Please DO NOT approve this development. You will ruin this town! You will have to increase our taxes to pay for it, we do NOT have the ability to absorb doubling the size of Cle Elum in six years. Our schools, police, fire-none can handle it. Every community Sun Communities has expanded to, it has destroyed. Bullfrog Rd will be a parking lot every weekend. If there's a fire, there's no way people can get out safely. Lawsuits against them are numerous. It's NOT affordable housing. It's a Trojan horse that will only make money for the developer. Why you would even consider it is beyond comprehension. Is someone getting paid off???? It sure looks that way. If you vote in favor of destroying your town, I hope you plan on moving. Because you will not be welcome here. Do the right thing and VOTE NO to Sun Communitues.

Hello Cle Elum Planning and City Council,

As a home owner in Upper Kittitas County, I would urge you all to really consider the overall impact that would come to our community with the addition of the proposed Sun Communities plan on Bullfrog Flats.

It is a very aggressive plan that would change the scope of the community in so many ways. Ways that UKC is not ready to handle. The scale of the plan is the problem. The infrastructure of Cle Elum just can't support any of the proposal, and the community would be inundated with so many new problems that have not even been considered.

I urge you to vote no on this overwhelming growth plan. This can't be supported by our community in the way it is being presented and written. I believe a lot more preparation work needs to happen on the front end in order for something of this scale to be accepted in this area.

Please consider all the aspects and take a hard look at our current scenario and ask yourself, could this really work? Is this truly beneficial to the area?

Thank you for your time,

Stacy Sitton
Concerned UKC homeowner

To All Decision Makers Involved in the Bullfrog UGA Master Site Plan,

Growth is inevitable and I do not oppose it. However, reckless growth with negligent planning is clearly something to avoid. Increased population in our area, both in terms of physical structures and the number of permanent residents, can have many benefits. It can simultaneously create a burden on infrastructure and must be carefully managed. In simplistic terms, a new business or a new family in our area increases the burden, but also shares the weight of that burden. However, the model proposed by 47 Degrees North looks to drastically increase population, either tourist or permanent, without contributing to their fair share of the burden.

I could express the details of my concern with the infrastructure burden (roads, schools, police, fire, water, to name only a few). And I could express the details of why homeownership without land ownership is damaging to low-income individuals (though it is being portrayed as positive by 47 Degree North). But I am assuming my elected officials are already aware of the obvious details in these concerns and are carefully considering them.

My objection to this project is this: Taxing all the residents and visitors of this project as one tax parcel is unacceptable.

Should the Bullfrog UGA Master Site Plan be re-submitted in its original form, where residents would own their home and parcel, and be taxed as such, I would not oppose it.

Thank you,

Re: 47 Degrees North Major Amendment proposal

I am writing to inform the city of my very strong opposition to the Sun Communities 47° North proposal for the Bullfrog flats property. The proposed manufactured home / RV community:

- Is in clear violation of the vision for the property adopted by the city and presented to the public as a condition for annexing Bullfrog Flats into the city. It's not in character with the City of Cle Elum and does not comply with fundamental requirements of the city's comprehensive plan, the development agreement, or zoning for the property.

- Instead of traditional neighborhoods that were planned to be connected to and a natural extension of the city, supporting the rest of the city, 47 Degrees North would create a private for-profit community and tourist resort with gates, private roads and utilities which will be separated from the rest of the city. It will create a private city within a city, forever.

- Fiscal studies of 47 Degrees North show that it will not create sufficient tax revenue to cover the city's cost to serve it. Unless the developer agrees to financially cover the substantial deficits, forever, existing city taxpayers will be required to subsidize Sun's development and taxes will go up.

- Sun's 47 Degrees North will be in its entirety a private business not a natural neighborhood (no lots sold, all spots leased), wholly owned by a massive out-of-state publicly traded corporation whose fiduciary duty is to its shareholders, not city taxpayers. Any subsidies of the project would be a gift of public funds to a private entity.

- Is not housing as contemplated for the Bullfrog UGA. It will displace half of the actual housing planned for the area and replace it with a private park designed as a transient playground.

- Will be the largest manufactured home/RV park on the West Coast and will double the population of Cle Elum. Parks of this magnitude have no place in a town as small as Cle Elum. Wrong Place, Wrong Size.

- Sun has eliminated the industrial park component of the approved plan and is proposing a major new retail center to the project which would compete with existing city businesses and will seriously damage Cle Elum's downtown, which the city has invested millions of dollars to reinvigorate. The retail center is in direct conflict with the city's comprehensive plan which states that the Bullfrog Flats Master Plan…."is intended to elevate the DTC (downtown core) as the primary retail and activity nexus for Cle Elum". Current rules for the Bullfrog Flats property prohibit a retail center on the property.

- Provides no significant benefits to city or UKC residents, but creates serious and significant impacts on roads, police, fire, schools, emergency services, hospitals and other public services that can't be (or won't be) fully mitigated by the developer.

- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for. Any such increase in taxes will effectively translate to a subsidy for a private business,

- Denial of 47 Degrees North will not take away or reduce underlying property rights. It will simply require Sun Communities to comply with city's current rules, regulations and comprehensive plan for the property. The original underlying zoning approval and development agreement already allows development of this site, just not as a private resort/manufactured home community/retail center.

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Respectfully,

ADDITIONAL COMMENTS:

I've had a cabin in the Liberty area for over 40 years. In that time, I have seen the traffic over Hwy 97 and I-90 increase greatly. People in the woods recreating has also increased. Many west-siders already come over to the east side for playing and any more addition will just add to the congestion. Parking at trail heads and other recreational sites is already a big problem on weekends and Holidays. Most of us locals don't even attempt to go to these places during those times. Think of the mass problems that will occur when a large RV community moves in; the situation will be untenable!

In addition, when manufactured homes and RV sites are put in, homeless and drug problems will increase! This is not debatable as there is already a large homeless community near the intersection of Hwy 97 and 970 at First Creek. Wildlife and other habitat will also be affected by this large of a project in the area proposed. Water issues could also add to the concerns of the people to an already severe water shortage and well drilling moratorium in some areas.

Taxes will probably go up but I don't count that as my primary concern. It is plainly the addition of a large RV-recreational site that is just not conducive to the area with the current problems already in existence. Cle Elum itself will suffer with the addition of any type of retail outlet as is part of the plan.

This is a bad plan and should definitely be denied!

To: The City of Cle Elum

Re: 47 Degrees North

The Facts
On May 5, 2021, the City of Cle Elum issued Sun Communities a Temporary Use Authorization in connection with building permits relating to five (5) model manufactured homes to be used for public display. The location of the site is 4240 Bullfrog Road, Cle Elum WA.

That Temporary Use Authorization specifically states:

1) This temporary use shall be limited for a period of not to exceed two years from the date of issuance of the first building permit, provided that the authorization may be extended for one additional year, at the City's sole discretion.
2) The Project Sponsor shall apply, receive, and maintain in good standing a City Business License.
3) Prior to the expiration of this use authorization, the model homes, the temporary garage type structure, and all signage shall be removed, and the Project Sponsor shall return the site to its previous condition.

Sun Communities is in direct violation of the Temporary Use Authorization due to the following:

1) It has failed to remove the units or before May 5, 2023, as required; and
2) No business license was applied for, received or maintained

Relief Requested
The City of Cle Elum should require immediate removal of the structures and not elect to extend the non-conforming so-called Temporary Use Authorization.

General Comments
The Cle Elum Municipal Code does not contemplate such a thing as a Temporary Use Authorization. The code does allow for Special Use Permits and Conditional Use Permits, but each of these have specific qualifiers and conditions of approval. The Zoning associated with the location of these model homes is that of General Commercial. That zone contemplates commerce and general uses that serve the community. The trailers are simply staged in an attempt to fool the public into believing that the 47 Degrees North Development has been approved, which it has not.

On the City's website, under the Recent Planning News page, the City has been actively advertising for the model homes for Sun Communities. Statements such as these indicate to the public that the 47 Degrees North development has been approved and is a done deal, which it is not.

Did you know? Sun Communities is currently displaying models of the manufactured homes proposed for the 47 Degrees North project at 4240 Bullfrog Road near the School District Administration Building!

The community has voiced its opposition to the 47 Degrees North development in a loud and clear manner. Following the public comment period, when the tally is over, the City will likely receive close to 1,000 letters of condemnation associated with the project.

I understand that there is a process in play as it relates to the Sun Communities application. However, the City should not be making up new rules favoring the applicant and thumbing its nose at the community in the process.

You have my request and my comments. Please reply to this correspondence identifying what the City's intentions are.

RE: 47 Degrees North Major Amendment Proposal

I am writing to inform the city of my extraordinarily strong opposition to the Sun Communities 47° North proposal for the Bullfrog flats property. The proposed manufactured home / RV community will result in negative impacts:

- Traffic gridlock with high volume of transient visitors in large recreational vehicles
- Decreased level of service for emergency medical services
- Decreased level of service for police protection
- Decreased level of service for fire protection
- Increased tax burden on existing property owners to pay for aging infrastructure (water, sewer, power, roads)
- Increased 2nd home ownership within a private resort adversely impacting many throughout the community.
- Adverse impact to downtown core businesses as resort environment will drive dollars to remain at the resort.
- Potential to increase jobs yet does little to offer adequate affordable housing options in relationship to number of workers necessary to support multiple resorts in the area.
- Potential to require additional city resources to manage and address concerns by a high volume of transient visitors.
- High volume of short-term rentals (STRs) tax revenue by law are applied to tourism rather than infrastructure upgrades.
- 90% of profits will be, by law, sent out of our community to Wall Street investors.

For these reasons, I implore the City to DENY this proposed major amendment and retain the current approved land use for the property.

Dear Sir or Ma'am,

I would like to comment on the 47° North neighborhood. I am strongly opposed to this neighborhood or any other neighborhood that is like this model. I believe it will have very negative adverse effects on our city. We are not prepared for the influx of this many people. Furthermore, this is not the type of neighborhood we want. Please listen to the people who are opposed to this idea.

Thank you,
Susan Black

Hello,

As property owners in Ronald, we oppose 47 Degree North development plans and the Sun corporation. The issues created by rapid growth will significantly change the community in a very negative way. Our infrastructure simply isn't able to accommodate this development. Please vote no.

Thank you,
Susan Campbell

Re: 47 Degrees North Major Amendment proposal

I am writing to inform the city of my very strong opposition to the Sun Communities 47° North proposal for the Bullfrog flats property. The proposed manufactured home / RV community:

Negative Impact of 47° North

- Decreased level of service for EMS
- Decreased level of service for fire protection
- Decrease level of service for police protection
- Increased traffic burden on 2-lane roads
- Increased tax burden to pay for aging infrastructure (water, sewer, power, roads, EMS, schools, police,)
- Doubling the population of Cle Elum within 6 years
- Profits sent out of our community to Wallstreet investors
- Largest private trailer park community west of the Mississippi
- Wildfire risk due to limited ingress & egress: **Paradise Fire 2.0**

For these reasons, and so many others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Respectfully,

Susan Christenson

I am writing to inform the city of my very strong opposition to the Sun Communities 47° North proposal for the Bullfrog flats property. The proposed manufactured home / RV community:

- Is in clear violation of the vision for the property adopted by the city and presented to the public as a condition for annexing Bullfrog Flats into the city. It's not in character with the City of Ce Elum and does not comply with fundamental requirements of the city's comprehensive plan, the development agreement and zoning for the property.

- Instead of traditional neighborhoods that were planned to be connected to and a natural extension of the city, supporting the rest of the city, 47 Degrees North would create a private for-profit community and tourist resort with gates, private roads and utilities which will be separated from the rest of the city. It will create a private city within a city, forever.

- Fiscal studies of 47 Degrees North show that it will not create enough tax revenue to cover the city's cost to serve it. Unless the developer agrees to financially cover the substantial deficits, forever, existing city taxpayers will be required to subsidize Sun's development and taxes will go up.

- Sun's 47 Degrees North will be in its entirety a private business not a natural neighborhood (no lots sold, all spots leased), wholly owned by a massive out-of-state publicly traded corporation who's fiduciary duty is to its shareholders, not city taxpayers. Any subsidies of the project would be a gift of public funds to a private entity.

- Is not housing as contemplated for the Bullfrog UGA. It will displace half of the actual housing planned for the area and replace it with a private park designed as a transient playground.

- Will be the largest manufactured home/RV park on the West Coast and will double the population of Cle Elum. Parks of this magnitude have no place in a town as small as Cle Elum. Wrong Place Wrong Size.

- Sun has proposed a major new retail center in the project which would compete with existing city businesses and will seriously damage Cle Elum's downtown, which the city has invested millions of dollars to reinvigorate. This is totally opposite of the city's comprehensive plan which states that the Bullfrog Flats Master Plan...."is intended to elevate the DTC (downtown core) as the primary retail and activity nexus for Cle Elum". Current rules for the Bullfrog Flats property prohibit a retail center on the property.

- Provides no significant benefits to city or UKC residents, but creates serious and significant impacts on roads, police, fire, schools, emergency services, hospitals and other public services that can't be (or won't be) fully mitigated by the developer, and,

- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for, which will be a subsidy for a private business,

- Denial of 47 Degrees North will not take away or reduce underlying property rights. It will simply require Sun Communities to comply with city's current rules, regulations and comprehensive plan for the property. The original underlying zoning approval and development agreement already allows development of this site, just not as a private resort/manufactured home community/retail center.

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Please DO NOT approve this development. You will ruin this town! You will have to increase our taxes to pay for it, we do NOT have the ability to absorb doubling the size of Cle Elum in six years. Our schools, police, fire-none can handle it. Every community Sun Communities has expanded to, it has destroyed.

Thank you!

Dear Planning Department and Powers that Be at Cle Elum Local Government,

We are strongly against 47 degrees north. As you know, This community is full of grit and determination. People who have worked so hard to be able to afford a home, build a business. Build this community. The roads and infrastructure, businesses, Community... has all been built on the backbones of the full time residents of Cle Elum. I believe 47 degrees north will tear down the values of homes that we all have worked so hard to afford. Instead of full time and invested residents, it would allow short term housing and place more stress on the people here who already work so hard. It will add an unbalanced amount of road traffic, all of which falls on full time residents to fix and maintain. It would add a transient aspect to a town that has already been coined "halfway to everywhere" and I think that narrative needs to change. Cle elum IS the DESTINATION. Cle elum "the journey is the destination". Not a transient "halfway to anywhere" town. We need to not let big business $$ change who we are. There is too much history to protect. Too many incredible people who have paid and poured out their lives for this beautiful city.
I believe 47 degrees north is a horrible idea and we plead with you to stop 47 degrees north.
Proud resident,
Susie Marino

Re: 47 Degrees North Major Amendment proposal

I am writing to inform the city of my very strong opposition to the Sun Communities 47° North proposal for the Bullfrog flats property. The proposed manufactured home / RV community:

- Is in clear violation of the vision for the property adopted by the city and presented to the public as a condition for annexing Bullfrog Flats into the city. It's not in character with the City of Cle Elum and does not comply with fundamental requirements of the city's comprehensive plan, the development agreement, or zoning for the property.

- Instead of traditional neighborhoods that were planned to be connected to and a natural extension of the city, supporting the rest of the city, 47 Degrees North would create a private for-profit community and tourist resort with gates, private roads and utilities which will be separated from the rest of the city. It will create a private city within a city, forever.

- Fiscal studies of 47 Degrees North show that it will not create sufficient tax revenue to cover the city's cost to serve it. Unless the developer agrees to financially cover the substantial deficits, forever, existing city taxpayers will be required to subsidize Sun's development and taxes will go up.

- Sun's 47 Degrees North will be in its entirety a private business not a natural neighborhood (no lots sold, all spots leased), wholly owned by a massive out-of-state publicly traded corporation whose fiduciary duty is to its shareholders, not city taxpayers. Any subsidies of the project would be a gift of public funds to a private entity.

- Is not housing as contemplated for the Bullfrog UGA. It will displace half of the actual housing planned for the area and replace it with a private park designed as a transient playground.

- Will be the largest manufactured home/RV park on the West Coast and will double the population of Cle Elum. Parks of this magnitude have no place in a town as small as Cle Elum. Wrong Place, Wrong Size.

- Sun has eliminated the industrial park component of the approved plan and is proposing a major new retail center to the project which would compete with existing city businesses and will seriously damage Cle Elum's downtown, which the city has invested millions of dollars to reinvigorate. The retail center is in direct conflict with the city's comprehensive plan which states that the Bullfrog Flats Master Plan…."is intended to elevate the DTC (downtown core) as the primary retail and activity nexus for Cle Elum". Current rules for the Bullfrog Flats property prohibit a retail center on the property.

- Provides no significant benefits to city or UKC residents, but creates serious and significant impacts on roads, police, fire, schools, emergency services, hospitals and other public services that can't be (or won't be) fully mitigated by the developer.

- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for. Any such increase in taxes will effectively translate to a subsidy for a private business,

- Denial of 47 Degrees North will not take away or reduce underlying property rights. It will simply require Sun Communities to comply with city's current rules, regulations and comprehensive plan for the property. The original underlying zoning approval and development agreement already allows development of this site, just not as a private resort/manufactured home community/retail center.

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Respectfully,

Suzanne J. Tritt

Unless the developer agrees to financially cover the substantial deficits, forever, existing city taxpayers will be required to subsidize Sun's development and taxes will go up.

- Sun's 47 Degrees North will be in its entirety a private business not a natural neighborhood (no lots sold, all spots leased), wholly owned by a massive out-of-state publicly traded corporation who's fiduciary duty is to its shareholders, not city taxpayers. Any subsidies of the project would be a gift of public funds to a private entity.

- Is not housing as contemplated for the Bullfrog UGA. It will displace half of the actual housing planned for the area and replace it with a private park designed as a transient playground.

- Will be the largest manufactured home/RV park on the West Coast and will double the population of Cle Elum. Parks of this magnitude have no place in a town as small as Cle Elum. Wrong Place Wrong Size.

- Sun has eliminated the industrial park component of the approved plan and is proposing a major new retail center to the project which would compete with existing city businesses and will seriously damage Cle Elum's downtown, which the city has invested millions of dollars to reinvigorate. The retail center is in direct conflict with the city's comprehensive plan which states that the Bullfrog Flats Master Plan…."is intended to elevate the DTC (downtown core) as the primary retail and activity nexus for Cle Elum". Current rules for the Bullfrog Flats property prohibit a retail center on the property.

- Provides no significant benefits to city or UKC residents, but creates serious and significant impacts on roads, police, fire, schools, emergency services, hospitals and other public services that can't be (or won't be) fully mitigated by the developer, and,

- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for. Any such increase in taxes will effectively translate to a subsidy for a private business,

- Denial of 47 Degrees North will not take away or reduce underlying property rights. It will simply require Sun Communities to comply with the city's current rules, regulations and comprehensive plan for the property. The original underlying zoning approval and development agreement already allows development of this site, just not as a private resort/manufactured home community/retail center.

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property. While I support growth, this is not the instant growth that will benefit our community. I am so proud to return to Cle Elum several years ago to live. My grandfather Louis Peretti was born in Cle Elum in 1909 and this city continues to be the special community that it has always been to our family.

Thank you for your consideration,

Re: 47 Degrees North Major Amendment proposal

I am writing to inform the city of my very strong opposition to the Sun Communities 47° North proposal for the Bullfrog flats property. The proposed manufactured home / RV community:

- Is in clear violation of the vision for the property adopted by the city and presented to the public as a condition for annexing Bullfrog Flats into the city. It's not in character with the City of Cle Elum and does not comply with fundamental requirements of the city's comprehensive plan, the development agreement, or zoning for the property.

- Instead of traditional neighborhoods that were planned to be connected to and a natural extension of the city, supporting the rest of the city, 47 Degrees North would create a private for-profit community and tourist resort with gates, private roads and utilities which will be separated from the rest of the city. It will create a private city within a city, forever.

- Fiscal studies of 47 Degrees North show that it will not create sufficient tax revenue to cover the city's cost to serve it. Unless the developer agrees to financially cover the substantial deficits, forever, existing city taxpayers will be required to subsidize Sun's development and taxes will go up.

- Sun's 47 Degrees North will be in its entirety a private business not a natural neighborhood (no lots sold, all spots leased), wholly owned by a massive out-of-state publicly traded corporation who's fiduciary duty is to its shareholders, not city taxpayers. Any subsidies of the project would be a gift of public funds to a private entity.

Dear Mayor McGowan and members of the Planning Department,

We write this letter in opposition of the 47 Degrees North project as a concerned members of the community. This is a special place. We moved to Cle Elum in 2017, attracted by the natural beauty and small town vibe. With children who attended WSMS and CERHS, we became more embedded through school functions, sports, the wonderful restaurants, taverns, and shops, and ultimately deep friendships that developed. We are grateful to be a part of Cle Elum and Roslyn, but never more so than this January. Our son, Micah Narte, passed away on Alpental. The outpouring of support from the community was, quite frankly, overwhelming. It helped us get through some very dark days, and sustains us still. Although his life was tragically cut short, Micah thrived here. As we have often said, Cle Elum helped him become who he was meant to be.

If there is one criticism, it is how overloaded our resources and infrastructure become during summer months, when the town swells from the influx of golfers and people passing through to various camping locations. This proposed development would make this a full time struggle. There is also the issue of the type of development. Manufactured homes are fine, but not at the scale in this proposal. Finally, there are significant questions around the business practices and character of the corporation behind the development. Simply stated, 47 Degrees North represents a threat to our way of life and to what makes Cle Elum the jewel of Central Washington.

Sincerely,
Ted & Tina Rockwell

Subject: 47 Degrees North development proposal

[EXTERNAL EMAIL] DO NOT CLICK links or attachments unless you recognize the sender and know the content is safe.

I am writing in opposition to the current land use request by 47 Degrees North and requesting the denial of it's current proposal. Among other things, I worry about the following.

This current application varies significantly from what we were led to believe when we invested in, and established residence in, Cle Elum. It will adversely impact the experience and services we have come to enjoy. Overall, at the very least, we would feel misled and deceived by the city leaders.

The traffic congestion in this area, already significant, will make egress, in the time of emergency, near impossible if not dangerous. It will also limit the response ability of emergency vehicles to major events such as health crises, accidents or fires.

In addition, I believe this development will adversely affect our tax rate without commensurate increases in benefits.

Please deny this proposal in its current form.

Sincerely, Terrence Truhler

Subject: 47 Degrees North Major Amendment, SEPA and Development Agreement - Traffic Comments

[EXTERNAL EMAIL] DO NOT CLICK links or attachments unless you recognize the sender and know the content is safe.

City of Cle Elum - Mayor, City Council members, Planning Department,

Re: 47 Degrees North Major Amendment, SEPA and Development Agreement

Thank you for the opportunity to provide my comments on the Sun Communities 47 Degrees North Major Amendment, SEPA Addendum/SEIS and Draft Development Agreement. This email contains my comments on traffic only. Future emails will address other aspects of the application.

Comments on the SEIS/Addendum Traffic Analysis

The SEPA Traffic analysis has a number of major flaws which result in significantly understating the amount of congestion on the city and county road system both with and without 47 Degree North. These flaws significantly overestimate the road capacity that's available for 47 Degrees North traffic. SEPA should not be closed until the traffic analysis is corrected.

Specifically:

1. The study doesn't include the full buildout traffic of major developments already approved, vested and in the pipeline (Suncadia, City Heights and Ronald PUD/Hotel). Because Sun assumed such a short buildout period for 47 Degrees North (5 years), the project is essentially trying to "cut the line" by getting its traffic in the road system before other approved major developments are completed. 47 Degrees North is essentially proposing to use up road capacity that is already allocated to others. Full buildout of

approved, but not yet completed, developments cannot be ignored. They have legal vested rights to complete their projects and their traffic is vested as well.

The significance is that if the traffic from approved developments is included we are likely to find that the city and UKC road systems are already beyond their max capacity and there is little or no capacity for full buildout of 47 Degrees North without massive investments in infrastructure that will take many years to complete.

2. The Addendum traffic study ignores peak summer weekends (Friday evening through Sunday evening) for mitigation purposes.

Roughly half of 47 Degrees North is an RV resort, a business that will operate at maximum capacity on summer weekends, and the other half is a manufactured home community assumed to have a high percentage of 2nd homes that will be weekend getaways or short-term weekend rentals, again, operating at maximum capacity on summer weekends. Sun's business plan will clearly be to maximize summer weekend occupancy. Yet the traffic report uses weekday evenings as the basis for mitigation.

This is a flawed assumption for assessing impacts. We who live here know the traffic patterns; our businesses and emergency responders know the patterns. On summer weekends our UKC streets are packed and on weekday evenings the streets are largely empty. Irrespective of any comp plan policy, best practices for traffic studies require that mitigations be applied to the impacts of a project whenever that might be. Sun should be required to mitigate the real impacts of its project.

3. It does not appear that Large RV's and travel trailers (oversize vehicles) are fully accounted for in the traffic analysis. It appears they were counted as if they were trips from a typical passenger car. Standard traffic analysis protocol is that oversize vehicles count as more than one passenger vehicle trip because they occupy more space (and time) on the roadway. Given that Sun's RV resort will introduce a very large number of oversize vehicles, improperly accounting for them significantly understates the real traffic impacts from the project.

4. The traffic analysis didn't study the need for road widening on Bullfrog Rd or SR 903 (i.e. a corridor study). The study only looked at intersections. With the large amount of traffic added by 47 Degrees North onto Bullfrog Rd and SR 903, together with the large amount of traffic already drawn to these roads by the school campus, Suncadia, City Heights access, transfer station etc., it is essential to analyze whether these roadway corridors will be over capacity and will need to be widened or lanes added. This is particularly important because of the proposed 47 Degree North arterial connector and the large proposed retail center which will significantly impact traffic flow on SR 903. The fact that this wasn't studied is a major oversight.

5. The traffic analysis of the I-90 Exit 80 ramps is flawed because it does not reflect the gridlock effects from the freeway during peak summer weekend periods. We who live here know that on peak summer weekends traffic backs up past the weigh station onto Bullfrog Rd. often past the Tumble Creek entrance. And that's before adding the additional background from Suncadia, City Heights and other major projects vested and in the pipeline.

The Addendum traffic analysis assumes that adding roundabouts at the exit ramps will make them free flowing. Even assuming it's possible to add roundabouts, they will not make traffic free flowing. During peak summer periods no mitigation at the ramps can be effective until if/when the freeway itself is fixed. Adding the 47 Degree North traffic will simply make peak backups worse, perhaps extending all the way to the Suncadia Trail main entrance or further.

6. There is no analysis of cut through or bypass traffic when the freeway is in gridlock condition. We who live here know that on peak summer weekends significant bypass traffic occurs on Cle Elum 1st and 2nd Streets, SR 903 and Bullfrog Rd. How will the proposed 47 Degrees North collector arterial (connecting SR 903 to Bullfrog Rd.) function during bypass events and how will this affect queues and backups at exit 80?

7. The studies didn't analyze the impact of major congestion on the ability of our emergency responders and law enforcement to respond to accidents and emergencies, nor the impact of congestion on wildfire evacuation. We who live here know that emergency vehicle access is currently a major issue and it can only be expected to worsen. The fact that this wasn't studied is a major oversight. The city committed to looking at emergency evacuation during scoping.

Regardless of the what, who, how, when and how much of upgrading the road network is eventually assigned, it is the role of SEPA to give City decision makers accurate data so that they can make good decisions. The 47 Degree North traffic analysis doesn't do that. It significantly understates congestion on the city and UKC road network both with and without 47 Degrees North and so it is flawed. No further action should be taken until the Addendum traffic analysis is corrected.

Draft Development Agreement

Until the SEPA traffic analysis is updated to correctly reflect expected congestion and impacts no action should be taken on the development agreement because it will be based on flawed data. However, since the Draft agreement is a part of the application materials, I provide my initial comments on the Exhibit D - 47 North Transportation Impact Mitigation Plan.

When reviewing the agreement, I ask the city to think about recent experiences with the City Heights Development Agreement. Many provisions in Development Agreements may seem simple and benign at first but carry interpretations that have impacts far beyond original intents and understandings. Yet they obligate the city to accept responsibilities, costs and risks regardless of the passage of time. The 47 Degree North Development Agreement carries far more significant risks and potential costs for the city than any previous development agreement.

I also ask the city to think about recent experiences on the 1st Street Downtown Revitalization Project, the difficulties and uncertainties of securing funding, the length of time to completion, the uncertainty of cost estimates and unforeseen circumstances that arise. 1st Street is just one project, albeit a very large (and important) one. The 47 Degrees North agreement as written would obligate the City to build 14 or more intersection projects and potential road corridor widening of uncertain scope and cost with little help from Sun Communities.

This draft Development Agreement is clearly very "developer friendly", and a very unfair deal for the city. In many, if not most, jurisdictions in Washington, 47 Degrees North would be a non-starter, and rejected on its face because it doesn't meet concurrency requirements.

Concurrency is a state law which says if roadways are congested and failing from existing traffic and/or developments already approved and vested, a city can deny new development until enough capacity is added. It is a significant tool small cities can use to manage growth and leverage greater developer participation in road improvements. Under this Development Agreement as written the city would waive its rights under concurrency, taking away that tool.

Even under the current traffic analysis in the Addendum (which understates traffic as we know) much of the city's and UKC's primary road systems will be at failure (gridlock) by 2031 during peak periods, even without 47 Degrees North. When the traffic analysis is updated to include the correct background traffic from Suncadia and City Heights it's likely the entire system will be at failure (gridlock) by 2031. The fact is, there is simply no excess road capacity available for 47 Degrees North in the current system without major improvements. All available capacity has been used up and/or allocated to the other large developments the city and the county have approved.

The road improvements needed to add capacity for 47 Degrees North are massive and system wide. Just looking at intersections in the current traffic study, it shows about 14 intersections in the city and UKC that need to be upgraded. And the traffic report significantly understates what's needed because it only looked at intersections, not at corridors. When corridors are included in the updated traffic analysis it's likely that the total cost to upgrade the road system could easily be well more than $20 million.

With the city facing massive costs for road system expansion, Sun proposes the city allow them to add all of the 47 Degrees North traffic onto the already gridlocked failing road system in exchange for a fee of just $1.0 million and a "loan" of $3.6 million which has to be paid back under uncertain terms (but it definitely has to be paid back). Sun would have no responsibility to make any offsite road improvements anywhere. Simply pay the fee and go. All the responsibility would be passed to the city and the city's taxpayers.

This development agreement as written is a recipe for years of gridlock because most of the road system won't be upgraded for decades because every single intersection and roadway will have to wait on city (or county) funding, band width, priorities and grant availability. The city knows well how grant funding cycles operate, they are lengthy and uncertain and never yield as much as is needed. And as the years go on the cost of road improvements will continue to rise (they always do) but with this agreement Sun's responsibility won't rise. It will be capped at $1.0 million.

My specific comments on the development agreement are:

1. The Recitals (A. thru E.) require the city to accept the results of the flawed traffic analysis. If the DA is signed as written the city will have no future legal recourse to contest the inaccurate traffic studies.

2. The DA should include a "concurrency plan" which restricts the pace of development to actual available capacity in the road system. Mitigation occurs when a project is built, not when a fee is paid. The developer should not be allowed to pay a small fee and add traffic to already failing roads, Development should be tied an actual schedule for building new road capacity, regardless of who is responsible for building it.

Section 3 of the DA contains a clause that appears to exempt 47 Degrees North from WA state concurrency law. This clause should be removed, the DA should contain provisions that specifically tie the pace of development to levels of service and concurrency, not exempt it.

3. The developer's estimates of project costs are very very preliminary and almost certainly understate the true cost of what it will actually take to build projects. None of the road system improvements in the study are on any CIP/TIP list; there are no preliminary design plans, surveys, or engineering cost estimates; there are no studies of utility relocations, soils conditions or ROW acquisition; no studies of number of lanes, lane lengths, impacts on adjacent properties.

The developers' "estimates" are described in their application material as "notional"....in other words, not based on any site-specific real-world data. If the DA is accepted as it's currently written the city will be accepting responsibility for a huge black box of unknown scope, cost or schedule and inevitable cost overruns.

If "fair share payment percentages" are accepted by the city for mitigation, developer fee payments should be tied to the actual final cost of finished projects.

4. There is no provision in the agreement for a traffic monitoring program to correct for errors or inaccurate assumptions in the traffic analysis. A robust monitoring program should be included.

5. As the agreement is currently written, the city would be accepting a fee for improvements to County and WSDOT facilities (Bullfrog Rd and I-90 ramps). Without an Interlocal Agreement the city cannot accept payments or responsibility for improving County and/or WSDOT facilities. But even if the city could, it's not in the city's interest to take responsibility for other jurisdictions. It should be the developer's sole responsibility to negotiate mitigation with the county and WSDOT and any agreements reached with them should be incorporated into this development agreement.

Request

I respectfully request that the city halt this process and require that the traffic studies be redone to correct the serious flaws that have been identified, and that the city review its options under concurrency law and the lengthy time it will take to upgrade the road system to

maintain level of service and that the DA be rewritten or re-negotiated so that the developer accepts an appropriate level of responsibility to include actually constructing improvements, adhering to a concurrency plan and not spinning risk onto the city and taxpayers.

Thanks for the opportunity to make these comments. I will be commenting on other aspects of the 47 Degree North project prior to the conclusion of the public comment period.

Subject: 47 Degrees North Major Amendment, SEPA Addendum/SEIS and Development Agreement - Public Comment

[EXTERNAL EMAIL] DO NOT CLICK links or attachments unless you recognize the sender and know the content is safe.

Thank you for the opportunity to provide comments on the Sun Communities 47 Degrees North (47°N) Major Amendment, SEPA Addendum/SEIS and Draft Development Agreement. This Comment letter discusses the fiscal considerations of the 47°N proposal, specifically the proposed retail center and the importance of sales tax revenue to Sun's project, which is atypical. Note that all of the data I cite below is from the SEIS and/or from the recent SEPA Addendum.

As background, the existing approved Bullfrog Flats plan doesn't include any significant retail component, in fact the existing Development Agreement specifically prohibits significant retail on the Bullfrog Flats property. This is a long standing City Comprehensive Plan policy to protect the existing City Downtown Core and support it as the City's focal point. As a result, most city general fund revenue (almost 70%) projected to come from the current Bullfrog Flats Master Plan is from property taxes. Sales tax revenue (ongoing)[i] is only a small portion of Bullfrog Flats projected tax revenue (about 4%). Net tax revenue (revenue minus expenses) from the Bullfrog Flats plan is projected to be significantly and overwhelmingly positive for the City. The SEIS studies project large revenue surpluses for the city's general fund through at least 2051. This means that the current Bullfrog Flats Master Plan will be a net fiscal positive for the city's unrestricted general fund and will support expansion of a wide range of city services, programs and infrastructure that will benefit the entire city, not just the Bullfrog Flats property.

The Sun 47°N proposal on the other hand, due to its land use structure (Manufactured Homes + RV Resort), generates significantly less property tax revenue than the Bullfrog Flats Plan, and in fact the SEIS and Addendum show its property tax revenue alone won't be enough to cover the city's general fund costs for services to the project (primarily police and fire). In other words from a property tax stand point, not only will 47°N property tax revenues not "grow the pie" and benefit the entire city, it will be a net negative requiring a subsidy from the city's general fund.

To make up the shortfall and make the project work fiscally for the city, 47°N depends heavily on retail sales tax revenue from the proposed new commercial/retail center. The SEPA Addendum projects that retail sales tax revenue (ongoing) primarily from the retail center will be about 35% to 40% of the project's general fund tax revenues after buildout. And the addendum also shows that even with this large assumed retail sales tax component, 47°N still does not generate large net revenue surpluses for the city. After the initial buildout period (which is heavily supported by one time construction tax revenues which are still far less than the Bullfrog Flats plan)

ongoing general fund revenues to the city are only slightly more than break even and actually turn negative after 2030. In short, the SEIS and Addendum documents show that the current Bullfrog Flats Master plan is a big net fiscal winner for the city, while 47°N is at its very best a fiscal breakeven proposition.

This all means that the 47°N fiscal picture is critically dependent on retail sales tax projections from the proposed new Sun commercial/retail center on SR 903. Even small "misses" in retail center tax revenue projections means the city will be in the hole, and large "misses" means the city will face a possible fiscal catastrophe (potential city losses of hundreds of thousands of dollars per year in a worst case scenario).

Sun has proposed the 47°N commercial/retail center to be 25 acres in size with 150,000 sq. ft. of grocery, retail and office uses. To put this in perspective this is very similar, almost identical, in total size and uses to the Entryway commercial center (Safeway, Tribune, Cle Elum Hardware, Warrior's, future Les Schwab, et al) which is also about 25 acres in size, but currently has a bit less than 150,000 sq. ft. of building space). Or another perspective is that the proposed Sun center is actually larger than the City's Downtown Core (22.1 ac.. per the City's comp plan).

We who live here know that even after decades of promotion both the "Safeway" Entryway zone and the Downtown Core still have significant vacant or underutilized space. Sales demand is just not sufficient (yet) to support all of the retail and commercial space currently available. Yet even with this vacant space the SEPA addendum assumes the new Sun 47°N retail center will be 100% occupied and generating maximum sales tax revenue within a roughly 6 year period (2025 - 2031). This is a fiscal assumption for 47°N that is clearly suspect and given the fiscal importance to the city of getting the 47°N fiscal picture right it needs to be critically examined in detail.

The addendum fiscal analysis shows that the new Sun center needs to capture roughly **$36M** in new retail demand per year in order to meet its sales tax revenue projections. And the addendum also shows that the manufactured home/RV component of the project will only generate roughly $2M in new demand per year at buildout. This means that the Sun center needs to capture an additional roughly **$34M in totally new** retail demand and that this new demand has to come from sources outside the city of Cle Elum. If not, retail sales will not be "new" revenue, it will instead move revenue from one part of the city to another, not growing the city's revenue pie as the projections require. The Addendum does not address where all of this $34M in new demand will come from, it simply assumes that it will be there when needed. But if this new demand does not materialize, which is likely, then the city's general fund will be in a big hole because it will cost the city more to serve 47°N than it will get back in tax revenue.

Another related and important unstudied impact of the Sun center is impacts on the City's downtown core. It is a virtual certainty that a new retail center the size and scope of Sun's proposal, requiring $34M in new demand, will have a significant impact on Cle Elum's downtown. We just don't know how much because the addendum didn't address it. At a minimum it can be reasonably anticipated that a significant amount of summer retail traffic from up valley will find it more convenient to stop at the new center and not continue downtown. Shoppers and visitors from Suncadia, Roslyn, Ronald and upper valley will need to drive right past the new Sun center on SR 903 to get to Cle Elum downtown. It's logical to assume that many will just use the more convenient new Sun Center and

not continue downtown, especially during heavy traffic periods. This is a significant real, but not yet quantified, impact on the city's downtown. Avoiding this potential impact is the very reason that the current Bullfrog Flats approval prohibits significant retail.

The City has spent millions of dollars and many years (and will spend many more millions) promoting its downtown (and the 1st Street project) and successfully attracting new businesses and restaurants to make the downtown experience more vibrant. The City has made this huge investment of time, money and effort and they need to know what impact the new Sun center will have on their investment and on legacy businesses. This impact has not been studied and that is a flaw in the Addendum making it inadequate.

To address concerns on fiscal shortfalls Sun has proposed a complicated and extremely staff intensive fiscal monitoring and reimbursement program (Conditions of Approval 80, 81 and 82). But let's be realistic, no developer, let alone a massive publicly traded corporation with unlimited legal resources and shareholder revenues to support, will willingly write the city checks of $300,000 per year or more to make up general fund shortfalls into perpetuity. It is a certainty that Sun's legal and administrative staff will argue every provision, contest every invoice, tie up staff time, and if necessary mobilize its significant legal resources, to change the agreement. A fiscal guarantee program is a reasonable city safety net for a project that is anticipated to be a clear net winner with a remote possibility of shortfalls (like the current Bullfrog Flats Master Plan), but it is an unwieldy and impossible to administer program for a project that is likely to be a consistent net fiscal loser from the beginning.

At least from a fiscal perspective the SEPA data shows that 47°N will be a net fiscal loser, a big long term problem for the city, with the only winner being Sun Communities. I urge the city to reject 47°N, and retain the existing Bullfrog Flats Master Plan approval. Thank you for the opportunity to make these comments.

[i] Two categories of sales tax 1. Construction sales tax or one time sales tax accrues only one time during initial construction of the project and is not recurring and 2. Ongoing sales tax is from the operation of the project and recurs yearly in perpetuity

Re: 47 Degrees North Major Amendment, SEPA Addendum/SEIS and Development Agreement

Thank you for the opportunity to provide comments on the Sun Communities (Sun) 47 Degrees North (47°N) Major Amendment, SEPA Addendum/SEIS and Draft Development Agreement. This comment letter discusses the major inconsistencies between Sun's 47°N proposal and the current approved plan for the Bullfrog Flats property, Development Agreement (DA), PMU zoning and comp plan policies; and the significant discretionary policy changes that will be needed if the city were to approve Sun's request.

Background

The proposed plan for 47°N could quite literally not be more opposite from the current approved Bullfrog Flats plan and the city's current planning vision for the property. The major policy differences are listed in detail below. It's crystal clear the Sun vision for the Bullfrog Flats property is not really an "amendment." It's a completely different plan, a completely different vision of how the Bullfrog Flats property should be developed.

Sun opines that 47°N fits within the provisions of the city's Comprehensive Plan, zoning policies and existing DA. This is just not true as a clear reading of the provisions shows. In essence, what Sun is really requesting are major changes to the city's Comprehensive Plan, zoning policies and a complete rewrite of the existing DA. This is significant because it means that the action before the city is a discretionary choice between two opposing planning visions for the Bullfrog Flats property and how the city meets its GMA obligations. The city has the discretion to choose between the competing visions. It does not have an obligation to choose Sun's vision.

A primary argument that Sun makes is that because 47°N is of similar size and has similar impacts as the current Bullfrog Flats Master Plan it must be approved as a substitute, and it can't reasonably be denied. But that is not true. Major policy reversals, like the ones at issue for 47°N are discretionary. The city can choose its future.

Even if it were assumed for sake of argument that specific technical impacts from 47°N were shown to be identical to, or even less than, impacts from the current approved Bullfrog Flats plan, the city is still not obligated to approve 47°N if the city does not agree with the proposed changes in vision and growth policies. An argument that a massive RV resort has traffic, sewage flow or water use similar to a residential development does not mean the city is obligated to approve the RV resort if the comp plan/DA designates housing. Or approve a huge new retail center if the comp plan/DA calls for a business park. Or a manufactured home park if the comp plan/DA calls for fee simple residential neighborhoods. Those changes are policy changes and the city has the discretionary right to choose its future.

The current Bullfrog Flats master plan, policies and DA were adopted with widespread public input and support as the blueprint for future city expansion. The existing plan still has widespread support, while 47°N has literally no public support. The Bullfrog Flats land use approval was written into the city's comprehensive plan and other long range planning documents, and perhaps more importantly, it was written into a legal contract between the city and the property owner (the DA).

In other words, the city was so seriously committed to having the property developed in accordance with the current approved plan and vision that the city required it to be guaranteed, not just by zoning and land use code, but by contract. Trendwest, the original property owner, agreed and executed that contract. Every subsequent owner of the Bullfrog Flats property to this day has ratified and executed it as well. This includes the current owner, Sun. Sun accepted those contract terms. Now Sun seeks to amend the contract to allow a completely different land use plan and vision. That's fine. Any party to a contract can request contract amendments, but that does not obligate the other party to agree. Approval is discretionary. The city gets to choose.

Major Policy Differences

Here are the major discretionary policy and DA changes the city will need to consider, and agree with, if the 47°N proposal is to be approved:

Housing

- The Bullfrog Flats Master Plan provides for 1,334 housing units. 47°N proposes 707 housing units. This is an almost 50% reduction in housing supply planned for the property. The Bullfrog Flats property is the largest undeveloped UGA left in city limits and it was planned to accommodate future city population growth under GMA for decades into the future. A housing supply reduction of the magnitude proposed by 47°N will require the city to make up for this loss of housing capacity to accommodate future population growth in some other way: by increased density in other parts of the city, redevelopment, further UGA expansion (if possible), or other means. This is a major policy decision that will affect other parts of the city.

- Related to this first point: The Bullfrog Flats housing supply was anticipated to accommodate 20 to 30 years of normal city growth, while Sun projects that the 47°N housing supply will be gone in five years, presumably because of new and different types

of buyers that Sun will attract for its housing. If 47°N is approved how will the city then accommodate its expected long term city growth,10, 15, 20 years from now? Growth won't stop when Sun's project is completed.

- The Bullfrog Flats approval primarily reserved its property for housing (as noted above) to assure a 20 to 30 year housing supply. During the original planning deliberations that brought the property into the UGA, land uses other than housing on the site were considered, and rejected by the city. This included an analysis of an RV Park on the site. This use was specifically rejected and prohibited by the DA. Now Sun proposes to revisit that decision, reverse it, and use up almost half of the valuable Bullfrog UGA for a private RV Resort. This reversal is discretionary. It is a major land use policy decision that the city must consider.

