- Denial of 47 Degrees North will not take away or reduce underlying property rights. It will simply require Sun Communities to comply with city's current rules, regulations and comprehensive plan for the property. The original underlying zoning approval and development agreement already allows development of this site, just not as a private resort/manufactured home community/retail center.

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Respectfully,

Re: 47 Degrees North Major Amendment proposal

I am writing to inform the city of my very strong opposition to the Sun Communities 47° North proposal for the Bullfrog flats property. The proposed manufactured home / RV community:

- Is in clear violation of the vision for the property adopted by the city and presented to the public as a condition for annexing Bullfrog Flats into the city. It's not in character with the City of Cle Elum and does not comply with fundamental requirements of the city's comprehensive plan, the development agreement, or zoning for the property.

- Instead of traditional neighborhoods that were planned to be connected to and a natural extension of the city, supporting the rest of the city, 47 Degrees North would create a private for-profit community and tourist resort with gates, private roads and utilities which will be separated from the rest of the city. It will create a private city within a city, forever.

- Fiscal studies of 47 Degrees North show that it will not create sufficient tax revenue to cover the city's cost to serve it. Unless the developer agrees to financially cover the substantial deficits, forever, existing city taxpayers will be required to subsidize Sun's development and taxes will go up.

- Sun's 47 Degrees North will be in its entirety a private business not a natural neighborhood (no lots sold, all spots leased), wholly owned by a massive out-of-state publicly traded corporation whose fiduciary duty is to its shareholders, not city taxpayers. Any subsidies of the project would be a gift of public funds to a private entity.

- Is not housing as contemplated for the Bullfrog UGA. It will displace half of the actual housing planned for the area and replace it with a private park designed as a transient playground.

- Will be the largest manufactured home/RV park on the West Coast and will double the population of Cle Elum. Parks of this magnitude have no place in a town as small as Cle Elum. Wrong Place, Wrong Size.

- Sun has eliminated the industrial park component of the approved plan and is proposing a major new retail center to the project which would compete with existing city businesses and will seriously damage Cle Elum's downtown, which the city has invested millions of dollars to reinvigorate. The retail center is in direct conflict with the city's comprehensive plan which states that the Bullfrog Flats Master Plan…."is intended to elevate the DTC (downtown core) as the primary retail and activity nexus for Cle Elum". Current rules for the Bullfrog Flats property prohibit a retail center on the property.

- Provides no significant benefits to city or UKC residents, but creates serious and significant impacts on roads, police, fire, schools, emergency services, hospitals and other public services that can't be (or won't be) fully mitigated by the developer.

- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for. Any such increase in taxes will effectively translate to a subsidy for a private business,

- Denial of 47 Degrees North will not take away or reduce underlying property rights. It will simply require Sun Communities to comply with city's current rules, regulations and comprehensive plan for the property. The original underlying zoning approval and development agreement already allows development of this site, just not as a private resort/manufactured home community/retail center.

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Re: 47 Degrees North Major Amendment proposal

I am writing to inform the city of my very strong opposition to the Sun Communities 47° North proposal for the Bullfrog flats property. The proposed manufactured home / RV community:

- Is in clear violation of the vision for the property adopted by the city and presented to the public as a condition for annexing Bullfrog Flats into the city. It's not in character with the City of Cle Elum and does not comply with fundamental requirements of the city's comprehensive plan, the development agreement, or zoning for the property.

- Instead of traditional neighborhoods that were planned to be connected to and a natural extension of the city, supporting the rest of the city, 47 Degrees North would create a private for-profit community and tourist resort with gates, private roads and utilities which will be separated from the rest of the city. It will create a private city within a city, forever.

- Fiscal studies of 47 Degrees North show that it will not create sufficient tax revenue to cover the city's cost to serve it. Unless the developer agrees to financially cover the substantial deficits, forever, existing city taxpayers will be required to subsidize Sun's development and taxes will go up.

