS Addendum and 47 Degree North Application was approved as complete by the City, the Les Schwab, Wendy's and Starbucks had already been approved. The traffic coming off I-90 for these businesses will add further congestion to an already congested area. I-90 will be backed up at Cle Elum just as it is at the Highway 18 exit. First Street in Cle Elum cannot handle this traffic congestion. Where is this reflected in the traffic analysis? A stop light is planned. That's it. And lots of roundabouts all over town and at the Freeway. We cannot handle the addition of 667 RV sites and weekend campers. The original Master Site Plan allowed 100 RV sites to be utilized for construction workers building homes in the development. They were to be torn down after 10 years. Why is the City moving away from the planned stick built homes and allowing modular homes and a massive RV park?

Of course, Sun Communities isn't going to mitigate their impact on services in our area. They indicate we can just raise taxes to pay for any shortfalls in services and infrastructure that are directly impacted by the rapid growth that will come with this development. Their own application states:

To reflect the uncertainty relating to predicting the future identified in the two prior paragraphs, it is recommended that a review of the assumptions used in the fiscal analysis be performed at year 5 of development, and appropriate updates to the analysis should be made at that time. If future mitigation should become necessary—consistent with typical municipal budgeting practices -- the city could impose new taxes or fees to balance its budget or seek to change levels of public services to meet available revenues. For instance, the city of Cle Elum does not currently impose all the funding mechanisms that cities rely on to fund services. For example, the city could consider implementing local option taxes (such as a levy lid lift that could be passed by voters) or the creation of business and occupation taxes. The city could also increase tax rates (such as their utility tax rates). Furthermore, future negotiations could consider the measures proposed in the previous pre-annexation agreement.

Why would the city ever consider approving an application when the developer is clearly stating that the city can address the shortfalls with new taxes on its residents or change the level of service offered? Seriously? You want fewer police, ambulances, fire fighters, and overcrowded classrooms? We know these manufactured homes and RV park won't generate the necessary tax base to support the infrastructure needed like the original Master Site Plan would have.

The decisions made by the City of Cle Elum will last for generations and generations to come. Roslyn, Ronald, and unincorporated areas of Upper County are at your mercy. I hope that you aren't the Council and Commission forever known for ruining Upper County by allowing Sun Communities to build this atrocity.

Thank you for allowing me to again address my concerns with the Mayor and Council.

Rhonda Holden

Re: 47 Degrees North Major Amendment proposal

I am writing to inform the city of my very strong opposition to the Sun Communities 47° North proposal for the Bullfrog flats property. The proposed manufactured home / RV community:

- Is in clear violation of the vision for the property adopted by the city and presented to the public as a condition for annexing Bullfrog Flats into the city. It's not in character with the City of Cle Elum and does not comply with fundamental requirements of the city's comprehensive plan, the development agreement, or zoning for the property.
- Instead of traditional neighborhoods that were planned to be connected to and a natural extension of the city, supporting the rest of the city, 47 Degrees North would create a private for-profit community and tourist resort with gates, private roads and utilities which will be separated from the rest of the city. It will create a private city within a city, forever.
- Fiscal studies of 47 Degrees North show that it will not create sufficient tax revenue to cover the city's cost to serve it. Unless the developer agrees to financially cover the substantial deficits, forever, existing city taxpayers will be required to subsidize Sun's development and taxes will go up.
- Sun's 47 Degrees North will be in its entirety a private business not a natural neighborhood (no lots sold, all spots leased), wholly owned by a massive out-of-state publicly traded corporation who's fiduciary duty is to its shareholders, not city taxpayers. Any subsidies of the project would be a gift of public funds to a private entity.
- Is not housing as contemplated for the Bullfrog UGA. It will displace half of the actual housing planned for the area and replace it with a private park designed as a transient playground.
- Will be the largest manufactured home/RV park on the West Coast and will double the population of Cle Elum. Parks of this magnitude have no place in a town as small as Cle Elum. Wrong Place Wrong Size.
- Sun has eliminated the industrial park component of the approved plan and is proposing a major new retail center to the project which would compete with existing city businesses and will seriously damage Cle Elum's downtown, which the city has invested millions of dollars to reinvigorate. The retail center is in direct conflict with the city's comprehensive plan which states that the Bullfrog Flats Master Plan...."is intended to elevate the DTC (downtown core) as the primary retail and activity nexus for Cle Elum". Current rules for the Bullfrog Flats property prohibit a retail center on the property.
- Provides no significant benefits to city or UKC residents, but creates serious and significant impacts on roads, police, fire, schools, emergency services, hospitals and other public services that can't be (or won't be) fully mitigated by the developer, and,
- The Grocery store and retail center, they state they will be bringing in, has no requirements of when or even if it has to be done.
- Most, if not all, of these supposed improvements, added neighborhood structures, housing with trailers, rv park community, retail center, are all against your city laws, that you developed and need to follow.
- All surrounding communities are against 47 degrees, why are you even toying with the thought of allowing them here?? Think about it!!
- County commissioners, fire, police, sheriffs, have all chimed and and are opposed!
- Where do we get the healthcare workers, doctors, clinics, hospitals, fire/ems, added police presense, school teachers, school space for extra kids, daycares, etc... to take care of all these extra bodies that won't be contributing financially to our communities, healthcare system, roads, fire, police, schooling etc??

- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for. Any such increase in taxes will effectively translate to a subsidy for a private business,

- The current residents only have One way out, don't clog up the already impossible traffic situation even more.

- Our full infrastructure in this and the surrounding communities needs to be addressed and repaired/improved before you should even be thinking about bringing that kind of a strain on all of us that live here or have a vested interest in this community.

- Denial of 47 Degrees North will not take away or reduce underlying property rights. It will simply require Sun Communities to comply with city's current rules, regulations and comprehensive plan for the property. The original underlying zoning approval and development agreement already allows development of this site, just not as a private resort/manufactured home community/retail center.