- The Bullfrog Flats approval envisions and encourages neighborhoods with a wide range of housing and ownership choices to appeal to a wide range of incomes and ages. Specifically enumerated are single family small lot detached, multi-family (apartments and condos), ADU housing, cluster housing, townhomes, cottages, apartments, mixed use residential and studios. Written into the approvals was a specific desire to promote fee simple ownership.

The 47°N proposal basically provides only two housing types, single family detached and multi-family, and they are not integrated together into a mixed use community, they are located in separate neighborhoods. None, not a single one, of the 47°N housing choices will include fee simple ownership. Sun will be the project's landlord in perpetuity. In many ways it will really function as one large apartment complex. It's hard to imagine a more diametrically opposed concept to the current city vision for the property. This is a major policy change the city must carefully consider.

Public vs. Private

- The Bullfrog Flats approval specifies public ownership of roads, utilities and recreational opportunities/amenities. It specifically envisions public access and recreation opportunities for the wider community and all city residents. This was a major reason for approving the plan. The 47°N proposal flips this vision, it is entirely a private community with restricted access for the general public. Some public recreation opportunities will remain but the largest most significant recreation amenities in the project (the RV resort, Clubhouse and pocket parks) will be entirely private and unavailable to all city residents. This is a major policy change the city must consider.

- The Bullfrog Flats approval (and CMC Title 16) requires primarily publically owned infrastructure (roads, water, sewer) in accordance with the standard city development policies. The 47°N proposal is the opposite; all roads and utilities will be private. No resident of 47°N would have an account with, or pay utility bills, to the city. Rather, Sun proposes to operate 47°N as a private, for profit utility, charging individual residents at its own discretion. The city's role would be bulk water supply and sewage treatment under a single master contract with Sun. None of the private roads are proposed to be built to city standards. It is not reported what standards Sun proposes for water and sewer systems.

This new utility would become the city's largest single customer (by far), yet neither the application nor the SEIS explores the ramifications of this change either fiscally or regulatorily. Will the city be required to be the guarantor of the new utility if Sun, or a successor, can't perform at some point in the future? Typically state regulators require some guarantee of this type. What other risks or liabilities may the city be inadvertently taking on? Allowing, essentially sponsoring, the formation of a new private utility within the city's UGA/service area roughly the same size as the city's existing utility is a major policy change the city must carefully consider.

Retail/Commercial

- The city's existing policies and the existing DA specifically prohibit retail uses on the Bullfrog Flats site (except for a small amount of convenience retail/deli to serve the business park). No retail component was approved in the Bullfrog Flats master plan. This prohibition was included specifically to implement city comprehensive plan policies designating and supporting downtown Cle Elum as the city's retail and commercial focal point.

47°N proposes the opposite. They propose a new 25 acre retail/commercial center with 150,000 sq. ft. of space, about as large as the city's downtown core and with similar proposed uses. The new Sun retail center would clearly compete for business with the downtown core, a clear conflict with the city's comprehensive plan and policies. This is a major policy change the city must carefully consider.

Employment/Business Park

- The Bullfrog Flats master plan included a 75 acre Business/Light Industrial Park for the express purpose of growing good paying living wage jobs in Cle Elum. Employment and job creation was/is a critical element of the Bullfrog Flats master plan. Various provisions of the Bullfrog Flats plan/DA require the developer to promote job creation and incentivize using local trades for housing construction. The SEIS estimates that the Bullfrog Flats plan would create almost 4,000 jobs for Cle Elum (2,000 construction jobs thru buildout (30 years) and 1,900 permanent jobs).

Relative to jobs and employment, 47°N is effectively the opposite. The Sun proposal would eliminate the Business/Light Industrial Park. And a side effect of reducing the amount of housing on the site by almost half and replacing stick built housing with manufactured homes from out of region is to severely reduce jobs for local trades. The SEIS estimates that 47°N would reduce the number of jobs created on the Bullfrog Flats property by almost 75%, only 1,000 jobs would be created (600 construction jobs thru buildout (5 years) and 400 permanent jobs). The permanent jobs created would be primarily lower paying retail, maintenance and caretaker jobs. The SEIS estimates that the large new RV Resort would only generate 30 to 35 new full time jobs. This stark change of vision on employment policy is a major change the city must carefully consider.

To summarize, the Sun application attempts to downplay the magnitude of the change of direction and policy that the city must accept to approve 47°N. They use artful choices of words to try to show that the proposal is a simple amendment that can be accommodated easily by the existing Bullfrog Flats approvals with little change. Nothing could be farther from the truth. No two proposals could be farther apart in their goals and aspirations. Literally opposite ends of the spectrum.

To approve the 47°N proposal, the city will need to reverse major long standing land use policies and visions for long term growth. Of course the city has every right to review these policies, but it also has the discretionary right to reject major policy changes without threat or fear of legal retaliation. I urge the city to reject these major policy changes, reject 47°N, and retain existing land use policies for the city and Bullfrog Flats. These policies still make sense for the long term growth of Cle Elum and UKC. The city can choose its future.

Thank you for the opportunity to make these comments. I may be commenting on other aspects of the 47°N project prior to the conclusion of the public comment period.

Subject: 47 Degrees North Major Amendment Proposal

[EXTERNAL EMAIL] DO NOT CLICK links or attachments unless you recognize the sender and know the content is safe.

To Cle Elum Mayor Jay McGowan and Council Members -

I am writing to inform the city of my very strong opposition to the Sun Communities 47° North proposal for the Bullfrog flats property.
The proposed manufactured home / RV community will result in negative impacts due to:

- Traffic gridlock with high volume of transient visitors in large recreational vehicles. I am a resident of Ronald, WA. When we had the Jolly Mountain Fire, we were told to leave our home at Midnight due to the potential fire jumping Highway 903. Since there is one road in and out of our home, and the impact of 47 Degrees North on Bullfrog from this will absolutely cause grid lock our roads for getting out of area in an emergency situation. This is unacceptable.

- 47 Degrees North will decreased the level of service for medical services. Since we currently only have 1 Medical Doctor and a few Physician Assistants, currently it is a long wait to get a medical appointments for residents. The current Urgent Care will be greatly impacted. Until Upper County figures out there Medical Services, adding the impact of 47 Degrees North, Bullfrog is unacceptable.

- With added impact of 47 Degrees North, this will decreased the level of service for police and fire protection This is unacceptable.

- Grocery Shopping ~ As a full time resident of Upper County, (Ronald), grocery shopping is a joke at the Safeway store in Cle Elum. With our current amount of tourism, which already overwhelms Safeway, I have to be sure to try to get my groceries prior to any week-end in the Summer/Winter. If you go to the store on a Sunday or Monday, the shelves are empty. If you go on a Thursday or Friday, the store is packed with week-

end campers/short term rentals, I have yet been able to figure out what a good day is to shop at Safeway in Cle Elum. It is the first time in my life when I make a grocery list, go to Safeway, and the shelves are so empty, I cannot complete my shopping. I have to be very particular if I am going to a party and offer to bring something, and the store is out of what I need. For example, I offered to bring a fruit tray one day to a party, went to Safeway, out of most fruits and what was left was in very sad condition. Why do I need to drive 1.5 hours round trip to Ellensburg to shop for groceries, when I should be able to drive to Safeway in Cle Elum and support local?

I don't believe the City of Cle Elum, has really thought this whole process out, and the impact it has on it's full time residents in Cle Elum and the surrounding areas.

For these reasons, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Respectfully,

Re: 47 Degrees North Major Amendment proposal

I am writing to inform the city of my very strong opposition to the Sun Communities 47° North proposal for the Bullfrog flats property. The proposed manufactured home / RV community:

- Is in clear violation of the vision for the property adopted by the city and presented to the public as a condition for annexing Bullfrog Flats into the city. It's not in character with the City of Cle Elum and does not comply with fundamental requirements of the city's comprehensive plan, the development agreement, or zoning for the property.

- Instead of traditional neighborhoods that were planned to be connected to and a natural extension of the city, supporting the rest of the city, 47 Degrees North would create a private for-profit community and tourist resort with gates, private roads and utilities which will be separated from the rest of the city. It will create a private city within a city. forever.

- Fiscal studies of 47 Degrees North show that it will not create sufficient tax revenue to cover the city's cost to serve it. Unless the developer agrees to financially cover the substantial deficits. forever, existing city taxpayers will be required to subsidize Sun's development and taxes will go up.

- Sun's 47 Degrees North will be in its entirety a private business not a natural neighborhood (no lots sold, all spots leased), wholly owned by a massive out-of-state publicly traded corporation whose fiduciary duty is to its shareholders, not city taxpayers. Any subsidies of the project would be a gift of public funds to a private entity.

- Is not housing as contemplated for the Bullfrog UGA. It will displace half of the actual housing planned for the area and replace it with a private park designed as a transient playground.

- Will be the largest manufactured home/RV park on the West Coast and will double the population of Cle Elum. Parks of this magnitude have no place in a town as small as Cle Elum. Wrong Place, Wrong Size.

- Sun has eliminated the industrial park component of the approved plan and is proposing a major new retail center to the project which would compete with existing city businesses and will seriously damage Cle Elum's downtown, which the city has invested millions of dollars to reinvigorate. The retail center is in direct conflict with the city's comprehensive plan which states that the Bullfrog Flats Master Plan...."is intended to elevate the DTC (downtown core) as the primary retail and activity nexus for Cle Elum". Current rules for the Bullfrog Flats property prohibit a retail center on the property.

- Provides no significant benefits to city or UKC residents, but creates serious and significant impacts on roads, police, fire, schools, emergency services, hospitals and other public services that can't be (or won't be) fully mitigated by the developer.

- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for. Any such increase in taxes will effectively translate to a subsidy for a private business.

- Denial of 47 Degrees North will not take away or reduce underlying property rights. It will simply require Sun Communities to comply with city's current rules, regulations and comprehensive plan for the property. The original underlying zoning approval and development agreement already allows development of this site, just not as a private resort/manufactured home community/retail center.

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Respectfully,

T W Willette

City of Cle Elum - Planning Department, Mayor, and City Council members

A quick internet search will reflect mayoral responsibilities as, "The mayor is the chief executive officer of the city. In this role, the mayor is responsible for the general welfare of its citizens and the city." Of course, the roles and responsibilities of a mayor are a bit more complex that this single statement however the premise of the overall general welfare for its citizens and the city remains true.

I am writing to each of you today to implore you to take into consideration the general welfare of the citizens, the city of Cle Elum, surrounding communities and future area residents when reviewing the application received from Sun Communities for the 47° North Development. I am confident the City of Cle Elum will receive many letters expressing concerns and not in support of the 47° North proposed application from Sun Communities. Many concerned citizens of this county and myself, have been working endlessly to raise awareness to the impact of this proposed development and as of June 20 City Hall has received over 1,000 letters opposing this obnoxious community killing development proposal. I can tell you aside from one man assuring me that Cle Elum would get a new grocery store and a man living in Alaska with Cle Elum ties, *not a single person I have encountered is in support of this proposed REIT development*. Very concerned citizens, myself included, have talked to literally hundreds of people about this proposed development. These people have sought us out at various community events, making a bee line to a table where they are able to sign a letter in opposition to this community killing development. I commend every individual that takes time out of their day to submit a unique response and those that may utilize a template that aligns with their objection to this specific proposed development.

Concerned citizen volunteers have sacrificed hours of their personal time to set up at various venues and local establishments and have received:

- 133 signatures at Easton Memorial Day Parade
- 104 signatures at Roads of Wonder Community Garage Sale
- 100+ signatures at local coffee shop from locals and those that frequently travel to or through Cle Elum
- 100+ signatures from Cle Elum and Roslyn Eagles guests and members
- 170+ signatures at Roslyn Market
- 100+ signatures from sidewalk surfing and patrons and employees of businesses in Roslyn

A little background about REITs – Real Estate Investment Trusts

REITs were created when President Eisenhower signs into law the REIT Act title contained in the Cigar Excise Tax Extension of 1960. REITs were created by Congress in order to give all investors the opportunity to invest in large-scale, diversified portfolios of income-producing real estate. REITs are required by law to distribute at least 90% of their taxable income to shareholders annually in the form of dividends. REITs reliable income is derived from rents paid to the owners of the property whose tenants often sign leases for long periods of time, or from interest payments from the financing of these properties.

REITs operate along a straightforward and easily understandable business model: *By increasing property occupancy rates and rents over time, higher levels of income may be produced. The* 47° North *development proposal Sun Communities business model will attract transient visitors through short term manufactured home rentals and rv parking/hookups and will also include some home ownership on leased land. Sun has not clear on the distribution of manufactured housing for long term versus short term rentals.*

Another brief internet search will reflect Sun Communities major shareholders are:

Vanguard, Cohen and Steers Capital Management, SSgA Funds Management, Principal Global Investors LLC, JPMorgan Investment Management, BlackRock Fund Advisors, Centerbridge Partners LP, Capital Research and Management Co, CenterSquare Investment Management LLC and Principal Real Estate Investors LLC holding 45%+ of Sun Communities Inc. shares. These funds, investments and others will be chasing profits, with stars in their eyes, off the backs of residents and taxpayers of Kittitas County the very moment should construction ever begin.

I ask you this honorable mayor, city council and planning committee can you answer how any of the investment and funds above care about the general welfare of the City of Cle Elum and that of our surrounding communities? I understand growth in our community is inevitable, but it is your responsibility to take into consideration the general welfare of the city and its residents. Allowing a development of the scale and magnitude of 47° North, with the sole premise of filling the pocketbooks of shareholders is not what I would consider taking the general welfare of the city of Cle Elum and its neighbors into consideration. If approved, the 47° N resort will be on many Sun Communities Inc. charts and reports for years to come striving for those double-digit returns.

Anyone, other than the shareholder, taking just a small block of time can easily learn how REITs operate. Landlords can be rapacious creatures, but this new breed of private-equity landlord has proved itself to be particularly so, many experts say. That is partly because of the imperative for growth: Private-equity firms chase double-digit returns within 10 years. To get that, they need credit: The more borrowed, the higher the returns.

"What is really dangerous to tenants and communities is the full integration of housing within financial markets," says Maya Abood, who wrote her graduate thesis at the Massachusetts Institute of Technology on the single-family-rental industry. "Because of the way our financial markets are structured, stockholders expect ever-increasing returns. All of this creates so much pressure on the companies that even if they wanted to do the right thing, which there's no evidence that they do, all of the entanglements lead to an incentive of not investing in maintenance, transferring all the costs onto tenants, constantly raising rents. Even little, tiny nickel-and-diming, if it's done across your entire portfolio, like little fees here and there — you can model those, you can predict those. And then that can be a huge revenue source." I have included the MIT Study - SECURITIZING SUBURBIA: THE FINANCIALIZATION OF SINGLE-FAMILY RENTAL HOUSING AND THE NEED TO REDEFINE "RISK" and respectfully ask that this document be printed in its entirety be included with my public comment. While this study may not completely represent Sun Communities Inc business model; much of the information is truly relevant to a community that has experienced significant growth in recent years with no expectation that this trend will change in the immediate future. The mere fact that Sun Communities will be renting the land throughout their ownership duration, it is important to understand any similarities, impact to housing availability, housing affordability and impact to those living within the Sun community and beyond.

"Neighborhoods that were formerly ownership neighborhoods that were one of the few ways that working-class families and communities of color could build wealth and gain stability are being slowly, or not so slowly, turned into renter communities, and not renter communities owned by mom-and-pop landlords but by some of the biggest private-equity firms in the world," says Peter Kuhns, the former Los Angeles director of the activist group Alliance of Californians for Community Empowerment.

Honorable mayor and city council, this proposed development is complex business model that will place unnecessary financial tax burden on residents in Cle Elum and surrounding communities within Upper Kittitas County.

In addition to my concern for lack of land ownership, the remaining part of Sun Communities proposed development will be strictly geared to a tourism economy. Tourism economies bring their own negative impact to communities: over usage of water, environmental pollution, large carbon footprint contributing to climate change, and displacement of locals resulting in degradation of the local economy, culture, and community.

Back to the general welfare of the city...

Taking into consideration the REIT practices, REIT benefactors and the extremely outdated infrastructure to the City of Cle Elum, surrounding communities, the Upper Kittitas County area the Sun Communities proposed development will provide absolutely no significant benefits to city or UKC residents, but creates serious and significant impacts on roads, police, fire, schools, emergency services, hospitals and other public services that can't be (or won't be) fully mitigated by the Sun Communities.

- How will this specific development coupled with aged and failing infrastructure enhance Cle Elum and the surrounding area? Local taxpayers and citizens will be nickeled and dimed no differently than those consuming the Sun Communities Inc products. Rest assured each item Sun Communities will market and sell is no different than a product sitting on a shelf.
- Is the city prepared to step up to support the victims of the predatory REIT system? Attorneys and nonprofits will be needed to support many, and often those with limited income, to seek resolution which often may involve not losing their home. Sun Communities has deep pockets and their duty, by law, is to assure their shareholders are compensated.
- Does our community need another resort paired with limited, restrictive, and ever-increasing incremental fee-based housing?
- What will happen, over time, when upkeep and maintenance expenses surpass profits and Sun Communities dumps the property? A beautiful piece of land will be raped of natural resources, littered with concrete slabs holding structures with a limited 'shelf life' and would incur an outlandish expense to remove or tear down structures.

Honorable mayor and city council, I beseech each of you to reflect on the concerns of every citizen submitting commentary and do the needful to preserve responsible growth and development of this unique area we all so deeply love.

I implore the City Council to **DENY** this proposed major amendment and retain the current approved land use for the property.

Respectfully,

Tiffany D Christman

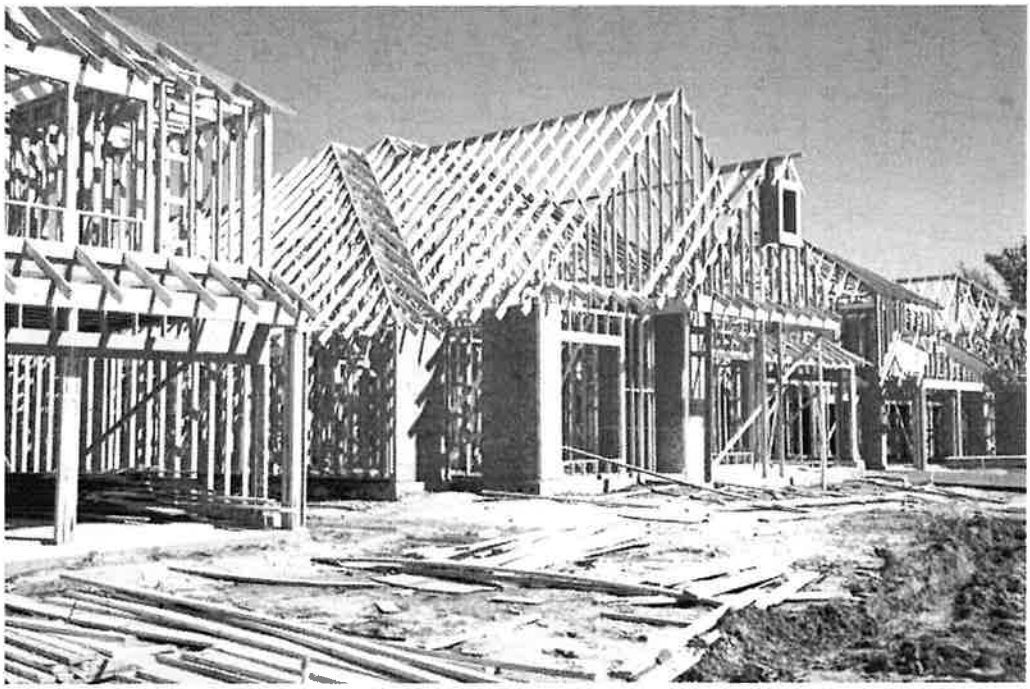
Home ownership and the "American Dream" are crushed by Real Estate Investment Trusts

Rob Mitchell

August 22, 2022 6:59 am



Home ownership is key to generational wealth, but Real Estate Investment Trusts profiting in Middle Tennessee's low-income neighborhoods raise barriers to owning. (Photo: Getty Images)

A big economic division between renters and homeowners is apparent when looking at net worth: For homeowners, the median net worth of $231,400 is about 44 times the median net worth of renters, which is $5,200.

Dr. Ken Chilton of Tennessee State University has studied the impact of Real Estate Investment Trusts on the housing market and how they are likely to rob families of the generational wealth created by home ownership. He coined the phrase "equity mining". For every family that rents from a REIT, $226,200 of family wealth is shifted to investors away from families. This creates a permanent underclass of poor who can become dependent upon the state to help them survive.

Across the United States, the decline of affordable housing has transformed the lives of the poor. Many poor families who are renting today receive no housing assistance and reside in the private rental market, where over half spend at least 50% of their income on housing costs and a quarter spend over 70% on them.

Increasing rent burden among low-income families directly contributes to their economic hardship and is a source of residential insecurity and homelessness. But sociologists have yet to identify the basic sources of the affordable housing crisis or to fully articulate the inner workings of rental markets. Conspicuously absent from most accounts of neighborhood dynamics or inequality are landlords and increasingly corporate interests via REITs, who play a vitally important role in the lives of low-income families.

In Rutherford County, nearly 10% of all residential units are owned by REITs.

Dr. Ken Chilton of Tennessee State University has studied the impact of Real Estate Investment Trusts on the housing market and how they are likely to rob families of the generational wealth created by home ownership. He coined the phrase "equity mining". For every family that rents from a REIT, $226,200 of family wealth is shifted to investors away from families.

Tenant exploitation (overcharging renters relative to the market value of their home) and landlord profit margins vary. However, their impact on the housing market is very real. Because the acquisition of property by REITs in low-income neighborhoods is relatively affordable, the renters in those neighborhoods easily become "exploited consumers."

Landlords operating in those neighborhoods also enjoy higher profits, owing to significantly lower mortgage and tax burdens but not significantly lower rents. This demonstrates how the market strategies and profit motivation of REITs contribute to high rent burdens in low-income neighborhoods.

The drive to maximize profits also contributes to a lack of inventory for families who may wish to own their home rather than rent. The lack of inventory causes a scarcity which drives up prices making it problematic to enter the home buying market.

We are witnessing a type of "social engineering". Many politicians may view this as an opportunity to continue to remain in power. Regardless of their words and how much they lament the situations we must judge our elected leaders by their deeds or lack thereof to address this growing issue. Homeownership leads to prosperity and creates the generational wealth necessary for future generations to realize the American dream.

Ten Actions Cities Can Take to Improve Housing Affordability

By Owen Minott, Julia Selby

Aug 10, 2022

SHARE

Housing unaffordability, rooted in an acute shortage of homes both for rent and sale, is a severe problem *across the nation* [https://bipartisanpolicy.org/blog/which-metro-areas-are-seeing-rising-rents-and-home-prices-all-of-them/], affecting red states and blue states, small cities and major metropolitan areas alike. Fortunately, city governments have a great deal of influence over housing costs, with many policy levers at their disposal to increase the supply of homes and improve housing affordability. Below are ten steps local leaders can take to help constituents who are contending with high housing costs.

1. Legalize more apartment units

Many American cities make it illegal to build anything other than a single-family, detached home on over *75%* [https://www.nytimes.com/interactive/2019/06/18/upshot/cities-across-america-question-single-family-zoning.html?mtrref=undefined&assetType=REGIWALL] of land zoned for residential use, severely restricting efforts to increase the *supply of affordable housing* [https://bipartisanpolicy.org/blog/a-primer-on-the-nations-housing-supply-crisis/]. Often, higher-income neighborhoods are disproportionately zoned for single-family homes, preventing low- and middle-income

4

families from living in communities with more economic opportunities. While rolling back single-family zoning is one of the highest profile policies proposed to enhance affordability, *early evidence from Minneapolis* [https://www.bloomberg.com/news/articles/2022-05-24/the-limits-of-ending-single-family-zoning], which eliminated single-family zoning, indicates that such measures alone are not sufficient. Cities can also *address other potentially restrictive policies* [https://bipartisanpolicy.org/explainer/what-are-zoning-and-land-use-regulations-and-how-do-they-affect-housing-supply/], including minimum lot size requirements, density limits, and prohibitions against mixed-use developments (apartments in commercial zones) to more quickly build affordable housing at scale.

2. Legalize accessory dwelling units

Accessory dwelling units (ADUs) are independent residences located on the same lot as a single-family house, often in basements or above garages. ADUs are typically affordable units that diversify a city's housing stock and make more efficient use of already-existing homes. ADUs can be a win-win for tenants and property owners, providing affordable rental units as well as benefits to homeowners—including generating income from an existing asset and adding flexibility in family living arrangements. Cities such as *Seattle, WA* [https://seattle.legistar.com/View.ashx?M=F&ID=7332825&GUID=E1055D33-C4B8-43A7-8533-BC0467C83CB2], *Princeton, N.J.* [https://www.nytimes.com/2021/12/10/realestate/the-adu-experiment.html], and *Washington, D.C.* [https://ggwash.org/view/65326/you-can-now-build-an-accessory-apartment-in-dc-to-make-some-money-heres-a-step-by-step-guide], have already relaxed zoning ordinances to allow for more ADUs. Los Angeles recently announced a *city-wide ADU plan* [https://www.lamayor.org/mayor-garcetti-announces-launch-adu-standard-plan-program] as a tool to combat its affordable housing crisis.

3. Eliminate or reduce parking requirements

Cities often require new buildings in a designated zone to have a certain number of designated parking spaces based on projected occupancy. *Research has made clear* [https://www.researchgate.net/publication/235359727_The_High_Cost_of_Free_Parking] that parking is very frequently oversupplied, with one *study* [http://yourdowntowndarie

n.com/wp-content/uploads/2015/07/Parking-study-from-UCONN.pdf] of six New England municipal centers, for example, finding the mandated amount of parking was, on average, two-and-a-half times more than demand at peak times. Parking minimums are also costly; building a single parking space adds an average of *$50,000* [https://www.gao.gov/assets/gao-18-637.pdf] in costs per housing unit in some metropolitan areas—and much more in others—with underground parking being particularly expensive. *Dozens of cities* [https://www.strongtowns.org/parking#:~:text=Parking%20minimums%20are%20local%20laws,are%20built%20and%20laid%20out.] have reduced or eliminated parking minimums with positive results. For example, *one study* [https://escholarship.org/uc/item/1qr84990] found that eliminating parking minimums in Los Angeles led developers to build more homes and convert old buildings into housing, helping to stimulate neighborhood revitalization.

4. More quickly and predictably approve developments that meet zoning laws

Even when zoning allows for more affordable apartments, getting new projects approved is often slow, costly, and unpredictable. Many projects require discretionary approvals, meaning local planning commissions and boards can reject proposed projects even if they meet zoning requirements. While community input is essential, the loudest voices are often existing *homeowners* [https://sites.bu.edu/kleinstein/files/2017/09/EinsteinPalmerGlick_ZoningPartic.pdf] in the area opposed to new development and are wealthier than the beneficiaries of new housing. When commissions do approve projects, regulatory delays and uncertainty can still increase the costs of developing new housing—costs that are passed on to residents and discourage development. Establishing *by-right development processes* [https://housingtoolkit.nmhc.org/wp-content/uploads/2019/04/F2_NMHC_PDF-Sections_Tools_By-Right-Dev_PG-63-TO-73.pdf] and more predictable permitting processes can increase the supply of affordable housing by ensuring buildings that meet zoning laws are approved and drive down housing costs associated with delays.

5. Build more affordable housing near transit

Low-income families in cities disproportionately rely on public transit to access jobs

and other travel needs. Yet housing near transit tends to be more expensive, forcing low-income families to either pay high rents or live far from accessible transit, potentially spending their limited resources on owning a car. Increasing the supply of affordable housing near transit can reduce the cost of living for low-income families by reducing their transportation costs—often the *second-largest* [https://www.huduser.gov/portal/pdredge/pdr_edge_research_071414.html] annual expense for families after housing—and better connect families to jobs and economic opportunities. Cities should use every tool in their toolbox to spur affordable housing in transit-rich-neighborhoods, including upzoning, better harmonizing housing and transit planning, and prioritizing housing construction subsidies for developments with transit access. Transit agencies can also utilize the *real estate they own* [https://www.pewtrusts.org/en/research-and-analysis/blogs/stateline/2021/09/30/transit-agencies-lease-real-estate-to-generate-much-needed-cash] in innovative ways to build well-placed housing. For example, the Washington Metropolitan Area Transit Authority recently partnered with Amazon to develop *1,000 affordable units* [https://www.wmata.com/about/news/Amazon-Metro-Affordable-Housing-Initiative.cfm] at Metro stations.

6. Establish and expand affordable housing trust funds

Cities do not need to rely solely on federal and state financing to overcome the expensive upfront costs of development; they can establish their own affordable *housing trust funds* [https://ggwash.org/view/80343/what-is-the-housing-production-trust-fund-anyway], like those that exist in *Los Angeles* [https://reports.nlihc.org/rental-programs/catalog/los-angeles-affordable-housing-trust-fund#:~:text=The%20Los%20Angeles%20Affordable%20Housing,of%20public%20and%20private%20financing.], Seattle, *Philadelphia* [https://www.phila.gov/media/20200329084134/Philadelphia-Housing-Trust-Fund-Report-2018-2019.pdf], and Washington, D.C.—as well as many counties and states. A housing production trust fund is a source of funds designated to finance production and preservation of affordable housing, providing additional gap financing in addition to other sources like the Low-Income Housing Tax Credit and private subsidies. Some cities, such as *Albuquerque* [https://www.phila.gov/media/20200329084134/Philadelphia-Housing-Trust-Fund-Report-2018-2019.pdf], have capitalized their housing trust funds through voter bond measures. While their exact structures and processes vary, the results are promising and worthy of consideration. In Washington, D.C., the Housing Production Trust Fund has produced *over 6,000 affordable units* [htt

ps://dhcd.dc.gov/page/housing-production-trust-fund] since 2015.

7. Improve housing voucher programs

Thousands of public housing authorities (PHAs) across the country administer Housing Choice Vouchers, which help low-income renters afford housing payments. Housing vouchers effectively reduce housing instability and allow low-income households to afford units in higher-opportunity neighborhoods. However, the program's success is *restrained* [https://www.huduser.gov/portal/pdredge/pdr-edge-research-052819.html] by landlords unwilling to accept vouchers as payment, with acceptance rates of vouchers declining—and reaching especially low levels in low-poverty areas. Evidence suggests that high denial rates are due to a combination of landlord *discrimination* [https://www.bostonfed.org/news-and-events/news/2019/08/housing-assistance-vouchers.aspx] against voucher holders as well as *legitimate challenges* [https://www.hud.gov/sites/dfiles/PIH/documents/ListeningForumsPublicSummary012320.pdf] working with PHAs—including the time-consuming inspection process. PHAs can improve landlords' experience with the Housing Choice Voucher program by having dedicated landlord liaisons, customer service hotlines, and workshops for participating landlords. *Marin County, CA* [https://www.huduser.gov/portal/periodicals/em/winter19/highlight3.html] started offering security deposits, damage protection, and vacancy loss coverage, which increased leases for voucher holders. Similarly, the PHA in *Cambridge, MA* [https://www.huduser.gov/portal/periodicals/em/winter19/highlight3.html] offers damage and vacancy payments for landlords who lease to voucher holders and conducts landlord surveys to improve landlord service satisfaction.

8. Maintain and establish emergency rental assistance programs

During the COVID-19 crisis, Congress provided $46 billion for emergency rental and utility assistance programs to prevent evictions and help low-income renters sustain financial shocks caused by the pandemic. The program—along with other emergency measures—helped prevent *1.36 million eviction filings* [https://evictionlab.org/us-eviction-filing-patterns-2021/], by one estimate. While most of this funding has been distributed, local governments can build on this success and maintain local emergency

8

rental assistance programs, leveraging institutional capacity developed during the pandemic. For example, San Antonio, TX assisted more than *56,000 households* [https://www.expressnews.com/news/local/article/San-Antonio-emergency-housing-assistance-16813723.php] with federal emergency assistance funds during the pandemic and will fund a new emergency rental assistance program at a smaller scale without federal funds, helping low-income households weather temporary hardships unrelated to COVID-19 and ensuring families stay stably housed until they regain their financial security. Even as the economy recovers from the pandemic, many low-income Americans will continue to be vulnerable to financial shocks as the high cost of rent outpaces wage growth.

9. Inventory and allocate public land for affordable housing

As a first step toward maximizing the use of public land and resources, a *2016 BPC report* [https://bipartisanpolicy.org/download/?file=/wp-content/uploads/2019/03/BPC-New-Infrastructure-Model.pdf] recommended that local governments develop a complete list of all assets owned, including vacant land and underutilized real estate. For example, a *2016 audit* [https://comptroller.nyc.gov/reports/audit-report-on-the-development-of-city-owned-vacant-lots-by-the-new-york-city-department-of-housing-preservation-and-development/] in New York City found more than 1,000 vacant lots owned by the city, many of which had been sitting idle for decades. Atlanta's Public Land Advisory Council oversaw an asset mapping effort in 2021 that identified *2,023 parcels* [https://saportareport.com/wp-content/uploads/2022/02/PlansforVacantPubliclyCont.pdf] of land suitable for affordable housing projects. Once surplus land is identified, cities can *sell or lease* [https://www.theurbanist.org/2018/09/28/disposition-policy-lets-put-underused-public-land-to-use-as-affordable-housing/] it at a reduced cost—or donate it—to offset the high cost of land and build more affordable housing. Montgomery County, MD, King County, WA, and Washington, D.C., have all *instituted policies* [https://localhousingsolutions.org/housing-policy-library/use-of-publicly-owned-property-for-affordable-housing/] encouraging low-income housing development on public land.

10. Support community land trusts

Community land trusts (CLTs) are nonprofit organizations governed by boards of residents and public representatives that act as stewards of land for affordable housing. Land is bought and maintained by the nonprofit organization, which sells homes that sit on the land to occupants—*splitting the ownership* [https://www.pewtrusts.org/en/research-and-analysis/blogs/stateline/2022/05/25/cities-back-community-land-trusts-to-protect-affordable-housing] of the land value and the home value so that occupants pay less for homeownership. Nonprofit stewards hold land in a trust in perpetuity in order to *preserve affordability* [https://www.nlc.org/wp-content/uploads/2021/08/Community-Land-Trusts_A-Guide-for-Local-Governments_Report-1.pdf] even when market rates rise sharply, permanently preventing developers from purchasing land for expensive units. Cities can support CLTs by providing financing, property tax exemptions, and technical assistance. There are *hundreds* [https://centerforneweconomics.org/apply/community-land-trust-program/directory/] of CLTs across the country, which have a record of empowering households—especially low-income *families of color* [https://housingmatters.urban.org/articles/how-community-land-trusts-can-advance-racial-and-economic-justice]—to build wealth.

Conclusion

Tackling the affordable housing crisis will require an all-hands-on-deck approach at the federal, state, and local levels. Some of the actions highlighted in this blog can be carried out at the state level, a more efficient process than instituting reforms city by city. Nevertheless, cities should not hesitate to do everything in their power to address the urgent need for more affordable housing—as soon as possible. No single policy can serve as a silver bullet to sufficiently improve affordability, and cities will need a comprehensive approach including a slate of policy solutions to have a meaningful impact.

Support Research Like This

With your support, BPC can continue to fund important research like this by combining the best ideas from both parties to promote health, security, and opportunity for all Americans.

City of Cle Elum - Planning Department, Mayor, and City Council members

I want to take this opportunity during the public comment period to shed light on Sun Communities and how they choose to conduct business. In my letter I will share information from the Town of Granby, Colorado where in 2018 Sun Communities bought land and established a RV Resort called River Run, now known as Sun Outdoors – Rocky Mountains and a manufactured home part called Smith Creek Crossings.

As recent as May 2023 Sun Communities has consumed some time during the Board of Trustees (City Council) meeting(s).

I will try to include as much information in this letter however the documents are quite extensive and complex yet reflect challenges in dealing with a large corporate landowner reselling necessary 'items on a shelf', *water*, for those residing within their property.

May 9th Board of Trustees Meeting – Sun Communities Water Billing Issues consume exactly one hour of town business meeting starting at 5:45 p.m. until 6:45 p.m.

https://www.townofgranby.com/vertical/sites/%7B89161B06-4754-446C-B6BF-16585CE8AB42%7D/uploads/BOT_-_5_9_2023_-_Agenda__Packet.pdf

Pages 5 – 9

MEMO To: Mayor and Board of Trustees From: Ted Cherry, Town Manager Cc: Deb Hess, Town Clerk Date: 5.9.2023 Re: West Service Area Rate Workshop

Summary: The Board of Trustees, at the previous meeting, asked to hold a workshop regarding the West Service Area (WSA) water rates and to address questions that have been brought forward regarding concerns by property owners in the service area.

History: The Town purchased the old Shorefox property for $4,494.406. Subsequently the Town sold a portions of the property to Sun Communities Inc. (Sun) for $6,172,500 between May and Sept. of 2018. Proceeds from the sale paid of all debt of the Town.

Through this sale of property the Town and Sun made an agreement regarding improvements to the property that needed to be made. These improvements included construction of water improvements. The original agreements explained that the Town would eventually take over the ownership and operations of the water system that serves River Run and Smith Creek and includes augmentation ponds, water treatment facilities, and water storage facilities.

During the time of purchase of the property by Sun and the current date there have been a number of amendments to the water services agreement and requests that have been made by Sun and the Town to one another. Through these amendments the provision the Town take over the ownership and operations of the water system have remained intact.

WSA Rate Study: The Town was responsible for undertaking a rate study for the WSA which was paid for by Sun as required in the water agreement. Undertaking the rate study was approved during the October 13, 2020 meeting. Minutes from that meeting can be found at this link.

https://www.townofgranby.com/vertical/sites/%7B89161B06-4754-446C-B6BF-16585CE8AB42%7D/uploads/2020-10-13_BOT_Minutes_Redacted.pdf

(pages 5 – 9 with relevant info)

An original draft of the rate study was discussed by the Board of Trustees at the March 9, 2021 meeting. The link is listed below. The analysis that was presented at that time was based on estimates of water usage and costs provided by Sun. The usage estimated in 2023 by Sun and their engineers were 69,562,125 gallons of water with expenses of $527,900. The Board was not asked, and did not accept, the rate study at that time, but was given the information as an update only. Costs and usage for the final accepted study were both reduced.

My understanding of the issue from two local residents in Granby: In essence Sun Communities decided to under charge the residents at the manufactured home park for community water that is not metered at an individual lot level. As a result of their decision to under charge, they are raising the water rates of those residing on their property. Sun Communities recommended their residents to proceed to the Town of Granby City Hall to voice their concerns and complaints. During the May 9th Board of Trustees meeting residents from the Sun Communities property took their concerns to the Board of Trustees. No one from Sun Communities was in attendance at the May 9th meeting and the Board of Trustees had to direct the residents back to Sum Communities Inc. See social media screen shot from Rebecca Quesada, a member of Town of Granby Board of Trustees.

Sun Communities, your lack of presence, showed a tasteless display of care for those who have bought into that community. Very concerning that not one representative in your organization could be in attendance via in person, zoom, or phone at last nights Town of Granby Board meeting? Your absence spoke volumes!

I've included as much pertinent information around this topic from the Town of Granby website. Their Board of Trustees meetings are recorded and available on the town of Granby website.

I implore the City Council to **DENY** this proposed major amendment and seriously reflect on the implications of entering into business with a corporation that their explicit business model and interests is produce profits for their investors.

Respectfully,

Tiffany D Christman

5:45 PM

MEMO

GRANBY
COLORADO
1905

To: Mayor and Board of Trustees
From: Ted Cherry, Town Manager
Cc: Deb Hess, Town Clerk
Date: 5.9.2023
Re: West Service Area Rate Workshop

Summary: The Board of Trustees, at the previous meeting, asked to hold a workshop regarding the West Service Area (WSA) water rates and to address questions that have been brought forward regarding concerns by property owners in the service area.

History: The Town purchased the old Shorefox property for $4,494.406. Subsequently the Town sold a portions of the property to Sun Communities Inc. (Sun) for $6,172,500 between May and Sept. of 2018. Proceeds from the sale paid of all debt of the Town.

Through this sale of property the Town and Sun made an agreement regarding improvements to the property that needed to be made. These improvements included construction of water improvements. The original agreements explained that the Town would eventually take over the ownership and operations of the water system that serves River Run and Smith Creek and includes augmentation ponds, water treatment facilities, and water storage facilities.

During the time of purchase of the property by Sun and the current date there have been a number of amendments to the water services agreement and requests that have been made by Sun and the Town to one another. Through these amendments the provision the Town take over the ownership and operations of the water system have remained intact.

WSA Rate Study: The Town was responsible for undertaking a rate study for the WSA which was paid for by Sun as required in the water agreement. Undertaking the rate study was approved during the October 13, 2020 meeting. Minutes from that meeting can be found at this link.

https://www.townofgranby.com/vertical/sites/%7B89161B06-4754-446C-B6BF-16585CE8AB42%7D/uploads/2020-10-13_BOT_Minutes_Redacted.pdf

An original draft of the rate study was discussed by the Board of Trustees at the March 9, 2021 meeting. The link is listed below. The analysis that was presented at that time was based on estimates of water usage and costs provided by Sun. The usage estimated in 2023 by Sun and their engineers were 69,562,125 gallons of water with expenses of $527,900. The Board was not asked, and did not accept, the rate study at that time, but was given the information as an update only. Costs and usage for the final accepted study were both reduced.

https://www.townofgranby.com/index.asp?SEC=45727B30-B97B-4E70-B859-E694BD1CB454&DE=AF891152-5C62-459F-81D7-A6EAFF900053

Subsequently the WSA was established by the Board of Trustees on April 27, 2021. The link for that meeting is below.

https://www.townofgranby.com/index.asp?SEC=45727B30-B97B-4E70-B859-E694BD1CB454&DE=B7A1A99A-90CD-49FB-9B34-188AC5826166

The final rate study and ordinance regarding rates was presented to the Board on Sept. 13, 2022. This was precipitated by Sun's application for initial acceptance which, per the water agreement, necessitated having a rate set for the WSA. The rate was set based on the study that used updated costs and usage amounts. The Town, by this time, had enough data to quantify items correctly. The yearly usage was calculated at 9,537,736 gallons, far less than the estimates Sun had provided to the Town in 2021, for the 2023 calendar year. Estimates on costs for operating the service was also reduced to $397,913 once the Town was given access to account information. Increases in operating costs and usage were figured into the study for 2024 through 2026. Information on this can be found at the link below.

https://www.townofgranby.com/index.asp?SEC=3D56153D-DD40-4B2F-9615-414FECAADDA3&DE=17C02D69-9DBD-46B8-9B84-0A87176DF29D

Below is a link to the final WSA study.

https://www.townofgranby.com/vertical/sites/%7B89161B06-4754-446C-B6BF-16585CE8AB42%7D/uploads/WSA_Rate_Study_Report_08182022_(1).pdf

Normal processes have staff analyzing water service areas every year though the budgeting process. Operational costs and usage will continue to change over time. Sun is required, through the water agreement, to cover all the costs involved with operating the system. If costs are not covered by billed rates Sun must pay the Town for the additional costs. If overpayment is received by the Town for usage during the year any extra funds will be used to boost the reserve fund of the WSA and reductions in future rates may be realized.

Sun is billed, per the water agreement, two bills monthly. Smith Creek is charged for 2 meters that feed the entire neighborhood. River Run is charged for 5 meters for the resort portion of operations. Each entity is charged for raw water per the breakdown agreed upon in the water agreement.

The rate set for the service area is $56.46/1,000 gallons of water. Sun has made the decision to pass this cost along to all residents of both communities. The Town, after the water runs through the meters, does not monitor individual meters. The Town does not know what the process is for Sun reading individual meters and what their charges are passed on to their individual residents.

Other Items of Consideration: Sun asked the Town to consider the option of Sun to maintain the water system without the Town's involvement. This happened during the March 9, 2021 Board meeting at the link above. The Town rejected this proposal as the Board believed it was in the best interest, and health, of citizens to maintain Town control. Safety was a large concern of this proposal as Sun would have had outside manager that would not have bene on site full time.

Sun was asked by Town staff, on numerous occasions, if they would consider a flat monthly fee instead of a per 1,000 gallon fee. This was contemplated in all rate studies. This would have made the billing easier and a flat rate could have been set by Sun for its full time residents in Smith Creek and River Run. This was rejected by Sun as they maintained they wanted to be charged on a per 1,000 gallon basis.

The Board should be aware that it is the understanding of staff that prior to the rate being adopted that Sun was charging its full time residents $10/1,000 gallons of water used. The Town did not have any hand in setting this rate. Staff does not understand how Sun came to this number for service as they

were being charged for all staff time during this period. It is the manager's opinion that this was an artificially low rate to charge for water.