- Sun's 47 Degrees North will be in its entirety a private business not a natural neighborhood (no lots sold, all spots leased), wholly owned by a massive out-of-state publicly traded corporation whose fiduciary duty is to its shareholders, not city taxpayers. Any subsidies of the project would be a gift of public funds to a private entity.

- Is not housing as contemplated for the Bullfrog UGA. It will displace half of the actual housing planned for the area and replace it with a private park designed as a transient playground.

- Will be the largest manufactured home/RV park on the West Coast and will double the population of Cle Elum. Parks of this magnitude have no place in a town as small as Cle Elum. Wrong Place, Wrong Size.

- Sun has eliminated the industrial park component of the approved plan and is proposing a major new retail center to the project which would compete with existing city businesses and will seriously damage Cle Elum's downtown, which the city has invested millions of dollars to reinvigorate. The retail center is in direct conflict with the city's comprehensive plan which states that the Bullfrog Flats Master Plan…."is intended to elevate the DTC (downtown core) as the primary retail and activity nexus for Cle Elum". Current rules for the Bullfrog Flats property prohibit a retail center on the property.

- Provides no significant benefits to city or UKC residents, but creates serious and significant impacts on roads, police, fire, schools, emergency services, hospitals and other public services that can't be (or won't be) fully mitigated by the developer.

- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for. Any such increase in taxes will effectively translate to a subsidy for a private business,

- Denial of 47 Degrees North will not take away or reduce underlying property rights. It will simply require Sun Communities to comply with city's current rules, regulations and comprehensive plan for the property. The original underlying zoning approval and development agreement already allows development of this site, just not as a private resort/manufactured home community/retail center.

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Respectfully,

_____

- Is in clear violation of the vision for the property adopted by the city and presented to the public as a condition for annexing Bullfrog Flats into the city. It's not in character with the City of Cle Elum and does not comply with fundamental requirements of the city's comprehensive plan, the development agreement, or zoning for the property.

- Instead of traditional neighborhoods that were planned to be connected to and a natural extension of the city, supporting the rest of the city, 47 Degrees North would create a private for-profit community and tourist resort with gates, private roads and utilities which will be separated from the rest of the city. It will create a private city within a city, forever.

- Fiscal studies of 47 Degrees North show that it will not create sufficient tax revenue to cover the city's cost to serve it. Unless the developer agrees to financially cover the substantial deficits, forever, existing city taxpayers will be required to subsidize Sun's development and taxes will go up.

- Sun's 47 Degrees North will be in its entirety a private business not a natural neighborhood (no lots sold, all spots leased), wholly owned by a massive out-of-state publicly traded corporation whose fiduciary duty is to its shareholders, not city taxpayers. Any subsidies of the project would be a gift of public funds to a private entity.

- Is not housing as contemplated for the Bullfrog UGA. It will displace half of the actual housing planned for the area and replace it with a private park designed as a transient playground.

- Will be the largest manufactured home/RV park on the West Coast and will double the population of Cle Elum. Parks of this magnitude have no place in a town as small as Cle Elum. Wrong Place, Wrong Size.

- Sun has eliminated the industrial park component of the approved plan and is proposing a major new retail center to the project which would compete with existing city businesses and will seriously damage Cle Elum's downtown, which the city has invested millions of dollars to reinvigorate. The retail center is in direct conflict with the city's comprehensive plan which states that the Bullfrog Flats Master Plan…."is intended to elevate the DTC (downtown core) as the primary retail and activity nexus for Cle Elum". Current rules for the Bullfrog Flats property prohibit a retail center on the property.

- Provides no significant benefits to city or UKC residents, but creates serious and significant impacts on roads, police, fire, schools, emergency services, hospitals and other public services that can't be (or won't be) fully mitigated by the developer.

- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for. Any such increase in taxes will effectively translate to a subsidy for a private business,

- Denial of 47 Degrees North will not take away or reduce underlying property rights. It will simply require Sun Communities to comply with city's current rules, regulations and comprehensive plan for the property. The original underlying zoning approval and development agreement already allows development of this site, just not as a private resort/manufactured home community/retail center.