- Rezone as a recreational trail and forest area for everyone to enjoy.

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Respectfully,

Subject: 47 Degrees North Major Amendment Proposal

I have expressed my concerns about the 47 North proposal from the beginning of this project to Lucy Temple. This is the last chance to repeat those concerns as they were not adequately or were vague in the EIS. I will keep it short and hopefully you will take them seriously. They may not be new as they have already been expressed to each of you already. I am not going to use the form letter of which I am sure you have received numerous copies. I am putting most of my own words in this comment letter, to hopefully help with the seriousness of my feelings.

I am strongly opposed to the 47 North Development off Bullfrog Road proposed by Sun Communities. Here are my issues:

- The roads through the county, and specifically the Cle Elum/Roslyn/Ronald valley will require significant modification to accommodate or mitigate the impact driven by the growth of the number and size of vehicles that will be passing through the area. We all are aware of the traffic problems that begin on Thursday evening and continue through Sunday night. The 47 North Development will make it worse by an order of magnitude. The traffic through downtown Cle Elum and Roslyn and SR-903 will be significant. There will obviously need to be revisions made to entrance/exit ramps on I-90. I believe there would be absolute chaos if a fire broke out that requires a level 3 evacuation. I do not see any direct financial commitment by Sun Communities nor the state of Washington to address this issue leaving the burden on the Kittitas County taxpayers.
- With the current population growth already being experienced, the added permanent and "migratory" population of 47 North will put medical, hospital, fire, and police/sheriff resources to what I believe will be a breaking point. I was unable to find any commitment from Sun Communities to address the staffing, facilities, and equipment necessary to support the expected growth. They will become a "business" not member of the community.
- Education services were not adequately addressed. This is difficult to assess as to the mix between permanent (manufactured trailer home residents) and migratory (RV) population increase. This will most likely cause disruptions to the current educational facilities and staffing.
- With today's homeless crisis, one can only wonder what the RV situation will be. With the state and King County providing living assistance funds I would expect that some of the RVs will be moving to 47 North and will be of various condition and "ownership."

- The Sun Communities did not address the need for significant expansion of retail services as New Suncadia has retained ownership of the proposed retail property. A Suncadia developer representative stated in a Suncadia Annual Meeting that he expected only 10% capacity of RV spots during the "off-season". I suspect it will be difficult to find any retailers willing to invest the significant funds necessary in groceries, gasoline, restaurants, and other service facilities due to the migratory nature of the RV population. Current property owners in Suncadia are still awaiting the "Villages" retail shops promised years ago. There should be no expectation that this will change any investment in these types of facilities.
- Last, but not least, is the change to the small-town climate of the Cle Elum valley. Yes, Suncadia, Tumble Creek, Woods & Steel Timberline and Sky Ridge have brought change, but the resident population has blended well into the community (that is my opinion). The 47 North Development will change that feeling. The studies I have read indicate that it will not create sufficient tax revenue to cover the cost to the city to serve, unlike the previously mentioned developments. It might be worth contacting the city government of Granby Colorado to see how the Sun Communities Run RV Resort changed their small-town environment. I think you will find the town has lost its "Jewel of the Rockies" distinction.
- I remained confused as to why the original plan for the Bullfrog flats property has not been implemented. New Suncadia is implementing their exit strategy from Kittitas County. The original approved plan appeared to be a well thought out initiative. It provided low-income housing ("sticks & bricks homes" not upscale mobile homes) where property would be owned not leased and thereby the owners could invest in the community their future. It retained the vibe of the valley without dropping a load on everyone else.

Do not let Sun Communities create an expensive mess that will last for generations. I am sure you are aware their strategy will be to offer a reduction in the number of sites as a compromise which would be a "save face" for the Council and the Mayor. I implore the city to deny the Sun Communities proposed amendment and retain the original development agreement land use plan for the Bullfrog Flats property.

Respectfully,

Any subsidies of the project would be a gift of public funds to a private entity.

- Is not housing as contemplated for the Bullfrog UGA. It will displace half of the actual housing planned for the area and replace it with a private park designed as a transient playground.

- Will be the largest manufactured home/RV park on the West Coast and will double the population of Cle Elum. Parks of this magnitude have no place in a town as small as Cle Elum. Wrong Place, Wrong Size.

- Sun has eliminated the industrial park component of the approved plan and is proposing a major new retail center to the project which would compete with existing city businesses and will seriously damage Cle Elum's downtown, which the city has invested millions of dollars to reinvigorate. The retail center is in direct conflict with the city's comprehensive plan which states that the Bullfrog Flats Master Plan...."is intended to elevate the DTC (downtown core) as the primary retail and activity nexus for Cle Elum". Current rules for the Bullfrog Flats property prohibit a retail center on the property.

- Provides no significant benefits to city or UKC residents, but creates serious and significant impacts on roads, police, fire, schools, emergency services, hospitals and other public services that can't be (or won't be) fully mitigated by the developer.

- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for. Any such increase in taxes will effectively translate to a subsidy for a private business,

- Denial of 47 Degrees North will not take away or reduce underlying property rights. It will simply require Sun Communities to comply with city's current rules, regulations and comprehensive plan for the property. The original underlying zoning approval and development agreement already allows development of this site, just not as a private resort/manufactured home community/retail center.

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Respectfully,

Signature

Dear City Council,

My name is Ripken Sherrill and I am currently a student at Cle Elum-Roslyn High School. I am sending you this letter to speak about the distraught over the 47 North Project. Over the past couple weeks my engineering class has been studying the effects of this project. This project will bring many undesired problems to the town of Cle Elum and Roslyn. The population of Cle Elum and Roslyn will be affected severely by this project. The total population of Cle Elum/Roslyn is about 3,350. After the effects of 47 North, it will increase our population by 73%. The area of the project is 7 times bigger than any trailer park in Washington. The population would rise from the current 3,350 to roughly 5,800 people depending on the time of year. This increase will cause many more impacts in Clecle elum.In my personal opinion this project should not go through with all of the issues that will come with it. I will not be supporting this project, thank you for your time.