The draft rate study that is referenced in March 9, 2021 is an example of how rates could be decreased if there were more users on the system. At this time the town does not have good information on when more users will be added. These would be added with a complete build out of Smith Creek, but the 2nd entrance is needed before this can happen and Sun was made aware of this when the original platting process began for that property. Additionally, the 2nd phase of the resort area would add additional users, and Sun has begun the initial steps of this process, but the Town is not aware of what their timeframe for this area is.

The Town has a revenue sharing agreement in place with Sun for $10,000,000 or 20 years, whichever happens sooner. This is half of the sales tax generated on property. To date the Town has shared back $758,825.81.

It is important to note that the rate study should be revisited yearly for the coming years to ensure accuracy of rates being determined for the system.

Questions regarding the rates that Sun charges to the residents of the properties should be directed to Wadioni Rainwater (Manager Smith Creek), Dave Huber (Manager Sun Communities Outdoor Rocky Mountains), Emerson Prosser (Sun Vice President), or Bill Raffoul (Sun Senior Vice President). Sun Communities can also be contacted via their social media accounts on Linkedin, Facebook, Instagram, and Twitter

Financial: None

Recommendation: Discussion topic only.

MEETING DATE: MAY 9, 2023

TIME OF AGENDA ITEM: 6:45 PM

Agenda Request No. 1

MEETING TO BE HELD AT:
Town Hall, Zero Jasper Avenue
Granby, CO 80446

(1) PRESENTATION OF 2022 AUDITED FINANCIAL REPORT / PAUL BACKES, MCMAHAN & ASSOCIATES
6:45 PM

almost a year and a half. As such, she thought that had been ample and reasonable time and since they have not closed, she would move that the Board withdraw the offer.

Krob said, just to clarify, when she said it was signed, it was signed by the Town, but Unicume had never signed it.

O'Flaherty said thank you, that was an important correction she wished to make to the motion. The Town signed the offer. Unicume never countersigned their part of the agreement so they never accepted our offer. It has been a year and a half and therefore she would move that we withdraw. Raible seconded. Roll Call Vote: Tindle said she had to abstain for a conflict of interest; Hardy, yes; Raible, yes; O'Flaherty, yes; Shaw, yes.

O'Flaherty said, related to that, there was another agreement which was a development agreement between the Town of Granby and Unicume Colorado, LLC. She would make a motion that we withdraw the proposed development agreement associated with the project, again it has been over a year and a half, since Unicume failed to sign this agreement. In the interim, they made a counteroffer. The Town does not accept the terms of this counteroffer. Therefore, she would move to withdraw the proposed development agreement. Hardy seconded. Roll Call Vote: Tindle said she had to abstain for a conflict of interest; Hardy, yes; Raible, yes; O'Flaherty, yes; Shaw, yes.

O'Flaherty said lastly, we have a contract to buy and sell real estate that was signed back on March 28, 2019 with an anticipated closing date of June 5, 2019. This related to the property on the contract described as Lot 1 between the Town of Granby and Unicume Colorado, LLC. She would like to direct the Town Manager to send a letter giving them 60 days to close on this property if they wish to move forward and prior to closing, they would need to reach a development agreement and if they close, it also needed to be bound by 16.90.130, as well as, the design guidelines of the Design Review Board at Granby Ranch.

Raible asked if that was 60 days from today.

O'Flaherty said that would be correct, 60 days from today. The anticipated closing again was June 5, 2019 so it has been a year and a half. Yes, she thought that was fair. We wanted to give them time, but the three things that would be in that letter would be that they have to close within 60 days. Prior to closing, they have to reach a development agreement and if they close, they are bound by 16.90.130 as well as the Design Guidelines and review by Granby Ranch since that property was in Granby Ranch.

Krob said if they fail to close within that 60 days, then per the motion, if they fail to close within that 60 days, then the agreement would be terminated per the notice.

O'Flaherty said we give them 60 days to get those things done. If they do not get them done, her motion corrected was that it would be then withdrawn.

Raible seconded. Roll Call Vote: Tindle said she had to abstain for a conflict of interest; Hardy, yes; Raible, yes; O'Flaherty, yes; Shaw, yes.

DISCUSSION AFTER EXECUTIVE SESSION ON THE RODEO APARTMENTS
Shaw asked if there were any public comments.

Christian Hornbaker stated he was a member of the Silversage Group and they had been passionate about this progress. Regardless of what happened, there were other potential developers that could utilize this property and he would like to challenge the Board to work between now and then to figure out the proper entrance and exit of that property other than having two entrances and two exits. He would like to be a part of that process and appreciated everyone's, including Hess', communications.

DISCUSSION AND POSSIBLE APPROVAL OF THE WEST SERVICE AREA RATE STUDY / TOWN MANAGER
6:48 PM
Shaw introduced the agenda item.

Cherry stated, as your memo reads, this was a rate study that was put together by SGM in conjunction with Sun Communities for the new water service area that provided water to Sun River Run and Smith Creek. The blue revisions were from SGM and the red items were items that were put in from Sun's attorneys. The language was good to move forward. The cost of this was not budgeted for and it was

$33,500. It should give you a rate study that took into account the cost of the water which included all of the infrastructure moving forward on the project, any savings that would need to take place in the future for replacement of items, to make sure that we have proper staffing involved out there and that every piece of infrastructure was taken into account.

O'Flaherty asked if that was reimbursable.

Krob said it was reimbursable. They paid for the rate study.

Cherry said we still have to pay for it, but the Town would be reimbursed.

Krob said the only other thing that he would add to it was at the bottom of SGM's memo, on the first page, they talked about under Item No. 4, that SGM would determine an appropriate initial fee to cover all startup costs for the potable and raw water systems. Sun and the Town would have to agree on the payoff period of startup costs, if startup costs were not paid up front. He encouraged the Board to have that discussion with Sun sooner than later because this was one unbudgeted item that was clearly reimbursable. Some of those startup costs could be pretty substantial and he thought that they would want to get a clear understanding from Sun of when they would be catching up on those startup costs.

Cherry reiterated that the Town was still working with them to get proper accounting of all of the infrastructure and all of the costs of everything that was out there. We've had communications going back and forth, but there was going to be a need for some equipment out there that would be included in the startup costs and getting Sun, Atwell and ESCO to be on the same page as the Town. That was going to be very important in this process. If anyone had any questions, Bellatty was present.

Shaw asked if there were any public comments or further discussion by the Board.

O'Flaherty talked with Bellatty earlier. When we talked about the rate study, she was curious on the ownership of the PVC pipes to Smith Creek Crossing that were not the Town's responsibility, that stayed with the developer, we do not take ownership and maintenance of those lines.

Krob said that was all an internal, private system. We have a master meter agreement for that section.

Bellatty said the water treatment plant, once it was initially accepted by the Town and operated by the Town, would have a master meter at its location and it would provide potable drinking water to a trunk line distribution system to either River Run Ranch through designated locations and PRVs (vaults) with meters where the Town's infrastructure ends. It would supply River Run Ranch and all the amenities in there. We have another trunk line component that went over to Smith Creek and additional PRVs with meters throughout the distribution. When it was leaving Town infrastructure, it went through a meter. The master meter was the meter that the Town would bill Sun with and that was at the water plant. Whether we were defining exactly how much water went into River Run Ranch or defining exactly how much went into Smith Creek, there could still be water loses in the trunk line infrastructure which the existing infrastructure that Atwell and ESCO assured us met industry standards for acceptable leaking prior to initial acceptance and that was what they would bill from. We may produce a million gallons and they may only show that they only used ½ million gallons, but we have no control over where that loss was once it left the Town's system.

John Balman, stated he was the Director of Construction at Atwell, Owner's Representative and was at the meeting on behalf of Sun Communities. The thing that he wanted to expand on, which was very pertinent to the water rates study, was in talking about a master meter, if you looked at the agreement, what the study was going to conclude and provide was four different rates. The reason why there would be four different rates was that there are two legal entities, one was Smith Creek and one was River Run. Within those two resorts, you would actually have two water systems, one was the non-potable system that the Town would operate and control, and the other was the raw water treatment plant and the potable water system. So, imagine at Smith Creek, there were 310 units that were residential. The water that would be provided for Smith Creek was through the augmentation, non-potable system and so you really couldn't charge two different water rates or have one water rate for the potable and the non-potable. What the water study was going to determine was a non-potable rate system for Smith Creek, potable for Smith Creek, non-potable for River Run and then a potable for River Run. The agreement was discussed back and forth between SGM, Wright Water Engineers, Jonathan Kelly, Madelyn Wallace and Nathan Krob and Cherry. He wanted to expand on that. So, in addition to the master meter that Bellatty was talking about, it was going to break down into those four different rates from those meters.

Bellatty added and said from the Town's perspective, we were going to send one bill to Sun for our operation. He didn't see Cindy Seader breaking all that stuff down. We would have master meters that depict what the raw water production was, the operation and maintenance costs would be baked into that rate, and he thought what Balman suggested and then on the water side, we have that which comes out of the water treatment facility. He would let the bean counters decide how they want to break it all out, but what we don't want it to be was too onerous for Cindy Seader to have to generate those numbers. If they want to get down and dirty with the specifics, that was up to them. We were tasked with producing water and segmenting that water through the augmentation plan for depletion. That was how he looked at it. He was just the operator. He knew it was a concern for Cindy Seader.

Krob asked, the losses from the plant to the end of the trunk line which was the Town's, was the Town responsible for those or was Sun because he assumed that Sun was responsible because you are metering at the plant?

Bellatty said from his perspective, all operating costs were ultimately reflected in the rates, therefore they were covered by Sun. Sun could defer those costs on to rate payers in Smith Creek or River Run Ranch however that agreement worked out, whatever they signed with the Town or whatever they worked out with the folks that live out there, but the cost of operating the plant and the capital costs for replacing infrastructure over time was reflected in that rate number. Therefore, he suggested that it was Sun's expense.

O'Flaherty said just to clarify, she thought they had that discussion earlier today when she was talking to Bellatty about this. When you send your crew out, whether you were working on maintaining augmentation ponds or you were fixing a leak in the main trunk line, again, that was being billed back, those are the Town's…..

Bellatty said he didn't see it as being billed back. He saw it that we have sufficient funds, after a period of time, baked in through either operations or capital replacement. to make the repairs necessary moving forward. Obviously, as the system got older, operationally speaking, we may have a repair and maintenance distribution line item that today only has $2,000 in it. It was basically a placer or a marker. For future budgets, where that number could potentially go up because the infrastructure has gotten older and we have experience settling or other operational issues that have caused failure in that pipe. But, to begin with, we just have a line item with a certain amount of money, not anticipating having any problems. It was a brand new system and there shouldn't be that much on the front end other than operational maintenance with pumps and chemicals or whatever.

O'Flaherty said to simplify it because it was confusing to her when she read it. Your staff would do the work and those hours would be reflected in the rates of what it cost to run that system to the west side water users.

Bellatty stated that was correct. They would do the work on the Town's infrastructure and not River Run Ranch. We were always there to help and we always have because of public health and safety. Beyond that, that was not their responsibility.

Cherry said the cost involved would be baked into the rates that we get out of this rate study.

O'Flaherty asked if the rate study was reimbursed.

Krob said yes.

Raible said the rate study included all these details that we discussed here.

Cherry said yes.

Bellatty said what he discussed was really what the budget was. Spurlin and he have worked closely to try to generate a budget. That budget was what that rate study would represent, the operations and the capital replacement.

O'Flaherty said the discussion of when this was going to be paid up front, was that part of what we needed to decide today?

Krob said no. He suggested that they have it sooner than later so that you don't get to the end of the road and you are at odds.

O'Flaherty said since it was an unbudgeted item, she would like to see at least half of it upfront.

Cherry said we have a reimbursement agreement with Sun.

Krob asked if she was talking about the money for the rate study or the front end costs of the system. The rate study was already covered by reimbursement agreement. As soon as we pay it, then they owe.

Spurlin said what she was anticipating doing and she was just ignoring the discussions, was that, when SGM submits bills for the rate study, then Seader would run them through developer billing and they got billed directly to Sun. We pay SGM, but when we pay them, it was set up as a receivable. So, it would not affect the budget.

O'Flaherty thanked Spurlin for clarifying.

Spurlin gave Krob a copy of the budget draft for it which has one number for revenue.

Bellatty said the one question Krob directed to you, was it your understanding that there were startup costs that would be potentially covered in a lump sum or was that supposed to get thrown into the rates and paid out over a certain amount of time, a catch up period?

Krob said that was why he asked the question because SGM's memo left that open and that was why he said that needed to be addressed early on rather than later.

Bellatty said there was no money budgeted for any of their water systems or general fund for startup costs.

O'Flaherty asked if Bellatty would be more comfortable seeing that put into the rates for over a 3-5-year period.

Cherry said there was a lot of technical stuff that was going to have to go in that we were not going to be able to solve tonight. We would have to work with SGM on those items, especially the startup costs that would be involved with this process. This was a whole water treatment and water system that we were taking on in one time where normally we add stuff intermittently. There would have to be continued conversations with Sun on how this was all going to work out for them.

Bellatty said he was satisfied with what the Board would choose based on staff's input and the only question was, was it appropriate to put all the startup costs on the rate payers or was it not? That was not for him to decide. We have to have it all resolved before initial acceptance because he didn't want to be running the plant with no money in the bank. If we run into any problems, how would we address it if there was no money.

Cherry said it was one rate payer, so Sun was really going to have to make some determinations on what they really want out of this. They have been involved in this agreement process as well.

Spurlin said she was under the impression with the startup costs with Nathan Krob a couple of weeks ago that Madelyn asked for the detail of the startup costs and that they would, if it was reasonable, pay that. They were not included in that budgeted number. It would be part of the rates down the road, but if we were going to buy a pickup truck, it had to be in that budget. If they were not going to pay it, then let her know because she needed to do another draft and put all of those costs in next year's budget. We budgeted for a full year because right now it was run through the North Service Area and it was really difficult to separate Sun out from the rest. We budgeted for a whole entire year whether we take acceptance or not. We know that it would happen sometime next year so we could cover the costs and then bill back.

Krob asked when SGM anticipated they would have the rate study done.

Spurlin said not until January.

Cherry said they started working on this 6-8 weeks ago. Originally, they said at the end of the year, but it had obviously been pushed back.

O'Flaherty asked if they had to amend the agreement for their water. We amended it until the end of the year. We would have to extend that as well and it would have to come back.

Cherry said we need to get a better timeframe from SGM, but Dave Kotz set aside time for them to do this.

O'Flaherty said, since we have the powers that be in the room, unrelated to water, but since you are here, she knew the Town, we did not want to try the org chart, but one that that would be really helpful to her as a trustee and to her fellow trustees, could we get an org chart from their different entities? Get an org chart from Sun about where Atwell fit in and where the different entities fit in. It would be really helpful and appreciated.

Shaw asked if there was any more public comment or any Board comment.

Balman asked if you went to SGM's revised proposal, it stated that they think they will be done the 3rd week of January. So if they came in with a rate study which was done the 3rd week of January, and then there was going to be comments going back and forth between the Town and Sun, his thought was that it wasn't going to get on the agenda for the Board until sometime in February, so the 3rd Amendment probably needed to extend a little bit safety beyond that.

Shaw asked for a motion to approve.

O'Flaherty moved to approve the West Water Service Area rate study. Raible seconded. All yes.

APPROVAL ORDINANCE NO. 945, AN ORDINANCE APPROVING A FIVE (5) YEAR LEASE OF TOWN PROPERTY TO HORIZONS SPECIALIZED SERVICES / TOWN CLERK 7:08 PM

Shaw introduced the agenda item.

Hess discussed the item with the Board.

O'Flaherty asked if the Board wanted to raise the rent.

Shaw stated it is a non-profit and wanted to keep it where it is.

O'Flaherty said that it should begin at 12:01 AM on the 9th of November.

Krob said he would change that time.

O'Flaherty asked that Horizons give the Town some type of notice if they wanted to terminate the lease agreement.

Krob said the agreement, as stated, was what was previously done. It was up to the Board if they want to change it.

Raible, Shaw and Tindle were fine with it as it was.

Krob said when it was entered into, the Town wanted to keep the lights on and the water running.

Discussion continued on who would be responsible for substantial repairs on the outside and the inside of the building, the tenant has the option to terminate if the building becomes inhabitable, there was nothing per Krob that makes the Town liable and Spurlin ran the utility numbers and the rent should cover the utility costs.

Shaw asked if there was any public or Board comments.

After discussion, O'Flaherty moved that if there was inside damage of more than $1,000, we accept the lease, we do want to support the non-profit, so she would move to accept the lease with that one modification and the date going to the 9th with commencement starting November 9, 2020 and if there was substantial damage inside the building of more than $1,000, we add to the inside. That would be her motion to accept the lease as presented with those two changes, the 9th and the inside damage.

MEMO

GRANBY
COLORADO
1905

To: Mayor and Board of Trustees
From: Ted Cherry, Town Manager
Cc: Deb Hess, Town Clerk
Date: 3.9.2021
Re: West Service Area Turnover Discussion

Summary: Bill Raffoul from Sun Communities and Jon Bauman of Atwell Engineering will be at the board meeting to present information about the idea of turning over the West Service Area to be run privately by Sun Communities. A presentation will be provided to the Board.

The concept of this idea has been discussed thoroughly by staff and limited information has been given to the Board. A list of questions were provided to Sun to provide written answers for and those are provided for you.

This is a discussion which is very important for the Town. No decisions are expected to be made at the meeting.

The presentation provided is from the original meeting held with Sun in January and do not reflect the updated numbers from the draft rate study for the WSA.

Financial Impact: None at this time.

Recommendation: Discussion only. Staff would appreciate any feedback on this idea as well as any further questions it would like to get answered.

Code, Chapter 2.80. The current Board Members, according to the Town Code, are Mayor Hardy and Mayor Pro-Tem Shaw, Planning Commissioners who would like to continue to serve are Thomas Marquardt, Geoff Jurgensen, Casey Farrell and John Young, and Pete Gallo resigned his position creating an open citizen's position. In order to fill the Board, at the current code requirements of seven members, the Board will need to appoint one other Board member to the Commission. Trustee DeLay has expressed interest in filling said position. One other citizen member will also need appointed. After advertising, the only interested person is Carin Aichele, who is an architect, stated she lives in Granby and has lived in Grand County for 4 years. She has a deep understanding of the planning process and is interested in helping make Granby great. The Board will need to make a motion to appoint all seven Board members.

O'Flaherty moved to re-appoint current Planning Commission members and to appoint Trustee DeLay and Carin Aichele to the Planning Commission. Shaw seconded the motion. Roll call vote: Raible, yes; Shaw, yes; O'Flaherty, yes; Michalowski, yes; Quesada, yes; DeLay, yes; Hardy, yes. Motion passed.

SETTLEMENT AGREEMENT AND RELEASE – IFIC AND RELEASE OF CLAIMS / TOWN ATTORNEY NATHAN KROB
6:05 PM
Krob explained the two documents for the settlement with IFIC regarding the two bond claims. After mediation, the settlement pursuant to the terms described, finalizes that settlement. The first agreement is a settlement between the Town and IFIC whereby the Town waives all its claims to the bonds and receives $190,000 in exchange. The release document is between the Town and Granby Prentice, Granby Holdings to say they will not challenge the Town's acceptance of that claim. The change they sent today says that we will not release our claims related to an unrelated matter, being the appointment to the HMD board. It is up to the Board if they want to consider this insert or any of the other terms. It does not hurt the Town, it clearly defines that GPGH and HMD Boards are similar.

After a discussion between the Board and Krob, and several motions, the motions made were confusing to the Board. Cherry clarified the information for the Board. The Release of Claims is continued to the next meeting for approval. O'Flaherty moved to accept the Settlement Agreement as presented. Raible seconded the motion. Roll call vote: Raible, yes; Shaw, yes; O'Flaherty, yes; Michalowski, yes; Quesada, yes; DeLay, yes; Hardy, yes. Motion passed.

WEST SERVICE AREA RATE STUDY / TOWN MANAGER TED CHERRY
6:28 PM
Cherry stated no decisions tonight as he was looking for input and questions. Present: Doug Bellatty, Dave Kotz (SGM) via Zoom, and representatives from Sun. Kotz, Bellatty and Spurlin gave input. Hardy asked for public comment and any other questions. After the next agenda item, the Board can consider all as a whole and then give staff direction.

SUN 4TH AMENDMENT WATER SERVICE AGREEMENT COMPLIANCE / TOWN MANAGER TED CHERRY
6:59 PM
Hardy stated Sun has a request for the Board regarding liquidated damages and the initial acceptance date. This is discussion; no vote needed on this tonight. Cherry explained the Fourth amendment to the Water Service Agreement and that February 28, 2021 was the deadline for the application of Initial Acceptance to avoid the $500 per day fee. It has been 9 days since the deadline, equaling $4500 in fees. Sun asks for the fee to be waived or reduced. They plan to file application for Initial Acceptance no later than March 19, 2021. The Fourth Amendment was approved by the Board on January 12, 2021 with an effective date of December 31, 2020 and was recorded on February 1, 2021.

Hardy asked if any questions for Cherry.

Bill Raffoul stated Sun understands it is responsible to pay late fee but is requesting a fee waiver or reduction because they had every intention of moving forward with the Initial Acceptance. The March 19 date for their application for Initial Acceptance is conditional to outside entities. The system is complete and waiting for engineers to sign off.

Cherry requested direction from the Board regarding moving forward with the fee. Hardy asked if the $500 was discounted. Cherry replied there were no damages included prior.

O'Flaherty, Michalowski, Shaw, DeLay, and Hardy stated they would like to move forward as per the agreement. Liquidated damages will stop once the Initial Acceptance is complete. Damages began on

Feb 28, 2021. Raible disagreed wanting to waive the fee until March 19 and then to reinstate it, if it is not completed. Krob clarified the invoice would be created the day after the initial acceptance is complete. Hardy asked for public comment. None.

WEST SERVICE AREA TURNOVER DISCUSSION / TOWN MANAGER TED CHERRY 7:24 PM

Raffoul stated the following: the Interconnect usage in that last 14 months is less than expected; to date, Sun has invested $16.3M in the water system; if it had been put on the town via tap fees, it would have equated to $7.6M; Sun believes privately operating this system eliminates all the issues that the Town has; Sun intends to minimize its loss over a period of time and requested the Town consider turning over the water operation to Sun.

The following was discussed: DeLay asked if the NSA QR had ever been analyzed. Doug responded not to his knowledge, Kotz agreed that 350 is a high number, he wants the Town to operate the water plant and storage tank, noting the Town needs the reserve tank as a reserve water supply.

Raffoul stated Sun is still willing to keep the Interconnect up. Operating and rates to sell to the Town would be comparable to the Town's rates to its customers.

There was concern from the Board that the water plant needs licensed operators available 24/7 that live in Granby for quick response times. Raffoul explained they would consider local contracts and training their own people.

O'Flaherty asked about outdoor watering. Raffoul responded that is included in non-potable water and included in the rent. She expressed concern about privatization and not being beneficial to the residents because it solves Sun's short-term problem, but not the long- term. Raffoul stated this solves both short and long-term problems. The Town needs to add to capital and Sun can do that through a letter of credit.

Cameron Grant (Sun) noted Sun will handle water rights however the town is comfortable. Sun will access, treat it and deliver the water. Sun would have outside contracts vs inside staff. Agreements could include some back up plans to address some what-ifs. Sun thinks they can more efficiently provide water service.

O'Flaherty noted Sun's difficulty keeping employees to stay during construction and asked how would Sun address this issue to keep water plant staff local? Grant stated Sun would need to address that.

Hardy asked for questions or comments.

Cherry asked if Sun would provide an annual audit. He expressed concern over stagnant water, water flow, and the safety of the water. Grant agreed Sun would provide an annual audit. The Town would have opportunity for inspection and review. John Allman (Atwell) noted currently residue is checked twice per month. They have had to flush the system because there are not enough residents to provide enough water flow.

Cherry stated currently the Town has checks and balances and is able to shut off water if a homeowner does not pay for sanitation services. He asked how Sun would ensure that Sun would continue to pay their bill. Raffoul replied Sun intends to pay their bills and is willing to remedy.

Quesada asked if it common for Sun to take over an operating system and if Sun had Mountain community examples of how that has worked. Raffoul replied Larkspur, CO is an example and he will check for more mountain community examples for the Board. Hardy asked why this was not brought up originally. Raffoul replied public or private was an option from the start. They are pursuing it now because of the water rate study and real time rate quotes.

Hardy asked for public comments or questions.

Hopper Becker stated, on behalf of the Granby Sanitation District, they are concerned how this will move forward because of the loss of ability to maintain integrity when it becomes private especially when a large corporation runs them because they are a for-profit entity. Another major concern is timely response.

Hardy asked for any other public comments or question. He suggested the possibility of a short-term trial run. Cherry offered that staff could come up with an outline of how this could work and come up

with a pros and cons list.

CONSENT AGENDA
8:28 PM
MOTION TO ADOPT THE MARCH 9, 2021 ACCOUNTS PAYABLE
Hardy asked if the Board had any questions. None. He asked for public comment. None

Shaw moved to adopt the accounts payable as presented. Quesada seconded the motion. Roll call vote: Raible, yes; Shaw, yes; O'Flaherty, yes; Michalowski, yes; Quesada, yes; DeLay, yes; Hardy, yes. Motion passed.

MOTION TO APPROVE THE FEBRUARY 23, 2021 MINUTES
Hardy asked for any comments regarding minutes. Hess respectfully requested the Board approve the minutes as presented in their summary form, per previous Board direction and vote, with one correction from Trustee DeLay under Economic Development pertaining to the Chamber's new website roll out date. The rest of the minutes are in summary form.

Shaw moved to approve the February 23, 2021 minutes. DeLay seconded the motion. Roll call vote: Raible, yes; Shaw, yes; O'Flaherty, yes; Michalowski, yes; Quesada, yes; DeLay, yes; Hardy, yes. Motion passed.

COMMITTEE UPDATE REPORTS
8:31 PM
Administrative / Mayor Hardy, Mayor Pro-Tem Shaw, Trustee Quesada
Shaw, Hess, and Spurlin had nothing to report.

Economic Development / Trustee DeLay
DeLay reported on the current absorption rate for home sales. Homes are selling at 108% of list price. According to the Grand County Board of Realtors multi-list, there are 44 single-family homes on the market locally with only 11 priced at less than $1M. It is very competitive and people are acting fast to win bids. No updates from Lauren Huber at the Chamber of Commerce.

Public Safety / Trustee Quesada
Interim Chief Stark stated the PD has approval for a $10k DOLA grant for a Chaplains group. They are also working on a body cam grant to be sure they are staying in compliance and within standards.

Public Works / Trustee Michalowski
Michalowski had nothing to report.

Recreation / Trustee Raible
Raible announced there is a skate park meeting this Thursday night at 7:00 PM, which is open to the public.

Water / Trustee O'Flaherty
O'Flaherty had nothing to report.

Town Manager Ted Cherry's Report and/or Update
Cherry's update follows: the new employees are Cody Mullinex who is the new Accounts Technician and Maura Bishop who is the new Administrative Assistant; the Comprehensive Plan grant was applied for and accepted by DOLA and we will find out within a couple months if we receive the grant; there is no new interest in development specifically on the Buckhorn lots; mediation went well; he sent the Mountain Migration Study to the Board members; NWCOG is doing this study for free, he emphasized the importance of filling it out and passing it along which will help gather data representing how Covid has affected our community, short-term rentals, and second homeowners, and deadline is the end of the month; and, we will be sending information to the owner of Granby Ranch regarding the gravel pit because of some language in the annexation agreement.

DeLay asked about a plan in the event we don't get DOLA funds. Cherry stated our options would be to pay full price out of pocket (not budgeted for), break the plan into sections tackling most important pieces first, or wait until next grant cycle.

Mayor Joshua Hardy's Update
Hardy noted spring break has started on the Front Range.

TOWN OF GRANBY, COLORADO
BOARD OF TRUSTEES
REGULAR MEETING MINUTES
APRIL 27, 2021

PRESENT: Mayor Joshua Hardy; Mayor Pro-Tem Deborah J.K. Shaw; Trustee Nick Raible, Trustee DeLay, Trustee Quesada via Zoom, Trustee Michalowski, and Trustee O'Flaherty

STAFF PRESENT: Town Manager Ted Cherry; Town Attorney Scott Krob; Town Finance Director Sharon Spurlin; Planning and Building Tech Cathy Tindle; Interim Chief Jonathon Stark; Town Clerk Deborah K. Hess, and Deputy Clerk Dianne Meier

Minutes are summary. Meeting recordings are available on the Town's website. NOTE FOR THE RECORD: This meeting was held via Zoom due to COVID-19 and as such parts of the recording cut in and out and therefore were inaudible.

TIME: 4:30 PM – DINNER
6:16 PM – BOT MEETING

BY: Mayor Josh Hardy

LOCATION: Town Hall, Zero Jasper Avenue

MEETING CALLED TO ORDER
6:16 PM
Mayor Hardy called the meeting to order. Everyone said the Pledge of Allegiance. There were no conflicts of interest.

UNSCHEDULED PUBLIC COMMENTS
6:16 PM
There were no unscheduled public comments.

RR MUSEUM UPDATE / DAVE NAPLES
6:16 PM
Dave Naples was not present.

KAIBAB FENCE DISCUSSION / TOWN MANAGER TED CHERRY
6:17 PM
Cherry explained the 2011 original agreement had language that stated the Town had to install a fence within a year. That never happened. Last year we received bids for different types of fencing. This year's bids have increased approximately $20.00 per linear foot and are also higher because of the additional 160 feet we neglected to put in last year's bids, for a total of $20,000 over what is budgeted. Both bids gave a timeframe beginning in September 2021.

There was discussion of waiting a year to budget, the current budgeted amount and an idea of doing what is possible this year with the budgeted amount and finishing next year. DeLay wanted to complete it this year to demonstrate good faith in the Town's agreements. There was also discussion regarding the price difference between the previously selected green coated fence and regular chain link fence.
Cherry was directed by the Board to bring back additional bids for regular chain link fence.

DISCUSSION AND POSSIBLE APPROVAL OF ORDINANCE NO. 950, AN ORDINANCE ESTABLISHING THE "TOWN OF GRANBY WEST SERVICE AREA WATER ACTIVITY ENTERPRISE" UNDER THE PORVISIONS OF TITLE 37, ARTICLE 45.1, COLORADO REVISED STATUTES / TOWN MANAGER TED CHERRY
6:31 PM
Cherry stated this ordinance is to create the WSA, which will create an enterprise fund and allow the Town to set rates.

DeLay moved to approve Ordinance No. 950. Shaw seconded. Roll call- O'Flaherty, yes; Raible, yes; Shaw, yes; Quesada, yes; DeLay, yes; Michalowski, yes; Hardy, yes.

GRANBY STATION PLAT REVISION / TOWN MANAGER TED CHERRY
6:33 PM
Cherry stated Granby Station attempted to get a lease with the railroad with no success. Therefore, they

DISCUSSION AND POSSIBLE APPROVAL OF RESOLUTION 2022-09-13, A RESOLUTION DIRECTING THE TOWN MANAGER AND FINANCE DIRECTOR TO PROCEED WITH THE ANNUAL RENEWAL OF THE HEALTH, DENTAL, LIFE, AND DISABILITY INSURANCES FOR QUALIFIED STAFF AND SETTING THE H.S.A. EMPLOYER CONTRIBUTION FOR THE DECEMBER 1, 2022 THROUGH NOVEMBER 30, 2023 HEALTH PLAN YEAR / TOWN MANAGER AND FINANCE DIRECTOR
6:45 PM
Hardy introduced the agenda item.

Spurlin and Cherry presented the above to the Board.

After discussion by the Board, Quesada moved to approve the resolution as presented. Raible seconded. Roll Call Vote – all yes; Shaw and Schafer absent.

DISCUSSION AND POSSIBLE APPROVAL OF AN AGREEMENT TO TERMINATE AND RELEASE PRIOR AGREEMENT / TOWN MANAGER
6:56 PM
Hardy introduced the agenda item.

Krob explained the former agreement and the termination of the agreement.

After discussion by the Board, Raible moved to approve the agreement as presented. Quesada seconded. All yes; Shaw and Schafer absent.

DISCUSSION AND POSSIBLE APPROVAL OF THE FOLLOWING:
7:01 PM
Hardy introduced the agenda items.

(A) ORDINANCE NO. 972, AN ORDINANCE ADOPTING RATES FOR THE WEST SERVICE AREA WATER ENTERPRISE
Krob explained the ordinance to the Board. Sun applied for initial acceptance to account for the cost of running the system.

Dave Huber, Sun Communities, commented and Daniela Gosselova also commented.

After discussion by the Board, Raible moved to approve the ordinance as stated. Quesada seconded. Roll Call Vote – all yes; Shaw and Schafer absent.

(B) DISCUSSION AND POSSIBLE APPROVAL OF THE FIFTH AMENDMENT TO WATER SERVICE AGREEMENT FOR SUN RIVER UN RANCH RV, LLC AND TOWN OF GRANBY, COLORADO / TOWN MANAGER
7:21 PM
Hardy asked for a motion to approve the Fifth Amendment.

Sneddon moved to approve the Fifth Amendment, to clarify the process for setting service fees and payments with any subsequent changes that would have to come back to the Board in a form that was Substantially as presented. Raible seconded. Roll Call Vote – all yes; Shaw and Schafer absent.

TOWN STAFFING DISCUSSION / TOWN MANAGER
7:22 PM
Hardy introduced the agenda item.

Cherry said there were two parts to this discussion. One is that there was previous approval of creating an Assistant Manager Position to pay between $80,000 to $110,000. He explained the process they went through to hire for the above position. The salary survey has not been completed yet, but the salary range should be from $107,000 to $155,000. He requested the Board continue the search using the updated salary range. The other part to this discussion is that Spurlin is retiring next year in August. This was previously brought to the Board and now we are bringing it back. We want a decent amount of time to replace her position. He continued the discussion with the following: hiring consultants/recruiters, and going out for this position at the beginning of 2023.

After discussion by the public and the Board, Sneddon said they could approve not to exceed $30,000 now.

City of Cle Elum - Planning Department, Mayor, and City Council members

Re: 47° North Development Major Amendment proposal

There are a number of reasons myself and others within our community believe the 47° North business model proposal is an inappropriate land use decision for our community. I am seeking your advice and advocacy on how to utilize this parcel of land in a different manner ***OR*** revert the parcel of land back to its original underlying zoning approval and development agreement.

I want to take this opportunity to share and encourage our community to form a coalition to dig deeper into Washington State Housing Trust Fund. Earlier this year Representative J.T. Wilcox mentioned the there was in excess of $400 million in the Housing Trust Fund. J.T. Wilcox mentioned there was so much funding that it would be difficult to utilize all the funding available.

Eligible Project Types are:

- Community Land Trusts
- Assisted living facilities
- Boarding homes
- Emergency shelters (including shelters for survivors of domestic violence)
- Group homes
- Home/loans for low-income homebuyers
- Multifamily rental housing
- Seasonal and year round housing for farmworkers
- Transitional housing

In my sharing this, I'm not going to pretend I'm a subject matter expert on programs of this nature but I would be remiss to ignore this opportunity to share information about this funding.

The Housing Trust Fund program makes funds available for affordable housing projects through a competitive application process. Applications are generally accepted once a year, but timing and frequency can vary depending on the size and nature of appropriations to the program by the Legislature.

Who Gets Housing?

Housing Trust Fund dollars support a wide range of capital projects that house a diverse array of low-income populations. Properties financed by the program can house people earning less than 80% of the Area Median Income, but most of these properties house households with special needs or incomes below 30% of the Area Median Income. This includes people and families experiencing homelessness, people needing supportive housing,

seniors, veterans, farmworkers, and people with developmental or other disabilities. Special-needs projects coordinate with state and local service providers to ensure clients receive appropriate housing and services.

Is Your Organization or Project Eligible for Housing Trust Fund Funding?

Chapter One, Section 105 of the Housing Trust Fund Handbook (PDF) lists the kinds of organizations and activities eligible for Housing Trust Fund funding

Housing Trust Fund Vision and Strategic Priorities

2022 Vision and Strategic Priorities for Housing Trust Fund Program

Washington Housing Trust Fund Handbook

https://deptofcommerce.app.box.com/s/f89ytc0qtime7dl6wpqke5h2zl1jwzlm

Section 105. Eligible Applicant

RCW 43.185.060

Washington State Housing Trust Fund Handbook

Organizations that may receive assistance from the department under this chapter are local governments, local housing authorities, behavioral health administrative services organizations established under chapter 71.24 RCW, nonprofit community or neighborhood-based organizations, federally recognized Indian tribes in the state of Washington, and regional or statewide nonprofit housing assistance organizations.
Eligibility for assistance from the department under this chapter also requires compliance with the revenue and taxation laws, as applicable to the recipient, at the time the grant is made.
RCW 43.185A.040

Organizations that may receive assistance from the department under this chapter are local governments, local housing authorities, nonprofit community or neighborhood-based organizations, federally recognized Indian tribes in the state of Washington, and regional or statewide nonprofit housing assistance organizations.
Eligibility for assistance from the department under this chapter also requires compliance with the revenue and taxation laws, as applicable to the recipient, at the time the grant is made.
Note: Nonprofit applicants must provide a certification from the Washington State Secretary of State

that they are registered to do business in Washington as a nonprofit organization in accordance with RCW 24.03. Furthermore, nonprofit organizations must submit a letter from the Internal Revenue Service designating them as a tax-exempt nonprofit organization.

Beyond this specific program there are various other opportunities, including collaboration with nonprofit organizations, that could be explored should a coalition be established to utilize this parcel in a manner that reflects the uniqueness and character of Cle Elum and Upper Kittitas County.

I implore the City Council to **DENY** this specific Sun Communities Inc proposed major amendment. Please take some time to reflect and explore opportunities that may allow our community to acquire the land and maintain hyperlocal stewardship, rather than lining the pockets out of state corporate, mutual fund and shareholder interests.

Respectfully,

Tiffany D Christman

To the City of Cle Elum: Mayor, City Council Members, and Planning Department

Re: 47 Degrees North Proposal

I am writing to provide the city with my very strong concerns about the Sun Communities 47°N proposal for the Bullfrog Flats property. The proposed manufactured home/RV community:

· Is not in character with the City of Cle Elum or the upper Kittitas Valley (a fundamental requirement of the current zoning for the property),

· Would create a new and separate private tourist resort instead of the natural extension of city neighborhoods originally envisioned by city zoning and current approvals,

· Is in its entirety a private business not a neighborhood (no lots will be created or sold, all spots will be leased, and the project will be private), wholly owned by a large out-of-state publicly traded corporation whose fiduciary duty is to its shareholders,

· Provides no significant benefits to upper valley residents and tax payers,

· Will create serious and significant impacts on roads, police, fire, schools, emergency services, hospitals, and other public services that can't (or won't) be fully mitigated by the developer, and therefore,

· Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for, essentially a subsidy for a private business,

· Denial of the Sun Communities proposal would not take away or reduce underlying property rights. The original underlying zoning approval would still allow development of this site, just not as a private resort/manufactured home community.

For all of these reasons, and others, I implore the City to DENY this proposed major amendment and retain the current approved land use for the property.

Thank you,
Tiffany Ledbetter

Subject: 47 North

[EXTERNAL EMAIL] DO NOT CLICK links or attachments unless you recognize the sender and know the content is safe.

I am opposed to the current camping and housing plan presented named 47 Degrees North for four reasons

1. History dictates Sun Development's overloading of space in units per acre guarantees to overload this site. I set as example the desirable Pismo Beach Development. For the entire track trees (palm trees) were an afterthought. Houses are lined up side by side 10 feet away from the other with no green space between sections.

2. Property is not owned with the home. This creates multiple issues including more easily foreclosure, lack of true support for public school facilities and compensation fees (creating a burden on local taxpayers to support Educational Program levies and Construction bond issues; not to mention busing, housing all students and support of all students) and shrugged responsibility to maintain the property in a respectful manner. Regarding the school support: As Superintendent and Principal for every new house built we had to plan on average, 1.6 students per home. Using 1000 homes where families will live, that is roughly 1600 new students including special needs students, highly capable students, athletic team costs, safety issues and development and portable housing.

3. There is no major plan for infrastructure development from the I-90 interchange to camping and home entrances. There are bridges and wetlands as well as multiple entrances including: The bus garage, district 7 fire, the proposed athletic fields and Tumble Creek. Weekend camping traffic will back up Bullfrog Road as will normal weekend traffic will continue to rise. New roundabouts will need to be created for safety sake. Again, the burden placed on current homeowners and property tax payers.)I understand people will have to pay personal property taxes, but that is an state and federal issue.

4. I see nothing in the plans for wild animal migration patterns. As someone who commutes almost daily to the schools from Tumble Creek, I have had to a number of times slam my brakes for both elk and deer. (I am also a very observant driver.)

Forty-Seven degrees North still has way to many questions and certainly not enough answers! I say NO to how it is currently presented.

Respectfully submitted,
Tim Berndt

Re: 47 Degrees North Major Amendment proposal

I am sure it comes as no surprise that I am writing to express my opposition to the 47 degrees north proposal by Sun Communities. I won't reiterate all the facts already well documented about impacts on infrastructure, tax base, police/fire/medical, quality of life etc. etc, though I do absolutely agree that these are real impacts to our community. I'm sure you've heard these facts aplenty.

But a big concern I have is the somewhat sleazy business practices of Sun Communities. In surfing the internet, I found several instances in which residents of a Sun Communities property were very unhappy with the company's practice of increasing rent while decreasing service. A recent example from the Connecticut Attorney General's Ofiice:

"Over the past year, the Office of the Attorney General has received numerous complaints from Beechwood Community (owned by Sun Communities) *residents in Killingworth who have seen sustained, escalating rent hikes despite deteriorating conditions. Beechwood residents, like many residents of mobile manufactured home parks, own their homes but pay monthly rent for the lot of land they sit on. That rent covers various common amenities, including property maintenance.*

Beechwood was acquired by Sun Communities in 2019, one of several real estate investment trusts that have acquired hundreds of mobile home parks across the country. The result has been increased lot rent and decreased responsiveness to tenant needs, according to residents. "

A search of the internet shows several other instances of this pattern of maximizing profits at the expense of the residents.

In addition to all the other problems that a development of this size and type will bring, this slipshod management style would almost certainly introduce a host of further long-term problems for our community: improper sewage disposal, poor road maintenance, water distribution problems, and yes, lawsuits that the city would be dragged into.

For these and the many other reasons you've heard, I urge you to deny this proposed modification to the Bullfrog UGA Master Site Plan and Development Agreement.

Subject: 47 Degrees North Proposal

[EXTERNAL EMAIL] DO NOT CLICK links or attachments unless you recognize the sender and know the content is safe.

I am writing as I would like to be a party of record on this proposal. I am a homeowner at 471 Fortune Creek Lane in Cle Elum. I am opposed to the proposal as I think it will result in the following:

1) Change the character of the community by adding a so many mobile homes relative to the existing housing stock/population so quickly.

2) A heavy burden on the infrastructure/services (schools, roads, hospitals, etc.) without providing a commensurate property tax base to otherwise support the increased population.

3) It is just way too big! Maybe 100 mobile homes would be okay, with the rest fee simple single family and Multifamily that would unfold over decades, but 1300 plus mobile home and rv sites plus tent sites just seems like way too much of that. Too many people that aren't necessarily committed to the community.

Thank you for consideration.

Re: 47 Degrees North Major Amendment proposal

I am writing to inform the city of my very strong opposition to the Sun Communities 47° North proposal for the Bullfrog flats property. The proposed manufactured home / RV community:

- Is in clear violation of the vision for the property adopted by the city and presented to the public as a condition for annexing Bullfrog Flats into the city. It's not in character with the City of Cle Elum and does not comply with fundamental requirements of the city's comprehensive plan, the development agreement, or zoning for the property.

- Instead of traditional neighborhoods that were planned to be connected to and a natural extension of the city, supporting the rest of the city, 47 Degrees North would create a private for-profit community and tourist resort with gates, private roads and utilities which will be separated from the rest of the city. It will create a private city within a city, forever.

- Fiscal studies of 47 Degrees North show that it will not create sufficient tax revenue to cover the city's cost to serve it. Unless the developer agrees to financially cover the substantial deficits, forever, existing city taxpayers will be required to subsidize Sun's development and taxes will go up.

- Sun's 47 Degrees North will be in its entirety a private business not a natural neighborhood (no lots sold, all spots leased), wholly owned by a massive out-of-state publicly traded corporation whose fiduciary duty is to its shareholders, not city taxpayers. Any subsidies of the project would be a gift of public funds to a private entity.

- Is not housing as contemplated for the Bullfrog UGA. It will displace half of the actual housing planned for the area and replace it with a private park designed as a transient playground.

- Will be the largest manufactured home/RV park on the West Coast and will double the population of Cle Elum. Parks of this magnitude have no place in a town as small as Cle Elum. Wrong Place, Wrong Size.