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Respectfully,

It will create a private city within a city, forever.

- Fiscal studies of 47 Degrees North show that it will not create sufficient tax revenue to cover the city's cost to serve it. Unless the developer agrees to financially cover the substantial deficits, forever, existing city taxpayers will be required to subsidize Sun's development and taxes will go up.

- Sun's 47 Degrees North will be in its entirety a private business not a natural neighborhood (no lots sold, all spots leased), wholly owned by a massive out-of-state publicly traded corporation whose fiduciary duty is to its shareholders, not city taxpayers. Any subsidies of the project would be a gift of public funds to a private entity.

- Is not housing as contemplated for the Bullfrog UGA. It will displace half of the actual housing planned for the area and replace it with a private park designed as a transient playground.

- Will be the largest manufactured home/RV park on the West Coast and will double the population of Cle Elum. Parks of this magnitude have no place in a town as small as Cle Elum. Wrong Place, Wrong Size.

- Sun has eliminated the industrial park component of the approved plan and is proposing a major new retail center to the project which would compete with existing city businesses and will seriously damage Cle Elum's downtown, which the city has invested millions of dollars to reinvigorate. The retail center is in direct conflict with the city's comprehensive plan which states that the Bullfrog Flats Master Plan…."is intended to elevate the DTC (downtown core) as the primary retail and activity nexus for Cle Elum". Current rules for the Bullfrog Flats property prohibit a retail center on the property.

- Provides no significant benefits to city or UKC residents, but creates serious and significant impacts on roads, police, fire, schools, emergency services, hospitals and other public services that can't be (or won't be) fully mitigated by the developer.

- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for. Any such increase in taxes will effectively translate to a subsidy for a private business,

- Denial of 47 Degrees North will not take away or reduce underlying property rights. It will simply require Sun Communities to comply with city's current rules, regulations and comprehensive plan for the property. The original underlying zoning approval and development agreement already allows development of this site, just not as a private resort/manufactured home community/retail center.

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Respectfully,

McKenzie Wright

Re: 47 Degrees North Major Amendment proposal

I am writing to inform the city of my very strong opposition to the Sun Communities 47° North proposal for the Bullfrog flats property. The proposed manufactured home / RV community:

- Is in clear violation of the vision for the property adopted by the city and presented to the public as a condition for annexing Bullfrog Flats into the city. It's not in character with the City of Cle Elum and does not comply with fundamental requirements of the city's comprehensive plan, the development agreement, or zoning for the property.

- Instead of traditional neighborhoods that were planned to be connected to and a natural extension of the city, supporting the rest of the city, 47 Degrees North would create a private for-profit community and tourist resort with gates, private roads and utilities which will be separated from the rest of the city. It will create a private city within a city, forever.

- Fiscal studies of 47 Degrees North show that it will not create sufficient tax revenue to cover the city's cost to serve it. Unless the developer agrees to financially cover the substantial deficits, forever, existing city taxpayers will be required to subsidize Sun's development and taxes will go up.

- Sun's 47 Degrees North will be in its entirety a private business not a natural neighborhood (no lots sold, all spots leased), wholly owned by a massive out-of-state publicly traded corporation whose fiduciary duty is to its shareholders, not city taxpayers. Unless the developer agrees to financially cover the substantial deficits, forever, existing city taxpayers will be required to subsidize Sun's development and taxes will go up.

- Sun's 47 Degrees North will be in its entirety a private business not a natural neighborhood (no lots sold, all spots leased), wholly owned by a massive out-of-state publicly traded corporation whose fiduciary duty is to its shareholders, not city taxpayers. Any subsidies of the project would be a gift of public funds to a private entity.

- Is not housing as contemplated for the Bullfrog UGA. It will displace half of the actual housing planned for the area and replace it with a private park designed as a transient playground.

- Will be the largest manufactured home/RV park on the West Coast and will double the population of Cle Elum. Parks of this magnitude have no place in a town as small as Cle Elum. Wrong Place, Wrong Size.