Sincerely,

Ripken Sherrill

Re: 47 Degrees North Major Amendment proposal

I am writing to inform the city of my very strong opposition to the Sun Communities 47° North proposal for the Bullfrog flats property. The proposed manufactured home / RV community:

- Is in clear violation of the vision for the property adopted by the city and presented to the public as a condition for annexing Bullfrog Flats into the city. It's not in character with the City of Cle Elum and does not comply with fundamental requirements of the city's comprehensive plan, the development agreement, or zoning for the property.

- Instead of traditional neighborhoods that were planned to be connected to and a natural extension of the city, supporting the rest of the city, 47 Degrees North would create a private for-profit community and tourist resort with gates, private roads and utilities which will be separated from the rest of the city. It will create a private city within a city, forever.

- Fiscal studies of 47 Degrees North show that it will not create sufficient tax revenue to cover the city's cost to serve it. Unless the developer agrees to financially cover the substantial deficits, forever, existing city taxpayers will be required to subsidize Sun's development and taxes will go up.

- Sun's 47 Degrees North will be in its entirety a private business not a natural neighborhood (no lots sold, all spots leased), wholly owned by a massive out-of-state publicly traded corporation whose fiduciary duty is to its shareholders, not city taxpayers. Any subsidies of the project would be a gift of public funds to a private entity.

- Is not housing as contemplated for the Bullfrog UGA. It will displace half of the actual housing planned for the area and replace it with a private park designed as a transient playground.

- Will be the largest manufactured home/RV park on the West Coast and will double the population of Cle Elum. Parks of this magnitude have no place in a town as small as Cle Elum. Wrong Place, Wrong Size.

- Sun has eliminated the industrial park component of the approved plan and is proposing a major new retail center to the project which would compete with existing city businesses and will seriously damage Cle Elum's downtown, which the city has invested millions of dollars to reinvigorate. The retail center is in direct conflict with the city's comprehensive plan which states that the Bullfrog Flats Master Plan…."is intended to elevate the DTC (downtown core) as the primary retail and activity nexus for Cle Elum". Current rules for the Bullfrog Flats property prohibit a retail center on the property.

- Provides no significant benefits to city or UKC residents, but creates serious and significant impacts on roads, police, fire, schools, emergency services, hospitals and other public services that can't be (or won't be) fully mitigated by the developer.

City of Cle Elum
Attention: Planning Department/47 Degrees North
119 West First Street
Cle Elum, WA 98922

Subject: Reject 47 Degrees North as Currently Proposed

Dear Planning Department:

I would like to express my opposition to the Proposed 47 Degrees North project.

Cle Elum's Planning Department's Objective is to "Preserve and Enhance the Community's Character". My comments seek to help Cle Elum meet these wonderful Objectives.

COMMENT NO. 1 Preserve and Enhance – REJECT the proposed 47 Degrees North project. Require all Future Submittals for 47 Degrees North state in **WRITING** how the new proposal meets the Objectives to "Preserve and Enhance Cle Elum's Character". This project is not even close to meeting this Objective, as currently proposed.

COMMENT NO. 2 Community Character Impact of 47 Degrees North – Cle Elum residents are currently having difficulty meeting their needs with the Tourist demands already being placed on Cle Elum's only Grocery Store. Safeway, as the only Grocery Store in Upper Kittitas County, will be completely overwhelmed and unable to accommodate the new population burden which 47 Degrees North will impose on the Cle Elum community. 47 Degrees North will make it impossible for the Multi-Generation coal mining legacy Cle Elum Residents who are already complaining that they CAN NOT afford food with the CURRENT population levels. **You must act to protect Cle Elum Resident's from this irreversible and permanent negative impact.**

COMMENT NO. 3 Community Character Impact of 47 Degrees North – 47 Degrees North will not create sufficient Tax Revenue to cover Cle Elum's "Cost to Serve" 47 Degrees North! This is Crazy and it is Fiscally Irresponsible to move forward with this project as proposed! The City of Cle Elum MUST be guaranteed by your "Conditions for Approval" that NET TAX REVENUE WILL BE ACHIEVED by the 47 DEGREES NORTH project. BANKRUPTCY must never be at risk for the City of Cle Elum because of the proposed 47 Degrees North project.

COMMENT NO. 4 Enhancing Cle Elum's Character - 47 Degrees North should be required to contribute funds, prior to any construction, toward a 2nd Grocery Story in Cle Elum as a "Condition for Approval" to Preserve and Enhance the Cle Elum Community's Character.

COMMENT NO. 5 Preserving and Enhancing Cle Elum's Character – 47 Degrees North must provide a "Net Gain" in Tax Revenue for the City of Elum. This requirement must be a

'Condition for Approval" and confirmed by Financial Submittals and Affadavits attesting to this fact signed by Senior Management of 47 Degrees North.

COMMENT NO. 6 – Community Character - The Cle Elum Planning Department has a HUGE BURDEN associated with Preserving and Enhancing Cle Elum's Character for Future Cle Elum Generations. After the 1st Tree has been cut down by 47 Degrees North, it will never be possible to remedy any unintended mistakes made during the Planning Department decision process.

Therefore, REJECTION of the 47 Degrees North project, as currently proposed, is clearly the best course of action for the Cle Elum Planning Department.

Thank you.