- Sun has eliminated the industrial park component of the approved plan and is proposing a major new retail center to the project which would compete with existing city businesses and will seriously damage Cle Elum's downtown, which the city has invested millions of dollars to reinvigorate. The retail center is in direct conflict with the city's comprehensive plan which states that the Bullfrog Flats Master Plan…."is intended to elevate the DTC (downtown core) as the primary retail and activity nexus for Cle Elum". Current rules for the Bullfrog Flats property prohibit a retail center on the property.

- Provides no significant benefits to city or UKC residents, but creates serious and significant impacts on roads, police, fire, schools, emergency services, hospitals and other public services that can't be (or won't be) fully mitigated by the developer.

- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for. Any such increase in taxes will effectively translate to a subsidy for a private business,

- Denial of 47 Degrees North will not take away or reduce underlying property rights. It will simply require Sun Communities to comply with city's current rules, regulations and comprehensive plan for the property. The original underlying zoning approval and development agreement already allows development of this site, just not as a private resort/manufactured home community/retail center.

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Respectfully,

Signature

Re: 47 Degrees North Major Amendment proposal

I am writing to inform the city of my very strong opposition to the Sun Communities 47° North proposal for the Bullfrog flats property. The proposed manufactured home / RV community:

- Is in clear violation of the vision for the property adopted by the city and presented to the public as a condition for annexing Bullfrog Flats into the city. It's not in character with the City of Ce Elum and does not comply with fundamental requirements of the city's comprehensive plan, the development agreement, or zoning for the property.

- Instead of traditional neighborhoods that were planned to be connected to and a natural extension of the city, supporting the rest of the city, 47 Degrees North would create a private for-profit community and tourist resort with gates, private roads and utilities which will be separated from the rest of the city. It will create a private city within a city, forever.

- Fiscal studies of 47 Degrees North show that it will not create sufficient tax revenue to cover the city's cost to serve it. Unless the developer agrees to financially cover the substantial deficits, forever, existing city taxpayers will be required to subsidize Sun's development and taxes will go up.

- Sun's 47 Degrees North will be in its entirety a private business not a natural neighborhood (no lots sold, all spots leased), wholly owned by a massive out-of-state publicly traded corporation who's fiduciary duty is to its shareholders, not city taxpayers. Any subsidies of the project would be a gift of public funds to a private entity.

- Is not housing as contemplated for the Bullfrog UGA. It will displace half of the actual housing planned for the area and replace it with a private park designed as a transient playground.

- Will be the largest manufactured home/RV park on the West Coast and will double the population of Cle Elum. Parks of this magnitude have no place in a town as small as Cle Elum. Wrong Place Wrong Size.

- Sun has eliminated the industrial park component of the approved plan and is proposing a major new retail center to the project which would compete with existing city businesses and will seriously damage Cle Elum's downtown, which the city has invested millions of dollars to reinvigorate. The retail center is in direct conflict with the city's comprehensive plan which states that the Bullfrog Flats Master Plan...."is intended to elevate the DTC (downtown core) as the primary retail and activity nexus for Cle Elum". Current rules for the Bullfrog Flats property prohibit a retail center on the property.

- Provides no significant benefits to city or UKC residents, but creates serious and significant impacts on roads, police, fire, schools, emergency services, hospitals and other public services that can't be (or won't be) fully mitigated by the developer, and,

- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for. Any such increase in taxes will effectively translate to a subsidy for a private business,

- Denial of 47 Degrees North will not take away or reduce underlying property rights. It will simply require Sun Communities to comply with city's current rules, regulations and comprehensive plan for the property. The original underlying zoning approval and development agreement already allows development of this site, just not as a private resort/manufactured home community/retail center.

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Respectfully,

Subject: 47 Degrees North Major Amendment Proposal

[EXTERNAL EMAIL] DO NOT CLICK links or attachments unless you recognize the sender and know the content is safe.

To Cle Elum Mayor Jay McGowan and Council Members -

I am writing to inform the city of my very strong opposition to the Sun Communities 47° North proposal for the Bullfrog flats property.

The proposed manufactured home / RV community will result in negative impacts due to:

- Traffic gridlock with high volume of transient visitors in large recreational vehicles. I am a resident of Ronald, WA. When we had the Jolly Mountain Fire, we were told to leave our home at Midnight due to the potential fire jumping Highway 903. Since there is one road in and out of our home, and the impact of 47 Degrees North on Bullfrog from this will absolutely cause grid lock our roads for getting out of area in an emergency situation. This is unacceptable.

- 47 Degrees North will decreased the level of service for medical services. Since we currently only have 1 Medical Doctor and a few Physician Assistants, currently it is a long wait to get a medical appointments for residents. The current Urgent Care will be greatly impacted. Until Upper County figures out there Medical Services, adding the impact of 47 Degrees North, Bullfrog is unacceptable.

- With added impact of 47 Degrees North, this will decreased the level of service for police and fire protection This is unacceptable.

- Grocery Shopping ~ As a full time resident of Upper County, (Ronald), grocery shopping is a joke at the Safeway store in Cle Elum. With our current amount of tourism, which already overwhelms Safeway, I have to be sure to try to get my groceries prior to any week-end in the Summer/Winter. If you go to the store on a Sunday or Monday, the shelves are empty. If you go on a Thursday or Friday, the store is packed with week-end campers/short term rentals, I have yet been able to figure out what a good day is to shop at Safeway in Cle Elum. It is the first time in my life when I make a grocery list, go to Safeway, and the shelves are so empty, I cannot complete my shopping. I have to be very particular if I am going to a party and offer to bring something, and the store is out of what I need. For example, I offered to bring a fruit tray one day to a party, went to Safeway, out of most fruits and what was left was in very sad condition. Why do I need to drive 1.5 hours round trip to Ellensburg to shop for groceries, when I should be able to drive to Safeway in Cle Elum and support local?

I don't believe the City of Cle Elum, has really thought this whole process out, and the impact it has on it's full time residents in Cle Elum and the surrounding areas.

For these reasons, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Respectfully,

Re: 47 Degrees North Major Amendment proposal

I am writing to inform the city of my very strong opposition to the Sun Communities 47° North proposal for the Bullfrog flats property.

- The city water and sewer infrastructure are not capable of handling the additional demand/flows at this time. Per the Department of Health Water Use Efficiency Report for 2022 the city reported to be missing 33% of the water produced. That is 148,945,980 gallons of water annually or 283 gallons per minute non-stop for the entire year. How can the city consider adding more homes when they are already missing so much water? In fact, per reports the city has been missing more than 100 million gallons of water each year for the past four years. I would ask that the city consider a building moratorium until the missing water is reduced to less than 10% annually. The sewer system has inflow and infiltration issues as well. The infiltration can be as high as 50% thus putting a high flow load on the collection system and the treatment plant. This could result in sewage spills and/or compliance issues at the treatment plant. The treatment plant will also require expansion to be able to handle the additional flows and loading from the new development.
- If the city allows this development to be built there would have to be an expansion of the current water system to produce and store more water and an expansion at the wastewater plant to treat the water. Does a city have a plan in place to force this development to pay all expansion costs? Or is the city planning to spread these costs out to all rate payers? Does the city have the correct connection fee schedule in place to recoup the costs of expansion?

The proposed manufactured home / RV community:

- Is in clear violation of the vision for the property adopted by the city and presented to the public as a condition for annexing Bullfrog Flats into the city. It's not in character with the City of Ce Elum and does not comply with fundamental requirements of the city's comprehensive plan, the development agreement, or zoning for the property.

- Instead of traditional neighborhoods that were planned to be connected to and a natural extension of the city, supporting the rest of the city, 47 Degrees North would create a private for-profit community and tourist resort with gates, private roads and utilities which will be separated from the rest of the city. It will create a private city within a city, forever.

- Fiscal studies of 47 Degrees North show that it will not create sufficient tax revenue to cover the city's cost to serve it. Unless the developer agrees to financially cover the substantial deficits, forever, existing city taxpayers will be required to subsidize Sun's development and taxes will go up.

- Sun's 47 Degrees North will be in its entirety a private business not a natural neighborhood (no lots sold, all spots leased), wholly owned by a massive out-of-state publicly traded corporation who's fiduciary duty is to its shareholders, not city taxpayers. Any subsidies of the project would be a gift of public funds to a private entity.

- Is not housing as contemplated for the Bullfrog UGA. It will displace half of the actual housing planned for the area and replace it with a private park designed as a transient playground.

- Will be the largest manufactured home/RV park on the West Coast and will double the population of Cle Elum. Parks of this magnitude have no place in a town as small as Cle Elum. Wrong Place Wrong Size.

- Sun has eliminated the industrial park component of the approved plan and is proposing a major new retail center to the project which would compete with existing city businesses and will seriously damage Cle Elum's downtown, which the city has invested millions of dollars to reinvigorate. The retail center is in direct conflict with the city's comprehensive plan which states that the Bullfrog Flats Master Plan…."is intended to elevate the DTC (downtown core) as the primary retail and activity nexus for Cle Elum". Current rules for the Bullfrog Flats property prohibit a retail center on the property.

- Provides no significant benefits to city or UKC residents, but creates serious and significant impacts on roads, police, fire, schools, emergency services, hospitals and other public services that can't be (or won't be) fully mitigated by the developer, and,

- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for. Any such increase in taxes will effectively translate to a subsidy for a private business,

- Denial of 47 Degrees North will not take away or reduce underlying property rights. It will simply require Sun Communities to comply with city's current rules, regulations and comprehensive plan for the property. The original underlying zoning approval and development agreement already allows development of this site, just not as a private resort/manufactured home community/retail center.

- The city water and sewer infrastructure are not capable of handling the additional flows at this time. Per the Department of Health Water Use Efficiency Report for 2022 the city claims to be missing 33% of the water produced. That is 148,945,980 gallons of water annually or 283 gallons per minute. How can the city consider adding more homes when they are missing so much water? In fact, per reports the city has been missing more than 100 million gallons of water each year for the past four years. I would ask that the city consider a building moratorium until the missing water is reduced to less than 10% annually. If the city allows this development to be built there would have to be an expansion of the current water treatment plant to produce more water and an expansion at the wastewater plant to treat the water. For the sewer system the infiltration can be as high as 50% thus putting an undo load on the system and the treatment plant. The city should consider a building moratorium until the infiltration of groundwater into the sewer system is reduced so as to create more capacity to allow more home to be built.

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Respectfully,

To City of Cle Elum Planning Department, Mayor, and Council Members:
Please see the attached letter.

I ask that you say no to the proposed development based on the poor state of the water and sewer infrastructure.

- The city water and sewer infrastructure are not capable of handling the additional demand/flows at this time. Per the Department of Health Water Use Efficiency Report for 2022 the city reported to be missing 33% of the water produced. That is 148,945,980 gallons of water annually or 283 gallons per minute non-stop for the entire year. How can the city consider adding more homes when they are already missing so much water? In fact, per reports the city has been missing more than 100 million gallons of water each year for the past four years. I would ask that the city consider a building moratorium until the missing water is reduced to less than 10% annually. The sewer system has inflow and infiltration issues as well. The infiltration can be as high as 50% thus putting a high flow load on the collection system and the treatment plant. This could result in sewage spills and/or compliance issues at the treatment plant. The treatment plant will also require expansion to be able to handle the additional flows and loading from the new development.
- If the city allows this development to be built there would have to be an expansion of the current water system to produce and store more water and an expansion at the wastewater plant to treat the water. Does a city have a plan in place to force this development to pay all expansion costs? Or is the city planning to spread these costs out to all rate payers? June 20, 2023

To: Cle Elum Planning Department

Cle Elum Mayor and City Council Members

119 W First St

Cle Elum, WA 98922

Attention: Planning Department/47 Degrees North

As a registered voter of Kittitas County and Roslyn/Cle Elum school board member, I am writing to voice my very strong objection to the Sun Communities 47 Degrees North proposal for the Bullfrog Flats property.

The proposed manufactured home / RV park:

- is not consistent with the City of Cle Elum or Upper Kittitas County, a fundamental requirement of the current zoning for the property
- is not a natural extension of city neighborhoods as originally envisioned and planned
- does not address the affordable housing crisis because of the lack of land ownership by tenants
- is wholly owned by a large, out-of-state publicly traded corporation whose fiduciary duty is to its shareholders with no long-term vested interest in the Upper Kittitas County
- does not contribute sufficient revenue to offset the serious impact on roads, police, fire, schools, emergency services, hospitals and other public services

- will create extensive and unaddressed traffic congestion access conditions that will reduce emergency vehicle access and require additional revenue from existing homeowners and businesses to address

The proposal is not a modification of the original agreement, it is a complete rewrite that is unacceptable to the surrounding community. If you believe this development is best for the City of Cle Elum, then route all of the traffic for this development through the city and not on the county road, Bullfrog Road. The City of Cle Elum and Sun Communities should bear 100% of the cost and traffic impacts of this development.

This proposal does virtually nothing to address the affordable housing crisis in Kittitas County. The proposal didn't even take the time to understand how the local median income percentage is applied when qualifying for low income housing assistance. Unless home (and land) ownership is included, you are "kicking the (affordable housing) can down the road" and not solving anything.

This proposal is built on a lot of subsidies by the taxpayers of Cle Elum and Kittitas County. That is both unwise and unfair. This is a for profit company. If it is such a great plan and proposal, it should more than pay for itself on its own.

Residents of the City of Cle Elum and the surrounding community have been unified and clear in their opposition to this proposal. The latest proposed business park modification goes against Cle Elum's commitment to support and build up the businesses downtown. Diluting traffic to downtown will hurt businesses and go against all the effort that has been put into revitalizing downtown.

The schools will be hurt by this proposal. There is not enough tax revenue generated by this development to pay for the necessary increase in physical plant at the Cle Elum/Roslyn schools. Addressing that shortfall will land on the shoulders of local residents and businesses to raise their bond levies to address. Sun Communities will not pay their fair share as they potentially increase the number of students by 25% – 30%.

For all of these reasons above, I respectfully urge the City of Cle Elum to DENY this proposed major amendment and retain the current approved land use for the Bullfrog Flats property.

I am writing to provide the city with my very strong concerns about the Sun Communities 47°N proposal for the Bullfrog Flats property. The proposed manufactured home/RV community:

· Is not in character with the City of Cle Elum or the upper Kittitas Valley (a fundamental requirement of the current zoning for the property),

· Would create a new and separate private tourist resort instead of the natural extension of city neighborhoods originally envisioned by city zoning and current approvals,

· Is in its entirety a private business not a neighborhood (no lots will be created or sold, all spots will be leased, and the project will be private), wholly owned by a large out-of-state publicly traded corporation whose fiduciary duty is to its shareholders,

· Provides no significant benefits to upper valley residents and tax payers,

· Will create serious and significant impacts on roads, police, fire, schools, emergency services, hospitals, and other public services that can't (or won't) be fully mitigated by the developer, and therefore,

· Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for, essentially a subsidy for a private business,

· Denial of the Sun Communities proposal would not take away or reduce underlying property rights. The original underlying zoning approval would still allow development of this site, just not as a private resort/manufactured home community.

For all of these reasons, and others, I implore the City to DENY this proposed major amendment and retain the current approved land use for the property.

Thank you

Dear City of Cle Elum Planning Department,

I am writing to inform the city of my very strong opposition to the Sun Communities 47 Degrees North proposal for the Bullfrog flats property. The proposed development results in many negative impacts, including:

- Decreased level of emergency medical services
- Decreased level of police protection services
- Decreased level of fire protection services
- Increased traffic with a high volume of large recreation vehicles
- Increased tax burden on existing property owners to pay for aging infrastructure
- Increased second home ownership within a private resort
- Adverse impacts to downtown businesses as a resort environment drives dollars to remain within the resort
- Missed potential to increase jobs as the development offers little adequate affordable housing opportunities in relation to the number of workers necessary to support multiple resorts in the area
- 90% of profits will be sent out of our community to non-local investors

These negative impacts do not only affect Cle Elum, but the rest of Kittitas County as well.

I've worked in Cle Elum for the last 2 years and feel fortunate to have been able to find a home to rent in Cle Elum this year. As young adults, my partner and I face the sad reality that we are unlikely to ever be able to afford to own a home for a family in Cle Elum. This development will bring in more employees, increasing competition for affordable housing in Upper County that will not be provided in large enough quantities by 47 Degrees North.

Upper Kittitas County is not in a position to support the scale, infrastructure, or dramatic increase in residents and visitors such a fast buildout requires. I call on the City of Cle Elum to listen to the many requests of local residents and DENY this proposed major amendment and retain the current approved land use for the property.

Sincerely,
Tonya Morrey

Dear Cle Elum city council, I am writing to express my deep concern regarding the proposed development project at 47 Degrees North in Cle Elum, Washington. As a conscientious resident and advocate for environmental preservation, I believe it is crucial to address the potential adverse impacts this development may have on the local ecosystem and surrounding environment.

Cle Elum's natural beauty, diverse wildlife, and delicate ecosystems are invaluable assets that require careful protection and management. Any significant development project, especially one located within such a pristine area, must be evaluated with utmost scrutiny to minimize its potential negative effects.

First and foremost, the environmental impact assessment should include a comprehensive evaluation of the project's effects on the local flora and fauna. Cle Elum is home to a wide range of plant and animal species, including several endangered or threatened ones. Any disturbance to their natural habitat or disruption of migration patterns could have severe consequences for their survival.

Additionally, the project's impact on water resources must be thoroughly examined. Cle Elum Lake and surrounding water bodies are not only important for their aesthetic and recreational value but also crucial for the sustenance of various aquatic species. The development's potential effects on water quality, quantity, and runoff management should be studied to prevent contamination, erosion, and other detrimental consequences.

Moreover, the increased human activity associated with the development may lead to issues such as air pollution, noise pollution, and light pollution. These factors could significantly impact the quality of life for both wildlife and nearby communities. Proper mitigation strategies should be implemented to minimize these disturbances and maintain the overall environmental balance.

Furthermore, it is essential to consider the long-term sustainability of the development. Adopting eco-friendly building practices, utilizing renewable energy sources, and incorporating green spaces can help mitigate the project's carbon footprint and promote a more sustainable future for Cle Elum.

Given the potential gravity of these concerns, I kindly request that the responsible authorities conduct a thorough and transparent environmental impact assessment for the proposed development at 47 Degrees North. It is imperative that all relevant stakeholders, including local communities, environmental organizations, and scientific experts, are included in this evaluation process to ensure a well-rounded and unbiased understanding of the potential consequences.

Re: 47 Degrees North Major Amendment proposal

I am writing to inform the city of my very strong opposition to the Sun Communities 47° North proposal for the Bullfrog flats property. The proposed manufactured home / RV community:

- Is in clear violation of the vision for the property adopted by the city and presented to the public as a condition for annexing Bullfrog Flats into the city. It's not in character with the City of Cle Elum and does not comply with fundamental requirements of the city's comprehensive plan, the development agreement, or zoning for the property.
- Instead of traditional neighborhoods that were planned to be connected to and a natural extension of the city, supporting the *rest of the city, 47 Degrees North would create a private for-profit community and tourist resort with gates, private roads and* utilities which will be separated from the rest of the city. It will create a private city within a city, <u>forever</u>.
- Fiscal studies of 47 Degrees North show that it will not create sufficient tax revenue to cover the city's cost to serve it. Unless the developer agrees to financially cover the substantial deficits, <u>forever</u>, existing city taxpayers will be required to subsidize Sun's development and taxes will go up.
- Sun's 47 Degrees North will be in its entirety a private business not a natural neighborhood (no lots sold, all spots leased), wholly owned by a massive out-of-state publicly traded corporation who's fiduciary duty is to its shareholders, not city taxpayers. Any subsidies of the project would be a gift of public funds to a private entity.
- Is not housing as contemplated for the Bullfrog UGA. It will displace half of the actual housing planned for the area and replace it with a private park designed as a transient playground.
- Will be the largest manufactured home/RV park on the West Coast and will double the population of Cle Elum. Parks of this magnitude have no place in a town as small as Cle Elum. Wrong Place Wrong Size.
- Sun has eliminated the industrial park component of the approved plan and is proposing a major new retail center to the project which would compete with existing city businesses and will seriously damage Cle Elum's downtown, which the city has *invested millions of dollars to reinvigorate. The retail center is in direct conflict with the city's comprehensive plan which states* that the Bullfrog Flats Master Plan...."is intended to elevate the DTC (downtown core) as the primary retail and activity nexus for Cle Elum". Current rules for the Bullfrog Flats property prohibit a retail center on the property.
- Provides no significant benefits to city or UKC residents, but creates serious and significant impacts on roads, police, fire, schools, emergency services, hospitals and other public services that can't be (or won't be) fully mitigated by the developer, and,
- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for. Any such increase in taxes will effectively translate to a subsidy for a private business,
- <u>Denial</u> of 47 Degrees North will not take away or reduce underlying property rights. It will simply require Sun Communities to comply with city's current rules, regulations and comprehensive plan for the property. The original underlying zoning approval and development agreement already allows development of this site, just not as a private resort/manufactured home community/retail center.

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Respectfully,

Signature

To Whom It May Concern,

I'm writing to inform the city of my very strong opposition to the Sun Communities 47° North proposal for the Bullfrog flats property. I've been a Cle Elum resident for the last 3 years and owned recreational property on the Yakima River. I've moved my family moved here to enjoy the small-town feel, gracious residents and the tremendous opportunities for recreation and simply enjoying our quiet outdoors.

What is being proposed in the current 47 Degrees North plan is going to permanently scar this beautiful place, cause irreparable harm to our shared lands, swamp the area with a new "instant city" of visitors with their RVs, motorcycles, boats and snow machines and is completely out of step with the character of Cle Elum and the surrounding areas. This is not the legacy you would be proud to leave behind.

These are the key issues that I strongly object to:

1. This project will be the largest manufactured home/RV park on the West Coast. Pouring thousands of visitors to our already overcrowded rivers, lakes, camp sites and playgrounds. This proposed project is way too much too fast. A slow growing community like the original plan makes so much more sense for handling infrastructure, creating meaningful jobs. A measured slow and steady growth is welcome.

2. This proposed development provides no significant benefits to city or UKC residents, but creates serious and significant impacts on roads, police, fire, schools, emergency services, medical facilities and other public services that can't be (or won't be) fully mitigated by the developer.

3. I-90 in both directions on a Sunday afternoon is currently gridlock.....adding 600+ RVs towing boats, motorcycles, snow machines etc. will make I-90 impassable. If this project happens, we can add Friday afternoon I-90 gridlock to the mix.

4. Wildfires are inevitable - God forbid one rips though our community we will be forced to compete with thousands of people evacuating RVs on one two lane road. Weve seen it before in Paradise California- complete pandemonium and disaster. Not to mention an impassable gridlock for the firefighters.

5. As I'm sure you are aware, Fiscal studies of 47 Degrees North show that it will not create sufficient tax revenue to cover the city's cost to serve it.

For these reasons, and many more, I implore the City to DENY this proposed major amendment and retain the current approved land use for the property.

Respectfully,

Trever Tillman
Cle Elum Resident

Dear City Council,

The 47 Degrees North Project cannot be allowed to be built. Through careful planning and development Cle Elum has become an amazing community to live in, work in and visit. Yes, my home is a second home, but i plan to retire there just as soon as I can. Please don't allow the community to change in a drastically wrong way. Once it is done it can't be unwound. Cle Elum will change but please help guide the change carefully and do not allow a massive trailer park to be built.

Sincerely,
Trevor Bennett

Re: 47 Degrees North Major Amendment proposal

I am writing to inform the city of my very strong opposition to the Sun Communities 47° North proposal for the Bullfrog flats property. The proposed manufactured home / RV community:

Negative Impact of 47° North

Decreased level of service for EMS

Decreased level of service for fire protection

Decrease level of service for police protection

Increased traffic burden on 2-lane roads

Increased tax burden to pay for aging infrastructure (water, sewer, power, roads, EMS, schools, police,)

Doubling the population of Cle Elum within 6 years

Profits sent out of our community to Wallstreet investors

Largest private trailer park community west of the Mississippi

Wildfire risk due to limited ingress & egress: **Paradise Fire 2.0**

For these reasons, and so many others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Respectfully,

Trisha Fitzpatrick

Re: **47 Degrees North Major Amendment Proposal**

I am writing to inform the city of my very strong opposition to the Sun Communities 47 Degrees North proposal for the Bullfrog flats property. The proposed manufactured home/RV community will result in negative impacts:

- Traffic gridlock with high volume of transient visitors in large recreational vehicles
- Decreased level of service for emergency medical services
- Decreased level of service for police protection
- Decreased level of service for fire protection
- Increased tax burden on existing property owners to pay for aging infrastructure (water, sewer, power, roads)
- Increased 2nd home ownership within a private resort adversely impacting many throughout the community
- Adverse impact to downtown core businesses as resort environment will drive dollars to remain at the resort
- Potential to increase jobs yet does little to offer adequate affordable housing options in relationship to amount of workers necessary to support multiple resorts on the area
- Potential to require additional city resources to manage and address concerns by a high volume of transient visitors
- High volume of short term rentals (STRs) tax revenue by law are applied to tourism rather than infrastructure upgrades
- 90% of profits will be, by law, sent out of our community to Wall Street investors

For these reasons, I implore the City to DENY this proposed major amendment and retain the current approved land use for the property.

Respectfully,

Dear all,

I am writing as a twenty-two year old, newly graduated, Cle Elum resident to implore you to deny the Sun Communities 47 North amendment proposal. As someone who has Cle Elum and Roslyn woven tightly into their family's history, my parents, grandparents, and great-grandparents all have had the honor of living in and alongside the residents of these two beautiful towns. Their beauty not only comes from the appreciation and preservation of the nature, but also in the camaraderie and shared respect for one another and the town.

I recognize I am young. Some may even argue I've barely made it to the 'real world'. I mean, I've never even written a letter in opposition before. But there are certain things that throughout my life, have seemed starkly right and wrong. Having attended the University of Washington in Seattle, I am very used to development, it seems like there are ten new buildings every week. I think development can be great, it can bolster school systems, local businesses, and create a healthy city buzz. However, I have also seen firsthand the outcomes of rushed, poorly thought out, and non-community supported developments, and it kills neighborhoods. It drives people away, pushing them to move elsewhere. Seattle is seeing huge influxes of new people but more alarming are the massive migrations of people native to Seattle out of the city. Much of the development has been done poorly and it's pushed people out, it's changed the culture, and it's irrevocably transformed the city. Seattle can survive because it's a metropolitan city, but Cle Elum can't. By voting yes on this proposal, you inevitably drive Cle Elum residents out due to pricing, congestion, and feeling unrepresented. The current residents are the backbone of the city, them leaving destroys the charm of it and it will lose any curb appeal it has. Yes, it's beautiful, but a massive influx of non-invested, non-respectful, RV residents isn't going to positively impact the city, it will destroy it. If the backbone fails, the whole system will collapse and no one will want to visit, it will be a ghost town.

The proposed development quite literally has bad written all over it, it is poorly designed and a clear representation of prioritizing personal interests over community. Prioritizing the well-being and experiences of tourists not even in the town yet over invested residents with generational ties is quite literally embarrassing and in violation of the reasons each of you ran for office, to represent the community. The amount of push back on this proposal should give you all the clarity you need, as representatives of the city's interests, **not** of future tourists, to make the ethical, correct decision for the longevity and preservation of the city. Thoughtful development in Cle Elum could be wonderful, but this is not the right kind of development.

The original zoning protected residents, nature, and balance. This proposal wants to extinguish all the protections designed to preserve that. I believe in Cle Elum's ability to thrive and draw new people in, but a rapid RV expansion that completely defies the very protections to prevent it, is not the way to go.

I urge you to make the decision on behalf of the well-being of your existing residents. If the worst case scenario isn't one that still benefits the existing community, it's not the right choice. Don't turn your back on the people who depend on you. Vote no on the Sun Communities 47 North amendment proposal.

Best,
Vayden Hicks

Re: 47 Degrees North Major Amendment proposal

I am writing to inform the city of my very strong opposition to the Sun Communities 47° North proposal for the Bullfrog flats property. The proposed manufactured home / RV community should not take place because:

- Continued unchecked development cuts into habitat and will cause increased problems for wildlife.
- We already have terrible congestion. This development will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for. In an inevitable emergency, the entire city of Roslyn and their safety will be threatened by this development.
- Is in clear violation of the vision for the property adopted by the city and presented to the public as a condition for annexing Bullfrog Flats into the city. It's not in character with the City of Cle Elum and does not comply with fundamental requirements of the city's comprehensive plan, the development agreement, or zoning for the property.
- Fiscal studies of 47 Degrees North show that it will not create sufficient tax revenue to cover the city's cost to serve it. Unless the developer agrees to financially cover the substantial deficits, forever, existing city taxpayers will be required to subsidize Sun's development and taxes will go up.
- Sun's 47 Degrees North will be in its entirety a private business not a natural neighborhood (no lots sold, all spots leased), wholly owned by a massive out-of-state publicly traded corporation who's fiduciary duty is to its shareholders, not city taxpayers. Any subsidies of the project would be a gift of public funds to a private entity.
- This will be the largest manufactured home/RV park on the West Coast and will double the population of Cle Elum. Parks of this magnitude have no place in a town as small as Cle Elum. We do not have the infrastructure to support upper Kittitas County as it currently exists. The development would exacerbate current problems.
- Sun has eliminated the industrial park component of the approved plan and is proposing a major new retail center to the project which would compete with existing city businesses and will seriously damage Cle Elum's downtown, which the city has invested millions of dollars to reinvigorate. The retail center is in direct conflict with the city's comprehensive plan which states that the Bullfrog Flats Master Plan…."is intended to elevate the DTC (downtown core) as the primary retail and activity nexus for Cle Elum". Current rules for the Bullfrog Flats property prohibit a retail center on the property.
- The 903 where Sun wants to have the new retail center is already too congested.
- Provides no significant benefits to city or UKC residents, but creates serious and significant impacts on roads, police, fire, schools, emergency services, hospitals and other public services that can't be (or won't be) fully mitigated by the developer, and,

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Please listen to what the residents of upper county want and need. We do not want or need this development.

Respectfully,

Victoria Jarvis

Re: 47 Degrees North Major Amendment proposal

I am writing to inform the city of my very strong opposition to the Sun Communities 47° North proposal for the Bullfrog flats property. The proposed manufactured home / RV community:

- Is in clear violation of the vision for the property adopted by the city and presented to the public as a condition for annexing Bullfrog Flats into the city. It's not in character with the City of Cle Elum and does not comply with fundamental requirements of the city's comprehensive plan, the development agreement, or zoning for the property.

- Instead of traditional neighborhoods that were planned to be connected to and a natural extension of the city, supporting the rest of the city, 47 Degrees North would create a private for-profit community and tourist resort with gates, private roads and utilities which will be separated from the rest of the city. It will create a private city within a city, forever.

- Fiscal studies of 47 Degrees North show that it will not create sufficient tax revenue to cover the city's cost to serve it. Unless the developer agrees to financially cover the substantial deficits, forever, existing city taxpayers will be required to subsidize Sun's development and taxes will go up.

- Sun's 47 Degrees North will be in its entirety a private business not a natural neighborhood (no lots sold, all spots leased), wholly owned by a massive out-of-state publicly traded corporation whose fiduciary duty is to its shareholders, not city taxpayers. Any subsidies of the project would be a gift of public funds to a private entity.

- Is not housing as contemplated for the Bullfrog UGA. It will displace half of the actual housing planned for the area and replace it with a private park designed as a transient playground.

- Will be the largest manufactured home/RV park on the West Coast and will double the population of Cle Elum. Parks of this magnitude have no place in a town as small as Cle Elum. Wrong Place, Wrong Size.

- Sun has eliminated the industrial park component of the approved plan and is proposing a major new retail center to the project which would compete with existing city businesses and will seriously damage Cle Elum's downtown, which the city has invested millions of dollars to reinvigorate. The retail center is in direct conflict with the city's comprehensive plan which states that the Bullfrog Flats Master Plan…."is intended to elevate the DTC (downtown core) as the primary retail and activity nexus for Cle Elum". Current rules for the Bullfrog Flats property prohibit a retail center on the property.

- Provides no significant benefits to city or UKC residents, but creates serious and significant impacts on roads, police, fire, schools, emergency services, hospitals and other public services that can't be (or won't be) fully mitigated by the developer.

- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for. Any such increase in taxes will effectively translate to a subsidy for a private business,

- Denial of 47 Degrees North will not take away or reduce underlying property rights. It will simply require Sun Communities to comply with city's current rules, regulations and comprehensive plan for the property. The original underlying zoning approval and development agreement already allows development of this site, just not as a private resort/manufactured home community/retail center.

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Respectfully,

City of Cle Elum – Mayor, City Council members, Planning Department,

Re: 47 Degrees North Major Amendment proposal

I am writing to provide the city with my very strong concerns about the Sun Communities 47° North proposal for the Bullfrog flats property. The proposed manufactured home / RV community:

– is not in character with the City of Ce Elum or the upper valley (a fundamental requirement of the current zoning for the property),
– would create a new and separate private tourist resort and not a natural extension of city neighborhoods as originally envisioned/required by city zoning and current approvals,
– is in its entirety a private business not a neighborhood (no lots will be created or sold, all spots will be leased, and the project will be private), wholly owned by a large out-of-state publically traded corporation who's fiduciary duty is to its shareholders,
– provides no significant benefits to upper valley residents and tax payers, but
– will create serious and significant impacts on roads, police, fire, schools, emergency services, hospitals and other public services that can't (or won't) be fully mitigated by the developer, and therefore,
– will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to

pay for, essentially a subsidy for a private business,

– Denial of the Sun Communities proposal would not take away or reduce underlying property rights. The original underlying zoning approval would still allow development of this site, just not as a private resort/manufactured home community.

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

City of Cle Elum.
I feel sure the voices against this development have well covered the pitfalls of such an endeavor, so I'm going a different way.

1. A few years ago the Dept of Commerce and the US Forest Service joined together to study 'Outdoor Recreation'.
The study showed that Outdoor Recreation was the 1st Gross National Product. This study did not count yachts and such pleasure boats, So, why is Kittitas county not preserving and promoting our natural resources? Roofs are not a renewable source of income.

2. In answering a question I had posed, a local politician shrugged and said,'That's Progress.'
I now wonder what we are progressing toward and what's our ultimate destination?
Do you know?
I'd like to see some deep forward thinking. I'd like our politicians do some critical thinking. . . to step out in a fresh direction. The same old stuff hasn't worked, has it.

3. You bet I am against 47 Degree North, along with other mindless developements.

Thank you for hearing me out.

To: City of Cle Elum – Mayor, City Council members, Planning Department

I'm writing to inform the city of my very strong opposition to the Sun Communities 47° North proposal for the Bullfrog flats property. We moved here to Suncadia Resort to enjoy the small-town feel, gracious residents and the tremendous opportunities for recreation and simply enjoying our quiet outdoors and wild life.

What is being proposed in the current 47 Degrees North plan is going to permanently scar this beautiful place, cause irreparable harm to our shared lands, swamp the area with a new "instant city" of visitors with their RVs, motorcycles, boats and snow machines and is completely out of step with the character of Cle Elum and the surrounding areas. This is not the legacy you would be proud to leave behind.

These are the key issues that I strongly object to:

1. This project will be the largest manufactured home/RV park on the West Coast. Pouring thousands of visitors to our already overcrowded rivers, lakes, camp sites and playgrounds. This proposed project is way too much too fast. A slow growing community like the original plan makes so much more sense for handling infrastructure, creating meaningful jobs. A measured slow and steady growth is welcome.

2. This proposed development provides no significant benefits to city or UKC residents, but creates serious and significant impacts on roads, police, fire, schools, emergency services, medical facilities and other public services that can't be (or won't be) fully mitigated by the developer.

3. I-90 in both directions on a Sunday afternoon is currently gridlock.....adding 600+ RVs towing boats, motorcycles, snow machines etc. will make I-90 impassable. If this project happens, we can add Friday afternoon I-90 gridlock to the mix.

4. Wildfires are inevitable - God forbid one rips though our community we will be forced to compete with thousands of people evacuating RVs on one two lane road. Weve seen it before in Paradise California- complete pandemonium and disaster. Not to mention an impassable gridlock for the firefighters.

5. As I'm sure you are aware, Fiscal studies of 47 Degrees North show that it will not create sufficient tax revenue to cover the city's cost to serve it.

For these reasons, and many more, I implore the City to DENY this proposed major amendment and retain the current approved land use for the property.

Respectfully,

Re: 47 Degrees North

Dear Planning Department:

Members of the Washington State Horse Park Authority board ("WSHPA") have reviewed the various documents provided by the City of Cle Elum ("the City") for public comment regarding the Sun Communities ("Sun") 47 Degrees North project. We also have met via Zoom call with Sun's representatives to discuss questions and issues relevant to Horse Park operations.

Background

Eight easement and license agreements signed in 2010 describe WSHPA's rights to use various parcels included in Sun's application. These ancillary agreements are available in the following link https://drive.google.com/drive/folders/1A35R5uOvXb3VncT2-cWFBdf6DzSJwt7x?usp=sharing.

WSHPA Comments on the Application

The following comments correspond to the maps in the package entitled "Master Plan Update for 47 Degrees North."

Map C000 defines the project site in blue, but the defined area does not encompass the 150 foot strip between the Horse Park and I90. This parcel has ongoing operational significance to the Horse Park and is governed by the Easement and Agreement for Noise Control. ***Sun stated in our meeting that it intends to dedicate this parcel to the City.*** This should be reflected on the site plan and memorialized in the city's decision.

Map C001 and C002 represent Context and Existing Conditions respectively. C001 shows some dashed yellow lines that are not defined, but seem to be only part of the dirt road layout. The overall riding trail system and cross country tracks are not depicted, but these are existing

conditions that should be shown. ***Labels on map C002 are very difficult to read and Sun has committed to provide a more legible version so that the Horse Park can verify that each of the easements and licenses are accurately reflected.*** We request that you provide us with the opportunity to review and comment on a more legible version of this map when it is submitted.

C003 shows the Reserve Parcel as 55 acres as opposed to the 63 acres referenced in earlier documents. ***Sun advised during our Zoom call that the 55 acres was not intended to encompass the entire open space area set aside as the Reserve. Sun agrees that the entire Reserve is 63 acres and includes the slope along the northern boundary as depicted on map C004.*** It would be useful for a note to be added to C003 acknowledging this.

The 8 acres previously designated for affordable housing at the Horse Park's northeast corner is to remain open space. ***Sun stated that this is a potential location for a horseback riding amenity for its guests that Sun would construct at its own expense and that ideally the Horse Park would manage. Details of such an arrangement were left for future discussion.***

C004 shows "public trails" marked with blue dotted lines. Application documents state there will be "approximately 6 miles of trails developed and maintained by Sun Communities open for public use," and "an entire trail network designed for hiking, biking and equestrian uses." There are ***no details available at this time about the equestrian trails including the envisioned locations, overall distance or how they relate to the location and composition of the hiking and biking trails.*** These details are critical because, as we have discussed in previous meetings with Sun representatives, horses are "prey" animals and their natural reaction to sudden visual and/or sound stimulus is to flee. It is essential to understand this response mechanism and minimize conditions that trigger it and which pose serious risk to the rider, the horse, as well as other people, animals and property close by. If the intended equestrian trails are not "horse-friendly" and safe to use in practice, they will not be utilized. We are particularly concerned about this issue because previous "commitments" by Suncadia to provide access to equestrian trails in the master planned resort (see Reciprocal License Agreement for Use of Equestrian Trails on the MPR, Horse Park and Bullfrog Properties) through the equestrian tunnel and under the Cle Elum river bridge to "west side trails" never materialized. ***Sun stated it is its goal to work with the Horse Park to continue to be a destination serving the regional horse community by providing a safe and appealing riding experience through the beautiful woodland open spaces we all cherish and are striving to protect. Specific details of the trails are to be provided by Sun with subsequent planning documents to ensure they meet equestrian needs.***

Specific comments regarding the indicated trail locations:

- The main east-west trail is depicted along the Horse Park's northern property line and adjacent to the maintenance and storage areas and our competition arenas. This close proximity poses significant safety and security concerns. ***The Horse Park would like the***

hiking and biking trail moved to the top of that slope, while the equestrian trail could stay as indicated with fencing installed near its property line to separate trail activity from and protect Horse Park property and visitors. This would locate the equestrian trail within the parcel covered by the Easement Agreement for Spectator Area#8).

- There is some type of dotted line route depicted between the RV resort and residential development which crosses the trail leading north-south between the Horse Park and the equestrian tunnel. There is an Easement Agreement for Access between the Horse Park and Bullfrog Tunnel which protects the Park's rights to use that trail. ***Therefore, the Horse Park would appreciate learning details about the uses Sun has planned for that connection, how it will be constructed and how horse crossing will be safely controlled.***
- ***Sun will provide a more detailed view of how the proposed public trail relates to the slope road/equestrian trail that leads to/from the Managed Open Space.*** The Horse Park constructed this route and its rights to use it are protected by the Access Easement between Event Area and Horse Park
- Horse Park would like to see similar ***details about how the public trail relates to the Horse Park's cross country tracks that are in place in the Managed Open Space***. Please refer to the Event Area License Agreement.

Aside from equestrian uses, there is uncertainty about the activities and amenities Sun envisions for the Managed Open Space and the Reserve parcel and their location***? Sun stated that there are very limited uses allowed by the Kittitas Conservation Trust in the Managed Open Space and in the River Corridor. Sun envisions that these same restrictions that allow only "casual" and "passive" uses will be applied in the Reserve parcel. The Horse Park needs to review the KCT restrictions that Sun is referencing to understand Sun's intentions. Sun did state that it is their intent that the trails they create "do not provide friction with the Horse Park trails" and that their interests in providing safe, horse-friendly riding trails are "perfectly aligned" with the interests of the Horse Park. Conditions need to be incorporated into Sun's plans or imposed by the City to assure these intentions are realized.***

The following issue was not discussed***: How does Sun plan to control public access during Horse Park events when the Reserve parcel and/or the Managed Open Space will be in use?***

C005 reflects a short section of Douglas Munro Blvd. that is to be dedicated to the City. ***The Horse Park pointed out that there are other parcels included in Suncadia's commitment for the entry road to the Horse Park, and would like to know if there is any misunderstanding about that which could impact Horse Park operations.*** Please refer to the Easement for Vehicular Access to the Horse Park.

C006 and C007 show two dashed lines between residential unit numbers 37-38 that would become the reciprocal emergency access for 47 North and the Horse Park. We are concerned that the roadway through the residential development to the exit onto Bullfrog Road is long and circuitous

for vehicles that may be towing horse trailers in an emergency. ***The Horse Park is requesting that Sun create a short emergency-only egress road from the cul de sac at unit #1 to Bullfrog Road to address this important emergency response need. This small area is already cleared for access to the powerline and the equestrian tunnel.***

Very truly yours,

Re: 47 Degrees North Major Amendment proposal

I am writing to inform the city of my very strong opposition to the Sun Communities 47° North proposal for the Bullfrog flats property. The proposed manufactured home / RV community:

- Is in clear violation of the vision for the property adopted by the city and presented to the public as a condition for annexing Bullfrog Flats into the city. It's not in character with the City of Cle Elum and does not comply with fundamental requirements of the city's comprehensive plan, the development agreement, or zoning for the property.

- Instead of traditional neighborhoods that were planned to be connected to and a natural extension of the city, supporting the rest of the city, 47 Degrees North would create a private for-profit community and tourist resort with gates, private roads and utilities which will be separated from the rest of the city. It will create a private city within a city, forever.

- Fiscal studies of 47 Degrees North show that it will not create sufficient tax revenue to cover the city's cost to serve it. Unless the developer agrees to financially cover the substantial deficits, forever, existing city taxpayers will be required to subsidize Sun's development and taxes will go up.

- Sun's 47 Degrees North will be in its entirety a private business not a natural neighborhood (no lots sold, all spots leased), wholly owned by a massive out-of-state publicly traded corporation whose fiduciary duty is to its shareholders, not city taxpayers. Any subsidies of the project would be a gift of public funds to a private entity.

- Is not housing as contemplated for the Bullfrog UGA. It will displace half of the actual housing planned for the area and replace it with a private park designed as a transient playground.

- Will be the largest manufactured home/RV park on the West Coast and will double the population of Cle Elum. Parks of this magnitude have no place in a town as small as Cle Elum. Wrong Place, Wrong Size.

- Sun has eliminated the industrial park component of the approved plan and is proposing a major new retail center to the project which would compete with existing city businesses and will seriously damage Cle Elum's downtown, which the city has invested millions of dollars to reinvigorate. The retail center is in direct conflict with the city's comprehensive plan which states that the Bullfrog Flats Master Plan…."is intended to elevate the DTC (downtown core) as the primary retail and activity nexus for Cle Elum". Current rules for the Bullfrog Flats property prohibit a retail center on the property.

- Provides no significant benefits to city or UKC residents, but creates serious and significant impacts on roads, police, fire, schools, emergency services, hospitals and other public services that can't be (or won't be) fully mitigated by the developer.

- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for. Any such increase in taxes will effectively translate to a subsidy for a private business,

- Denial of 47 Degrees North will not take away or reduce underlying property rights. It will simply require Sun Communities to comply with city's current rules, regulations and comprehensive plan for the property. The original underlying zoning approval and development agreement already allows development of this site, just not as a private resort/manufactured home community/retail center.