Sincerely,

Robert and Kathryn Elliott

To the City of Cle Elum: Mayor, City Council Members, Planning Department

Re: 47 Degrees North Major Amendment Proposal

I am writing to provide the city with my very strong concerns about the Sun Communities 47°N proposal for the Bullfrog Flats property. The proposed manufactured home/RV community:

- Is not in character with the City of Cle Elum or the upper Kittitas Valley (a fundamental requirement of the current zoning for the property),
- Would create a new and separate private tourist resort instead of the natural extension of city neighborhoods originally envisioned by city zoning and current approvals,
- Is in its entirety a private business not a neighborhood (no lots will be created or sold, all spots will be leased, and the project will be private), wholly owned by a large out-of-state publicly traded corporation whose fiduciary duty is to its shareholders,
- Provides no significant benefits to upper valley residents and tax payers,
- Will create serious and significant impacts on roads, police, fire, schools, emergency services, hospitals, and other public services that can't (or won't) be fully mitigated by the developer, and therefore,
- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for, essentially a subsidy for a private business,
- Denial of the Sun Communities proposal would not take away or reduce underlying property rights. The original underlying zoning approval would still allow development of this site, just not as a private resort/manufactured home community.

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Re: 47 Degrees North Major Amendment proposal

I am writing to inform the city of my very strong opposition to the Sun Communities 47° North proposal for the Bullfrog flats property. The proposed manufactured home / RV community:

- Is in clear violation of the vision for the property adopted by the city and presented to the public as a condition for annexing Bullfrog Flats into the city. It's not in character with the City of Cle Elum and does not comply with fundamental requirements of the city's comprehensive plan, the development agreement, or zoning for the property.

- Instead of traditional neighborhoods that were planned to be connected to and a natural extension of the city, supporting the rest of the city, 47 Degrees North would create a private for-profit community and tourist resort with gates, private roads and utilities which will be separated from the rest of the city. It will create a private city within a city, forever.

- Fiscal studies of 47 Degrees North show that it will not create sufficient tax revenue to cover the city's cost to serve it. Unless the developer agrees to financially cover the substantial deficits, forever, existing city taxpayers will be required to subsidize Sun's development and taxes will go up.

- Sun's 47 Degrees North will be in its entirety a private business not a natural neighborhood (no lots sold, all spots leased), wholly owned by a massive out-of-state publicly traded corporation whose fiduciary duty is to its shareholders, not city taxpayers. Any subsidies of the project would be a gift of public funds to a private entity.

- Is not housing as contemplated for the Bullfrog UGA. It will displace half of the actual housing planned for the area and replace it with a private park designed as a transient playground.

- Will be the largest manufactured home/RV park on the West Coast and will double the population of Cle Elum. Parks of this magnitude have no place in a town as small as Cle Elum. Wrong Place, Wrong Size.

- Sun has eliminated the industrial park component of the approved plan and is proposing a major new retail center to the project which would compete with existing city businesses and will seriously damage Cle Elum's downtown, which the city has invested millions of dollars to reinvigorate. The retail center is in direct conflict with the city's comprehensive plan which states that the Bullfrog Flats Master Plan…."is intended to elevate the DTC (downtown core) as the primary retail and activity nexus for Cle Elum". Current rules for the Bullfrog Flats property prohibit a retail center on the property.

- Provides no significant benefits to city or UKC residents, but creates serious and significant impacts on roads, police, fire, schools, emergency services, hospitals and other public services that can't be (or won't be) fully mitigated by the developer.

- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for. Any such increase in taxes will effectively translate to a subsidy for a private business,

- Denial of 47 Degrees North will not take away or reduce underlying property rights. It will simply require Sun Communities to comply with city's current rules, regulations and comprehensive plan for the property. The original underlying zoning approval and development agreement already allows development of this site, just not as a private resort/manufactured home community/retail center.

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Respectfully,

Signature

RE: 47 Degrees North Major Amendment Proposal

I am writing to inform the city of my extraordinarily strong opposition to the Sun Communities 47° North proposal for the Bullfrog flats property. The proposed manufactured home / RV community will result in negative impacts:

- Traffic gridlock with high volume of transient visitors in large recreational vehicles
- Decreased level of service for emergency medical services
- Decreased level of service for police protection
- Decreased level of service for fire protection
- Increased tax burden on existing property owners to pay for aging infrastructure (water, sewer, power, roads)
- Increased 2nd home ownership within a private resort adversely impacting many throughout the community.
- Adverse impact to downtown core businesses as resort environment will drive dollars to remain at the resort.
- Potential to increase jobs yet does little to offer adequate affordable housing options in relationship to number of workers necessary to support multiple resorts in the area.
- Potential to require additional city resources to manage and address concerns by a high volume of transient visitors.
- High volume of short-term rentals (STRs) tax revenue by law are applied to tourism rather than infrastructure upgrades.
- 90% of profits will be, by law, sent out of our community to Wall Street investors.

For these reasons, I implore the City to DENY this proposed major amendment and retain the current approved land use for the property.

[EXTERNAL EMAIL] DO NOT CLICK links or attachments unless you recognize the sender and know the content is safe.

Hello,

My name is Ryan Weier, I am a homeowner in UKC. My address is 31 Hawkeye Ln Ronald, WA 98940.

I am deeply concerned for our community. 47 Degrees North is extremely dangerous for our community and **must be stopped and rejected.** Sun Communities is a massive business that only cares about dollar figures.

City Council - I URGE YOU to listen to the concerned members of your community. Do not give into the pressures of Sun Communities or let them line your pockets and sway your decision. The lives of thousands of children, adults, and future generations are relying on YOU to make sure our community is preserved and not impacted by a multi-billion dollar monster.

We already have tons of growth in our area from the Cle Elum Heights project + others. Let's wait until those projects are done and our community has adapted to the increased population before considering ANY MORE expansion.

A deeply concerned citizen,
Ryan

Sahily (Sally) Vellon
861 Spragger Way
Cle Elum, WA 98922

To whom it May Concern:

I oppose the 47 degree north development as it has been presented in its current form.

I personally do not see growth as a bad thing. However, it must be methodically planned so the quality of life we enjoy is not diminished. I do not feel that the plan as presented will achieve this for us.

The scope of the development has diverged from its initial proposal of small single family homes or townhomes and apartments. In its place, the plan with manufactured homes that has been presented, will impact our lives negatively in many ways from our first responders, traffic and the line at the grocery store (not just on the weekends). We do not have the infrastructure to support this level of growth.

The current proposal will deplete the resources available to the current residents of Cle Elum as well as the county. Financially it just does not add up for the city or the county to pursue this proposal.

Simply put - the accounting ($) just does not add up! I am not alone wondering why the plan is even being considered and why our mayor is pushing this project so hard.

It doesn't make sense.

Regards,
Sahily Vellon

Re: 47 Degrees North Major Amendment proposal

In addition to this email, I will also be sending a hard copy letter.

I am writing to inform the city of my very strong opposition to the Sun Communities 47° North proposal for the Bullfrog flats property. The proposed manufactured home / RV community:

- Is in clear violation of the vision for the property adopted by the city and presented to the public as a condition for annexing Bullfrog Flats into the city. It's not in character with the City of Ce Elum and does not comply with fundamental requirements of the city's comprehensive plan, the development agreement, or zoning for the property.
- Instead of traditional neighborhoods that were planned to be connected to and a natural extension of the city, supporting the rest of the city, 47 Degrees North would create a private for-profit community and tourist resort with gates, private roads and utilities which will be separated from the rest of the city. It will create a private city within a city, forever.

- Fiscal studies of 47 Degrees North show that it will not create sufficient tax revenue to cover the city's cost to serve it. Unless the developer agrees to financially cover the substantial deficits, forever, existing city taxpayers will be required to subsidize Sun's development and taxes will go up.

- Sun's 47 Degrees North will be in its entirety a private business not a natural neighborhood (no lots sold, all spots leased), wholly owned by a massive out-of-state publicly traded corporation who's fiduciary duty is to its shareholders, not city taxpayers. Any subsidies of the project would be a gift of public funds to a private entity.

- Is not housing as contemplated for the Bullfrog UGA. It will displace half of the actual housing planned for the area and replace it with a private park designed as a transient playground.

- Will be the largest manufactured home/RV park on the West Coast and will double the population of Cle Elum. Parks of this magnitude have no place in a town as small as Cle Elum. Wrong Place Wrong Size.

- Sun has eliminated the industrial park component of the approved plan and is proposing a major new retail center to the project which would compete with existing city businesses and will seriously damage Cle Elum's downtown, which the city has invested millions of dollars to reinvigorate. The retail center is in direct conflict with the city's comprehensive plan which states that the Bullfrog Flats Master Plan...."is intended to elevate the DTC (downtown core) as the primary retail and activity nexus for Cle Elum". Current rules for the Bullfrog Flats property prohibit a retail center on the property.

- Provides no significant benefits to city or UKC residents, but creates serious and significant impacts on roads, police, fire, schools, emergency services, hospitals and other public services that can't be (or won't be) fully mitigated by the developer, and,

- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for. Any such increase in taxes will effectively translate to a subsidy for a private business,

- Denial of 47 Degrees North will not take away or reduce underlying property rights. It will simply require Sun Communities to comply with city's current rules, regulations and comprehensive plan for the property. The original underlying zoning approval and development agreement already allows development of this site, just not as a private resort/manufactured home community/retail center.

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Respectfully,

Sandra D.

To the City of Cle Elum: Mayor, City Council Members, Planning Department

Re: 47 Degrees North Major Amendment Proposal

I am writing to provide the city with my very strong concerns about the Sun Communities 47°N proposal for the Bullfrog Flats property. The proposed manufactured home/RV community:

- Is not in character with the City of Cle Elum or the upper Kittitas Valley (a fundamental requirement of the current zoning for the property),
- Would create a new and separate private tourist resort instead of the natural extension of city neighborhoods originally envisioned by city zoning and current approvals,
- Is in its entirety a private business not a neighborhood (no lots will be created or sold, all spots will be leased, and the project will be private), wholly owned by a large out-of-state publicly traded corporation whose fiduciary duty is to its shareholders,
- Provides no significant benefits to upper valley residents and tax payers,
- Will create serious and significant impacts on roads, police, fire, schools, emergency services, hospitals, and other public services that can't (or won't) be fully mitigated by the developer, and therefore,
- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for, essentially a subsidy for a private business,
- Denial of the Sun Communities proposal would not take away or reduce underlying property rights. The original underlying zoning approval would still allow development of this site, just not as a private resort/manufactured home community.

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Sandy Ferguson

May 10, 2023

To: Mayor Jay McGowen and Council members

Dear Cle Elum City Council,

I am writing this letter in opposition of the proposed development 47 Degrees North. I have been a Roslyn resident for 42 years. During this time, I have seen many changes. Some of these changes have enhanced the community, but this current proposal seems preposterous.

I don't think our community has the resources, and infrastructure to accommodate such a large development. I am grateful that you are open to comments from the community.

Most concerning is the wild fire situation in upper county which has ramped up considerably the last few years. There is one way in and out for residents on the 903 corridor. That alone, could be disastrous, in addition to a school system that is not prepared to take in the influx population.

I wonder if thorough research has been made on the impact on the current population. We have only one major grocery store, that has long lines year round especially in the summer. Traffic is backed up going through town with tourists visiting the local campgrounds and the Farmers' Market from June through September. I have children and grandchildren that live in this community

The small town I moved to in 1982 is busting at the seams, with few places to park in town even on week days.

For the above reasons, I am adamantly opposed to the 47 degrees North project moving forward.