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Respectfully,

Wendell L. Saville

RE: 47 Degrees North Amendment Proposal

Dear Mayor McGowan and City Council members,

As a member of the City of Cle Elum, I am writing to request that you DENY the proposed Amendment submitted by Sun Communities regarding the 47 Degrees North for the Bullfrog flats property. I will outline a few of my reasons below and respectfully request that you will take this into consideration for your determination.

Impact to Vital Emergency Services

I reviewed the Addendum to Final SEIS and am baffled at the estimated impact to emergency services, baffled in the sense it is drastically underestimated. For those that live and reside in Cle Elum, we are all aware of the stress that has been placed upon emergency services due to the influx of population over the last few years related to the COVID exodus of the westside residents. Why would the Council agree to this Amendment and even further worsen the situation?

Based on the amended proposal, all residential and RV buildouts will be on an accelerated schedule and completed by 2028 - only 5 short years away!! The estimated Resident / RV population will more than **DOUBLE** the current population of Cle Elum in that same timeframe. The pandemic occurred three years ago, and emergency services are STILL struggling to meet the influx of demand. To place further unnecessary stress upon emergency services is not only illogical, it will be detrimental and lead to the unnecessary loss of life. There is **no way** that emergency services can grow at the rate of the 47 Degrees North population, and before you know it, things will escalate to a level where emergency calls cannot be answered due to limited available resources. What if emergency services cannot make it to your loved one? Is that acceptable? I call it a recipe for disaster.

I also noticed in the SEIS that, although the construction will be on an accelerated 5-year schedule, the cost impact to Fire and Police is spread over 14 YEARS! That doesn't make sense and the numbers do not add up. The influx of population to Cle Elum will be instantaneous – almost overnight. Not gradually increasing over 14 years. The cost of emergency services will skyrocket at an unprecedented level that cannot be met and there will not be the necessary funds to keep up with demand. To forecast the cost impact to the city of Cle Elum based on current budget is *grossly* underestimating the impact of 47 Degrees North, especially given the fact that emergency services are also comprised of many volunteers and therefore, are not reflective within the current budgetary costs. In my opinion, since this development will more the DOUBLE the current population of Cle Elum, it is realistically expected that the impact to emergency services will also DOUBLE during that same timeframe. In fact, due to the

transient nature of the RV visitors, I would even argue that the impact to the City of Cle Elum is more than double. In the SEIS, the RV Proxy Population was estimated to be 1.5 times the number of RV sites (a population of 941 for 637 RV sites). Extrapolating that calculation, it is therefore reasonable to expect that the impact to services will be closer to 1.5 times the current level! I do not believe that there is a labor pool in the area that can support this type of growth and retention for emergency services.

I read through the SEIS, and Sun Communities is NOT providing their own emergency services. In fact, they are NOT committed to do anything for the overall Cle Elum community at all. Emergency services for Sun residents or RV visitors are the FULL burden of the city of Cle Elum and Kittitas County. Therefore, Sun Communities is the ultimate game player making all the rules, reaping all the income, with no commitment or desire to assist with the infrastructure costs that will be required to care for those who are on their premises. They are basically building a fortress without the desire or willingness to ensure the emergency services are in place to care for those who will reside or visit Sun Communities. This should be a big red flag to everyone that Sun Communities is it for the money and bottom line, there is no care regarding the impact to the City of Cle Elum or its citizens.

Traffic Impact

The Narrative and SEIS both contain a lot of data regarding the impact of 47 Degrees North on traffic and roads. However, I found it interesting that none of the data or analysis seemed to take into consideration the special characteristics of an RV / Travel Trailer such as wider turning radiuses and much longer / wider vehicles than the standard car or truck. Given that the Amended proposal includes 637 RV sites, this is a fundamental characteristic that is completely left out of the traffic studies! I therefore conclude that any of the traffic studies or analysis completed for this Amendment be rejected and not relied upon for any realistic impact to the traffic.

As I was reading through the Narrative, I noticed one statistic that stood out to me. On page 7 under section #3 The Recreational Resort, the last sentence of the first paragraph reads:

"Based on seasonality and the flow of guest arrivals, Sun's operational forecasting indicates only fifteen (15) days a year with more than 200 guest arrivals. The entrance area of the Recreational Resort is designed to accommodate without impact to traffic (or traffic queueing) on Bullfrog Road."

This number seems extremely unrealistic to me. If the RV park will contain 637 sites, and it is expected that the majority of the visitors will be weekend travelers, why wouldn't the analysis consider at least a higher percentage of arrivals on any given day? If 637 RV and travel trailers are descending upon Cle Elum EVERY weekend between Memorial Day and Labor Day, this will have a DRASTIC and FATAL impact to the area!

For those familiar with the intersection of Hwy 18 and I-90 on the west side, you know the impact traffic has done to a major intersection – traffic is backed up on I-90 in both directions for miles and miles. Road rage breaks out. Accidents occur. It's gridlock. Now imagine the same traffic trying to enter and exit along Bullfrog Road. Along that stretch of I-90, though, there are only two lanes in each direction. The exit ramps are very short and will not accomodate a large volume of traffic. In a very short time, the traffic will begin backing up onto I-90 in both directions. That would be catastrophic to anyone that travels the I-90 corridor! Not only that, it is a recipe for disaster – road rage, people driving on the shoulder or weaving in and out of backed up traffic, vehicles running out of gas on the freeway from

sitting too long, and many other scenarios too numerous to list. This is NOT the vision of a small town such as Cle Elum. This is the vision of a greedy corporation and blind city leaders that were led down a yellow brick road of empty promises.

City leaders need to address the current traffic issues that already face the City of Cle Elum before allowing a development of this size. Need I remind you of the recent Memorial Day weekend when traffic was backed up on I-90, cars were cutting through South Cle Elum – literally trapping residents in their own homes as they could not leave. I also saw posts on Facebook that the people stuck in the traffic were jumping out of their vehicles and leaving human waste in yards as they needed to relieve themselves – the same for dogs and kids that were in the stuck vehicles. Is this your vision for Cle Elum? What about quality of life? What if there is an emergency such as a wildfire and nobody could get out and emergency vehicles could not get in?

I-90 15 mph westbound rolling stop. No one's going anywhere very soon.

Vision of the City

I was recently reminded of Mayor McGowan's vision of the City of Cle Elum when he was elected in 2015 (based on an article in the Daily Record November 2015). His vision was for small, independent businesses. He also stated that his vision for Bullfrog Flats area be "developed into some kind of research campus". And the Mayor then goes on to state that without someone "who is very savvy we will have no one to protect the city." Hence, Mayor McGown, the plea from those who have voiced their concern regarding 47 Degrees North, PLEASE PROTECT THE CITY.

Also, a reminder of the vision for the city from the Comprehensive Plan which was just adopted in 2019: *"Cle Elum's evolving character will depend in large part upon the type of community the citizens will support through its land use policies. Future land use patterns will strive to reflect the small town qualities, rich cultural history and natural beauty that current residents expect and desire to preserve. Cle Elum strives to function as a 21st century city while retaining its 19th century feel. "*

In closing, I implore the City to DENY this proposed major Amendment and retain the current approved land use for the property.

Respectfully,

Wendy Darcy

Re: 47 Degrees North Major Amendment proposal

I oppose Sun Communities 47° North proposal for the Bullfrog flats property. I am in agreeance with my community members and concur that your proposed development is detrimental to Cle Elum as follows:

- It is in clear violation of the vision for the property adopted by the city and presented to the public as a condition for annexing Bullfrog Flats into the city. It's not in character with the City of Cle Elum and does not comply with fundamental requirements of the city's comprehensive plan, the development agreement, or zoning for the property.

- Instead of traditional neighborhoods that were planned to be connected to and a natural extension of the city, supporting the rest of the city, 47 Degrees North would create a private for-profit community and tourist resort with gates, private roads and utilities which will be separated from the rest of the city. It will create a private city within a city, forever.

- Fiscal studies of 47 Degrees North show that it will not create sufficient tax revenue to cover the city's cost to serve it. Unless the developer agrees to financially cover the substantial deficits, forever, existing city taxpayers will be required to subsidize Sun's development and taxes will go up.

- Sun's 47 Degrees North will be in its entirety a private business not a natural neighborhood (no lots sold, all spots leased), wholly owned by a massive out-of-state publicly traded corporation who's fiduciary duty is to its shareholders, not city taxpayers. Any subsidies of the project would be a gift of public funds to a private entity.

- It is not housing as contemplated for the Bullfrog UGA. It will displace half of the actual housing planned for the area and replace it with a private park designed as a transient playground.

- Will be the largest manufactured home/RV park on the West Coast and will double the population of Cle Elum. Parks of this magnitude have no place in a town as small as Cle Elum. Wrong Place Wrong Size.

- Sun has eliminated the industrial park component of the approved plan and is proposing a major new retail center to the project which would compete with existing city businesses and will seriously damage Cle Elum's downtown, which the city has invested millions of dollars to reinvigorate. The retail center is in direct conflict with the city's comprehensive plan which states that the Bullfrog Flats Master Plan…."is intended to elevate the DTC (downtown core) as the primary retail and activity nexus for Cle Elum". Current rules for the Bullfrog Flats property prohibit a retail center on the property.

- Provides no significant benefits to city or UKC residents, but creates serious and significant impacts on roads, police, fire, schools, emergency services, hospitals and other public services that can't be (or won't be) fully mitigated by the developer, and,

- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for. Any such increase in taxes will effectively translate to a subsidy for a private business,

- Denial of 47 Degrees North will not take away or reduce underlying property rights. It will simply require Sun Communities to comply with city's current rules, regulations and comprehensive plan for the property. The original underlying zoning approval and development agreement already allows development of this site, just not as a private resort/manufactured home community/retail center.

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Respectfully,

Wendy Evans

City of Cle Elum – Mayor, City Council members, Planning Department,

Re: 47 Degrees North Major Amendment proposal

I am writing to provide the city with my very strong concerns about the Sun Communities 47° North proposal for the Bullfrog flats property. The proposed manufactured home / RV community:

– is not in character with the City of Ce Elum or the upper valley (a fundamental requirement of the current zoning for the property),
– would create a new and separate private tourist resort and not a natural extension of city neighborhoods as originally envisioned/required by city zoning and current approvals,
– is in its entirety a private business not a neighborhood (no lots will be created or sold, all spots will be leased, and the project will be private), wholly owned by a large out-of-state publically traded corporation who's fiduciary duty is to its shareholders,
– provides no significant benefits to upper valley residents and tax payers, but
– will create serious and significant impacts on roads, police, fire, schools, emergency services, hospitals and other public services that can't (or won't) be fully mitigated by the developer, and therefore,
– will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for, essentially a subsidy for a private business,
– Denial of the Sun Communities proposal would not take away or reduce underlying property rights. The original underlying zoning approval would still allow development of this site, just not as a private resort/manufactured home community.

For all of these reasons and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Dear Mayor and Council members,
The question before you is should a monied entity be allowed to redefine a plan that was over time developed with certain goals in mind, to a plan that benefits the entity's shareholders, but not the shareholders of Upper Kittitas County- we the people! This proposal fails in many fundamental ways, but in one simple aspect, the fact that the proposal would not encourage home and property ownership, but rather a tenuous lease of property, leaving the Upper County with residents not tied to the land and the rights and expectations of an actual home owner. This is a very bad equation!
Growth and expansion in the area are inevitable, but it should be limited to people with skin in the game, not "investors" who would probably never see the Upper Kittitas County.
Please reject this proposal!!
Sincerely,
Scott Peterson

The retail center is in direct conflict with the city's comprehensive plan which states that the Bullfrog Flats Master Plan...."is intended to elevate the DTC (downtown core) as the primary retail and activity nexus for Cle Elum". Current rules for the Bullfrog Flats property prohibit a retail center on the property.

- Provides no significant benefits to city or UKC residents, but creates serious and significant impacts on roads, police, fire, schools, emergency services, hospitals and other public services that can't be (or won't be) fully mitigated by the developer, and,

- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for. Any such increase in taxes will effectively translate to a subsidy for a private business,

- Denial of 47 Degrees North will not take away or reduce underlying property rights. It will simply require Sun Communities to comply with city's current rules, regulations and comprehensive plan for the property. The original underlying zoning approval and development agreement already allows development of this site, just not as a private resort/manufactured home community/retail center.

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property. Please!

Respectfully,

Will Haag

Re: 47 Degrees North Major Amendment proposal

My name is Will Hicks and our family owns a house located on 621 Equinox Road in Cle Elum. I own and run Sapling Wealth Management, LLC, a family-run investment advisory firm that serves individuals and small business 401(k) clients in the Western & Central Washington area. Of the approximately 1,000 participants in 401(k) plans that I manage, 20% live in the Central Washington area.

I am writing to inform the city of my very strong opposition to the Sun Communities 47° North proposal for the Bullfrog flats property.

I have made it a strategic focus to expand the family business we run in the Central Washington area, as I believe these communities are largely underserved from the standpoint of higher-level financial advice at a reasonable fee. This is also an area where I personally wanted to make a larger commitment of my time and invest myself in the local community. I was incredibility impressed by the 2018 Cle Elum Downtown Master Plan, which we examined before we committed to buying a house in the area. This is an incredibly thoughtful piece of urban planning and it works well with the other plans for the area, such as the 2002 Bull Frog Flats plan. I found the published document to be a thoughtful long-term plan which clearly reflected a community that was willing to work together to achieve a common goal.

My strong objection to the 47 Degrees North Project is on multiple levels.

- **Development Is Necessary and Positive, But This Plan Is Not a Good One:** I will support most any development that supports the city's long term planning objectives. I strongly believe Cle Elum can, and should, have a strong development emphasis in the next few decades. In fact, the 2018 master plan was one of the major reasons I chose Cle Elum to purchase a home, because the community had a shared vision for future development that was thoughtful and well considered. However, does this development support the city's comprehensive plan for its community? Is this plan in keeping with the zoning for this parcel? I feel the easy answer to this question is no. The proposed 47 Degrees North development in many ways acts counter to the city's plans to develop downtown and nuture a tax base to support essential services, such as fire, schools and police. In fact, *I am shocked that this project got as far as it has*, given that many of its key features act to debase the city's long-term planning goals and destabilize the town's future finances.

- **Current "Marriage" Proposal Guarantees Future Acrimony:** 47 Degrees North is a huge project, and it will dramatically change the characteristics of Cle Elum. Therefore, Sun Communities is not just another entity looking to do business in town, they will become the single most important partner in planning the future of Cle Elum. However, this partner has a legal fiduciary obligation to their shareholders, not to the community in which they operate. Not only can you expect this publicly traded company to support these objectives, *it is their legal obligation to serve their shareholder interests.* Therefore, unless basic elements of fairness are negotiated upfront the town should expect that in many situations Sun Communities' interests will not align with the interests of the Cle Elum community. Approving the proposed plan to go forward with the proposed Sun Communities is like choosing to get married to someone who you know will result in years of acrimony. Any type of divorce will be gut wrenching and will be, ultimately, a financial disaster. How can this be a rational decision for the town? Particularly when there are so many other people to "marry" who have your core interests at heart.

- **Partnerships with REITS Can, And Do, Work:** I was a former Real Estate Investment Trust analyst on Wall Street. There are many situations where investment companies (REITS, private equity, etc.) make decisions to go forward with real estate developments that work with the interests of the community. In fact, this happens all the time. The

development package presented to the town does not work with the interest of the community. Send it back to the drawing board.

- **How to Make This Partnership Work:** I believe this proposed project has it all backwards. The dilemma should be pushed back (again) to the developer and the City Council should strongly say: "Give us a solution that supports our community's objectives, as stated in our published planning documents, the 2018 Cle Elum Downtown Master Plan and 2002 Bull Frog Flats plan". Right now, we have a plan that supports a developer's objectives which pressures the town to sacrifice its core long-term interests. Why is the town even willing to entertain this plan? Why has Cle Elum's negotiating leverage become so diminished in this situation? In fact, the town has the MOST leverage in this negotiation right now. Once this plan is approved, Cle Elum has given up considerable control over steering the town's future.

- **Current Plan Risks Progress Made in Cle Elum's Downtown Core:** Cle Elum's comprehensive development plan for its downtown has attracted millions in capital and development. It has created start-up businesses that have injected a new vitality into downtown. Now Sun Communities is proposing a major new retail center to the project which would compete with existing city businesses and will dilute Cle Elum's newfound downtown vibrancy. This is even though the current rules for the Bullfrog Flats property prohibit a retail center on the property.

- **Current Proposal Lacks Integrity & Invites Unwanted Big City Problems:** Following the town's master development plan does not take away or reduce any property rights. Requiring all developers to abide by the city's current rules, regulations and comprehensive plan for the property is a critical part of any long-term strategy and town governance, as it protects the rights and investments of the people currently living in this community. Otherwise, you are just setting the town up for a process for political favoritism and influence ... or worse. Do you really want to invite that into your town?

- **Opportunity For a Thoughtful Planning Benefits the Entire Community in the Long Term:** I firmly believe that in the next 10-20 years the city of Seattle will create an immense amount of wealth through new technology businesses, like cloud services and artificial intelligence. Cle Elum should position itself to benefit from a very high need to hike, bike, camp, fish, ride outside of Seattle's dense urban metropolis, which just 1.5 hour drive away (on days without traffic). This type of recreation is great for the town, as it supports the town's ethos, increases tax revenue & property values and does not have the commiserate increase on town services, such as education. Agreeing to allow Sun Communities' proposed development to go forward will greatly impair the thoughtful, long-term development that is more consistent with Cle Elum's soul.

For all of these reasons, and others, I strongly ask the City to **reject** any major amendment to the town's current zoning & building code and retain the current approved land use for the property.

Respectfully,

Signature

Re: 47 Degrees North Major Amendment proposal

I am writing to inform the city of my VERY strong opposition to the Sun Communities 47° North proposal for the Bullfrog flats property. The proposed manufactured home / RV community:

- Is in clear violation of the vision for the property adopted by the city and presented to the public as a condition for annexing Bullfrog Flats into the city. It's not in character with the City of Cle Elum and does not comply with fundamental requirements of the city's comprehensive plan, the development agreement, or zoning for the property.
- Instead of traditional neighborhoods that were planned to be connected to and a natural extension of the city, supporting the rest of the city, 47 Degrees North would create a private for-profit community and tourist resort with gates, private roads and utilities which will be separated from the rest of the city. It will create a private city within a city, forever.
- Fiscal studies of 47 Degrees North show that it will not create sufficient tax revenue to cover the city's cost to serve it. Unless the developer agrees to financially cover the substantial deficits, forever, existing city taxpayers will be required to subsidize Sun's development and taxes will go up.
- Sun's 47 Degrees North will be in its entirety a private business not a natural neighborhood (no lots sold, all spots leased), wholly owned by a massive out-of-state publicly traded corporation who's fiduciary duty is to its shareholders, not city taxpayers. Any subsidies of the project would be a gift of public funds to a private entity.
- Is not housing as contemplated for the Bullfrog UGA. It will displace half of the actual housing planned for the area and replace it with a private park designed as a transient playground.
- Will be the largest manufactured home/RV park on the West Coast and will double the population of Cle Elum. Parks of this magnitude have no place in a town as small as Cle Elum. Wrong Place Wrong Size.
- Sun has eliminated the industrial park component of the approved plan and is proposing a major new retail center to the project which would compete with existing city businesses and will seriously damage Cle Elum's downtown, which the city has invested millions of dollars to reinvigorate. The retail center is in direct conflict with the city's comprehensive plan which states that the Bullfrog Flats Master Plan...."is intended to elevate the DTC (downtown core) as the primary retail and activity nexus for Cle Elum". Current rules for the Bullfrog Flats property prohibit a retail center on the property.
- Provides no significant benefits to city or UKC residents, but creates serious and significant impacts on roads, police, fire, schools, emergency services, hospitals and other public services that can't be (or won't be) fully mitigated by the developer, and,
- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for. Any such increase in taxes will effectively translate to a subsidy for a private business,
- Denial of 47 Degrees North will not take away or reduce underlying property rights. It will simply require Sun Communities to comply with city's current rules, regulations and comprehensive plan for the property. The original underlying zoning approval and development agreement already allows development of this site, just not as a private resort/manufactured home community/retail center.

Re: 47° North Development Major Amendment proposal

You have heard much opposition to the 47° North Development Major Amendment proposal. I want to reiterate what some have already stated in public comments, the City of Cle Elum is entirely within its rights to deny this land-use change and deny permit approvals.

The Major Amendment would effectively place a commercial project, due to the transient nature of RV park customers, in an area designated for urban growth made up of city neighborhoods consistent with the UGA; this amendment is inconsistent with the comprehensive plan, and does not meet the standard of being in the public interest of long-term residents of the city and neighboring communities.

An RV park would create immense traffic hazards. Large scale motor homes with tow-alongs on a two-lane road would most certainly impact safety for people and wildlife crossings.

The potential to overwhelm the town's sewer system is a very real concern, and it would negatively affect public services, such as fire/rescue and law enforcement. The so-called revenue does not meet the cost to the city and to local residents. There will not be property taxes paid by the park residents so those costs will be passed on to landowners in tax increases.

The city has legal grounds to deny the developer this major change in land-use, with the option of going back to the original approved plan.

Re: 47 Degrees North

The Facts
On May 5, 2021, the City of Cle Elum issued Sun Communities a Temporary Use Authorization in connection with building permits relating to five (5) model manufactured homes to be used for public display. The location of the site is 4240 Bullfrog Road, Cle Elum WA.

That Temporary Use Authorization specifically states:

1) This temporary use shall be limited for a period of not to exceed two years from the date of issuance of the first building permit, provided that the authorization may be extended for one additional year, at the City's sole discretion.
2) The Project Sponsor shall apply, receive, and maintain in good standing a City Business License.
3) Prior to the expiration of this use authorization, the model homes, the temporary garage type structure, and all signage shall be removed, and the Project Sponsor shall return the site to its previous condition.

Sun Communities is in direct violation of the Temporary Use Authorization due to the following:

1) It has failed to remove the units or before May 5, 2023, as required; and
2) No business license was applied for, received or maintained

Relief Requested
The City of Cle Elum should require immediate removal of the structures and not elect to extend the non-conforming so-called Temporary Use Authorization.

General Comments
The Cle Elum Municipal Code does not contemplate such a thing as a Temporary Use Authorization. The code does allow for Special Use Permits and Conditional Use Permits, but each of these have specific qualifiers and conditions of approval. The Zoning associated with the location of these model homes is that of General Commercial. That zone contemplates commerce and general uses that serve the community. The trailers are simply staged in an attempt to fool the public into believing that the 47 Degrees North Development has been approved, which it has not.

On the City's website, under the Recent Planning News page, the City has been actively advertising for the model homes for Sun Communities. Statements such as these indicate to the public that the 47 Degrees North development has been approved and is a done deal, which it is not.

Did you know? Sun Communities is currently displaying models of the manufactured homes proposed for the 47 Degrees North project at 4240 Bullfrog Road near the School District Administration Building!

The community has voiced its opposition to the 47 Degrees North development in a loud and clear manner. Following the public comment period, when the tally is over, the City will likely receive close to 1,000 letters of condemnation associated with the project.

I understand that there is a process in play as it relates to the Sun Communities application. However, the City should not be making up new rules favoring the applicant and thumbing its nose at the community in the process.

You have my request and my comments. Please reply to this correspondence identifying what the City's intentions are.

To Whom It May Concern:

I am a local property owner who is very much opposed to the 47 Degrees North proposed development. Sun Properties has a terrible reputation across the country and is not a business Cle Elum needs to deal with. Further, the proposed development would not pay for itself and will actually cost Cle Elum taxpayers over the years, all while making our roads and single grocery store too crowded! I have yet to see an actual benefit to the community at large, instead only increased cost and stress put on our schools, emergency services, and community resources. PLEASE VOTE NO and reject the 47 Degrees North proposal.

Re: 47 Degrees North Major Amendment proposal

I am writing to inform the city of my very strong opposition to the Sun Communities 47° North proposal for the Bullfrog flats property. The proposed manufactured home / RV community.

As a resident and property owner in Ronald, WA I would like to briefly express my unwavering disagreement with the proposed development and planning of this project for the following reasons -

Not only will the development displace wildlife, but there has also been no expressed plan to improve the local infrastructure concurrent with and to accommodate for the substantial increase in population as a result of this development. Without exception to impact the additional population will have on local small community heritage and that which would also be contradictory to the vision as set by improvements the city has already made and established. M**ost importantly, the proposal is a blatant violation of the current land use designated for this property and Cle Elum has historically held a priority and made precedence to following and upholding land use without amendments.**

Is in clear violation of the vision for the property adopted by the city and presented to the public as a condition for annexing Bullfrog Flats into the city. It's not in character with the City of Cle Elum and does not comply with fundamental requirements of the city's comprehensive plan, the development agreement, or zoning for the property.

Instead of traditional neighborhoods that were planned to be connected to and a natural extension of the city, supporting the rest of the city, 47 Degrees North would create a private for-profit community and tourist resort with gates, private roads and utilities which will be separated from the rest of the city. It will create a private city within a city, forever.

Fiscal studies of 47 Degrees North show that it will not create sufficient tax revenue to cover the city's cost to serve it. Unless the developer agrees to financially cover the substantial deficits, forever, existing city taxpayers will be required to subsidize Sun's development and taxes will go up.

Sun's 47 Degrees North will be in its entirety a private business and not a natural neighborhood (no lots sold, all spots leased), wholly owned by a massive out-of-state publicly traded corporation who's fiduciary duty is to its shareholders, not city taxpayers. Any subsidies of the project would be a gift of public funds to a private entity.

Is not housing as contemplated for the Bullfrog UGA. It will displace half of the actual housing planned for the area and replace it with a private park designed as a transient playground.

Will be the largest manufactured home/RV park on the West Coast and will double the population of Cle Elum. Parks of this magnitude have no place in a town as small as Cle Elum. Wrong Place, Wrong Size.

Sun has eliminated the industrial park component of the approved plan and is proposing a major new retail center to the project which would compete with existing city businesses and will seriously damage Cle Elum's downtown, which the city has invested millions of dollars to reinvigorate. The retail center is in direct conflict with the city's comprehensive plan which states that the Bullfrog Flats Master Plan...."is intended to elevate the DTC (downtown core) as the primary retail and activity nexus for Cle Elum". Current rules for the Bullfrog Flats property prohibit a retail center on the property.

Provides no significant benefits to city or UKC residents, but creates serious and significant impacts on roads, police, fire, schools, emergency services, hospitals and other public services that can't be (or won't be) fully mitigated by the developer, and,
Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for. Any such increase in taxes will effectively translate to a subsidy for a private business,

Denial of 47 Degrees North will not take away or reduce underlying property rights. It will simply require Sun Communities to comply with city's current rules, regulations and comprehensive plan for the property. I am opposed to the 47 Degree North development because:

1) It will increase traffic without providing enough additional taxes to improve the roads needed to carry the traffic
2) It will cause a large increase in students for the local schools without providing enough addition tax income to build the additional school facilities.
3) It will require additional police forces and fire fighters without providing additional taxes to cover the cost of these services

RE 47 Degree North Major Amendment Proposal

This draft Development Agreement is clearly very "developer friendly", and a very unfair deal for the city. In many, if not most, jurisdictions in Washington, 47 Degrees North would be a non-starter, and rejected on its face because it doesn't meet concurrency requirements.

Concurrency is a state law which says if roadways are congested and failing from existing traffic and/or developments already approved and vested, a city can deny new development until enough capacity is added. It is a significant tool small cities can use to manage growth and leverage greater developer participation in road improvements. Under this Development Agreement as written the city would waive its rights under concurrency, taking away that tool and allowing Sun Communities to add more traffic to roads already over capacity.

Sincerely,

Barbara Brunner

166 hummingbird lane, Cle Elum

Dear City of Cle Elum Planners,

I am writing concerning the 47 degree north proposal for Bullfrog flats. I am a lifelong reident of Cle Elum for 62 years. My mother and father are lifelong Cle Elum residents. I currently own 3 low income rental properties within the Cle Elum city limits. I personally reside in the upper county and visit Cle Elum daily.

I have a very strong negative opinion of the Sun Communities 47° North proposal for the Bullfrog flats property. I can foresee many problems with this proposal that would devastate the quality of life in the upper county and the Roslyn-Cle Elum corridor. Some of these immediate concerns are:

1. I see where Cle Elum residents would have to pay a "fee" to use the ammenities at 47 North. Is this an integrated approach or does it foster a us vs. them attitude from the very start? If the development is in the city limits then it should have to provide these ammenties to the whole community.
2. There is not the school capacity to currently handle the increased student load that would come with a large development like this. Huge changes would be required and that would require me to pay even higher property taxes which my low income renters could NOT absorb.
3. There would be a traffic nightmare that I do not see adequately addressed in the proposal. Large RVs would have there own set of problems in the CE traffic matrix.
4. More diluted police coverage due to such a large influx of people. More police = more required city revenue.
5. More diluted EMS coverage due to such a large influx of people. Again, more tax increases.
6. Fire coverage would have to be upgraded very significantly. Who pays for that?
7. Retail business sprawl would now include a 3rd location. (We already have downtown, Safeway hill.) Do we really want a third one? What would the existing businesses get from this type of RV development,
8. Quality of life in our small town would be negatively impacted by a large transient population that comes with such a huge RV development.
9. Cle Elum infrastructure (sewer, storm,water,roads) would have to be significantly upgraded to accommodate this rapid growth, costing many

millions of dollars.

10. Many elderly are unprepared to deal with the large influx of new residents and the issues like traffic, crowds that come with it. Also, the senior center would have to be greatly expanded and this is not in the proposal.

What does the Cle Elum Community get from all this transient development? Nothing but short and long term problems, higher taxes and the destruction of our way of life.

For the reasons above and basic common sense, I beg the City to REJECT this proposed amendment and keep the current approved land use for the property.

Respectfully,

Gary Carlson

Subject: 47 Degrees North

[EXTERNAL EMAIL] DO NOT CLICK links or attachments unless you recognize the sender and know the content is safe.

To Whom It May Concern:
I am against the City Council approving the 47 Degrees North amended proposal.
As many others have mentioned, it is inconceivable that our community resources could provide for the inevitable increase in population over such a short period of time. Growth and change are expected. Can our public utilities, emergency services, current grocery store (one very tired Safeway), schools, childcare, medical/dental providers cope with such a rapid influx of residents?
Besides the mobile/manufactured homes, including 600+ transient RV spaces would add extra pressure on our roads and infrastructures.
In my opinion, the scale of 47 Degrees North is way too massive for Upper Kittitas County. I don't like the idea of Sun Communities being the landlord -collecting a monthly fee for land the manufactured homes sit on. They will increase the monthly fee. Who benefits the most? Not Cle Elum.
We need affordable housing. I cannot believe that putting in manufactured homes (decrease in value over time) on land the homeowner will not own, is a reasonable "affordable housing" option.
I hope the the City Council recommends that 47 Degrees North project will be stopped. I have not heard even one single comment that believes this is a positive move for Cle Elum.
I appreciate the hard work our leaders perform to keep our community vibrant and friendly. Just say NO to 47 Degrees North.
Sincerely,
Beverly Gonyea

Public Comment RE: 47 Degrees North Notice of Application

Government, at the community level, is only as legitimate as its willingness and commitment to uphold the public process. When that becomes irrelevant, manipulated and in extreme cases intentionally abandoned, there is no real government left.

In this age we live in, where leadership at all levels of government is lacking both integrity and continuity, I personally feel our only solace is in our ability to strengthen and protect the small community footprint we choose to live in. Raise families in. Find work in. And build a future with.

To listen to the voices of the citizens and landowners that wake each day inside, or on the fringes, of our limited city boundaries. To respect the efforts they make continuously to ensure it is a safe, prosperous, and uplifting place to live both today and for decades to come.

This effort to protect the community's future is not just reflected in our words today. Cle Elum exists because of the words that have been documented for over 120 years in many public forums. Words that ultimately led to codified agreements that reflected the majority opinion of our citizens at various points in time. These are decades of public comments that have all led to this moment in time. Where the fate of our community's future is in peril. And the wishes and efforts of so many generations could simply be erased.

The Bullfrog Flats UGA Development Agreement was conceived in controversy. But after considerable effort, and strong community input, that Development Agreement was finalized. It became what the community felt best protected our future and respected our past. In exchange for giving up the traditional uses of those lands, there would be room to build the next generation of housing for the city. An extension of our traditional residential neighborhoods, where families owned homes and the land attached.

It was a development plan that paid for its impact, with the perpetual assurance of property taxes that supported the needs of the growing population. A plan that would be built over many years allowing time to adjust for any unforeseen impacts. To ensure that the "sense of community" endured as an extension of the generational history that many city citizens long before us fought for and cherished.

Sun Communities request to modify the approved Bullfrog Flats UGA Development Agreement Master Site Plan must be denied for the following straightforward reasons:

1) The vast reduction in future Property Taxes from the modified uses of this land clearly jeopardizes the future solvency of the City of Cle Elum and its ability to provide the required basic services for its citizens.

2) The scale and context of the proposed land use is severely disproportionate, and disruptive, to the existing context of the current city. The modification from traditional single family neighborhood extensions to vast parks consisting of mobile homes and RV's, will destabilize public safety and community continuity.

3) The ingress/egress of the modified plan gravely compounds, and is simply incapable of actually mitigating, the compressed traffic that would inundate Bullfrog Road as the only arterial surface road handling the I-90 Exit Interchange volume and convergence of significant traffic loads from the adjacent Tumblecreek/Suncadia properties and Roslyn/Ronald/Lakes communities. The nature of our community's topography dramatically increases the probability of wildfire during what is already a high traffic summer season. The existing road system is mathematically incapable of handling an emergency evacuation of the proposed human, passenger vehicle and RV density attached to their proposed land use/design.

4) The reduced proposed build-out timeframe of 5 years, vs. the Development Agreements 20-30 years, is not a feasible timeframe to continuously quantify and adjust to the interlocking unexpected impacts of such a dramatically modified land use, compounded by the already reduced tax revenues.

5) The inherent risks of having a single corporation own 50% of our city, though not illegal, present unfathomable potentially disastrous outcomes. In review of their documents, there is no real guarantee for our community of the quality of their ability to manage the parks they propose to create. To meet reasonable standards for health and public safety at all times. To even be financially viable as a company in the future. Or if they become disenchanted with the project, to not sell to another entity that has even less scruples.

Our City Council has the inherent responsibility to make decisions that support a financially viable, thriving community today and in the future. The Bullfrog Flats UGA Development Agreement supported that. The modifications requested by Sun Communities in their 47 Degrees North Application do not.

Sun Communities made the decision to purchase this land knowing full well what the approved Development Agreement would require. It is within their rights to request the city, and by extension each citizen of our community, accommodate their drastically modified vision. It is squarely within the Cle Elum City Councils rights to deny such a request, holding true to the community's approved vision as stipulated decades ago.

Public Comment RE: 47 Degrees North Notice of Application

Government, at the community level, is only as legitimate as its willingness and commitment to uphold the public process. When that becomes irrelevant, manipulated and in extreme cases intentionally abandoned, there is no real government left.

In this age we live in, where leadership at all levels of government is lacking both integrity and continuity, I personally feel our only solace is in our ability to strengthen and protect the small community footprint we choose to live in. Raise families in. Find work in. And build a future with.

To listen to the voices of the citizens and landowners that wake each day inside, or on the fringes, of our limited city boundaries. To respect the efforts they make continuously to ensure it is a safe, prosperous, and uplifting place to live both today and for decades to come.

This effort to protect the community's future is not just reflected in our words today. Cle Elum exists because of the words that have been documented for over 120 years in many public forums. Words that ultimately led to codified agreements that reflected the majority opinion of our citizens at various points in time. These are decades of public comments that have all led to this moment in time. Where the fate of our community's future is in peril. And the wishes and efforts of so many generations could simply be erased.

The Bullfrog Flats UGA Development Agreement was conceived in controversy. But after considerable effort, and strong community input, that Development Agreement was finalized. It became what the community felt best protected our future and respected our past. In exchange for giving up the traditional uses of those lands, there would be room to build the next generation of housing for the city. An extension of our traditional residential neighborhoods, where families owned homes and the land attached.

It was a development plan that paid for its impact, with the perpetual assurance of property taxes that supported the needs of the growing population. A plan that would be built over many years allowing time to adjust for any unforeseen impacts. To ensure that the "sense of community" endured as an extension of the generational history that many city citizens long before us fought for and cherished.

Sun Communities request to modify the approved Bullfrog Flats UGA Development Agreement Master Site Plan must be denied for the following straightforward reasons:

1) The vast reduction in future Property Taxes from the modified uses of this land clearly jeopardizes the future solvency of the City of Cle Elum and its ability to provide the required basic services for its citizens.

2) The scale and context of the proposed land use is severely disproportionate, and disruptive, to the existing context of the current city. The modification from traditional single family neighborhood extensions to vast parks consisting of mobile homes and RV's, will destabilize public safety and community continuity.

3) The ingress/egress of the modified plan gravely compounds, and is simply incapable of actually mitigating, the compressed traffic that would inundate Bullfrog Road as the only arterial surface road handling the I-90 Exit Interchange volume and convergence of significant traffic loads from the adjacent Tumblecreek/Suncadia properties and Roslyn/Ronald/Lakes communities. The nature of our community's topography dramatically increases the probability of wildfire during what is already a high traffic summer season. The existing road system is mathematically incapable of handling an emergency evacuation of the proposed human, passenger vehicle and RV density attached to their proposed land use/design.

4) The reduced proposed build-out timeframe of 5 years, vs. the Development Agreements 20-30 years, is not a feasible timeframe to continuously quantify and adjust to the interlocking unexpected impacts of such a dramatically modified land use, compounded by the already reduced tax revenues.

5) The inherent risks of having a single corporation own 50% of our city, though not illegal, present unfathomable potentially disastrous outcomes. In review of their documents, there is no real guarantee for our community of the quality of their ability to manage the parks they propose to create. To meet reasonable standards for health and public safety at all times. To even be financially viable as a company in the future. Or if they become disenchanted with the project, to not sell to another entity that has even less scruples.

Our City Council has the inherent responsibility to make decisions that support a financially viable, thriving community today and in the future. The Bullfrog Flats UGA Development Agreement supported that. The modifications requested by Sun Communities in their 47 Degrees North Application do not.

Sun Communities made the decision to purchase this land knowing full well what the approved Development Agreement would require. It is within their rights to request the city, and by extension the citizen of our community, accommodate their drastically modified vision. It is squarely within the Cle Elum City Councils rights to deny such a request, holding true to the community's approved vision as stipulated decades ago.

RE: 47 Degrees North Major Amendment Proposal

I am writing to inform the city of my extraordinarily strong opposition to the Sun Communities 47° North proposal for the Bullfrog flats property. The proposed manufactured home / RV community will result in negative impacts:

- Traffic gridlock with high volume of transient visitors in large recreational vehicles
- Decreased level of service for emergency medical services
- Decreased level of service for police protection
- Decreased level of service for fire protection
- Increased tax burden on existing property owners to pay for aging infrastructure (water, sewer, power, roads)
- Increased 2nd home ownership within a private resort adversely impacting many throughout the community.
- Adverse impact to downtown core businesses as resort environment will drive dollars to remain at the resort.
- Potential to increase jobs yet does little to offer adequate affordable housing options in relationship to number of workers necessary to support multiple resorts in the area.
- Potential to require additional city resources to manage and address concerns by a high volume of transient visitors.
- High volume of short-term rentals (STRs) tax revenue by law are applied to tourism rather than infrastructure upgrades.
- 90% of profits will be, by law, sent out of our community to Wall Street investors.

For these reasons, I implore the City to DENY this proposed major amendment and retain the current approved land use for the property.

Respectfully,

Alicia Corbett

Re: 47 Degrees North Major Amendment proposal

I am writing to inform the city of my very strong opposition to the Sun Communities 47° North proposal for the Bullfrog flats property. The proposed manufactured home / RV community:

- Is in clear violation of the vision for the property adopted by the city and presented to the public as a condition for annexing Bullfrog Flats into the city. It's not in character with the City of Cle Elum and does not comply with fundamental requirements of the city's comprehensive plan, the development agreement, or zoning for the property.

- Instead of traditional neighborhoods that were planned to be connected to and a natural extension of the city, supporting the rest of the city, 47 Degrees North would create a private for-profit community and tourist resort with gates, private roads and utilities which will be separated from the rest of the city. It will create a private city within a city, forever.

- Fiscal studies of 47 Degrees North show that it will not create sufficient tax revenue to cover the city's cost to serve it. Unless the developer agrees to financially cover the substantial deficits, forever, existing city taxpayers will be required to subsidize Sun's development and taxes will go up.

- Sun's 47 Degrees North will be in its entirety a private business not a natural neighborhood (no lots sold, all spots leased), wholly owned by a massive out-of-state publicly traded corporation whose fiduciary duty is to its shareholders, not city taxpayers. Any subsidies of the project would be a gift of public funds to a private entity.

- Is not housing as contemplated for the Bullfrog UGA. It will displace half of the actual housing planned for the area and replace it with a private park designed as a transient playground.

- Will be the largest manufactured home/RV park on the West Coast and will double the population of Cle Elum. Parks of this magnitude have no place in a town as small as Cle Elum. Wrong Place, Wrong Size.

- Sun has eliminated the industrial park component of the approved plan and is proposing a major new retail center to the project which would compete with existing city businesses and will seriously damage Cle Elum's downtown, which the city has invested millions of dollars to reinvigorate. The retail center is in direct conflict with the city's comprehensive plan which states that the Bullfrog Flats Master Plan…."is intended to elevate the DTC (downtown core) as the primary retail and activity nexus for Cle Elum". Current rules for the Bullfrog Flats property prohibit a retail center on the property.

- Provides no significant benefits to city or UKC residents, but creates serious and significant impacts on roads, police, fire, schools, emergency services, hospitals and other public services that can't be (or won't be) fully mitigated by the developer.

- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for. Any such increase in taxes will effectively translate to a subsidy for a private business,

- Denial of 47 Degrees North will not take away or reduce underlying property rights. It will simply require Sun Communities to comply with city's current rules, regulations and comprehensive plan for the property. The original underlying zoning approval and development agreement already allows development of this site, just not as a private resort/manufactured home community/retail center.

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Respectfully,

Deborah Robinson

Any subsidies of the project would be a gift of public funds to a private entity.

- Is not housing as contemplated for the Bullfrog UGA. It will displace half of the actual housing planned for the area and replace it with a private park designed as a transient playground.

- Will be the largest manufactured home/RV park on the West Coast and will double the population of Cle Elum. Parks of this magnitude have no place in a town as small as Cle Elum. Wrong Place, Wrong Size.

- Sun has eliminated the industrial park component of the approved plan and is proposing a major new retail center to the project which would compete with existing city businesses and will seriously damage Cle Elum's downtown, which the city has invested millions of dollars to reinvigorate. The retail center is in direct conflict with the city's comprehensive plan which states that the Bullfrog Flats Master Plan...."is intended to elevate the DTC (downtown core) as the primary retail and activity nexus for Cle Elum". Current rules for the Bullfrog Flats property prohibit a retail center on the property.

- Provides no significant benefits to city or UKC residents, but creates serious and significant impacts on roads, police, fire, schools, emergency services, hospitals and other public services that can't be (or won't be) fully mitigated by the developer.

- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for. Any such increase in taxes will effectively translate to a subsidy for a private business,

- Denial of 47 Degrees North will not take away or reduce underlying property rights. It will simply require Sun Communities to comply with city's current rules, regulations and comprehensive plan for the property. The original underlying zoning approval and development agreement already allows development of this site, just not as a private resort/manufactured home community/retail center.

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Respectfully,

Re: 47 Degrees North Major Amendment proposal

I am writing to inform the city of my very strong opposition to the Sun Communities 47° North proposal for the Bullfrog flats property. The proposed manufactured home / RV community:

- Is in clear violation of the vision for the property adopted by the city and presented to the public as a condition for annexing Bullfrog Flats into the city. It's not in character with the City of Cle Elum and does not comply with fundamental requirements of the city's comprehensive plan, the development agreement, or zoning for the property.

- Instead of traditional neighborhoods that were planned to be connected to and a natural extension of the city, supporting the rest of the city, 47 Degrees North would create a private for-profit community and tourist resort with gates, private roads and utilities which will be separated from the rest of the city. It will create a private city within a city, forever.

- Fiscal studies of 47 Degrees North show that it will not create sufficient tax revenue to cover the city's cost to serve it. Unless the developer agrees to financially cover the substantial deficits, forever, existing city taxpayers will be required to subsidize Sun's development and taxes will go up.

- Sun's 47 Degrees North will be in its entirety a private business not a natural neighborhood (no lots sold, all spots leased), wholly owned by a massive out-of-state publicly traded corporation whose fiduciary duty is to its shareholders, not city taxpayers. Any subsidies of the project would be a gift of public funds to a private entity.