A concerned citizen,

Sara McCoy

June 22, 2023

City of Cle Elum
Attn: Planning Department/47 Degrees Nortj

Honorable Mayor, City Council Members and City Planners,

I am writing to voice my opposition to the request made by Sun Communities to alter the existing approved development agreement for the land commonly referred to as "Bullfrog Flats" so they can proceed with their 47 Degrees North project. My reasons for opposing the development as they've presented it are:

1. Sun Communities is a large, for-profit REIT whose primary objective is to generate value in the form of steadily increasing returns for their shareholders. They are a vertically integrated company which means they own the land, they sell the product that sits on top of it, they finance the purchase of the product that sits on top of it and they collect steadily increasing rents for the land in perpetuity. While there is absolutely nothing wrong with a development company of this nature, the key question we must ask ourselves is "does it belong here?" and "is this type of arrangement right for the current and future residents of the city?"
2. Ownership of the land beneath each manufactured home does not transfer with each home to the new owner. This means that Sun Communities retains ownership of all the land and rents it back to the owner of the structure that sits on it. They have a very clear business strategy of raising rents on the land annually as it steadily delivers increased return to their shareholders. Meanwhile, it creates a less desirable and higher risk asset class for the owner of the home which will mean higher interest rate loans and the financial burden of both a mortgage and a rent payment each month. It will also dramatically affect both market and assessed value of the manufactured home since any current or future owners will not realize any benefit from increased land value. This model would ultimately lead to tax revenue shortfalls since both land value and improvements value are diminished since they are not "connected" like a typical single family home sitting on land that is owned by the homeowner.
3. With regards to the transient RV portion of the proposed development, this will place an increased burden on infrastructure and will further crowd roads during peak travel times causing backups and potential issues for first responders or in the event of wildfire evacuations. It will mean a steady flow of vacationer traffic who will leave their trash and sewage in Cle Elum and then leave without any vested interest in the betterment of our community. It's also worth noting that Seattle is experiencing a devastating homelessness crisis. There are derelict RV's

and encampments throughout the city. Given the Bullfrog Flats close proximity to I-90, it is possible that many of these RVs could find there way here and setup in the RV park, which is not in the best interest of the community and could further strain law enforcement. Please ask yourselves if hundreds of concrete pads catering to a transient population is the highest and best use of this land.

4. In their most recent revision to their application, Sun Communities is proposing a retail center. This would be in direct competition with the current downtown Cle Elum retail core. There is already plenty of retail space available in the downtown core with significant investment currently taking place to improve downtown's appeal and accessibility to draw in more retail traffic. Adding retail into the Sun Communities development would create unnecessary competition and potentially harm existing and new businesses who are currently in downtown Cle Elum. Additionally, while their proposal references a potential grocery store, Sun Communities is not in the grocery store business. Those that are in the grocery store business (Safeway/Albertsons/Kroger/Walmart, etc) have very sophisticated modeling to determine how, where and when they want to enter a market. If there was a compelling business case for a second grocery store in Cle Elum, there would be a second grocery store in Cle Elum. Whatever Sun Communities is stating is pure speculation.

As anybody who has researched this project knows, this land has been approved for development for many years now. Development is perfectly fine provided it is done responsibly and in a way that benefits all parties involved including the developer, the city, the community and the end users or buyers of the product. The proposal that Sun Communities has put forth represents an alteration that heavily favors them and their shareholders at the expense of the city, its residents, the surrounding communities, our infrastructure, and the future owners of homes there. In addition, their timing for buildout is quite aggressive and it will be virtually impossible for services such as fire, police, medical and infrastructure to keep pace.

You as the elected officials have been entrusted by your constituents to represent the collective voice of the citizens that put you there. I hope you take whatever time is necessary to evaluate the feedback you have received relating to this project to ensure the voices of your neighbors are being heard.

I'd encourage you to decline Sun Communities request to alter the plan and request that they stick to the existing approved plan that is already in place. They were aware of that development plan when they purchased the land so it should be no shock to them if they are told to stick to it.

Thanks for your time.

Respectfully,

Scott Connell

- Is not housing as contemplated for the Bullfrog UGA. It will displace half of the actual housing planned for the area and replace it with a private park designed as a transient playground.
- Will be the largest manufactured home/RV park on the West Coast and will double the population of Cle Elum. Parks of this magnitude have no place in a town as small as Cle Elum. Wrong Place Wrong Size.
- Sun has eliminated the industrial park component of the approved plan and is proposing a major new retail center to the project which would compete with existing city businesses and will seriously damage Cle Elum's downtown, which the city has invested millions of dollars to reinvigorate. The retail center is in direct conflict with the city's comprehensive plan which states that the Bullfrog Flats Master Plan...."is intended to elevate the DTC (downtown core) as the primary retail and activity nexus for Cle Elum". Current rules for the Bullfrog Flats property prohibit a retail center on the property.
- Provides no significant benefits to city or UKC residents, but creates serious and significant impacts on roads, police, fire, schools, emergency services, hospitals and other public services that can't be (or won't be) fully mitigated by the developer, and,
- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for. Any such increase in taxes will effectively translate to a subsidy for a private business,
- Denial of 47 Degrees North will not take away or reduce underlying property rights. It will simply require Sun Communities to comply with city's current rules, regulations and comprehensive plan for the property. The original underlying zoning approval and development agreement already allows development of this site, just not as a private resort/manufactured home community/retail center.

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Respectfully,

Scott Person

To: The City of Cle Elum Planning Commission
From: Shane Baker

Please do not allow the building the proposed development of 47 Degrees North. Too many homes equals too many people using roads and resources that aren't enough for the current residents. Try going to Safeway at 9 am on any given Saturday or driving West bound on I90 on a Sunday afternoon!

The City may want/need the money but no amount of money will help you/us keep up with all the traffic and consumer goods it would take to provide for such an influx of residence even if they are part time.

Don't allow this until the infrastructure is ready. That could be a generation away!