- Will be the largest manufactured home/RV park on the West Coast and will double the population of Cle Elum. Parks of this magnitude have no place in a town as small as Cle Elum. Wrong Place, Wrong Size.

- Sun has eliminated the industrial park component of the approved plan and is proposing a major new retail center to the project which would compete with existing city businesses and will seriously damage Cle Elum's downtown, which the city has invested millions of dollars to reinvigorate. The retail center is in direct conflict with the city's comprehensive plan which states that the Bullfrog Flats Master Plan…."is intended to elevate the DTC (downtown core) as the primary retail and activity nexus for Cle Elum". Current rules for the Bullfrog Flats property prohibit a retail center on the property.

- Provides no significant benefits to city or UKC residents, but creates serious and significant impacts on roads, police, fire, schools, emergency services, hospitals and other public services that can't be (or won't be) fully mitigated by the developer.

- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for. Any such increase in taxes will effectively translate to a subsidy for a private business,

- Denial of 47 Degrees North will not take away or reduce underlying property rights. It will simply require Sun Communities to comply with city's current rules, regulations and comprehensive plan for the property. The original underlying zoning approval and development agreement already allows development of this site, just not as a private resort/manufactured home community/retail center.

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Respectfully,

Re: 47 Degrees North Major Amendment proposal

I am writing to inform the city of my very strong opposition to the Sun Communities 47° North proposal for the Bullfrog flats property. The proposed manufactured home / RV community:

- Is in clear violation of the vision for the property adopted by the city and presented to the public as a condition for annexing Bullfrog Flats into the city. It's not in character with the City of Cle Elum and does not comply with fundamental requirements of the city's comprehensive plan, the development agreement, or zoning for the property.

- Instead of traditional neighborhoods that were planned to be connected to and a natural extension of the city, supporting the rest of the city, 47 Degrees North would create a private for-profit community and tourist resort with gates, private roads and utilities which will be separated from the rest of the city. It will create a private city within a city, forever.

- Fiscal studies of 47 Degrees North show that it will not create sufficient tax revenue to cover the city's cost to serve it. Unless the developer agrees to financially cover the substantial deficits, forever, existing city taxpayers will be required to subsidize Sun's development and taxes will go up.

- Sun's 47 Degrees North will be in its entirety a private business not a natural neighborhood (no lots sold, all spots leased), wholly owned by a massive out-of-state publicly traded corporation whose fiduciary duty is to its shareholders, not city taxpayers. Any subsidies of the project would be a gift of public funds to a private entity.

- Is not housing as contemplated for the Bullfrog UGA. It will displace half of the actual housing planned for the area and replace it with a private park designed as a transient playground.

- Will be the largest manufactured home/RV park on the West Coast and will double the population of Cle Elum. Parks of this magnitude have no place in a town as small as Cle Elum. Wrong Place, Wrong Size.

- Sun has eliminated the industrial park component of the approved plan and is proposing a major new retail center to the project which would compete with existing city businesses and will seriously damage Cle Elum's downtown, which the city has invested millions of dollars to reinvigorate. The retail center is in direct conflict with the city's comprehensive plan which states that the Bullfrog Flats Master Plan…."is intended to elevate the DTC (downtown core) as the primary retail and activity nexus for Cle Elum". Current rules for the Bullfrog Flats property prohibit a retail center on the property.

- Provides no significant benefits to city or UKC residents, but creates serious and significant impacts on roads, police, fire, schools, emergency services, hospitals and other public services that can't be (or won't be) fully mitigated by the developer.

- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for. Any such increase in taxes will effectively translate to a subsidy for a private business,

- Denial of 47 Degrees North will not take away or reduce underlying property rights. It will simply require Sun Communities to comply with city's current rules, regulations and comprehensive plan for the property. The original underlying zoning approval and development agreement already allows development of this site, just not as a private resort/manufactured home community/retail center.

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Respectfully,

John A Snedeker

Re: 47 Degrees North Major Amendment proposal

I am writing to inform the city of my very strong opposition to the Sun Communities 47° North proposal for the Bullfrog flats property. The proposed manufactured home / RV community:

- Is in clear violation of the vision for the property adopted by the city and presented to the public as a condition for annexing Bullfrog Flats into the city. It's not in character with the City of Cle Elum and does not comply with fundamental requirements of the city's comprehensive plan, the development agreement, or zoning for the property.

- Instead of traditional neighborhoods that were planned to be connected to and a natural extension of the city, supporting the rest of the city, 47 Degrees North would create a private for-profit community and tourist resort with gates, private roads and utilities which will be separated from the rest of the city. It will create a private city within a city, forever.

- Fiscal studies of 47 Degrees North show that it will not create sufficient tax revenue to cover the city's cost to serve it. Unless the developer agrees to financially cover the substantial deficits, forever, existing city taxpayers will be required to subsidize Sun's development and taxes will go up.

- Sun's 47 Degrees North will be in its entirety a private business not a natural neighborhood (no lots sold, all spots leased), wholly owned by a massive out-of-state publicly traded corporation whose fiduciary duty is to its shareholders, not city taxpayers. Any subsidies of the project would be a gift of public funds to a private entity.

- Is not housing as contemplated for the Bullfrog UGA. It will displace half of the actual housing planned for the area and replace it with a private park designed as a transient playground.

- Will be the largest manufactured home/RV park on the West Coast and will double the population of Cle Elum. Parks of this magnitude have no place in a town as small as Cle Elum. Wrong Place, Wrong Size.

- Sun has eliminated the industrial park component of the approved plan and is proposing a major new retail center to the project which would compete with existing city businesses and will seriously damage Cle Elum's downtown, which the city has invested millions of dollars to reinvigorate. The retail center is in direct conflict with the city's comprehensive plan which states that the Bullfrog Flats Master Plan…."is intended to elevate the DTC (downtown core) as the primary retail and activity nexus for Cle Elum". The retail center is in direct conflict with the city's comprehensive plan which states that the Bullfrog Flats Master Plan…."is intended to elevate the DTC (downtown core) as the primary retail and activity nexus for Cle Elum". Current rules for the Bullfrog Flats property prohibit a retail center on the property.

- Provides no significant benefits to city or UKC residents, but creates serious and significant impacts on roads, police, fire, schools, emergency services, hospitals and other public services that can't be (or won't be) fully mitigated by the developer.

- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for. Any such increase in taxes will effectively translate to a subsidy for a private business,

- Denial of 47 Degrees North will not take away or reduce underlying property rights. It will simply require Sun Communities to comply with city's current rules, regulations and comprehensive plan for the property. The original underlying zoning approval and development agreement already allows development of this site, just not as a private resort/manufactured home community/retail center.

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Respectfully,

_____

Re: 47 Degrees North Major Amendment proposal

I am writing to inform the city of my very strong opposition to the Sun Communities 47° North proposal for the Bullfrog flats property. The proposed manufactured home / RV community:

- Is in clear violation of the vision for the property adopted by the city and presented to the public as a condition for annexing Bullfrog Flats into the city. It's not in character with the City of Cle Elum and does not comply with fundamental requirements of the city's comprehensive plan, the development agreement, or zoning for the property.

- Instead of traditional neighborhoods that were planned to be connected to and a natural extension of the city, supporting the rest of the city, 47 Degrees North would create a private for-profit community and tourist resort with gates, private roads and utilities which will be separated from the rest of the city. It will create a private city within a city, forever.

- Fiscal studies of 47 Degrees North show that it will not create sufficient tax revenue to cover the city's cost to serve it. Unless the developer agrees to financially cover the substantial deficits, forever, existing city taxpayers will be required to subsidize Sun's development and taxes will go up.

- Sun's 47 Degrees North will be in its entirety a private business not a natural neighborhood (no lots sold, all spots leased), wholly owned by a massive out-of-state publicly traded corporation whose fiduciary duty is to its shareholders, not city taxpayers. Any subsidies of the project would be a gift of public funds to a private entity.

- Is not housing as contemplated for the Bullfrog UGA. It will displace half of the actual housing planned for the area and replace it with a private park designed as a transient playground.

- Will be the largest manufactured home/RV park on the West Coast and will double the population of Cle Elum. Parks of this magnitude have no place in a town as small as Cle Elum. Wrong Place, Wrong Size.

- Sun has eliminated the industrial park component of the approved plan and is proposing a major new retail center to the project which would compete with existing city businesses and will seriously damage Cle Elum's downtown, which the city has invested millions of dollars to reinvigorate. The retail center is in direct conflict with the city's comprehensive plan which states that the Bullfrog Flats Master Plan…."is intended to elevate the DTC (downtown core) as the primary retail and activity nexus for Cle Elum". Current rules for the Bullfrog Flats property prohibit a retail center on the property.

It will simply require Sun Communities to comply with city's current rules, regulations and comprehensive plan for the property. The original underlying zoning approval and development agreement already allows development of this site, just not as a private resort/manufactured home community/retail center.

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Respectfully,

Re: 47 Degrees North Major Amendment proposal

I am writing to inform the city of my very strong opposition to the Sun Communities 47° North proposal for the Bullfrog flats property. The proposed manufactured home / RV community:

- Is in clear violation of the vision for the property adopted by the city and presented to the public as a condition for annexing Bullfrog Flats into the city. It's not in character with the City of Cle Elum and does not comply with fundamental requirements of the city's comprehensive plan, the development agreement, or zoning for the property.

- Instead of traditional neighborhoods that were planned to be connected to and a natural extension of the city, supporting the rest of the city, 47 Degrees North would create a private for-profit community and tourist resort with gates, private roads and utilities which will be separated from the rest of the city. It will create a private city within a city, forever.

- Fiscal studies of 47 Degrees North show that it will not create sufficient tax revenue to cover the city's cost to serve it. Unless the developer agrees to financially cover the substantial deficits, forever, existing city taxpayers will be required to subsidize Sun's development and taxes will go up.

- Sun's 47 Degrees North will be in its entirety a private business not a natural neighborhood (no lots sold, all spots leased), wholly owned by a massive out-of-state publicly traded corporation whose fiduciary duty is to its shareholders, not city taxpayers. Any subsidies of the project would be a gift of public funds to a private entity.

- Is not housing as contemplated for the Bullfrog UGA. It will displace half of the actual housing planned for the area and replace it with a private park designed as a transient playground.

- Will be the largest manufactured home/RV park on the West Coast and will double the population of Cle Elum. Parks of this magnitude have no place in a town as small as Cle Elum. Wrong Place, Wrong Size.

- Sun has eliminated the industrial park component of the approved plan and is proposing a major new retail center to the project which would compete with existing city businesses and will seriously damage Cle Elum's downtown, which the city has invested millions of dollars to reinvigorate. The retail center is in direct conflict with the city's comprehensive plan which states that the Bullfrog Flats Master Plan…."is intended to elevate the DTC (downtown core) as the primary retail and activity nexus for Cle Elum". Current rules for the Bullfrog Flats property prohibit a retail center on the property.

- Provides no significant benefits to city or UKC residents, but creates serious and significant impacts on roads, police, fire, schools, emergency services, hospitals and other public services that can't be (or won't be) fully mitigated by the developer.

- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for. Any such increase in taxes will effectively translate to a subsidy for a private business,

- Denial of 47 Degrees North will not take away or reduce underlying property rights. It will simply require Sun Communities to comply with city's current rules, regulations and comprehensive plan for the property. The original underlying zoning approval and development agreement already allows development of this site, just not as a private resort/manufactured home community/retail center.

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Re: 47 Degrees North Major Amendment proposal

I am writing to inform the city of my very strong opposition to the Sun Communities 47° North proposal for the Bullfrog flats property. The proposed manufactured home / RV community:

- Is in clear violation of the vision for the property adopted by the city and presented to the public as a condition for annexing Bullfrog Flats into the city. It's not in character with the City of Ce Elum and does not comply with fundamental requirements of the city's comprehensive plan, the development agreement, or zoning for the property.

- Instead of traditional neighborhoods that were planned to be connected to and a natural extension of the city, supporting the rest of the city, 47 Degrees North would create a private for-profit community and tourist resort with gates, private roads and utilities which will be separated from the rest of the city. It will create a private city within a city, forever.

- Fiscal studies of 47 Degrees North show that it will not create sufficient tax revenue to cover the city's cost to serve it. Unless the developer agrees to financially cover the substantial deficits, forever, existing city taxpayers will be required to subsidize Sun's development and taxes will go up.

- Sun's 47 Degrees North will be in its entirety a private business not a natural neighborhood (no lots sold, all spots leased), wholly owned by a massive out-of-state publicly traded corporation who's fiduciary duty is to its shareholders, not city taxpayers. Any subsidies of the project would be a gift of public funds to a private entity.

- Is not housing as contemplated for the Bullfrog UGA. It will displace half of the actual housing planned for the area and replace it with a private park designed as a transient playground.

- Will be the largest manufactured home/RV park on the West Coast and will double the population of Cle Elum. Parks of this magnitude have no place in a town as small as Cle Elum. Wrong Place Wrong Size.

- Sun has eliminated the industrial park component of the approved plan and is proposing a major new retail center to the project which would compete with existing city businesses and will seriously damage Cle Elum's downtown, which the city has invested millions of dollars to reinvigorate. The retail center is in direct conflict with the city's comprehensive plan which states that the Bullfrog Flats Master Plan…."is intended to elevate the DTC (downtown core) as the primary retail and activity nexus for Cle Elum". Current rules for the Bullfrog Flats property prohibit a retail center on the property.

- Provides no significant benefits to city or UKC residents, but creates serious and significant impacts on roads, police, fire, schools, emergency services, hospitals and other public services that can't be (or won't be) fully mitigated by the developer.

- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for. Any such increase in taxes will effectively translate to a subsidy for a private business,

- Denial of 47 Degrees North will not take away or reduce underlying property rights. It will simply require Sun Communities to comply with city's current rules, regulations and comprehensive plan for the property. The original underlying zoning approval and development agreement already allows development of this site, just not as a private resort/manufactured home community/retail center.

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Respectfully,

Cherie Munson

Re: 47 Degrees North Major Amendment proposal

I am writing to inform the city of my very strong opposition to the Sun Communities 47° North proposal for the Bullfrog flats property. The proposed manufactured home / RV community:

- Is in clear violation of the vision for the property adopted by the city and presented to the public as a condition for annexing Bullfrog Flats into the city. It's not in character with the City of Cle Elum and does not comply with fundamental requirements of the city's comprehensive plan, the development agreement, or zoning for the property.

- Instead of traditional neighborhoods that were planned to be connected to and a natural extension of the city, supporting the rest of the city, 47 Degrees North would create a private for-profit community and tourist resort with gates, private roads and utilities which will be separated from the rest of the city. It will create a private city within a city, forever.

- Fiscal studies of 47 Degrees North show that it will not create sufficient tax revenue to cover the city's cost to serve it. Unless the developer agrees to financially cover the substantial deficits, forever, existing city taxpayers will be required to subsidize Sun's development and taxes will go up.

- Sun's 47 Degrees North will be in its entirety a private business not a natural neighborhood (no lots sold, all spots leased), wholly owned by a massive out-of-state publicly traded corporation whose fiduciary duty is to its shareholders, not city taxpayers. Any subsidies of the project would be a gift of public funds to a private entity.

- Is not housing as contemplated for the Bullfrog UGA. It will displace half of the actual housing planned for the area and replace it with a private park designed as a transient playground.

- Will be the largest manufactured home/RV park on the West Coast and will double the population of Cle Elum. Parks of this magnitude have no place in a town as small as Cle Elum. Wrong Place, Wrong Size.

- Sun has eliminated the industrial park component of the approved plan and is proposing a major new retail center to the project which would compete with existing city businesses and will seriously damage Cle Elum's downtown, which the city has invested millions of dollars to reinvigorate. The retail center is in direct conflict with the city's comprehensive plan which states that the Bullfrog Flats Master Plan…."is intended to elevate the DTC (downtown core) as the primary retail and activity nexus for Cle Elum". Current rules for the Bullfrog Flats property prohibit a retail center on the property.

- Provides no significant benefits to city or UKC residents, but creates serious and significant impacts on roads, police, fire, schools, emergency services, hospitals and other public services that can't be (or won't be) fully mitigated by the developer.

- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for. Any such increase in taxes will effectively translate to a subsidy for a private business,

- Denial of 47 Degrees North will not take away or reduce underlying property rights. It will simply require Sun Communities to comply with city's current rules, regulations and comprehensive plan for the property. The original underlying zoning approval and development agreement already allows development of this site, just not as a private resort/manufactured home community/retail center.

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Respectfully,

Re: 47 Degrees North Major Amendment proposal

I am writing to inform the city of my very strong opposition to the Sun Communities 47° North proposal for the Bullfrog flats property. The proposed manufactured home / RV community will result in negative impacts:

- Traffic gridlock with high volume of transient visitors in large recreational vehicles
- Decreased level of service for emergency medical services
- Decreased level of service for police protection
- Decreased level of service for fire protection
- Increased tax burden on existing property owners to pay for aging infrastructure (water, sewer, power, roads)
- Increased 2nd home ownership within a private resort adversely impacting many throughout the community
- Adverse impact to downtown core businesses as resort environment will drive dollars to remain at the resort
- Potential to increase jobs yet does little to offer adequate affordable housing options in relationship to amount of workers necessary to support multiple resorts in the area
- Potential to require additional city resources to manage and address concerns by a high volume of transient visitors
- High volume of short term rentals (STRs) tax revenue by law are applied tourism rather than infrastructure upgrades
- 90% of profits will be, by law, sent out of our community to Wall Street investors

For these reasons, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Re: 47 Degrees North Major Amendment proposal

I am writing to inform the city of my very strong opposition to the Sun Communities 47° North proposal for the Bullfrog flats property. The proposed manufactured home / RV community:

- Is in clear violation of the vision for the property adopted by the city and presented to the public as a condition for annexing Bullfrog Flats into the city. It's not in character with the City of Cle Elum and does not comply with fundamental requirements of the city's comprehensive plan, the development agreement, or zoning for the property.
- Instead of traditional neighborhoods that were planned to be connected to and a natural extension of the city, supporting the rest of the city, 47 Degrees North would create a private for-profit community and tourist resort with gates, private roads and utilities which will be separated from the rest of the city. It will create a private city within a city, forever.
- Fiscal studies of 47 Degrees North show that it will not create sufficient tax revenue to cover the city's cost to serve it. Unless the developer agrees to financially cover the substantial deficits, forever, existing city taxpayers will be required to subsidize Sun's development and taxes will go up.
- Sun's 47 Degrees North will be in its entirety a private business not a natural neighborhood (no lots sold, all spots leased), wholly owned by a massive out-of-state publicly traded corporation whose fiduciary duty is to its shareholders, not city taxpayers. Any subsidies of the project would be a gift of public funds to a private entity.
- Is not housing as contemplated for the Bullfrog UGA. It will displace half of the actual housing planned for the area and replace it with a private park designed as a transient playground.
- Will be the largest manufactured home/RV park on the West Coast and will double the population of Cle Elum. Parks of this magnitude have no place in a town as small as Cle Elum. Wrong Place, Wrong Size.
- Sun has eliminated the industrial park component of the approved plan and is proposing a major new retail center to the project which would compete with existing city businesses and will seriously damage Cle Elum's downtown, which the city has invested millions of dollars to reinvigorate. The retail center is in direct conflict with the city's comprehensive plan which states that the Bullfrog Flats Master Plan...."is intended to elevate the DTC (downtown core) as the primary retail and activity nexus for Cle Elum". Current rules for the Bullfrog Flats property prohibit a retail center on the property.
- Provides no significant benefits to city or UKC residents, but creates serious and significant impacts on roads, police, fire, schools, emergency services, hospitals and other public services that can't be (or won't be) fully mitigated by the developer.
- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for. Any such increase in taxes will effectively translate to a subsidy for a private business,
- Denial of 47 Degrees North will not take away or reduce underlying property rights. It will simply require Sun Communities to comply with city's current rules, regulations and comprehensive plan for the property. The original underlying zoning approval and development agreement already allows development of this site, just not as a private resort/manufactured home community/retail center.

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Respectfully,

Jim Felicetty

Re: 47 Degrees North Major Amendment proposal

I am writing to inform the city of my very strong opposition to the Sun Communities 47° North proposal for the Bullfrog flats property. The proposed manufactured home / RV community:

- Is in clear violation of the vision for the property adopted by the city and presented to the public as a condition for annexing Bullfrog Flats into the city. It's not in character with the City of Cle Elum and does not comply with fundamental requirements of the city's comprehensive plan, the development agreement, or zoning for the property.

- Instead of traditional neighborhoods that were planned to be connected to and a natural extension of the city, supporting the rest of the city, 47 Degrees North would create a private for-profit community and tourist resort with gates, private roads and utilities which will be separated from the rest of the city. It will create a private city within a city, forever.

- Fiscal studies of 47 Degrees North show that it will not create sufficient tax revenue to cover the city's cost to serve it. Unless the developer agrees to financially cover the substantial deficits, forever, existing city taxpayers will be required to subsidize Sun's development and taxes will go up.

- Sun's 47 Degrees North will be in its entirety a private business not a natural neighborhood (no lots sold, all spots leased), wholly owned by a massive out-of-state publicly traded corporation whose fiduciary duty is to its shareholders, not city taxpayers. Any subsidies of the project would be a gift of public funds to a private entity.

- Is not housing as contemplated for the Bullfrog UGA. It will displace half of the actual housing planned for the area and replace it with a private park designed as a transient playground.

- Will be the largest manufactured home/RV park on the West Coast and will double the population of Cle Elum. Parks of this magnitude have no place in a town as small as Cle Elum. Wrong Place, Wrong Size.

- Is not housing as contemplated for the Bullfrog UGA. It will displace half of the actual housing planned for the area and replace it with a private park designed as a transient playground.

- Will be the largest manufactured home/RV park on the West Coast and will double the population of Cle Elum. Parks of this magnitude have no place in a town as small as Cle Elum. Wrong Place, Wrong Size.

- Sun has eliminated the industrial park component of the approved plan and is proposing a major new retail center to the project which would compete with existing city businesses and will seriously damage Cle Elum's downtown, which the city has invested millions of dollars to reinvigorate. The retail center is in direct conflict with the city's comprehensive plan which states that the Bullfrog Flats Master Plan…."is intended to elevate the DTC (downtown core) as the primary retail and activity nexus for Cle Elum". Current rules for the Bullfrog Flats property prohibit a retail center on the property.

- Provides no significant benefits to city or UKC residents, but creates serious and significant impacts on roads, police, fire, schools, emergency services, hospitals and other public services that can't be (or won't be) fully mitigated by the developer.

- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for. Any such increase in taxes will effectively translate to a subsidy for a private business,

- Denial of 47 Degrees North will not take away or reduce underlying property rights. It will simply require Sun Communities to comply with city's current rules, regulations and comprehensive plan for the property. The original underlying zoning approval and development agreement already allows development of this site, just not as a private resort/manufactured home community/retail center.

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Respectfully,

Carolyn K Biddle

Re: 47 Degrees North Major Amendment proposal

I am writing to inform the city of my very strong opposition to the Sun Communities 47° North proposal for the Bullfrog flats property. The proposed manufactured home / RV community:

- Is in clear violation of the vision for the property adopted by the city and presented to the public as a condition for annexing Bullfrog Flats into the city. It's not in character with the City of Cle Elum and does not comply with fundamental requirements of the city's comprehensive plan, the development agreement, or zoning for the property.

- Instead of traditional neighborhoods that were planned to be connected to and a natural extension of the city, supporting the rest of the city, 47 Degrees North would create a private for-profit community and tourist resort with gates, private roads and utilities which will be separated from the rest of the city. It will create a private city within a city, forever.

- Fiscal studies of 47 Degrees North show that it will not create sufficient tax revenue to cover the city's cost to serve it. Unless the developer agrees to financially cover the substantial deficits, forever, existing city taxpayers will be required to subsidize Sun's development and taxes will go up.

- Sun's 47 Degrees North will be in its entirety a private business not a natural neighborhood (no lots sold, all spots leased), wholly owned by a massive out-of-state publicly traded corporation whose fiduciary duty is to its shareholders, not city taxpayers. Any subsidies of the project would be a gift of public funds to a private entity.

- Is not housing as contemplated for the Bullfrog UGA. It will displace half of the actual housing planned for the area and replace it with a private park designed as a transient playground.

- Will be the largest manufactured home/RV park on the West Coast and will double the population of Cle Elum. Parks of this magnitude have no place in a town as small as Cle Elum. Wrong Place, Wrong Size.

The retail center is in direct conflict with the city's comprehensive plan which states that the Bullfrog Flats Master Plan…."is intended to elevate the DTC (downtown core) as the primary retail and activity nexus for Cle Elum". Current rules for the Bullfrog Flats property prohibit a retail center on the property.

- Provides no significant benefits to city or UKC residents, but creates serious and significant impacts on roads, police, fire, schools, emergency services, hospitals and other public services that can't be (or won't be) fully mitigated by the developer.

- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for. Any such increase in taxes will effectively translate to a subsidy for a private business,

- Denial of 47 Degrees North will not take away or reduce underlying property rights. It will simply require Sun Communities to comply with city's current rules, regulations and comprehensive plan for the property. The original underlying zoning approval and development agreement already allows development of this site, just not as a private resort/manufactured home community/retail center.

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Respectfully,

Cindy Mehlhoff

Re: 47 Degrees North Major Amendment proposal

I am writing to inform the city of my very strong opposition to the Sun Communities 47° North proposal for the Bullfrog flats property. The proposed manufactured home / RV community:

- Is in clear violation of the vision for the property adopted by the city and presented to the public as a condition for annexing Bullfrog Flats into the city. It's not in character with the City of Cle Elum and does not comply with fundamental requirements of the city's comprehensive plan, the development agreement, or zoning for the property.

- Instead of traditional neighborhoods that were planned to be connected to and a natural extension of the city, supporting the rest of the city, 47 Degrees North would create a private for-profit community and tourist resort with gates, private roads and utilities which will be separated from the rest of the city. It will create a private city within a city, forever.

- Fiscal studies of 47 Degrees North show that it will not create sufficient tax revenue to cover the city's cost to serve it. Unless the developer agrees to financially cover the substantial deficits, forever, existing city taxpayers will be required to subsidize Sun's development and taxes will go up.

- Sun's 47 Degrees North will be in its entirety a private business not a natural neighborhood (no lots sold, all spots leased), wholly owned by a massive out-of-state publicly traded corporation whose fiduciary duty is to its shareholders, not city taxpayers. Any subsidies of the project would be a gift of public funds to a private entity.

- Is not housing as contemplated for the Bullfrog UGA. It will displace half of the actual housing planned for the area and replace it with a private park designed as a transient playground.

- Will be the largest manufactured home/RV park on the West Coast and will double the population of Cle Elum. Parks of this magnitude have no place in a town as small as Cle Elum. Wrong Place, Wrong Size.

- Sun has eliminated the industrial park component of the approved plan and is proposing a major new retail center to the project which would compete with existing city businesses and will seriously damage Cle Elum's downtown, which the city has invested millions of dollars to reinvigorate. The retail center is in direct conflict with the city's comprehensive plan which states that the Bullfrog Flats Master Plan…."is intended to elevate the DTC (downtown core) as the primary retail and activity nexus for Cle Elum". Current rules for the Bullfrog Flats property prohibit a retail center on the property.

The retail center is in direct conflict with the city's comprehensive plan which states that the Bullfrog Flats Master Plan…."is intended to elevate the DTC (downtown core) as the primary retail and activity nexus for Cle Elum". Current rules for the Bullfrog Flats property prohibit a retail center on the property.

- Provides no significant benefits to city or UKC residents, but creates serious and significant impacts on roads, police, fire, schools, emergency services, hospitals and other public services that can't be (or won't be) fully mitigated by the developer.

- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for. Any such increase in taxes will effectively translate to a subsidy for a private business,

- Denial of 47 Degrees North will not take away or reduce underlying property rights. It will simply require Sun Communities to comply with city's current rules, regulations and comprehensive plan for the property. The original underlying zoning approval and development agreement already allows development of this site, just not as a private resort/manufactured home community/retail center.

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Respectfully,

Re: 47 Degrees North Major Amendment proposal

I am writing to inform the city of my very strong opposition to the Sun Communities 47° North proposal for the Bullfrog flats property. The proposed manufactured home / RV community:

- Is in clear violation of the vision for the property adopted by the city and presented to the public as a condition for annexing Bullfrog Flats into the city. It's not in character with the City of Cle Elum and does not comply with fundamental requirements of the city's comprehensive plan, the development agreement, or zoning for the property.

- Instead of traditional neighborhoods that were planned to be connected to and a natural extension of the city, supporting the rest of the city, 47 Degrees North would create a private for-profit community and tourist resort with gates, private roads and utilities which will be separated from the rest of the city. It will create a private city within a city, forever.

- Fiscal studies of 47 Degrees North show that it will not create sufficient tax revenue to cover the city's cost to serve it. Unless the developer agrees to financially cover the substantial deficits, forever, existing city taxpayers will be required to subsidize Sun's development and taxes will go up.

- Sun's 47 Degrees North will be in its entirety a private business not a natural neighborhood (no lots sold, all spots leased), wholly owned by a massive out-of-state publicly traded corporation whose fiduciary duty is to its shareholders, not city taxpayers. Any subsidies of the project would be a gift of public funds to a private entity.

- Is not housing as contemplated for the Bullfrog UGA. It will displace half of the actual housing planned for the area and replace it with a private park designed as a transient playground.

- Will be the largest manufactured home/RV park on the West Coast and will double the population of Cle Elum. Parks of this magnitude have no place in a town as small as Cle Elum. Wrong Place, Wrong Size.

- Sun has eliminated the industrial park component of the approved plan and is proposing a major new retail center to the project which would compete with existing city businesses and will seriously damage Cle Elum's downtown, which the city has invested millions of dollars to reinvigorate. The retail center is in direct conflict with the city's comprehensive plan which states that the Bullfrog Flats Master Plan…."is intended to elevate the DTC (downtown core) as the primary retail and activity nexus for Cle Elum". Current rules for the Bullfrog Flats property prohibit a retail center on the property.

The retail center is in direct conflict with the city's comprehensive plan which states that the Bullfrog Flats Master Plan…."is intended to elevate the DTC (downtown core) as the primary retail and activity nexus for Cle Elum". Current rules for the Bullfrog Flats property prohibit a retail center on the property.

- Provides no significant benefits to city or UKC residents, but creates serious and significant impacts on roads, police, fire, schools, emergency services, hospitals and other public services that can't be (or won't be) fully mitigated by the developer.

- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for. Any such increase in taxes will effectively translate to a subsidy for a private business,

- Denial of 47 Degrees North will not take away or reduce underlying property rights. It will simply require Sun Communities to comply with city's current rules, regulations and comprehensive plan for the property. The original underlying zoning approval and development agreement already allows development of this site, just not as a private resort/manufactured home community/retail center.

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Respectfully,

Re: 47 Degrees North Major Amendment proposal

I am writing to inform the city of my very strong opposition to the Sun Communities 47° North proposal for the Bullfrog flats property. The proposed manufactured home / RV community:

- Is in clear violation of the vision for the property adopted by the city and presented to the public as a condition for annexing Bullfrog Flats into the city. It's not in character with the City of Cle Elum and does not comply with fundamental requirements of the city's comprehensive plan, the development agreement, or zoning for the property.

- Instead of traditional neighborhoods that were planned to be connected to and a natural extension of the city, supporting the rest of the city, 47 Degrees North would create a private for-profit community and tourist resort with gates, private roads and utilities which will be separated from the rest of the city. It will create a private city within a city, forever.

- Fiscal studies of 47 Degrees North show that it will not create sufficient tax revenue to cover the city's cost to serve it. Unless the developer agrees to financially cover the substantial deficits, forever, existing city taxpayers will be required to subsidize Sun's development and taxes will go up.

- Sun's 47 Degrees North will be in its entirety a private business not a natural neighborhood (no lots sold, all spots leased), wholly owned by a massive out-of-state publicly traded corporation whose fiduciary duty is to its shareholders, not city taxpayers. Any subsidies of the project would be a gift of public funds to a private entity.

- Is not housing as contemplated for the Bullfrog UGA. It will displace half of the actual housing planned for the area and replace it with a private park designed as a transient playground.

- Will be the largest manufactured home/RV park on the West Coast and will double the population of Cle Elum. Parks of this magnitude have no place in a town as small as Cle Elum. Wrong Place, Wrong Size.

- Sun has eliminated the industrial park component of the approved plan and is proposing a major new retail center to the project which would compete with existing city businesses and will seriously damage Cle Elum's downtown, which the city has invested millions of dollars to reinvigorate. The retail center is in direct conflict with the city's comprehensive plan which states that the Bullfrog Flats Master Plan...."is intended to elevate the DTC (downtown core) as the primary retail and activity nexus for Cle Elum". Current rules for the Bullfrog Flats property prohibit a retail center on the property.

- Provides no significant benefits to city or UKC residents, but creates serious and significant impacts on roads, police, fire, schools, emergency services, hospitals and other public services that can't be (or won't be) fully mitigated by the developer.

Re: 47 Degrees North Major Amendment proposal

I am writing to inform the city of my very strong opposition to the Sun Communities 47° North proposal for the Bullfrog flats property. The proposed manufactured home / RV community will result in negative impacts:

- Traffic gridlock with high volume of transient visitors in large recreational vehicles
- Decreased level of service for emergency medical services
- Decreased level of service for police protection
- Decreased level of service for fire protection
- Increased tax burden on existing property owners to pay for aging infrastructure (water, sewer, power, roads)
- Increased 2nd home ownership within a private resort adversely impacting many throughout the community
- Adverse impact to downtown core businesses as resort environment will drive dollars to remain at the resort
- Potential to increase jobs yet does little to offer adequate affordable housing options in relationship to amount of workers necessary to support multiple resorts in the area
- Potential to require additional city resources to manage and address concerns by a high volume of transient visitors
- High volume of short term rentals (STRs) tax revenue by law are applied tourism rather than infrastructure upgrades
- 90% of profits will be, by law, sent out of our community to Wall Street investors

For these reasons, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

- High volume of short-term rentals (STRs) tax revenue by law are applied tourism rather than infrastructure upgrades.
- 90% of profits will be, by law, sent out of our community to Wall Street investors.

For these reasons, I implore the City to DENY this proposed major amendment and retain the current approved land use for the property.

Respectfully,

RE: 47 Degrees North Major Amendment Proposal

I am writing to inform the city of my very strong opposition to the Sun Communities 47° North proposal for the Bullfrog flats property. The proposed manufactured home / RV community will result in negative impacts:

- Traffic gridlock with high volume of transient visitors in large recreational vehicles
- Decreased level of service for emergency medical services
- Decreased level of service for police protection
- Decreased level of service for fire protection
- Increased tax burden on existing property owners to pay for aging infrastructure (water, sewer, power, roads)
- Increased 2nd home ownership within a private resort adversely impacting many throughout the community.
- Adverse impact to downtown core businesses as resort environment will drive dollars to remain at the resort.
- Potential to increase jobs yet does little to offer adequate affordable housing options in relationship to number of workers necessary to support multiple resorts in the area.
- Potential to require additional city resources to manage and address concerns by a high volume of transient visitors.
- High volume of short-term rentals (STRs) tax revenue by law are applied tourism rather than infrastructure upgrades.
- 90% of profits will be, by law, sent out of our community to Wall Street investors.

For these reasons, I implore the City to DENY this proposed major amendment and retain the current approved land use for the property.

Re: 47 Degrees North Major Amendment proposal

I am writing to inform the city of my very strong opposition to the Sun Communities 47° North proposal for the Bullfrog flats property. The proposed manufactured home / RV community:

- Is in clear violation of the vision for the property adopted by the city and presented to the public as a condition for annexing Bullfrog Flats into the city. It's not in character with the City of Cle Elum and does not comply with fundamental requirements of the city's comprehensive plan, the development agreement, or zoning for the property.

- Instead of traditional neighborhoods that were planned to be connected to and a natural extension of the city, supporting the rest of the city, 47 Degrees North would create a private for-profit community and tourist resort with gates, private roads and utilities which will be separated from the rest of the city. It will create a private city within a city, forever.

- Fiscal studies of 47 Degrees North show that it will not create sufficient tax revenue to cover the city's cost to serve it. Unless the developer agrees to financially cover the substantial deficits, forever, existing city taxpayers will be required to subsidize Sun's development and taxes will go up.

- Sun's 47 Degrees North will be in its entirety a private business not a natural neighborhood (no lots sold, all spots leased), wholly owned by a massive out-of-state publicly traded corporation who's fiduciary duty is to its shareholders, not city taxpayers. Any subsidies of the project would be a gift of public funds to a private entity.

- Is not housing as contemplated for the Bullfrog UGA. It will displace half of the actual housing planned for the area and replace it with a private park designed as a transient playground.

- Will be the largest manufactured home/RV park on the West Coast and will double the population of Cle Elum. Parks of this magnitude have no place in a town as small as Cle Elum. Wrong Place Wrong Size.

- Sun has eliminated the industrial park component of the approved plan and is proposing a major new retail center to the project which would compete with existing city businesses and will seriously damage Cle Elum's downtown, which the city has invested millions of dollars to reinvigorate. The retail center is in direct conflict with the city's comprehensive plan which states that the Bullfrog Flats Master Plan…."is intended to elevate the DTC (downtown core) as the primary retail and activity nexus for Cle Elum". Current rules for the Bullfrog Flats property prohibit a retail center on the property.

- Provides no significant benefits to city or UKC residents, but creates serious and significant impacts on roads, police, fire, schools, emergency services, hospitals and other public services that can't be (or won't be) fully mitigated by the developer.

- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for. Any such increase in taxes will effectively translate to a subsidy for a private business,

- Denial of 47 Degrees North will not take away or reduce underlying property rights. It will simply require Sun Communities to comply with city's current rules, regulations and comprehensive plan for the property. The original underlying zoning approval and development agreement already allows development of this site, just not as a private resort/manufactured home community/retail center.

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Respectfully,

Mary Stetson Benavids

The retail center is in direct conflict with the city's comprehensive plan which states that the Bullfrog Flats Master Plan…."is intended to elevate the DTC (downtown core) as the primary retail and activity nexus for Cle Elum". Current rules for the Bullfrog Flats property prohibit a retail center on the property.

- Provides no significant benefits to city or UKC residents, but creates serious and significant impacts on roads, police, fire, schools, emergency services, hospitals and other public services that can't be (or won't be) fully mitigated by the developer.

- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for. Any such increase in taxes will effectively translate to a subsidy for a private business,

- Denial of 47 Degrees North will not take away or reduce underlying property rights. It will simply require Sun Communities to comply with city's current rules, regulations and comprehensive plan for the property. The original underlying zoning approval and development agreement already allows development of this site, just not as a private resort/manufactured home community/retail center.

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Respectfully,

Mallory Aima

Re: 47 Degrees North Major Amendment proposal

I am writing to inform the city of my very strong opposition to the Sun Communities 47° North proposal for the Bullfrog flats property. The proposed manufactured home / RV community:

- Is in clear violation of the vision for the property adopted by the city and presented to the public as a condition for annexing Bullfrog Flats into the city. It's not in character with the City of Cle Elum and does not comply with fundamental requirements of the city's comprehensive plan, the development agreement, or zoning for the property.

- Instead of traditional neighborhoods that were planned to be connected to and a natural extension of the city, supporting the rest of the city, 47 Degrees North would create a private for-profit community and tourist resort with gates, private roads and utilities which will be separated from the rest of the city. It will create a private city within a city, forever.

- Fiscal studies of 47 Degrees North show that it will not create sufficient tax revenue to cover the city's cost to serve it. Unless the developer agrees to financially cover the substantial deficits, forever, existing city taxpayers will be required to subsidize Sun's development and taxes will go up.

- Sun's 47 Degrees North will be in its entirety a private business not a natural neighborhood (no lots sold, all spots leased), wholly owned by a massive out-of-state publicly traded corporation whose fiduciary duty is to its shareholders, not city taxpayers. Any subsidies of the project would be a gift of public funds to a private entity.

- Is not housing as contemplated for the Bullfrog UGA. It will displace half of the actual housing planned for the area and replace it with a private park designed as a transient playground.

- Will be the largest manufactured home/RV park on the West Coast and will double the population of Cle Elum. Parks of this magnitude have no place in a town as small as Cle Elum. Wrong Place, Wrong Size.

- Sun has eliminated the industrial park component of the approved plan and is proposing a major new retail center to the project which would compete with existing city businesses and will seriously damage Cle Elum's downtown, which the city has invested millions of dollars to reinvigorate. The retail center is in direct conflict with the city's comprehensive plan which states that the Bullfrog Flats Master Plan…."is intended to elevate the DTC (downtown core) as the primary retail and activity nexus for Cle Elum". Current rules for the Bullfrog Flats property prohibit a retail center on the property.

Re: 47 Degrees North Major Amendment proposal

I am writing to inform the city of my very strong opposition to the Sun Communities 47° North proposal for the Bullfrog flats property. The proposed manufactured home / RV community:

- Is in clear violation of the vision for the property adopted by the city and presented to the public as a condition for annexing Bullfrog Flats into the city. It's not in character with the City of Cle Elum and does not comply with fundamental requirements of the city's comprehensive plan, the development agreement, or zoning for the property.

- Instead of traditional neighborhoods that were planned to be connected to and a natural extension of the city, supporting the rest of the city, 47 Degrees North would create a private for-profit community and tourist resort with gates, private roads and utilities which will be separated from the rest of the city. It will create a private city within a city, forever.

- Fiscal studies of 47 Degrees North show that it will not create sufficient tax revenue to cover the city's cost to serve it. Unless the developer agrees to financially cover the substantial deficits, forever, existing city taxpayers will be required to subsidize Sun's development and taxes will go up.

- Sun's 47 Degrees North will be in its entirety a private business not a natural neighborhood (no lots sold, all spots leased), wholly owned by a massive out-of-state publicly traded corporation whose fiduciary duty is to its shareholders, not city taxpayers. Any subsidies of the project would be a gift of public funds to a private entity.

- Is not housing as contemplated for the Bullfrog UGA. It will displace half of the actual housing planned for the area and replace it with a private park designed as a transient playground.

- Will be the largest manufactured home/RV park on the West Coast and will double the population of Cle Elum. Parks of this magnitude have no place in a town as small as Cle Elum. Wrong Place, Wrong Size.

- Sun has eliminated the industrial park component of the approved plan and is proposing a major new retail center to the project which would compete with existing city businesses and will seriously damage Cle Elum's downtown, which the city has invested millions of dollars to reinvigorate. The retail center is in direct conflict with the city's comprehensive plan which states that the Bullfrog Flats Master Plan…."is intended to elevate the DTC (downtown core) as the primary retail and activity nexus for Cle Elum". Current rules for the Bullfrog Flats property prohibit a retail center on the property.

- Provides no significant benefits to city or UKC residents, but creates serious and significant impacts on roads, police, fire, schools, emergency services, hospitals and other public services that can't be (or won't be) fully mitigated by the developer.

- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for. Any such increase in taxes will effectively translate to a subsidy for a private business,

- Denial of 47 Degrees North will not take away or reduce underlying property rights. It will simply require Sun Communities to comply with city's current rules, regulations and comprehensive plan for the property. The original underlying zoning approval and development agreement already allows development of this site, just not as a private resort/manufactured home community/retail center.

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Respectfully,

Re: 47 Degrees North Major Amendment proposal

I am writing to inform the city of my very strong opposition to the Sun Communities 47° North proposal for the Bullfrog flats property. The proposed manufactured home / RV community:

- Is in clear violation of the vision for the property adopted by the city and presented to the public as a condition for annexing Bullfrog Flats into the city. It's not in character with the City of Cle Elum and does not comply with fundamental requirements of the city's comprehensive plan, the development agreement, or zoning for the property.

- Instead of traditional neighborhoods that were planned to be connected to and a natural extension of the city, supporting the rest of the city, 47 Degrees North would create a private for-profit community and tourist resort with gates, private roads and utilities which will be separated from the rest of the city. It will create a private city within a city, forever.

- Fiscal studies of 47 Degrees North show that it will not create sufficient tax revenue to cover the city's cost to serve it. Unless the developer agrees to financially cover the substantial deficits, forever, existing city taxpayers will be required to subsidize Sun's development and taxes will go up.

- Sun's 47 Degrees North will be in its entirety a private business not a natural neighborhood (no lots sold, all spots leased), wholly owned by a massive out-of-state publicly traded corporation whose fiduciary duty is to its shareholders, not city taxpayers. Any subsidies of the project would be a gift of public funds to a private entity.

- Is not housing as contemplated for the Bullfrog UGA. It will displace half of the actual housing planned for the area and replace it with a private park designed as a transient playground.

- Will be the largest manufactured home/RV park on the West Coast and will double the population of Cle Elum. Parks of this magnitude have no place in a town as small as Cle Elum. Wrong Place, Wrong Size.

- Sun has eliminated the industrial park component of the approved plan and is proposing a major new retail center to the project which would compete with existing city businesses and will seriously damage Cle Elum's downtown, which the city has invested millions of dollars to reinvigorate. The retail center is in direct conflict with the city's comprehensive plan which states that the Bullfrog Flats Master Plan...."is intended to elevate the DTC (downtown core) as the primary retail and activity nexus for Cle Elum". Current rules for the Bullfrog Flats property prohibit a retail center on the property.

- Provides no significant benefits to city or UKC residents, but creates serious and significant impacts on roads, police, fire, schools, emergency services, hospitals and other public services that can't be (or won't be) fully mitigated by the developer.

- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for. The proposed 47 Degrees North Project

Bill Smith <smithwr19@gmail.com>
To: Nancy Smith <smith24nancy@gmail.com>

Thu, Jun 22 at 10:38 AM
2023

Attention: Cle Elum Mayor:

We have been homeowners here in the Upper Kittitas County for more than 15 years. We, plus our extended family have many memories of the great times we have spent together here in the Upper County. We have developed many friendships with the local families who have lived here for generations and supported the community in many different ways.

The homeowners who live in Cle Elum and Roslyn have a very strong community commitment that is hard to duplicate. We are proud of this community and we feel good about giving back to the organizations throughout the community by supporting all the aspects of the people who live here.

We are not opposed to 'controlled' growth here in the Upper County. However, we are very much opposed to this proposed RV park in Cle Elum. Everything we have researched about this RV park will do nothing but harm to the wonderful life we share with our neighbors in our community. The infrastructure in Cle Elum has not been constructed to meet the needs of this type of development. The infrastructure needs to be addressed first to handle the development of affordable single family housing. A complex of 1,000+ RV spaces is NOT the answer.

We cannot find one person in Cle Elum who thinks this 47° North project is good for our community.

Please tell this developer to go somewhere else for their RV project!

We DO NOT support the 47° North project!

It's not in character with the City of Cle Elum and does not comply with fundamental requirements of the city's comprehensive plan, the development agreement, or zoning for the property.
- Instead of traditional neighborhoods that were planned to be connected to and a natural extension of the city, supporting the rest of the city, 47 Degrees North would create a private for-profit community and tourist resort with gates, private roads and utilities which will be separated from the rest of the city. It will create a private city within a city, forever.
- Fiscal studies of 47 Degrees North show that it will not create sufficient tax revenue to cover the city's cost to serve it. Unless the developer agrees to financially cover the substantial deficits, forever, existing city taxpayers will be required to subsidize Sun's development and taxes will go up.
- Sun's 47 Degrees North will be in its entirety a private business not a natural neighborhood (no lots sold, all spots leased), wholly owned by a massive out-of-state publicly traded corporation who's fiduciary duty is to its shareholders, not city taxpayers. Any subsidies of the project would be a gift of public funds to a private entity.
- Is not housing as contemplated for the Bullfrog UGA. It will displace half of the actual housing planned for the area and replace it with a private park designed as a transient playground.
- Will be the largest manufactured home/RV park on the West Coast and will double the population of Cle Elum. Parks of this magnitude have no place in a town as small as Cle Elum. Wrong Place Wrong Size.
- Sun has eliminated the industrial park component of the approved plan and is proposing a major new retail center to the project which would compete with existing city businesses and will seriously damage Cle Elum's downtown, which the city has invested millions of dollars to reinvigorate. The retail center is in direct conflict with the city's comprehensive plan which states that the Bullfrog Flats Master Plan...."is intended to elevate the DTC (downtown core) as the primary retail and activity nexus for Cle Elum". Current rules for the Bullfrog Flats property prohibit a retail center on the property.
- Provides no significant benefits to city or UKC residents, but creates serious and significant impacts on roads, police, fire, schools, emergency services, hospitals and other public services that can't be (or won't be) fully mitigated by the developer, and,
- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for. Any such increase in taxes will effectively translate to a subsidy for a private business,
- Denial of 47 Degrees North will not take away or reduce underlying property rights. It will simply require Sun Communities to comply with city's current rules, regulations and comprehensive plan for the property. The original underlying zoning approval and development agreement already allows development of this site, just not as a private resort/manufactured home community/retail center.

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Respectfully,

Signature

Re: 47 Degrees North Major Amendment proposal

I am writing to inform the city of my very strong opposition to the Sun Communities 47° North proposal for the Bullfrog flats property. The proposed manufactured home / RV community will result in negative impacts:

- Traffic gridlock with high volume of transient visitors in large recreational vehicles
- Decreased level of service for emergency medical services
- Decreased level of service for police protection
- Decreased level of service for fire protection
- Increased tax burden on existing property owners to pay for aging infrastructure (water, sewer, power, roads)
- Increased 2nd home ownership within a private resort adversely impacting many throughout the community
- Adverse impact to downtown core businesses as resort environment will drive dollars to remain at the resort
- Potential to increase jobs yet does little to offer adequate affordable housing options in relationship to amount of workers necessary to support multiple resorts in the area
- Potential to require additional city resources to manage and address concerns by a high volume of transient visitors
- High volume of short term rentals (STRs) tax revenue by law are applied tourism rather than infrastructure upgrades
- 90% of profits will be, by law, sent out of our community to Wall Street investors

For these reasons, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Respectfully,

- Denial of 47 Degrees North will not take away or reduce underlying property rights. It will simply require Sun Communities to comply with city's current rules, regulations and comprehensive plan for the property. The original underlying zoning approval and development agreement already allows development of this site, just not as a private resort/manufactured home community/retail center.

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Respectfully,

Re: 47 Degrees North Major Amendment proposal

I am writing to inform the city of my very strong opposition to the Sun Communities 47° North proposal for the Bullfrog flats property. The proposed manufactured home / RV community:

- Is in clear violation of the vision for the property adopted by the city and presented to the public as a condition for annexing Bullfrog Flats into the city. It's not in character with the City of Cle Elum and does not comply with fundamental requirements of the city's comprehensive plan, the development agreement, or zoning for the property.

- Instead of traditional neighborhoods that were planned to be connected to and a natural extension of the city, supporting the rest of the city, 47 Degrees North would create a private for-profit community and tourist resort with gates, private roads and utilities which will be separated from the rest of the city. It will create a private city within a city, forever.

- Fiscal studies of 47 Degrees North show that it will not create sufficient tax revenue to cover the city's cost to serve it. Unless the developer agrees to financially cover the substantial deficits, forever, existing city taxpayers will be required to subsidize Sun's development and taxes will go up.

- Sun's 47 Degrees North will be in its entirety a private business not a natural neighborhood (no lots sold, all spots leased), wholly owned by a massive out-of-state publicly traded corporation whose fiduciary duty is to its shareholders, not city taxpayers. Any subsidies of the project would be a gift of public funds to a private entity.

- Is not housing as contemplated for the Bullfrog UGA. It will displace half of the actual housing planned for the area and replace it with a private park designed as a transient playground.

- Will be the largest manufactured home/RV park on the West Coast and will double the population of Cle Elum. Parks of this magnitude have no place in a town as small as Cle Elum. Wrong Place, Wrong Size.

- Sun has eliminated the industrial park component of the approved plan and is proposing a major new retail center to the project which would compete with existing city businesses and will seriously damage Cle Elum's downtown, which the city has invested millions of dollars to reinvigorate. The retail center is in direct conflict with the city's comprehensive plan which states that the Bullfrog Flats Master Plan…."is intended to elevate the DTC (downtown core) as the primary retail and activity nexus for Cle Elum". Current rules for the Bullfrog Flats property prohibit a retail center on the property.

- Provides no significant benefits to city or UKC residents, but creates serious and significant impacts on roads, police, fire, schools, emergency services, hospitals and other public services that can't be (or won't be) fully mitigated by the developer.

- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for. Any such increase in taxes will effectively translate to a subsidy for a private business,

- Denial of 47 Degrees North will not take away or reduce underlying property rights. It will simply require Sun Communities to comply with city's current rules, regulations and comprehensive plan for the property. The original underlying zoning approval and development agreement already allows development of this site, just not as a private resort/manufactured home community/retail center.

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Re: 47 Degrees North Major Amendment proposal

I am writing to inform the city of my very strong opposition to the Sun Communities 47° North proposal for the Bullfrog flats property. The proposed manufactured home / RV community will result in negative impacts:

- Traffic gridlock with high volume of transient visitors in large recreational vehicles
- Decreased level of service for emergency medical services
- Decreased level of service for police protection
- Decreased level of service for fire protection
- Increased tax burden on existing property owners to pay for aging infrastructure (water, sewer, power, roads)
- Increased 2nd home ownership within a private resort adversely impacting many throughout the community
- Adverse impact to downtown core businesses as resort environment will drive dollars to remain at the resort
- Potential to increase jobs yet does little to offer adequate affordable housing options in relationship to amount of workers necessary to support multiple resorts in the area
- Potential to require additional city resources to manage and address concerns by a high volume of transient visitors
- High volume of short term rentals (STRs) tax revenue by law are applied tourism rather than infrastructure upgrades
- 90% of profits will be, by law, sent out of our community to Wall Street investors

For these reasons, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Respectfully,

Elaine M Bleggi

- Is not housing as contemplated for the Bullfrog UGA. It will displace half of the actual housing planned for the area and replace it with a private park designed as a transient playground.

- Will be the largest manufactured home/RV park on the West Coast and will double the population of Cle Elum. Parks of this magnitude have no place in a town as small as Cle Elum. Wrong Place, Wrong Size.

- Sun has eliminated the industrial park component of the approved plan and is proposing a major new retail center to the project which would compete with existing city businesses and will seriously damage Cle Elum's downtown, which the city has invested millions of dollars to reinvigorate. The retail center is in direct conflict with the city's comprehensive plan which states that the Bullfrog Flats Master Plan…."is intended to elevate the DTC (downtown core) as the primary retail and activity nexus for Cle Elum". Current rules for the Bullfrog Flats property prohibit a retail center on the property.

- Provides no significant benefits to city or UKC residents, but creates serious and significant impacts on roads, police, fire, schools, emergency services, hospitals and other public services that can't be (or won't be) fully mitigated by the developer.

- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for. Any such increase in taxes will effectively translate to a subsidy for a private business,

- Denial of 47 Degrees North will not take away or reduce underlying property rights. It will simply require Sun Communities to comply with city's current rules, regulations and comprehensive plan for the property. The original underlying zoning approval and development agreement already allows development of this site, just not as a private resort/manufactured home community/retail center.

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Respectfully,

Signature

Re: 47 Degrees North Major Amendment proposal

I am writing to inform the city of my very strong opposition to the Sun Communities 47° North proposal for the Bullfrog flats property. The proposed manufactured home / RV community:

- Is in clear violation of the vision for the property adopted by the city and presented to the public as a condition for annexing Bullfrog Flats into the city. It's not in character with the City of Cle Elum and does not comply with fundamental requirements of the city's comprehensive plan, the development agreement, or zoning for the property.

- Instead of traditional neighborhoods that were planned to be connected to and a natural extension of the city, supporting the rest of the city, 47 Degrees North would create a private for-profit community and tourist resort with gates, private roads and utilities which will be separated from the rest of the city. It will create a private city within a city, forever.

- Fiscal studies of 47 Degrees North show that it will not create sufficient tax revenue to cover the city's cost to serve it. Unless the developer agrees to financially cover the substantial deficits, forever, existing city taxpayers will be required to subsidize Sun's development and taxes will go up.

- Sun's 47 Degrees North will be in its entirety a private business not a natural neighborhood (no lots sold, all spots leased), wholly owned by a massive out-of-state publicly traded corporation whose fiduciary duty is to its shareholders, not city taxpayers. Any subsidies of the project would be a gift of public funds to a private entity.

- Is not housing as contemplated for the Bullfrog UGA. It will displace half of the actual housing planned for the area and replace it with a private park designed as a transient playground.

Proposed 47 degree North project by Sun Communities Inc.

Mayor Jay McGowan and Council
City of Cle Elum
119 West First Street
Cle Elum, WA 98922

Please don't be fooled by Sun Communities. They do not have the best interest of Cle Elum or surrounding residents. It is all about greed. Profits will be sent out of our community to Wall Street investors. Everybody, especially the city, should remember Sun makes NO legal commitments on just about anything related to the shopping center. This and other statements are just their projections and aspirations, they reserve the right to change things around significantly.

This quote was taken from Larry Stauffer's Facebook post:
"Sun Communities knows that the entire Upper County is opposed to their plan to build the mother of all trailer parks in the middle of our community. They heard the message so loud and clear that they pulled their previous application and sulked out of town. **However,** they did hear one thing the locals had to say, "We need another grocery store".

The proposed new grocery store is 50,000 sq ft. For perspective our current Safeway is 33,000 sq ft, so Sun is proposing a grocery 50% larger than our current Safeway, that's huge.
Sun proposes to build it out in four phases between 2023 and 2031. If the city approves 47 degrees North with the new retail center and it doesn't build out, or it builds out slower, than assumed, the cities general fund will be in a huge fiscal hole.

Remember: "it is the responsibility of the Council to provide effective **City government representation for the citizens,** determine policy, enact ordinances and resolutions, approve contracts, authorize the payment of all obligations incurred by the City and adopt the annual budget.

Just say NO! I implore the City to DENY this proposed major amendment and retain the current approved land use for the property.
Respectfully,

Re: 47 Degrees North Major Amendment proposal

I am writing to inform the city of my very strong opposition to the Sun Communities 47° North proposal for the Bullfrog flats property. The proposed manufactured home / RV community:

- Is in clear violation of the vision for the property adopted by the city and presented to the public as a condition for annexing Bullfrog Flats into the city. It's not in character with the City of Cle Elum and does not comply with fundamental requirements of the city's comprehensive plan, the development agreement, or zoning for the property.

- Instead of traditional neighborhoods that were planned to be connected to and a natural extension of the city, supporting the rest of the city, 47 Degrees North would create a private for-profit community and tourist resort with gates, private roads and utilities which will be separated from the rest of the city. It will create a private city within a city, forever.

- Fiscal studies of 47 Degrees North show that it will not create sufficient tax revenue to cover the city's cost to serve it. Unless the developer agrees to financially cover the substantial deficits, forever, existing city taxpayers will be required to subsidize Sun's development and taxes will go up.

- Sun's 47 Degrees North will be in its entirety a private business not a natural neighborhood (no lots sold, all spots leased), wholly owned by a massive out-of-state publicly traded corporation whose fiduciary duty is to its shareholders, not city taxpayers. Any subsidies of the project would be a gift of public funds to a private entity.

- Is not housing as contemplated for the Bullfrog UGA. It will displace half of the actual housing planned for the area and replace it with a private park designed as a transient playground.

- Will be the largest manufactured home/RV park on the West Coast and will double the population of Cle Elum. Parks of this magnitude have no place in a town as small as Cle Elum. Wrong Place, Wrong Size.

- Sun has eliminated the industrial park component of the approved plan and is proposing a major new retail center to the project which would compete with existing city businesses and will seriously damage Cle Elum's downtown, which the city has invested millions of dollars to reinvigorate. The retail center is in direct conflict with the city's comprehensive plan which states that the Bullfrog Flats Master Plan…."is intended to elevate the DTC (downtown core) as the primary retail and activity nexus for Cle Elum". Current rules for the Bullfrog Flats property prohibit a retail center on the property.

- Provides no significant benefits to city or UKC residents, but creates serious and significant impacts on roads, police, fire, schools, emergency services, hospitals and other public services that can't be (or won't be) fully mitigated by the developer.

- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for. Any such increase in taxes will effectively translate to a subsidy for a private business,

- Denial of 47 Degrees North will not take away or reduce underlying property rights. It will simply require Sun Communities to comply with city's current rules, regulations and comprehensive plan for the property. The original underlying zoning approval and development agreement already allows development of this site, just not as a private resort/manufactured home community/retail center.

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Respectfully,

Kelly Walker

Re: 47 Degrees North Major Amendment proposal

I am writing to inform the city of my very strong opposition to the Sun Communities 47° North proposal for the Bullfrog flats property. The proposed manufactured home / RV community will result in negative impacts:

- Traffic gridlock with high volume of transient visitors in large recreational vehicles
- Decreased level of service for emergency medical services
- Decreased level of service for police protection
- Decreased level of service for fire protection
- Increased tax burden on existing property owners to pay for aging infrastructure (water, sewer, power, roads)
- Increased 2nd home ownership within a private resort adversely impacting many throughout the community
- Adverse impact to downtown core businesses as resort environment will drive dollars to remain at the resort
- Potential to increase jobs yet does little to offer adequate affordable housing options in relationship to amount of workers necessary to support multiple resorts in the area
- Potential to require additional city resources to manage and address concerns by a high volume of transient visitors
- High volume of short term rentals (STRs) tax revenue by law are applied tourism rather than infrastructure upgrades
- 90% of profits will be, by law, sent out of our community to Wall Street investors

For these reasons, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Respectfully,

Tracy Bowman

Re: 47 Degrees North Major Amendment proposal

I am writing to inform the city of my very strong opposition to the Sun Communities 47° North proposal for the Bullfrog flats property. The proposed manufactured home / RV community:

- Is in clear violation of the vision for the property adopted by the city and presented to the public as a condition for annexing Bullfrog Flats into the city. It's not in character with the City of Cle Elum and does not comply with fundamental requirements of the city's comprehensive plan, the development agreement, or zoning for the property.

- Instead of traditional neighborhoods that were planned to be connected to and a natural extension of the city, supporting the rest of the city, 47 Degrees North would create a private for-profit community and tourist resort with gates, private roads and utilities which will be separated from the rest of the city. It will create a private city within a city, forever.

- Fiscal studies of 47 Degrees North show that it will not create sufficient tax revenue to cover the city's cost to serve it. Unless the developer agrees to financially cover the substantial deficits, forever, existing city taxpayers will be required to subsidize Sun's development and taxes will go up.

- Sun's 47 Degrees North will be in its entirety a private business not a natural neighborhood (no lots sold, all spots leased), wholly owned by a massive out-of-state publicly traded corporation whose fiduciary duty is to its shareholders, not city taxpayers. Any subsidies of the project would be a gift of public funds to a private entity.

- Is not housing as contemplated for the Bullfrog UGA. It will displace half of the actual housing planned for the area and replace it with a private park designed as a transient playground.

- Will be the largest manufactured home/RV park on the West Coast and will double the population of Cle Elum. Parks of this magnitude have no place in a town as small as Cle Elum. Wrong Place, Wrong Size.

- Sun has eliminated the industrial park component of the approved plan and is proposing a major new retail center to the project which would compete with existing city businesses and will seriously damage Cle Elum's downtown, which the city has invested millions of dollars to reinvigorate. The retail center is in direct conflict with the city's comprehensive plan which states that the Bullfrog Flats Master Plan…."is intended to elevate the DTC (downtown core) as the primary retail and activity nexus for Cle Elum". Current rules for the Bullfrog Flats property prohibit a retail center on the property.

- Provides no significant benefits to city or UKC residents, but creates serious and significant impacts on roads, police, fire, schools, emergency services, hospitals and other public services that can't be (or won't be) fully mitigated by the developer.

- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for. Any such increase in taxes will effectively translate to a subsidy for a private business,

- Denial of 47 Degrees North will not take away or reduce underlying property rights. It will simply require Sun Communities to comply with city's current rules, regulations and comprehensive plan for the property. The original underlying zoning approval and development agreement already allows development of this site, just not as a private resort/manufactured home community/retail center.

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

The retail center is in direct conflict with the city's comprehensive plan which states that the Bullfrog Flats Master Plan...."is intended to elevate the DTC (downtown core) as the primary retail and activity nexus for Cle Elum". Current rules for the Bullfrog Flats property prohibit a retail center on the property.

- Provides no significant benefits to city or UKC residents, but creates serious and significant impacts on roads, police, fire, schools, emergency services, hospitals and other public services that can't be (or won't be) fully mitigated by the developer, and,

- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for. Any such increase in taxes will effectively translate to a subsidy for a private business,

- Denial of 47 Degrees North will not take away or reduce underlying property rights. It will simply require Sun Communities to comply with city's current rules, regulations and comprehensive plan for the property. The original underlying zoning approval and development agreement already allows development of this site, just not as a private resort/manufactured home community/retail center.

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Respectfully,

Signature

Re: 47 Degrees North Major Amendment proposal

I am writing to inform the city of my very strong opposition to the Sun Communities 47° North proposal for the Bullfrog flats property. The proposed manufactured home / RV community:

- Is in clear violation of the vision for the property adopted by the city and presented to the public as a condition for annexing Bullfrog Flats into the city. It's not in character with the City of Ce Elum and does not comply with fundamental requirements of the city's comprehensive plan, the development agreement, or zoning for the property.
- Instead of traditional neighborhoods that were planned to be connected to and a natural extension of the city, supporting the rest of the city, 47 Degrees North would create a private for-profit community and tourist resort with gates, private roads and utilities which will be separated from the rest of the city. It will create a private city within a city, forever.
- Fiscal studies of 47 Degrees North show that it will not create sufficient tax revenue to cover the city's cost to serve it. Unless the developer agrees to financially cover the substantial deficits, forever, existing city taxpayers will be required to subsidize Sun's development and taxes will go up.
- Sun's 47 Degrees North will be in its entirety a private business not a natural neighborhood (no lots sold, all spots leased), wholly owned by a massive out-of-state publicly traded corporation who's fiduciary duty is to its shareholders, not city taxpayers. Any subsidies of the project would be a gift of public funds to a private entity.
- Is not housing as contemplated for the Bullfrog UGA. It will displace half of the actual housing planned for the area and replace it with a private park designed as a transient playground.
- Will be the largest manufactured home/RV park on the West Coast and will double the population of Cle Elum. Parks of this magnitude have no place in a town as small as Cle Elum. Wrong Place Wrong Size.
- Sun has eliminated the industrial park component of the approved plan and is proposing a major new retail center to the project which would compete with existing city businesses and will seriously damage Cle Elum's downtown, which the city has invested millions of dollars to reinvigorate. The retail center is in direct conflict with the city's comprehensive plan which states that the Bullfrog Flats Master Plan...."is intended to elevate the DTC (downtown core) as the primary retail and activity nexus for Cle Elum". Current rules for the Bullfrog Flats property prohibit a retail center on the property.

Re: 47 Degrees North Major Amendment proposal

I am writing to inform the city of my very strong opposition to the Sun Communities 47° North proposal for the Bullfrog flats property. The proposed manufactured home / RV community will result in negative impacts:

- Traffic gridlock with high volume of transient visitors in large recreational vehicles
- Decreased level of service for emergency medical services
- Decreased level of service for police protection
- Decreased level of service for fire protection
- Increased tax burden on existing property owners to pay for aging infrastructure (water, sewer, power, roads)
- Increased 2nd home ownership within a private resort adversely impacting many throughout the community
- Adverse impact to downtown core businesses as resort environment will drive dollars to remain at the resort
- Potential to increase jobs yet does little to offer adequate affordable housing options in relationship to amount of workers necessary to support multiple resorts in the area
- Potential to require additional city resources to manage and address concerns by a high volume of transient visitors
- High volume of short term rentals (STRs) tax revenue by law are applied tourism rather than infrastructure upgrades
- 90% of profits will be, by law, sent out of our community to Wall Street investors

For these reasons, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Re: 47 Degrees North Major Amendment proposal

I am writing to inform the city of my very strong opposition to the Sun Communities 47° North proposal for the Bullfrog flats property. The proposed manufactured home / RV community:

- Is in clear violation of the vision for the property adopted by the city and presented to the public as a condition for annexing Bullfrog Flats into the city. It's not in character with the City of Cle Elum and does not comply with fundamental requirements of the city's comprehensive plan, the development agreement, or zoning for the property.

- Instead of traditional neighborhoods that were planned to be connected to and a natural extension of the city, supporting the rest of the city, 47 Degrees North would create a private for-profit community and tourist resort with gates, private roads and utilities which will be separated from the rest of the city. It will create a private city within a city, forever.

- Fiscal studies of 47 Degrees North show that it will not create sufficient tax revenue to cover the city's cost to serve it. Unless the developer agrees to financially cover the substantial deficits, forever, existing city taxpayers will be required to subsidize Sun's development and taxes will go up.

- Sun's 47 Degrees North will be in its entirety a private business not a natural neighborhood (no lots sold, all spots leased), wholly owned by a massive out-of-state publicly traded corporation who's fiduciary duty is to its shareholders, not city taxpayers. Any subsidies of the project would be a gift of public funds to a private entity.

- Is not housing as contemplated for the Bullfrog UGA. It will displace half of the actual housing planned for the area and replace it with a private park designed as a transient playground.

- Will be the largest manufactured home/RV park on the West Coast and will double the population of Cle Elum. Parks of this magnitude have no place in a town as small as Cle Elum. Wrong Place Wrong Size.

- Sun has eliminated the industrial park component of the approved plan and is proposing a major new retail center to the project which would compete with existing city businesses and will seriously damage Cle Elum's downtown, which the city has invested millions of dollars to reinvigorate. The retail center is in direct conflict with the city's comprehensive plan which states that the Bullfrog Flats Master Plan…."is intended to elevate the DTC (downtown core) as the primary retail and activity nexus for Cle Elum". Current rules for the Bullfrog Flats property prohibit a retail center on the property.

- Provides no significant benefits to city or UKC residents, but creates serious and significant impacts on roads, police, fire, schools, emergency services, hospitals and other public services that can't be (or won't be) fully mitigated by the developer.

- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for. Any such increase in taxes will effectively translate to a subsidy for a private business,

- Denial of 47 Degrees North will not take away or reduce underlying property rights. It will simply require Sun Communities to comply with city's current rules, regulations and comprehensive plan for the property. The original underlying zoning approval and development agreement already allows development of this site, just not as a private resort/manufactured home community/retail center.

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Respectfully,

Re: 47 Degrees North Major Amendment proposal

I am writing to inform the city of my very strong opposition to the Sun Communities 47° North proposal for the Bullfrog flats property. The proposed manufactured home / RV community:

- Is in clear violation of the vision for the property adopted by the city and presented to the public as a condition for annexing Bullfrog Flats into the city. It's not in character with the City of Cle Elum and does not comply with fundamental requirements of the city's comprehensive plan, the development agreement, or zoning for the property.
- Instead of traditional neighborhoods that were planned to be connected to and a natural extension of the city, supporting the rest of the city, 47 Degrees North would create a private for-profit community and tourist resort with gates, private roads and utilities which will be separated from the rest of the city. It will create a private city within a city, forever.
- Fiscal studies of 47 Degrees North show that it will not create sufficient tax revenue to cover the city's cost to serve it. Unless the developer agrees to financially cover the substantial deficits, forever, existing city taxpayers will be required to subsidize Sun's development and taxes will go up.
- Sun's 47 Degrees North will be in its entirety a private business not a natural neighborhood (no lots sold, all spots leased), wholly owned by a massive out-of-state publicly traded corporation who's fiduciary duty is to its shareholders, not city taxpayers. Any subsidies of the project would be a gift of public funds to a private entity.
- Is not housing as contemplated for the Bullfrog UGA. It will displace half of the actual housing planned for the area and replace it with a private park designed as a transient playground.
- Will be the largest manufactured home/RV park on the West Coast and will double the population of Cle Elum. Parks of this magnitude have no place in a town as small as Cle Elum. Wrong Place Wrong Size.
- Sun has eliminated the industrial park component of the approved plan and is proposing a major new retail center to the project which would compete with existing city businesses and will seriously damage Cle Elum's downtown, which the city has invested millions of dollars to reinvigorate. The retail center is in direct conflict with the city's comprehensive plan which states that the Bullfrog Flats Master Plan…."is intended to elevate the DTC (downtown core) as the primary retail and activity nexus for Cle Elum". Current rules for the Bullfrog Flats property prohibit a retail center on the property.
- Provides no significant benefits to city or UKC residents, but creates serious and significant impacts on roads, police, fire, schools, emergency services, hospitals and other public services that can't be (or won't be) fully mitigated by the developer, and,
- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for. Any such increase in taxes will effectively translate to a subsidy for a private business,
- Denial of 47 Degrees North will not take away or reduce underlying property rights. It will simply require Sun Communities to comply with city's current rules, regulations and comprehensive plan for the property. The original underlying zoning approval and development agreement already allows development of this site, just not as a private resort/manufactured home community/retail center.

Re: 47 Degrees North Major Amendment proposal

I am writing to inform the city of my very strong opposition to the Sun Communities 47° North proposal for the Bullfrog flats property. The proposed manufactured home / RV community will result in negative impacts:

- Traffic gridlock with high volume of transient visitors in large recreational vehicles
- Decreased level of service for emergency medical services
- Decreased level of service for police protection
- Decreased level of service for fire protection
- Increased tax burden on existing property owners to pay for aging infrastructure (water, sewer, power, roads)
- Increased 2nd home ownership within a private resort adversely impacting many throughout the community
- Adverse impact to downtown core businesses as resort environment will drive dollars to remain at the resort
- Potential to increase jobs yet does little to offer adequate affordable housing options in relationship to amount of workers necessary to support multiple resorts in the area
- Potential to require additional city resources to manage and address concerns by a high volume of transient visitors
- High volume of short term rentals (STRs) tax revenue by law are applied tourism rather than infrastructure upgrades
- 90% of profits will be, by law, sent out of our community to Wall Street investors

For these reasons, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Respectfully,

Kari Lariviere

Re: 47 Degrees North Major Amendment proposal

I am writing to inform the city of my very strong opposition to the Sun Communities 47° North proposal for the Bullfrog flats property. The proposed manufactured home / RV community will result in negative impacts:

- Traffic gridlock with high volume of transient visitors in large recreational vehicles
- Decreased level of service for emergency medical services
- Decreased level of service for police protection
- Decreased level of service for fire protection
- Increased tax burden on existing property owners to pay for aging infrastructure (water, sewer, power, roads)
- Increased 2nd home ownership within a private resort adversely impacting many throughout the community
- Adverse impact to downtown core businesses as resort environment will drive dollars to remain at the resort
- Potential to increase jobs yet does little to offer adequate affordable housing options in relationship to amount of workers necessary to support multiple resorts in the area
- Potential to require additional city resources to manage and address concerns by a high volume of transient visitors
- High volume of short term rentals (STRs) tax revenue by law are applied tourism rather than infrastructure upgrades
- 90% of profits will be, by law, sent out of our community to Wall Street investors

For these reasons, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Respectfully,

Jenci Randall

Re: 47 Degrees North Major Amendment proposal

I am writing to inform the city of my very strong opposition to the Sun Communities 47° North proposal for the Bullfrog flats property. The proposed manufactured home / RV community:

- Is in clear violation of the vision for the property adopted by the city and presented to the public as a condition for annexing Bullfrog Flats into the city. It's not in character with the City of Cle Elum and does not comply with fundamental requirements of the city's comprehensive plan, the development agreement, or zoning for the property.

- Instead of traditional neighborhoods that were planned to be connected to and a natural extension of the city, supporting the rest of the city, 47 Degrees North would create a private for-profit community and tourist resort with gates, private roads and utilities which will be separated from the rest of the city. It will create a private city within a city, forever.

- Fiscal studies of 47 Degrees North show that it will not create sufficient tax revenue to cover the city's cost to serve it. Unless the developer agrees to financially cover the substantial deficits, forever, existing city taxpayers will be required to subsidize Sun's development and taxes will go up.

- Sun's 47 Degrees North will be in its entirety a private business not a natural neighborhood (no lots sold, all spots leased), wholly owned by a massive out-of-state publicly traded corporation whose fiduciary duty is to its shareholders, not city taxpayers. Any subsidies of the project would be a gift of public funds to a private entity.

- Is not housing as contemplated for the Bullfrog UGA. It will displace half of the actual housing planned for the area and replace it with a private park designed as a transient playground.

- Will be the largest manufactured home/RV park on the West Coast and will double the population of Cle Elum. Parks of this magnitude have no place in a town as small as Cle Elum. Wrong Place, Wrong Size.

- Sun has eliminated the industrial park component of the approved plan and is proposing a major new retail center to the project which would compete with existing city businesses and will seriously damage Cle Elum's downtown, which the city has invested millions of dollars to reinvigorate. The retail center is in direct conflict with the city's comprehensive plan which states that the Bullfrog Flats Master Plan…."is intended to elevate the DTC (downtown core) as the primary retail and activity nexus for Cle Elum". Current rules for the Bullfrog Flats property prohibit a retail center on the property.

- Provides no significant benefits to city or UKC residents, but creates serious and significant impacts on roads, police, fire, schools, emergency services, hospitals and other public services that can't be (or won't be) fully mitigated by the developer.

- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for. Any such increase in taxes will effectively translate to a subsidy for a private business,

- Denial of 47 Degrees North will not take away or reduce underlying property rights. It will simply require Sun Communities to comply with city's current rules, regulations and comprehensive plan for the property. The original underlying zoning approval and development agreement already allows development of this site, just not as a private resort/manufactured home community/retail center.

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Respectfully,

Kim Cswalt

The retail center is in direct conflict with the city's comprehensive plan which states that the Bullfrog Flats Master Plan…."is intended to elevate the DTC (downtown core) as the primary retail and activity nexus for Cle Elum". Current rules for the Bullfrog Flats property prohibit a retail center on the property.

- Provides no significant benefits to city or UKC residents, but creates serious and significant impacts on roads, police, fire, schools, emergency services, hospitals and other public services that can't be (or won't be) fully mitigated by the developer.

- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for. Any such increase in taxes will effectively translate to a subsidy for a private business,

- Denial of 47 Degrees North will not take away or reduce underlying property rights. It will simply require Sun Communities to comply with city's current rules, regulations and comprehensive plan for the property. The original underlying zoning approval and development agreement already allows development of this site, just not as a private resort/manufactured home community/retail center.

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Respectfully,

Re: 47 Degrees North Major Amendment proposal

I am writing to inform the city of my very strong opposition to the Sun Communities 47° North proposal for the Bullfrog flats property. The proposed manufactured home / RV community:

- Is in clear violation of the vision for the property adopted by the city and presented to the public as a condition for annexing Bullfrog Flats into the city. It's not in character with the City of Cle Elum and does not comply with fundamental requirements of the city's comprehensive plan, the development agreement, or zoning for the property.

- Instead of traditional neighborhoods that were planned to be connected to and a natural extension of the city, supporting the rest of the city, 47 Degrees North would create a private for-profit community and tourist resort with gates, private roads and utilities which will be separated from the rest of the city. It will create a private city within a city, forever.

- Fiscal studies of 47 Degrees North show that it will not create sufficient tax revenue to cover the city's cost to serve it. Unless the developer agrees to financially cover the substantial deficits, forever, existing city taxpayers will be required to subsidize Sun's development and taxes will go up.

- Sun's 47 Degrees North will be in its entirety a private business not a natural neighborhood (no lots sold, all spots leased), wholly owned by a massive out-of-state publicly traded corporation whose fiduciary duty is to its shareholders, not city taxpayers. Any subsidies of the project would be a gift of public funds to a private entity.

- Is not housing as contemplated for the Bullfrog UGA. It will displace half of the actual housing planned for the area and replace it with a private park designed as a transient playground.

- Will be the largest manufactured home/RV park on the West Coast and will double the population of Cle Elum. Parks of this magnitude have no place in a town as small as Cle Elum. Wrong Place, Wrong Size.

- Sun has eliminated the industrial park component of the approved plan and is proposing a major new retail center to the project which would compete with existing city businesses and will seriously damage Cle Elum's downtown, which the city has invested millions of dollars to reinvigorate. The retail center is in direct conflict with the city's comprehensive plan which states that the Bullfrog Flats Master Plan…."is intended to elevate the DTC (downtown core) as the primary retail and activity nexus for Cle Elum". Current rules for the Bullfrog Flats property prohibit a retail center on the property.

- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for. Any such increase in taxes will effectively translate to a subsidy for a private business,
- Denial of 47 Degrees North will not take away or reduce underlying property rights. It will simply require Sun Communities to comply with city's current rules, regulations and comprehensive plan for the property. The original underlying zoning approval and development agreement already allows development of this site, just not as a private resort/manufactured home community/retail center.

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Respectfully,

Re: 47 Degrees North Major Amendment proposal

I am writing to inform the city of my very strong opposition to the Sun Communities 47° North proposal for the Bullfrog flats property. The proposed manufactured home / RV community:

- Is in clear violation of the vision for the property adopted by the city and presented to the public as a condition for annexing Bullfrog Flats into the city. It's not in character with the City of Cle Elum and does not comply with fundamental requirements of the city's comprehensive plan, the development agreement, or zoning for the property.

- Instead of traditional neighborhoods that were planned to be connected to and a natural extension of the city, supporting the rest of the city, 47 Degrees North would create a private for-profit community and tourist resort with gates, private roads and utilities which will be separated from the rest of the city. It will create a private city within a city, forever.

- Fiscal studies of 47 Degrees North show that it will not create sufficient tax revenue to cover the city's cost to serve it. Unless the developer agrees to financially cover the substantial deficits, forever, existing city taxpayers will be required to subsidize Sun's development and taxes will go up.

- Sun's 47 Degrees North will be in its entirety a private business not a natural neighborhood (no lots sold, all spots leased), wholly owned by a massive out-of-state publicly traded corporation whose fiduciary duty is to its shareholders, not city taxpayers. Any subsidies of the project would be a gift of public funds to a private entity.

- Is not housing as contemplated for the Bullfrog UGA. It will displace half of the actual housing planned for the area and replace it with a private park designed as a transient playground.

- Will be the largest manufactured home/RV park on the West Coast and will double the population of Cle Elum. Parks of this magnitude have no place in a town as small as Cle Elum. Wrong Place, Wrong Size.

- Sun has eliminated the industrial park component of the approved plan and is proposing a major new retail center to the project which would compete with existing city businesses and will seriously damage Cle Elum's downtown, which the city has invested millions of dollars to reinvigorate. The retail center is in direct conflict with the city's comprehensive plan which states that the Bullfrog Flats Master Plan…."is intended to elevate the DTC (downtown core) as the primary retail and activity nexus for Cle Elum". Current rules for the Bullfrog Flats property prohibit a retail center on the property.

- Provides no significant benefits to city or UKC residents, but creates serious and significant impacts on roads, police, fire, schools, emergency services, hospitals and other public services that can't be (or won't be) fully mitigated by the developer.

- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for. Any such increase in taxes will effectively translate to a subsidy for a private business,

- Denial of 47 Degrees North will not take away or reduce underlying property rights. Re: 47 Degrees North Major Amendment proposal

I am writing to inform the city of my very strong opposition to the Sun Communities 47° North proposal for the Bullfrog flats property. The proposed manufactured home / RV community:

- Is in clear violation of the vision for the property adopted by the city and presented to the public as a condition for annexing Bullfrog Flats into the city. It's not in character with the City of Cle Elum and does not comply with fundamental requirements of the city's comprehensive plan, the development agreement, or zoning for the property.

- Instead of traditional neighborhoods that were planned to be connected to and a natural extension of the city, supporting the rest of the city, 47 Degrees North would create a private for-profit community and tourist resort with gates, private roads and utilities which will be separated from the rest of the city. It will create a private city within a city, forever.

- Fiscal studies of 47 Degrees North show that it will not create sufficient tax revenue to cover the city's cost to serve it. Unless the developer agrees to financially cover the substantial deficits, forever, existing city taxpayers will be required to subsidize Sun's development and taxes will go up.

- Sun's 47 Degrees North will be in its entirety a private business not a natural neighborhood (no lots sold, all spots leased), wholly owned by a massive out-of-state publicly traded corporation whose fiduciary duty is to its shareholders, not city taxpayers. Any subsidies of the project would be a gift of public funds to a private entity.

- Is not housing as contemplated for the Bullfrog UGA. It will displace half of the actual housing planned for the area and replace it with a private park designed as a transient playground.

- Will be the largest manufactured home/RV park on the West Coast and will double the population of Cle Elum. Parks of this magnitude have no place in a town as small as Cle Elum. Wrong Place, Wrong Size.

- Sun has eliminated the industrial park component of the approved plan and is proposing a major new retail center to the project which would compete with existing city businesses and will seriously damage Cle Elum's downtown, which the city has invested millions of dollars to reinvigorate. The retail center is in direct conflict with the city's comprehensive plan which states that the Bullfrog Flats Master Plan…."is intended to elevate the DTC (downtown core) as the primary retail and activity nexus for Cle Elum". Current rules for the Bullfrog Flats property prohibit a retail center on the property.

- Provides no significant benefits to city or UKC residents, but creates serious and significant impacts on roads, police, fire, schools, emergency services, hospitals and other public services that can't be (or won't be) fully mitigated by the developer.

- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for. Any such increase in taxes will effectively translate to a subsidy for a private business,

- Denial of 47 Degrees North will not take away or reduce underlying property rights. It will simply require Sun Communities to comply with city's current rules, regulations and comprehensive plan for the property. The original underlying zoning approval and development agreement already allows development of this site, just not as a private resort/manufactured home community/retail center.

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Re: 47 Degrees North Major Amendment proposal

I am writing to inform the city of my very strong opposition to the Sun Communities 47° North proposal for the Bullfrog flats property. The proposed manufactured home / RV community:

- Is in clear violation of the vision for the property adopted by the city and presented to the public as a condition for annexing Bullfrog Flats into the city. It's not in character with the City of Cle Elum and does not comply with fundamental requirements of the city's comprehensive plan, the development agreement, or zoning for the property.

- Instead of traditional neighborhoods that were planned to be connected to and a natural extension of the city, supporting the rest of the city, 47 Degrees North would create a private for-profit community and tourist resort with gates, private roads and utilities which will be separated from the rest of the city. It will create a private city within a city, <u>forever</u>.

- Fiscal studies of 47 Degrees North show that it will not create sufficient tax revenue to cover the city's cost to serve it. Unless the developer agrees to financially cover the substantial deficits, <u>forever</u>, existing city taxpayers will be required to subsidize Sun's development and taxes will go up.

- Sun's 47 Degrees North will be in its entirety a private business not a natural neighborhood (no lots sold, all spots leased), wholly owned by a massive out-of-state publicly traded corporation whose fiduciary duty is to its shareholders, not city taxpayers. Any subsidies of the project would be a gift of public funds to a private entity.

- Is not housing as contemplated for the Bullfrog UGA. It will displace half of the actual housing planned for the area and replace it with a private park designed as a transient playground.

- Will be the largest manufactured home/RV park on the West Coast and will double the population of Cle Elum. Parks of this magnitude have no place in a town as small as Cle Elum. Wrong Place, Wrong Size.

- Sun has eliminated the industrial park component of the approved plan and is proposing a major new retail center to the project which would compete with existing city businesses and will seriously damage Cle Elum's downtown, which the city has invested millions of dollars to reinvigorate. The retail center is in direct conflict with the city's comprehensive plan which states that the Bullfrog Flats Master Plan…."is intended to elevate the DTC (downtown core) as the primary retail and activity nexus for Cle Elum". Current rules for the Bullfrog Flats property prohibit a retail center on the property.

- Provides no significant benefits to city or UKC residents, but creates serious and significant impacts on roads, police, fire, schools, emergency services, hospitals and other public services that can't be (or won't be) fully mitigated by the developer.

- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for. Any such increase in taxes will effectively translate to a subsidy for a private business,

- <u>Denial</u> of 47 Degrees North will not take away or reduce underlying property rights. It will simply require Sun Communities to comply with city's current rules, regulations and comprehensive plan for the property. The original underlying zoning approval and development agreement already allows development of this site, just not as a private resort/manufactured home community/retail center.

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Respectfully,

Liz Spiller

Re: 47 Degrees North Major Amendment proposal

I am writing to inform the city of my very strong opposition to the Sun Communities 47° North proposal for the Bullfrog flats property. The proposed manufactured home / RV community:

- Is in clear violation of the vision for the property adopted by the city and presented to the public as a condition for annexing Bullfrog Flats into the city. It's not in character with the City of Cle Elum and does not comply with fundamental requirements of the city's comprehensive plan, the development agreement, or zoning for the property.
- Instead of traditional neighborhoods that were planned to be connected to and a natural extension of the city, supporting the rest of the city, 47 Degrees North would create a private for-profit community and tourist resort with gates, private roads and utilities which will be separated from the rest of the city. It will create a private city within a city, forever.
- Fiscal studies of 47 Degrees North show that it will not create sufficient tax revenue to cover the city's cost to serve it. Unless the developer agrees to financially cover the substantial deficits, forever, existing city taxpayers will be required to subsidize Sun's development and taxes will go up.
- Sun's 47 Degrees North will be in its entirety a private business not a natural neighborhood (no lots sold, all spots leased), wholly owned by a massive out-of-state publicly traded corporation who's fiduciary duty is to its shareholders, not city taxpayers. Any subsidies of the project would be a gift of public funds to a private entity.
- Is not housing as contemplated for the Bullfrog UGA. It will displace half of the actual housing planned for the area and replace it with a private park designed as a transient playground.
- Will be the largest manufactured home/RV park on the West Coast and will double the population of Cle Elum. Parks of this magnitude have no place in a town as small as Cle Elum. Wrong Place Wrong Size.
- Sun has eliminated the industrial park component of the approved plan and is proposing a major new retail center to the project which would compete with existing city businesses and will seriously damage Cle Elum's downtown, which the city has invested millions of dollars to reinvigorate. The retail center is in direct conflict with the city's comprehensive plan which states that the Bullfrog Flats Master Plan…."is intended to elevate the DTC (downtown core) as the primary retail and activity nexus for Cle Elum". Current rules for the Bullfrog Flats property prohibit a retail center on the property.
- Provides no significant benefits to city or UKC residents, but creates serious and significant impacts on roads, police, fire, schools, emergency services, hospitals and other public services that can't be (or won't be) fully mitigated by the developer, and,
- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for. Any such increase in taxes will effectively translate to a subsidy for a private business,
- Denial of 47 Degrees North will not take away or reduce underlying property rights. It will simply require Sun Communities to comply with city's current rules, regulations and comprehensive plan for the property. The original underlying zoning approval and development agreement already allows development of this site, just not as a private resort/manufactured home community/retail center.