Re: 47 Degrees North Major Amendment proposal

I am writing to inform the city of my very strong opposition to the Sun Communities 47° North proposal for the Bullfrog flats property. The proposed manufactured home / RV community:

- Is in clear violation of the vision for the property adopted by the city and presented to the public as a condition for annexing Bullfrog Flats into the city. It's not in character with the City of Cle Elum and does not comply with fundamental requirements of the city's comprehensive plan, the development agreement, or zoning for the property.
- Instead of traditional neighborhoods that were planned to be connected to and a natural extension of the city, supporting the rest of the city, 47 Degrees North would create a private for-profit community and tourist resort with gates, private roads and utilities which will be separated from the rest of the city. It will create a private city within a city, forever.
- Fiscal studies of 47 Degrees North show that it will not create sufficient tax revenue to cover the city's cost to serve it. Unless the developer agrees to financially cover the substantial deficits, forever, existing city taxpayers will be required to subsidize Sun's development and taxes will go up.
- Sun's 47 Degrees North will be in its entirety a private business not a natural neighborhood (no lots sold, all spots leased), wholly owned by a massive out-of-state publicly traded corporation who's fiduciary duty is to its shareholders, not city taxpayers. Any subsidies of the project would be a gift of public funds to a private entity.
- Is not housing as contemplated for the Bullfrog UGA. It will displace half of the actual housing planned for the area and replace it with a private park designed as a transient playground.
- Will be the largest manufactured home/RV park on the West Coast and will double the population of Cle Elum. Parks of this magnitude have no place in a town as small as Cle Elum. Wrong Place Wrong Size.
- Sun has eliminated the industrial park component of the approved plan and is proposing a major new retail center to the project which would compete with existing city businesses and will seriously damage Cle Elum's downtown, which the city has invested millions of dollars to reinvigorate. The retail center is in direct conflict with the city's comprehensive plan which states that the Bullfrog Flats Master Plan...."is intended to elevate the DTC (downtown core) as the primary retail and activity nexus for Cle Elum". Current rules for the Bullfrog Flats property prohibit a retail center on the property.
- Provides no significant benefits to city or UKC residents, but creates serious and significant impacts on roads, police, fire, schools, emergency services, hospitals and other public services that can't be (or won't be) fully mitigated by the developer, and,
- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for. Any such increase in taxes will effectively translate to a subsidy for a private business,
- Denial of 47 Degrees North will not take away or reduce underlying property rights. Hello

I think we need a solution for a long range plan for affordable housing. This proposed development is not a good long range plan for Upper Kittitas Valley. Please accept my opposition letter attached.

Best

To whom it may concerned,

I'm writing to inform the city of my very strong opposition to the Sun Communities 47° North proposal for the Bullfrog flats property. I owned a property in Suncadia.

What is being proposed in the current 47 Degrees North plan is going to permanently scar this beautiful place, cause irreparable harm to our shared lands, swamp the area with a new "instant city" of visitors with their RVs, motorcycles, boats and snow machines and is completely out of step with the character of Cle Elum and the surrounding areas. This is not the legacy you would be proud to leave behind.

These are the key issues in my view:

1. This project will be the largest manufactured home/RV park on the West Coast. Pouring thousands of visitors to our already overcrowded rivers, lakes, camp sites and playgrounds. This proposed project is way too much too fast.

2. This proposed development provides no significant benefits to city or UKC residents, but creates serious and significant impacts on roads, police, fire, schools, emergency services, medical facilities and other public services that can't be (or won't be) fully mitigated by the developer.

3. I-90 in both directions on a Sunday afternoon is currently gridlock.....adding 600+ RVs towing boats, motorcycles, snow machines etc. will make I-90 impassable. If this project happens, we can add Friday afternoon I-90 gridlock to the mix.

4. Wildfires are inevitable - God forbid one rips though our community we will be forced to compete with thousands of people evacuating RVs on one two lane road. Weve seen it before in Paradise California- complete pandemonium and disaster. Not to mention an impassable gridlock for the firefighters.

5. As I'm sure you are aware, Fiscal studies of 47 Degrees North show that it will not create sufficient tax revenue to cover the city's cost to serve it.

For these reasons, and many more, I implore the City to DENY this proposed major amendment and retain the current approved land use for the property.

Best,

Shao-Hui Tseng

Dear Honorable Mayor and Council Members

I am writing this letter to express my feelings about the 47 North Development proposal. When I first heard about the proposal a couple of years ago, I really culd not believe that a company was proposing to build the biggest trailer park in Washington in one of Washington's smallest cities. It did not make sense then and still does not.

I moved here 26 years ago when offered a job in Cle Elum. I bought a house and loved the community so much that I thought I would live here forever. I had come from Redmond, WA which was once a great town and had grown to a nightmare of traffic so much that I did not want to leave my home. When I later took a job in Bellevue, I commuted for 16 years rather than moving back over there. This is my home.

Over the years, there as been growth, some of which I did not support. I have seen quality of life decrease with this growth with more traffic, more crime, and crowds. This growth has been gradual enough that it is still doable. But 47 North proposes that population will double in six years. This will be a nightmare and forever change our way of life.

When faced by a new issue, I try to look at the pros and cons. In the case of 47 North, the only people I see that will benefit are the investors of Sun Company. It is not good for our community or the new residents.

We do not have infrastructure or services to serve the new community. The water and sewer services are inadequate for proposed 47 North. The school was pretty much to maximum occupation in the 90's when I worked there. A new school would have to be built to accommodate. Because the tax proceeds would not be enough to support that, we the homeowners of the community will have to foot the bill and our taxes will increase.

We are all acquainted with the traffic problems presently, especially on weekends. Studies have shown that our present roads are inadequate for the increased population . It is proposed that about half of the population of the trailer park and RV park will be part time people. So weekend traffic will become a nightmare. I

already see streams of cars speeding down my street to get to Westside Rd and on to the freeway on summer weekends I never go to the Lake on weekends anymore because of the crowds and trash. Because many of the residents will be part time, they will not have the ties to the community that are so important to our way of life.