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Respectfully,

- Is in clear violation of the vision for the property adopted by the city and presented to the public as a condition for annexing Bullfrog Flats into the city. It's not in character with the City of Cle Elum and does not comply with fundamental requirements of the city's comprehensive plan, the development agreement, or zoning for the property.

- Instead of traditional neighborhoods that were planned to be connected to and a natural extension of the city, supporting the rest of the city, 47 Degrees North would create a private for-profit community and tourist resort with gates, private roads and utilities which will be separated from the rest of the city. It will create a private city within a city, forever.

- Fiscal studies of 47 Degrees North show that it will not create sufficient tax revenue to cover the city's cost to serve it. Unless the developer agrees to financially cover the substantial deficits, forever, existing city taxpayers will be required to subsidize Sun's development and taxes will go up.

- Sun's 47 Degrees North will be in its entirety a private business not a natural neighborhood (no lots sold, all spots leased), wholly owned by a massive out-of-state publicly traded corporation whose fiduciary duty is to its shareholders, not city taxpayers. Any subsidies of the project would be a gift of public funds to a private entity.

- Is not housing as contemplated for the Bullfrog UGA. It will displace half of the actual housing planned for the area and replace it with a private park designed as a transient playground.

- Will be the largest manufactured home/RV park on the West Coast and will double the population of Cle Elum. Parks of this magnitude have no place in a town as small as Cle Elum. Wrong Place, Wrong Size.

- Sun has eliminated the industrial park component of the approved plan and is proposing a major new retail center to the project which would compete with existing city businesses and will seriously damage Cle Elum's downtown, which the city has invested millions of dollars to reinvigorate. The retail center is in direct conflict with the city's comprehensive plan which states that the Bullfrog Flats Master Plan…."is intended to elevate the DTC (downtown core) as the primary retail and activity nexus for Cle Elum". Current rules for the Bullfrog Flats property prohibit a retail center on the property.

- Provides no significant benefits to city or UKC residents, but creates serious and significant impacts on roads, police, fire, schools, emergency services, hospitals and other public services that can't be (or won't be) fully mitigated by the developer.

- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for. Any such increase in taxes will effectively translate to a subsidy for a private business,

- Denial of 47 Degrees North will not take away or reduce underlying property rights. It will simply require Sun Communities to comply with city's current rules, regulations and comprehensive plan for the property. The original underlying zoning approval and development agreement already allows development of this site, just not as a private resort/manufactured home community/retail center.

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Respectfully,

- Instead of traditional neighborhoods that were planned to be connected to and a natural extension of the city, supporting the rest of the city, 47 Degrees North would create a private for-profit community and tourist resort with gates, private roads and utilities which will be separated from the rest of the city. It will create a private city within a city, forever.
- Fiscal studies of 47 Degrees North show that it will not create sufficient tax revenue to cover the city's cost to serve it. Unless the developer agrees to financially cover the substantial deficits, forever, existing city taxpayers will be required to subsidize Sun's development and taxes will go up.
- Sun's 47 Degrees North will be in its entirety a private business not a natural neighborhood (no lots sold, all spots leased), wholly owned by a massive out-of-state publicly traded corporation who's fiduciary duty is to its shareholders, not city taxpayers. Any subsidies of the project would be a gift of public funds to a private entity.
- Is not housing as contemplated for the Bullfrog UGA. It will displace half of the actual housing planned for the area and replace it with a private park designed as a transient playground.
- Will be the largest manufactured home/RV park on the West Coast and will double the population of Cle Elum. Parks of this magnitude have no place in a town as small as Cle Elum. Wrong Place Wrong Size.
- Sun has eliminated the industrial park component of the approved plan and is proposing a major new retail center to the project which would compete with existing city businesses and will seriously damage Cle Elum's downtown, which the city has invested millions of dollars to reinvigorate. The retail center is in direct conflict with the city's comprehensive plan which states that the Bullfrog Flats Master Plan…."is intended to elevate the DTC (downtown core) as the primary retail and activity nexus for Cle Elum". Current rules for the Bullfrog Flats property prohibit a retail center on the property.
- Provides no significant benefits to city or UKC residents, but creates serious and significant impacts on roads, police, fire, schools, emergency services, hospitals and other public services that can't be (or won't be) fully mitigated by the developer, and,
- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for. Any such increase in taxes will effectively translate to a subsidy for a private business,
- Denial of 47 Degrees North will not take away or reduce underlying property rights. It will simply require Sun Communities to comply with city's current rules, regulations and comprehensive plan for the property. The original underlying zoning approval and development agreement already allows development of this site, just not as a private resort/manufactured home community/retail center.

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Respectfully,

Wayne W. Gotts

Re: 47 Degrees North Major Amendment proposal

I am writing to inform the city of my very strong opposition to the Sun Communities 47° North proposal for the Bullfrog flats property. The proposed manufactured home / RV community:

- Is in clear violation of the vision for the property adopted by the city and presented to the public as a condition for annexing Bullfrog Flats into the city. It's not in character with the City of Cle Elum and does not comply with fundamental requirements of the city's comprehensive plan, the development agreement, or zoning for the property.
- Instead of traditional neighborhoods that were planned to be connected to and a natural extension of the city, supporting the rest of the city, 47 Degrees North would create a private for-profit community and tourist resort with gates, private roads and utilities which will be separated from the rest of the city. It will create a private city within a city, forever.

Re: 47 Degrees North Major Amendment proposal

I am writing to inform the city of my very strong opposition to the Sun Communities 47° North proposal for the Bullfrog flats property. The proposed manufactured home / RV community will result in negative impacts:

- Traffic gridlock with high volume of transient visitors in large recreational vehicles
- Decreased level of service for emergency medical services
- Decreased level of service for police protection
- Decreased level of service for fire protection
- Increased tax burden on existing property owners to pay for aging infrastructure (water, sewer, power, roads)
- Increased 2nd home ownership within a private resort adversely impacting many throughout the community
- Adverse impact to downtown core businesses as resort environment will drive dollars to remain at the resort
- Potential to increase jobs yet does little to offer adequate affordable housing options in relationship to amount of workers necessary to support multiple resorts in the area
- Potential to require additional city resources to manage and address concerns by a high volume of transient visitors
- High volume of short term rentals (STRs) tax revenue by law are applied tourism rather than infrastructure upgrades
- 90% of profits will be, by law, sent out of our community to Wall Street investors

For these reasons, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Respectfully,

_____

Re: 47 Degrees North Major Amendment proposal

I am writing to inform the city of my very strong opposition to the Sun Communities 47° North proposal for the Bullfrog flats property. The proposed manufactured home / RV community:

- Is in clear violation of the vision for the property adopted by the city and presented to the public as a condition for annexing Bullfrog Flats into the city. It's not in character with the City of Cle Elum and does not comply with fundamental requirements of the city's comprehensive plan, the development agreement, or zoning for the property.
- Instead of traditional neighborhoods that were planned to be connected to and a natural extension of the city, supporting the rest of the city, 47 Degrees North would create a private for-profit community and tourist resort with gates, private roads and utilities which will be separated from the rest of the city. It will create a private city within a city, forever.
- Fiscal studies of 47 Degrees North show that it will not create sufficient tax revenue to cover the city's cost to serve it. Unless the developer agrees to financially cover the substantial deficits, forever, existing city taxpayers will be required to subsidize Sun's development and taxes will go up.
- Sun's 47 Degrees North will be in its entirety a private business not a natural neighborhood (no lots sold, all spots leased), wholly owned by a massive out-of-state publicly traded corporation who's fiduciary duty is to its shareholders, not city taxpayers. Any subsidies of the project would be a gift of public funds to a private entity.
- Is not housing as contemplated for the Bullfrog UGA. It will displace half of the actual housing planned for the area and replace it with a private park designed as a transient playground.
- Will be the largest manufactured home/RV park on the West Coast and will double the population of Cle Elum. Parks of this magnitude have no place in a town as small as Cle Elum. Wrong Place Wrong Size.
- Sun has eliminated the industrial park component of the approved plan and is proposing a major new retail center to the project which would compete with existing city businesses and will seriously damage Cle Elum's downtown, which the city has invested millions of dollars to reinvigorate. The retail center is in direct conflict with the city's comprehensive plan which states that the Bullfrog Flats Master Plan…."is intended to elevate the DTC (downtown core) as the primary retail and activity nexus for Cle Elum". Current rules for the Bullfrog Flats property prohibit a retail center on the property.
- Provides no significant benefits to city or UKC residents, but creates serious and significant impacts on roads, police, fire, schools, emergency services, hospitals and other public services that can't be (or won't be) fully mitigated by the developer, and,
- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for. Any such increase in taxes will effectively translate to a subsidy for a private business,
- Denial of 47 Degrees North will not take away or reduce underlying property rights. It will simply require Sun Communities to comply with city's current rules, regulations and comprehensive plan for the property. The original underlying zoning approval and development agreement already allows development of this site, just not as a private resort/manufactured home community/retail center.

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Respectfully,

_____

Re: 47 Degrees North Major Amendment proposal

I am writing to inform the city of my very strong opposition to the Sun Communities 47° North proposal for the Bullfrog flats property. The proposed manufactured home / RV community:

- Is in clear violation of the vision for the property adopted by the city and presented to the public as a condition for annexing Bullfrog Flats into the city. It's not in character with the City of Cle Elum and does not comply with fundamental requirements of the city's comprehensive plan, the development agreement, or zoning for the property.
- Instead of traditional neighborhoods that were planned to be connected to and a natural extension of the city, supporting the rest of the city, 47 Degrees North would create a private for-profit community and tourist resort with gates, private roads and utilities which will be separated from the rest of the city. It will create a private city within a city, forever.
- Fiscal studies of 47 Degrees North show that it will not create sufficient tax revenue to cover the city's cost to serve it. Unless the developer agrees to financially cover the substantial deficits, forever, existing city taxpayers will be required to subsidize Sun's development and taxes will go up.
- Sun's 47 Degrees North will be in its entirety a private business not a natural neighborhood (no lots sold, all spots leased), wholly owned by a massive out-of-state publicly traded corporation who's fiduciary duty is to its shareholders, not city taxpayers. Any subsidies of the project would be a gift of public funds to a private entity.
- Is not housing as contemplated for the Bullfrog UGA. It will displace half of the actual housing planned for the area and replace it with a private park designed as a transient playground.
- Will be the largest manufactured home/RV park on the West Coast and will double the population of Cle Elum. Parks of this magnitude have no place in a town as small as Cle Elum. Wrong Place Wrong Size.
- Sun has eliminated the industrial park component of the approved plan and is proposing a major new retail center to the project which would compete with existing city businesses and will seriously damage Cle Elum's downtown, which the city has invested millions of dollars to reinvigorate. The retail center is in direct conflict with the city's comprehensive plan which states that the Bullfrog Flats Master Plan...."is intended to elevate the DTC (downtown core) as the primary retail and activity nexus for Cle Elum". Current rules for the Bullfrog Flats property prohibit a retail center on the property.
- Provides no significant benefits to city or UKC residents, but creates serious and significant impacts on roads, police, fire, schools, emergency services, hospitals and other public services that can't be (or won't be) fully mitigated by the developer, and,
- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for. Any such increase in taxes will effectively translate to a subsidy for a private business,
- Denial of 47 Degrees North will not take away or reduce underlying property rights. It will simply require Sun Communities to comply with city's current rules, regulations and comprehensive plan for the property. The original underlying zoning approval and development agreement already allows development of this site, just not as a private resort/manufactured home community/retail center.

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Respectfully,

Signature

Re: 47 Degrees North Major Amendment proposal

I am writing to inform the city of my very strong opposition to the Sun Communities 47° North proposal for the Bullfrog flats property. The proposed manufactured home / RV community:

- Is in clear violation of the vision for the property adopted by the city and presented to the public as a condition for annexing Bullfrog Flats into the city. It's not in character with the City of Cle Elum and does not comply with fundamental requirements of the city's comprehensive plan, the development agreement, or zoning for the property.

- Instead of traditional neighborhoods that were planned to be connected to and a natural extension of the city, supporting the rest of the city, 47 Degrees North would create a private for-profit community and tourist resort with gates, private roads and utilities which will be separated from the rest of the city. It will create a private city within a city, forever.

- Fiscal studies of 47 Degrees North show that it will not create sufficient tax revenue to cover the city's cost to serve it. Unless the developer agrees to financially cover the substantial deficits, forever, existing city taxpayers will be required to subsidize Sun's development and taxes will go up.

- Sun's 47 Degrees North will be in its entirety a private business not a natural neighborhood (no lots sold, all spots leased), wholly owned by a massive out-of-state publicly traded corporation whose fiduciary duty is to its shareholders, not city taxpayers. Any subsidies of the project would be a gift of public funds to a private entity.

- Is not housing as contemplated for the Bullfrog UGA. It will displace half of the actual housing planned for the area and replace it with a private park designed as a transient playground.

- Will be the largest manufactured home/RV park on the West Coast and will double the population of Cle Elum. Parks of this magnitude have no place in a town as small as Cle Elum. Wrong Place, Wrong Size.

- Sun has eliminated the industrial park component of the approved plan and is proposing a major new retail center to the project which would compete with existing city businesses and will seriously damage Cle Elum's downtown, which the city has invested millions of dollars to reinvigorate. The retail center is in direct conflict with the city's comprehensive plan which states that the Bullfrog Flats Master Plan…."is intended to elevate the DTC (downtown core) as the primary retail and activity nexus for Cle Elum". Current rules for the Bullfrog Flats property prohibit a retail center on the property.

- Provides no significant benefits to city or UKC residents, but creates serious and significant impacts on roads, police, fire, schools, emergency services, hospitals and other public services that can't be (or won't be) fully mitigated by the developer.

- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for. Any such increase in taxes will effectively translate to a subsidy for a private business,

- Denial of 47 Degrees North will not take away or reduce underlying property rights. It will simply require Sun Communities to comply with city's current rules, regulations and comprehensive plan for the property. The original underlying zoning approval and development agreement already allows development of this site, just not as a private resort/manufactured home community/retail center.

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Respectfully,

- Is in clear violation of the vision for the property adopted by the city and presented to the public as a condition for annexing Bullfrog Flats into the city. It's not in character with the City of Cle Elum and does not comply with fundamental requirements of the city's comprehensive plan, the development agreement, or zoning for the property.

- Instead of traditional neighborhoods that were planned to be connected to and a natural extension of the city, supporting the rest of the city, 47 Degrees North would create a private for-profit community and tourist resort with gates, private roads and utilities which will be separated from the rest of the city. It will create a private city within a city, forever.

- Fiscal studies of 47 Degrees North show that it will not create sufficient tax revenue to cover the city's cost to serve it. Unless the developer agrees to financially cover the substantial deficits, forever, existing city taxpayers will be required to subsidize Sun's development and taxes will go up.

- Sun's 47 Degrees North will be in its entirety a private business not a natural neighborhood (no lots sold, all spots leased), wholly owned by a massive out-of-state publicly traded corporation whose fiduciary duty is to its shareholders, not city taxpayers. Any subsidies of the project would be a gift of public funds to a private entity.

- Is not housing as contemplated for the Bullfrog UGA. It will displace half of the actual housing planned for the area and replace it with a private park designed as a transient playground.

- Will be the largest manufactured home/RV park on the West Coast and will double the population of Cle Elum. Parks of this magnitude have no place in a town as small as Cle Elum. Wrong Place, Wrong Size.

- Sun has eliminated the industrial park component of the approved plan and is proposing a major new retail center to the project which would compete with existing city businesses and will seriously damage Cle Elum's downtown, which the city has invested millions of dollars to reinvigorate. The retail center is in direct conflict with the city's comprehensive plan which states that the Bullfrog Flats Master Plan…."is intended to elevate the DTC (downtown core) as the primary retail and activity nexus for Cle Elum". Current rules for the Bullfrog Flats property prohibit a retail center on the property.

- Provides no significant benefits to city or UKC residents, but creates serious and significant impacts on roads, police, fire, schools, emergency services, hospitals and other public services that can't be (or won't be) fully mitigated by the developer.

- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for. Any such increase in taxes will effectively translate to a subsidy for a private business,

- Denial of 47 Degrees North will not take away or reduce underlying property rights. It will simply require Sun Communities to comply with city's current rules, regulations and comprehensive plan for the property. The original underlying zoning approval and development agreement already allows development of this site, just not as a private resort/manufactured home community/retail center.

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Respectfully,

Jodie Mayer

- Instead of traditional neighborhoods that were planned to be connected to and a natural extension of the city, supporting the rest of the city, 47 Degrees North would create a private for-profit community and tourist resort with gates, private roads and utilities which will be separated from the rest of the city. It will create a private city within a city, forever.

- Fiscal studies of 47 Degrees North show that it will not create sufficient tax revenue to cover the city's cost to serve it. Unless the developer agrees to financially cover the substantial deficits, forever, existing city taxpayers will be required to subsidize Sun's development and taxes will go up.

- Sun's 47 Degrees North will be in its entirety a private business not a natural neighborhood (no lots sold, all spots leased), wholly owned by a massive out-of-state publicly traded corporation whose fiduciary duty is to its shareholders, not city taxpayers. Any subsidies of the project would be a gift of public funds to a private entity.

- Is not housing as contemplated for the Bullfrog UGA. It will displace half of the actual housing planned for the area and replace it with a private park designed as a transient playground.

- Will be the largest manufactured home/RV park on the West Coast and will double the population of Cle Elum. Parks of this magnitude have no place in a town as small as Cle Elum. Wrong Place, Wrong Size.

- Sun has eliminated the industrial park component of the approved plan and is proposing a major new retail center to the project which would compete with existing city businesses and will seriously damage Cle Elum's downtown, which the city has invested millions of dollars to reinvigorate. The retail center is in direct conflict with the city's comprehensive plan which states that the Bullfrog Flats Master Plan…."is intended to elevate the DTC (downtown core) as the primary retail and activity nexus for Cle Elum". Current rules for the Bullfrog Flats property prohibit a retail center on the property.

- Provides no significant benefits to city or UKC residents, but creates serious and significant impacts on roads, police, fire, schools, emergency services, hospitals and other public services that can't be (or won't be) fully mitigated by the developer.

- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for. Any such increase in taxes will effectively translate to a subsidy for a private business,

- Denial of 47 Degrees North will not take away or reduce underlying property rights. It will simply require Sun Communities to comply with city's current rules, regulations and comprehensive plan for the property. The original underlying zoning approval and development agreement already allows development of this site, just not as a private resort/manufactured home community/retail center.

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Respectfully,

Re: 47 Degrees North Major Amendment proposal

I am writing to inform the city of my very strong opposition to the Sun Communities 47° North proposal for the Bullfrog flats property. The proposed manufactured home / RV community:

- Is in clear violation of the vision for the property adopted by the city and presented to the public as a condition for annexing Bullfrog Flats into the city. It's not in character with the City of Cle Elum and does not comply with fundamental requirements of the city's comprehensive plan, the development agreement, or zoning for the property.

- Instead of traditional neighborhoods that were planned to be connected to and a natural extension of the city, supporting the rest of the city, 47 Degrees North would create a private for-profit community and tourist resort with gates, private roads and utilities which will be separated from the rest of the city. It will create a private city within a city, forever.

- Fiscal studies of 47 Degrees North show that it will not create sufficient tax revenue to cover the city's cost to serve it. Unless the developer agrees to financially cover the substantial deficits, forever, existing city taxpayers will be required to subsidize Sun's development and taxes will go up.

- Sun's 47 Degrees North will be in its entirety a private business not a natural neighborhood (no lots sold, all spots leased), wholly owned by a massive out-of-state publicly traded corporation whose fiduciary duty is to its shareholders, not city taxpayers. Any subsidies of the project would be a gift of public funds to a private entity.

- Is not housing as contemplated for the Bullfrog UGA. It will displace half of the actual housing planned for the area and replace it with a private park designed as a transient playground.

- Will be the largest manufactured home/RV park on the West Coast and will double the population of Cle Elum. Parks of this magnitude have no place in a town as small as Cle Elum. Wrong Place, Wrong Size.

- Sun has eliminated the industrial park component of the approved plan and is proposing a major new retail center to the project which would compete with existing city businesses and will seriously damage Cle Elum's downtown, which the city has invested millions of dollars to reinvigorate. The retail center is in direct conflict with the city's comprehensive plan which states that the Bullfrog Flats Master Plan…."is intended to elevate the DTC (downtown core) as the primary retail and activity nexus for Cle Elum". Current rules for the Bullfrog Flats property prohibit a retail center on the property.

- Provides no significant benefits to city or UKC residents, but creates serious and significant impacts on roads, police, fire, schools, emergency services, hospitals and other public services that can't be (or won't be) fully mitigated by the developer.

- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for. Any such increase in taxes will effectively translate to a subsidy for a private business,

- Denial of 47 Degrees North will not take away or reduce underlying property rights. It will simply require Sun Communities to comply with city's current rules, regulations and comprehensive plan for the property. The original underlying zoning approval and development agreement already allows development of this site, just not as a private resort/manufactured home community/retail center.

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Respectfully,

Re: 47 Degrees North Major Amendment proposal

I am writing to inform the city of my very strong opposition to the Sun Communities 47° North proposal for the Bullfrog flats property. The proposed manufactured home / RV community:

- Is in clear violation of the vision for the property adopted by the city and presented to the public as a condition for annexing Bullfrog Flats into the city. It's not in character with the City of Cle Elum and does not comply with fundamental requirements of the city's comprehensive plan, the development agreement, or zoning for the property.

- Instead of traditional neighborhoods that were planned to be connected to and a natural extension of the city, supporting the rest of the city, 47 Degrees North would create a private for-profit community and tourist resort with gates, private roads and utilities which will be separated from the rest of the city. It will create a private city within a city, forever.

- Fiscal studies of 47 Degrees North show that it will not create sufficient tax revenue to cover the city's cost to serve it. Unless the developer agrees to financially cover the substantial deficits, forever, existing city taxpayers will be required to subsidize Sun's development and taxes will go up.

- Sun's 47 Degrees North will be in its entirety a private business not a natural neighborhood (no lots sold, all spots leased), wholly owned by a massive out-of-state publicly traded corporation whose fiduciary duty is to its shareholders, not city taxpayers. - Will be the largest manufactured home/RV park on the West Coast and will double the population of Cle Elum. Parks of this magnitude have no place in a town as small as Cle Elum. Wrong Place, Wrong Size.

- Sun has eliminated the industrial park component of the approved plan and is proposing a major new retail center to the project which would compete with existing city businesses and will seriously damage Cle Elum's downtown, which the city has invested millions of dollars to reinvigorate. The retail center is in direct conflict with the city's comprehensive plan which states that the Bullfrog Flats Master Plan…."is intended to elevate the DTC (downtown core) as the primary retail and activity nexus for Cle Elum". Current rules for the Bullfrog Flats property prohibit a retail center on the property.

- Provides no significant benefits to city or UKC residents, but creates serious and significant impacts on roads, police, fire, schools, emergency services, hospitals and other public services that can't be (or won't be) fully mitigated by the developer.

- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for. Any such increase in taxes will effectively translate to a subsidy for a private business,

- Denial of 47 Degrees North will not take away or reduce underlying property rights. It will simply require Sun Communities to comply with city's current rules, regulations and comprehensive plan for the property. The original underlying zoning approval and development agreement already allows development of this site, just not as a private resort/manufactured home community/retail center.

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Respectfully,

Re: 47 Degrees North Major Amendment proposal

I am writing to inform the city of my very strong opposition to the Sun Communities 47° North proposal for the Bullfrog flats property. The proposed manufactured home / RV community:

- Is in clear violation of the vision for the property adopted by the city and presented to the public as a condition for annexing Bullfrog Flats into the city. It's not in character with the City of Cle Elum and does not comply with fundamental requirements of the city's comprehensive plan, the development agreement, or zoning for the property.

- Instead of traditional neighborhoods that were planned to be connected to and a natural extension of the city, supporting the rest of the city, 47 Degrees North would create a private for-profit community and tourist resort with gates, private roads and utilities which will be separated from the rest of the city. It will create a private city within a city, forever.

- Fiscal studies of 47 Degrees North show that it will not create sufficient tax revenue to cover the city's cost to serve it. Unless the developer agrees to financially cover the substantial deficits, forever, existing city taxpayers will be required to subsidize Sun's development and taxes will go up.

- Sun's 47 Degrees North will be in its entirety a private business not a natural neighborhood (no lots sold, all spots leased), wholly owned by a massive out-of-state publicly traded corporation whose fiduciary duty is to its shareholders, not city taxpayers. Any subsidies of the project would be a gift of public funds to a private entity.

- Is not housing as contemplated for the Bullfrog UGA. It will displace half of the actual housing planned for the area and replace it with a private park designed as a transient playground.

- Will be the largest manufactured home/RV park on the West Coast and will double the population of Cle Elum. Parks of this magnitude have no place in a town as small as Cle Elum. Wrong Place, Wrong Size.

- Will be the largest manufactured home/RV park on the West Coast and will double the population of Cle Elum. Parks of this magnitude have no place in a town as small as Cle Elum. Wrong Place, Wrong Size.

- Sun has eliminated the industrial park component of the approved plan and is proposing a major new retail center to the project which would compete with existing city businesses and will seriously damage Cle Elum's downtown, which the city has invested millions of dollars to reinvigorate. The retail center is in direct conflict with the city's comprehensive plan which states that the Bullfrog Flats Master Plan…."is intended to elevate the DTC (downtown core) as the primary retail and activity nexus for Cle Elum". Current rules for the Bullfrog Flats property prohibit a retail center on the property.

- Provides no significant benefits to city or UKC residents, but creates serious and significant impacts on roads, police, fire, schools, emergency services, hospitals and other public services that can't be (or won't be) fully mitigated by the developer.

- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for. Any such increase in taxes will effectively translate to a subsidy for a private business,

- Denial of 47 Degrees North will not take away or reduce underlying property rights. It will simply require Sun Communities to comply with city's current rules, regulations and comprehensive plan for the property. The original underlying zoning approval and development agreement already allows development of this site, just not as a private resort/manufactured home community/retail center.

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Respectfully,

Barbara Muzzey

Re: 47 Degrees North Major Amendment proposal

I am writing to inform the city of my very strong opposition to the Sun Communities 47° North proposal for the Bullfrog flats property. The proposed manufactured home / RV community:

- Is in clear violation of the vision for the property adopted by the city and presented to the public as a condition for annexing Bullfrog Flats into the city. It's not in character with the City of Cle Elum and does not comply with fundamental requirements of the city's comprehensive plan, the development agreement, or zoning for the property.

- Instead of traditional neighborhoods that were planned to be connected to and a natural extension of the city, supporting the rest of the city, 47 Degrees North would create a private for-profit community and tourist resort with gates, private roads and utilities which will be separated from the rest of the city. It will create a private city within a city, forever.

- Fiscal studies of 47 Degrees North show that it will not create sufficient tax revenue to cover the city's cost to serve it. Unless the developer agrees to financially cover the substantial deficits, forever, existing city taxpayers will be required to subsidize Sun's development and taxes will go up.

- Sun's 47 Degrees North will be in its entirety a private business not a natural neighborhood (no lots sold, all spots leased), wholly owned by a massive out-of-state publicly traded corporation whose fiduciary duty is to its shareholders, not city taxpayers. Any subsidies of the project would be a gift of public funds to a private entity.

- Is not housing as contemplated for the Bullfrog UGA. It will displace half of the actual housing planned for the area and replace it with a private park designed as a transient playground.

- Will be the largest manufactured home/RV park on the West Coast and will double the population of Cle Elum. Parks of this magnitude have no place in a town as small as Cle Elum. Wrong Place, Wrong Size.

Current rules for the Bullfrog Flats property prohibit a retail center on the property.

- Provides no significant benefits to city or UKC residents, but creates serious and significant impacts on roads, police, fire, schools, emergency services, hospitals and other public services that can't be (or won't be) fully mitigated by the developer.

- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for. Any such increase in taxes will effectively translate to a subsidy for a private business,

- Denial of 47 Degrees North will not take away or reduce underlying property rights. It will simply require Sun Communities to comply with city's current rules, regulations and comprehensive plan for the property. The original underlying zoning approval and development agreement already allows development of this site, just not as a private resort/manufactured home community/retail center.

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Respectfully,

Re: 47 Degrees North Major Amendment proposal

I am writing to inform the city of my very strong opposition to the Sun Communities 47° North proposal for the Bullfrog flats property. The proposed manufactured home / RV community:

- Is in clear violation of the vision for the property adopted by the city and presented to the public as a condition for annexing Bullfrog Flats into the city. It's not in character with the City of Cle Elum and does not comply with fundamental requirements of the city's comprehensive plan, the development agreement, or zoning for the property.

- Instead of traditional neighborhoods that were planned to be connected to and a natural extension of the city, supporting the rest of the city, 47 Degrees North would create a private for-profit community and tourist resort with gates, private roads and utilities which will be separated from the rest of the city. It will create a private city within a city, forever.

- Fiscal studies of 47 Degrees North show that it will not create sufficient tax revenue to cover the city's cost to serve it. Unless the developer agrees to financially cover the substantial deficits, forever, existing city taxpayers will be required to subsidize Sun's development and taxes will go up.

- Sun's 47 Degrees North will be in its entirety a private business not a natural neighborhood (no lots sold, all spots leased), wholly owned by a massive out-of-state publicly traded corporation whose fiduciary duty is to its shareholders, not city taxpayers. Any subsidies of the project would be a gift of public funds to a private entity.

- Is not housing as contemplated for the Bullfrog UGA. It will displace half of the actual housing planned for the area and replace it with a private park designed as a transient playground.

- Will be the largest manufactured home/RV park on the West Coast and will double the population of Cle Elum. Parks of this magnitude have no place in a town as small as Cle Elum. Wrong Place, Wrong Size.

- Sun has eliminated the industrial park component of the approved plan and is proposing a major new retail center to the project which would compete with existing city businesses and will seriously damage Cle Elum's downtown, which the city has invested millions of dollars to reinvigorate. The retail center is in direct conflict with the city's comprehensive plan which states that the Bullfrog Flats Master Plan…."is intended to elevate the DTC (downtown core) as the primary retail and activity nexus for Cle Elum". Current rules for the Bullfrog Flats property prohibit a retail center on the property.

- Provides no significant benefits to city or UKC residents, but creates serious and significant impacts on roads, police, fire, schools, emergency services, hospitals and other public services that can't be (or won't be) fully mitigated by the developer.

- Denial of 47 Degrees North will not take away or reduce underlying property rights. It will simply require Sun Communities to comply with city's current rules, regulations and comprehensive plan for the property. The original underlying zoning approval and development agreement already allows development of this site, just not as a private resort/manufactured home community/retail center.

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Respectfully,

Matt Woodring

Re: 47 Degrees North Major Amendment proposal

I am writing to inform the city of my very strong opposition to the Sun Communities 47° North proposal for the Bullfrog flats property. The proposed manufactured home / RV community:

- Is in clear violation of the vision for the property adopted by the city and presented to the public as a condition for annexing Bullfrog Flats into the city. It's not in character with the City of Cle Elum and does not comply with fundamental requirements of the city's comprehensive plan, the development agreement, or zoning for the property.

- Instead of traditional neighborhoods that were planned to be connected to and a natural extension of the city, supporting the rest of the city, 47 Degrees North would create a private for-profit community and tourist resort with gates, private roads and utilities which will be separated from the rest of the city. It will create a private city within a city, forever.

- Fiscal studies of 47 Degrees North show that it will not create sufficient tax revenue to cover the city's cost to serve it. Unless the developer agrees to financially cover the substantial deficits, forever, existing city taxpayers will be required to subsidize Sun's development and taxes will go up.

- Sun's 47 Degrees North will be in its entirety a private business not a natural neighborhood (no lots sold, all spots leased), wholly owned by a massive out-of-state publicly traded corporation whose fiduciary duty is to its shareholders, not city taxpayers. Any subsidies of the project would be a gift of public funds to a private entity.

- Is not housing as contemplated for the Bullfrog UGA. It will displace half of the actual housing planned for the area and replace it with a private park designed as a transient playground.

- Will be the largest manufactured home/RV park on the West Coast and will double the population of Cle Elum. Parks of this magnitude have no place in a town as small as Cle Elum. Wrong Place, Wrong Size.

- Sun has eliminated the industrial park component of the approved plan and is proposing a major new retail center to the project which would compete with existing city businesses and will seriously damage Cle Elum's downtown, which the city has invested millions of dollars to reinvigorate. The retail center is in direct conflict with the city's comprehensive plan which states that the Bullfrog Flats Master Plan…."is intended to elevate the DTC (downtown core) as the primary retail and activity nexus for Cle Elum". Current rules for the Bullfrog Flats property prohibit a retail center on the property.

- Provides no significant benefits to city or UKC residents, but creates serious and significant impacts on roads, police, fire, schools, emergency services, hospitals and other public services that can't be (or won't be) fully mitigated by the developer.

- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for. Any such increase in taxes will effectively translate to a subsidy for a private business,

- Denial of 47 Degrees North will not take away or reduce underlying property rights. It will simply require Sun Communities to comply with city's current rules, regulations and comprehensive plan for the property. The original underlying zoning approval and development agreement already allows development of this site, just not as a private resort/manufactured home community/retail center.

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Re: 47 Degrees North Major Amendment proposal

I am writing to inform the city of my very strong opposition to the Sun Communities 47° North proposal for the Bullfrog flats property. The proposed manufactured home / RV community will result in negative impacts:

- Traffic gridlock with high volume of transient visitors in large recreational vehicles
- Decreased level of service for emergency medical services
- Decreased level of service for police protection
- Decreased level of service for fire protection
- Increased tax burden on existing property owners to pay for aging infrastructure (water, sewer, power, roads)
- Increased 2nd home ownership within a private resort adversely impacting many throughout the community
- Adverse impact to downtown core businesses as resort environment will drive dollars to remain at the resort
- Potential to increase jobs yet does little to offer adequate affordable housing options in relationship to amount of workers necessary to support multiple resorts in the area
- Potential to require additional city resources to manage and address concerns by a high volume of transient visitors
- High volume of short term rentals (STRs) tax revenue by law are applied tourism rather than infrastructure upgrades
- 90% of profits will be, by law, sent out of our community to Wall Street investors

For these reasons, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Respectfully, Alex.

Re: 47 Degrees North Major Amendment proposal

I am writing to inform the city of my very strong opposition to the Sun Communities 47° North proposal for the Bullfrog flats property. The proposed manufactured home / RV community will result in negative impacts:

- Traffic gridlock with high volume of transient visitors in large recreational vehicles
- Decreased level of service for emergency medical services
- Decreased level of service for police protection
- Decreased level of service for fire protection
- Increased tax burden on existing property owners to pay for aging infrastructure (water, sewer, power, roads)
- Increased 2nd home ownership within a private resort adversely impacting many throughout the community
- Adverse impact to downtown core businesses as resort environment will drive dollars to remain at the resort
- Potential to increase jobs yet does little to offer adequate affordable housing options in relationship to amount of workers necessary to support multiple resorts in the area
- Potential to require additional city resources to manage and address concerns by a high volume of transient visitors
- High volume of short term rentals (STRs) tax revenue by law are applied tourism rather than infrastructure upgrades
- 90% of profits will be, by law, sent out of our community to Wall Street investors

For these reasons, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Respectfully,

Re: 47 Degrees North Major Amendment proposal

I am writing to inform the city of my very strong opposition to the Sun Communities 47° North proposal for the Bullfrog flats property. The proposed manufactured home / RV community will result in negative impacts:

- Traffic gridlock with high volume of transient visitors in large recreational vehicles
- Decreased level of service for emergency medical services
- Decreased level of service for police protection
- Decreased level of service for fire protection
- Increased tax burden on existing property owners to pay for aging infrastructure (water, sewer, power, roads)
- Increased 2nd home ownership within a private resort adversely impacting many throughout the community
- Adverse impact to downtown core businesses as resort environment will drive dollars to remain at the resort
- Potential to increase jobs yet does little to offer adequate affordable housing options in relationship to amount of workers necessary to support multiple resorts in the area
- Potential to require additional city resources to manage and address concerns by a high volume of transient visitors
- High volume of short term rentals (STRs) tax revenue by law are applied tourism rather than infrastructure upgrades
- 90% of profits will be, by law, sent out of our community to Wall Street investors

For these reasons, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Respectfully,

Barbara Milos

Re: 47 Degrees North Major Amendment proposal

I am writing to inform the city of my very strong opposition to the Sun Communities 47° North proposal for the Bullfrog flats property. The proposed manufactured home / RV community:

- Is in clear violation of the vision for the property adopted by the city and presented to the public as a condition for annexing Bullfrog Flats into the city. It's not in character with the City of Cle Elum and does not comply with fundamental requirements of the city's comprehensive plan, the development agreement, or zoning for the property.

- Instead of traditional neighborhoods that were planned to be connected to and a natural extension of the city, supporting the rest of the city, 47 Degrees North would create a private for-profit community and tourist resort with gates, private roads and utilities which will be separated from the rest of the city. It will create a private city within a city, forever.

- Fiscal studies of 47 Degrees North show that it will not create sufficient tax revenue to cover the city's cost to serve it. Unless the developer agrees to financially cover the substantial deficits, forever, existing city taxpayers will be required to subsidize Sun's development and taxes will go up.

- Sun's 47 Degrees North will be in its entirety a private business not a natural neighborhood (no lots sold, all spots leased), wholly owned by a massive out-of-state publicly traded corporation whose fiduciary duty is to its shareholders, not city taxpayers. Any subsidies of the project would be a gift of public funds to a private entity.

- Is not housing as contemplated for the Bullfrog UGA. It will displace half of the actual housing planned for the area and replace it with a private park designed as a transient playground.

- Will be the largest manufactured home/RV park on the West Coast and will double the population of Cle Elum. Parks of this magnitude have no place in a town as small as Cle Elum. Wrong Place, Wrong Size.

- Sun has eliminated the industrial park component of the approved plan and is proposing a major new retail center to the project which would compete with existing city businesses and will seriously damage Cle Elum's downtown, which the city has invested millions of dollars to reinvigorate. The retail center is in direct conflict with the city's comprehensive plan which states that the Bullfrog Flats Master Plan…."is intended to elevate the DTC (downtown core) as the primary retail and activity nexus for Cle Elum". Current rules for the Bullfrog Flats property prohibit a retail center on the property.

- Provides no significant benefits to city or UKC residents, but creates serious and significant impacts on roads, police, fire, schools, emergency services, hospitals and other public services that can't be (or won't be) fully mitigated by the developer.

- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for. Any such increase in taxes will effectively translate to a subsidy for a private business,

- Denial of 47 Degrees North will not take away or reduce underlying property rights. It will simply require Sun Communities to comply with city's current rules, regulations and comprehensive plan for the property. The original underlying zoning approval and development agreement already allows development of this site, just not as a private resort/manufactured home community/retail center.

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

- Fiscal studies of 47 Degrees North show that it will not create sufficient tax revenue to cover the city's cost to serve it. Unless the developer agrees to financially cover the substantial deficits, forever, existing city taxpayers will be required to subsidize Sun's development and taxes will go up.

- Sun's 47 Degrees North will be in its entirety a private business not a natural neighborhood (no lots sold, all spots leased), wholly owned by a massive out-of-state publicly traded corporation whose fiduciary duty is to its shareholders, not city taxpayers. Any subsidies of the project would be a gift of public funds to a private entity.

- Is not housing as contemplated for the Bullfrog UGA. It will displace half of the actual housing planned for the area and replace it with a private park designed as a transient playground.

- Will be the largest manufactured home/RV park on the West Coast and will double the population of Cle Elum. Parks of this magnitude have no place in a town as small as Cle Elum. Wrong Place, Wrong Size.

- Sun has eliminated the industrial park component of the approved plan and is proposing a major new retail center to the project which would compete with existing city businesses and will seriously damage Cle Elum's downtown, which the city has invested millions of dollars to reinvigorate. The retail center is in direct conflict with the city's comprehensive plan which states that the Bullfrog Flats Master Plan…."is intended to elevate the DTC (downtown core) as the primary retail and activity nexus for Cle Elum". Current rules for the Bullfrog Flats property prohibit a retail center on the property.

- Provides no significant benefits to city or UKC residents, but creates serious and significant impacts on roads, police, fire, schools, emergency services, hospitals and other public services that can't be (or won't be) fully mitigated by the developer.

- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for. Any such increase in taxes will effectively translate to a subsidy for a private business,

- Denial of 47 Degrees North will not take away or reduce underlying property rights. It will simply require Sun Communities to comply with city's current rules, regulations and comprehensive plan for the property. The original underlying zoning approval and development agreement already allows development of this site, just not as a private resort/manufactured home community/retail center.

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Respectfully,

Re: 47 Degrees North Major Amendment proposal

I am writing to inform the city of my very strong opposition to the Sun Communities 47° North proposal for the Bullfrog flats property. The proposed manufactured home / RV community:

- Is in clear violation of the vision for the property adopted by the city and presented to the public as a condition for annexing Bullfrog Flats into the city. It's not in character with the City of Cle Elum and does not comply with fundamental requirements of the city's comprehensive plan, the development agreement, or zoning for the property.

- Instead of traditional neighborhoods that were planned to be connected to and a natural extension of the city, supporting the rest of the city, 47 Degrees North would create a private for-profit community and tourist resort with gates, private roads and utilities which will be separated from the rest of the city. It will create a private city within a city, forever.

- Fiscal studies of 47 Degrees North show that it will not create sufficient tax revenue to cover the city's cost to serve it. Unless the developer agrees to financially cover the substantial deficits, forever, existing city taxpayers will be required to subsidize Sun's development and taxes will go up.

- Sun's 47 Degrees North will be in its entirety a private business not a natural neighborhood (no lots sold, all spots leased), wholly owned by a massive out-of-state publicly traded corporation whose fiduciary duty is to its shareholders, not city taxpayers. - Is not housing as contemplated for the Bullfrog UGA. It will displace half of the actual housing planned for the area and replace it with a private park designed as a transient playground.

- Will be the largest manufactured home/RV park on the West Coast and will double the population of Cle Elum. Parks of this magnitude have no place in a town as small as Cle Elum. Wrong Place, Wrong Size.

- Sun has eliminated the industrial park component of the approved plan and is proposing a major new retail center to the project which would compete with existing city businesses and will seriously damage Cle Elum's downtown, which the city has invested millions of dollars to reinvigorate. The retail center is in direct conflict with the city's comprehensive plan which states that the Bullfrog Flats Master Plan…."is intended to elevate the DTC (downtown core) as the primary retail and activity nexus for Cle Elum". Current rules for the Bullfrog Flats property prohibit a retail center on the property.

- Provides no significant benefits to city or UKC residents, but creates serious and significant impacts on roads, police, fire, schools, emergency services, hospitals and other public services that can't be (or won't be) fully mitigated by the developer.

- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for. Any such increase in taxes will effectively translate to a subsidy for a private business,

- Denial of 47 Degrees North will not take away or reduce underlying property rights. It will simply require Sun Communities to comply with city's current rules, regulations and comprehensive plan for the property. The original underlying zoning approval and development agreement already allows development of this site, just not as a private resort/manufactured home community/retail center.

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Respectfully,

Marchel Allenbaugh

Re: 47 Degrees North Major Amendment proposal

I am writing to inform the city of my very strong opposition to the Sun Communities 47° North proposal for the Bullfrog flats property. The proposed manufactured home / RV community:

- Is in clear violation of the vision for the property adopted by the city and presented to the public as a condition for annexing Bullfrog Flats into the city. It's not in character with the City of Cle Elum and does not comply with fundamental requirements of the city's comprehensive plan, the development agreement, or zoning for the property.

- Instead of traditional neighborhoods that were planned to be connected to and a natural extension of the city, supporting the rest of the city, 47 Degrees North would create a private for-profit community and tourist resort with gates, private roads and utilities which will be separated from the rest of the city. It will create a private city within a city, forever.

- Fiscal studies of 47 Degrees North show that it will not create sufficient tax revenue to cover the city's cost to serve it. Unless the developer agrees to financially cover the substantial deficits, forever, existing city taxpayers will be required to subsidize Sun's development and taxes will go up.

- Sun's 47 Degrees North will be in its entirety a private business not a natural neighborhood (no lots sold, all spots leased), wholly owned by a massive out-of-state publicly traded corporation whose fiduciary duty is to its shareholders, not city taxpayers. Any subsidies of the project would be a gift of public funds to a private entity.