As far as residents of 47 North,, they will own their home with a mortgage but will rent the land from Sun Communities Company. The rent on their lot will increase yearly. If they want to move, they will need to sell their home which them Sun Communities will be able to sell again. The Sun Company will then be the largest land owner in our community . The Sun Company is not a good landlord, there are numerous lawsuits against them for predatory practices. The satisfaction reports for Sun Company are very low. These homes are not affordable homes. It is projected that a yearly income of $100,000 would be required. That is double the medium income in the city.

Sun has done their research and is dangling a carrot of a second grocery store. They have identified a plot of land on 903 for a retail development including a grocery store. They are not proposing they will build it and will sell the land to another developer. So the grocery store may or may not ever be built. If there are citizens who want another grocery store, there are ways they can work for that without getting the largest trailer park in Washington in the deal. In addition, the proposed retail development would pull business away from the downtown which is contrary to the plan for the city

If the city codes for that piece of land are examined, it is clear that the 47 North development proposal is contrary to the codes in type of housing and density of housing.

In conclusion, there are many more reasons that the proposed 47 north development is not good for our community or any future residents. It is a way of making money with no regard for the beauty of our area.

Sincerely

Sharon R Hill

- Instead of traditional neighborhoods that were planned to be connected to and a natural extension of the city, supporting the rest of the city, 47 Degrees North would create a private for-profit community and tourist resort with gates, private roads and utilities which will be separated from the rest of the city. It will create a private city within a city, forever.

- Fiscal studies of 47 Degrees North show that it will not create sufficient tax revenue to cover the city's cost to serve it. Unless the developer agrees to financially cover the substantial deficits, forever, existing city taxpayers will be required to subsidize Sun's development and taxes will go up.

- Sun's 47 Degrees North will be in its entirety a private business not a natural neighborhood (no lots sold, all spots leased), wholly owned by a massive out-of-state publicly traded corporation whose fiduciary duty is to its shareholders, not city taxpayers. Any subsidies of the project would be a gift of public funds to a private entity.

- Is not housing as contemplated for the Bullfrog UGA. It will displace half of the actual housing planned for the area and replace it with a private park designed as a transient playground.

- Will be the largest manufactured home/RV park on the West Coast and will double the population of Cle Elum. Parks of this magnitude have no place in a town as small as Cle Elum. Wrong Place, Wrong Size.

- Sun has eliminated the industrial park component of the approved plan and is proposing a major new retail center to the project which would compete with existing city businesses and will seriously damage Cle Elum's downtown, which the city has invested millions of dollars to reinvigorate. The retail center is in direct conflict with the city's comprehensive plan which states that the Bullfrog Flats Master Plan...."is intended to elevate the DTC (downtown core) as the primary retail and activity nexus for Cle Elum". Current rules for the Bullfrog Flats property prohibit a retail center on the property.

- Provides no significant benefits to city or UKC residents, but creates serious and significant impacts on roads, police, fire, schools, emergency services, hospitals and other public services that can't be (or won't be) fully mitigated by the developer.

- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for. Any such increase in taxes will effectively translate to a subsidy for a private business,

- Denial of 47 Degrees North will not take away or reduce underlying property rights. It will simply require Sun Communities to comply with city's current rules, regulations and comprehensive plan for the property. The original underlying zoning approval and development agreement already allows development of this site, just not as a private resort/manufactured home community/retail center.

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Respectfully,

Sharon Stuart

Re: 47 Degrees North Major Amendment proposal

I am writing to inform the city of my very strong opposition to the Sun Communities 47° North proposal for the Bullfrog Flats property. The proposed manufactured home / RV community:

- Is in clear violation of the vision for the property adopted by the city and presented to the public as a condition for annexing Bullfrog Flats into the city. It's not in character with the City of Cle Elum and does not comply with fundamental requirements of the city's comprehensive plan, the development agreement, or zoning for the property.

- Instead of traditional neighborhoods that were planned to be connected to and a natural extension of the city, supporting the rest of the city, 47 Degrees North would create a private for-profit community and tourist resort with gates, private roads and utilities which will be separated from the rest of the city. It will create a private city within a city, forever.

- Fiscal studies of 47 Degrees North show that it will not create sufficient tax revenue to cover the city's cost to serve it. Unless the developer agrees to financially cover the substantial deficits, forever, existing city taxpayers will be required to subsidize Sun's development and taxes will go up.

- Sun's 47 Degrees North will be in its entirety a private business not a natural neighborhood (no lots sold, all spots leased), wholly owned by a massive out-of-state publicly traded corporation who's fiduciary duty is to its shareholders, not city taxpayers. Any subsidies of the project would be a gift of public funds to a private entity.

Re: 47 Degrees North Major Amendment proposal

Good Afternoon. I am writing to provide the city with my very strong concerns about the Sun Communities 47° North proposal for the Bullfrog flats property.

Cle Elum and the surrounding areas have already turned significantly into a VBRO community. People with no connection to the community come for a few days, party, overwhelm the local infrastructure, and surrounding natural environment. 47° North will greatly exacerbate the problem and will be a further destroy the fabric of the community. Since this has development has been proposed I have not spoken to one resident of the area that supports it.

- It clearly violates the vision for the property adopted by the city and presented to the public as a condition for annexing Bullfrog Flats into the city. It's not in character with the City of Cle Elum and does not comply with fundamental requirements of the city's comprehensive plan, the development agreement, or zoning for the property.

- Instead of traditional neighborhoods that were planned to be connected to and a natural extension of the city, supporting the rest of the city, 47 Degrees North would create a private for-profit community and tourist resort with gates, private roads and utilities which will be separated from the rest of the city. It will create a private city within a city, forever.

- Fiscal studies of 47 Degrees North show that it will not create sufficient tax revenue to cover the city's cost to serve it. Unless the developer agrees to financially cover the substantial deficits, forever, existing city taxpayers will be required to subsidize Sun's development and taxes will go up.