- Sun has eliminated the industrial park component of the approved plan and is proposing a major new retail center to the project which would compete with existing city businesses and will seriously damage Cle Elum's downtown, which the city has invested millions of dollars to reinvigorate. The retail center is in direct conflict with the city's comprehensive plan which states that the Bullfrog Flats Master Plan…."is intended to elevate the DTC (downtown core) as the primary retail and activity nexus for Cle Elum". Current rules for the Bullfrog Flats property prohibit a retail center on the property.

- Provides no significant benefits to city or UKC residents, but creates serious and significant impacts on roads, police, fire, schools, emergency services, hospitals and other public services that can't be (or won't be) fully mitigated by the developer.

- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for. Any such increase in taxes will effectively translate to a subsidy for a private business,

- Denial of 47 Degrees North will not take away or reduce underlying property rights. It will simply require Sun Communities to comply with city's current rules, regulations and comprehensive plan for the property. The original underlying zoning approval and development agreement already allows development of this site, just not as a private resort/manufactured home community/retail center.

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Respectfully,

Barbara A. Peters

Re: 47 Degrees North Major Amendment proposal

I am writing to inform the city of my very strong opposition to the Sun Communities 47° North proposal for the Bullfrog flats property. The proposed manufactured home / RV community:

- Is in clear violation of the vision for the property adopted by the city and presented to the public as a condition for annexing Bullfrog Flats into the city. It's not in character with the City of Cle Elum and does not comply with fundamental requirements of the city's comprehensive plan, the development agreement, or zoning for the property.

- Instead of traditional neighborhoods that were planned to be connected to and a natural extension of the city, supporting the rest of the city, 47 Degrees North would create a private for-profit community and tourist resort with gates, private roads and utilities which will be separated from the rest of the city. It will create a private city within a city, forever.

- Fiscal studies of 47 Degrees North show that it will not create sufficient tax revenue to cover the city's cost to serve it. Unless the developer agrees to financially cover the substantial deficits, forever, existing city taxpayers will be required to subsidize Sun's development and taxes will go up.

- Sun's 47 Degrees North will be in its entirety a private business not a natural neighborhood (no lots sold, all spots leased), wholly owned by a massive out-of-state publicly traded corporation whose fiduciary duty is to its shareholders, not city taxpayers. Any subsidies of the project would be a gift of public funds to a private entity.

- Is not housing as contemplated for the Bullfrog UGA. It will displace half of the actual housing planned for the area and replace it with a private park designed as a transient playground.

- Will be the largest manufactured home/RV park on the West Coast and will double the population of Cle Elum. Parks of this magnitude have no place in a town as small as Cle Elum. Wrong Place, Wrong Size.

- Sun has eliminated the industrial park component of the approved plan and is proposing a major new retail center to the project which would compete with existing city businesses and will seriously damage Cle Elum's downtown, which the city has invested millions of dollars to reinvigorate. The retail center is in direct conflict with the city's comprehensive plan which states that the Bullfrog Flats Master Plan…."is intended to elevate the DTC (downtown core) as the primary retail and activity nexus for Cle Elum". Current rules for the Bullfrog Flats property prohibit a retail center on the property.

- Provides no significant benefits to city or UKC residents, but creates serious and significant impacts on roads, police, fire, schools, emergency services, hospitals and other public services that can't be (or won't be) fully mitigated by the developer.

- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for. Any such increase in taxes will effectively translate to a subsidy for a private business,

- Denial of 47 Degrees North will not take away or reduce underlying property rights. It will simply require Sun Communities to comply with city's current rules, regulations and comprehensive plan for the property. The original underlying zoning approval and development agreement already allows development of this site, just not as a private resort/manufactured home community/retail center.

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Respectfully,

Douglas McDonald

Re: 47 Degrees North Major Amendment proposal

I am writing to inform the city of my very strong opposition to the Sun Communities 47° North proposal for the Bullfrog flats property. The proposed manufactured home / RV community:

- Is in clear violation of the vision for the property adopted by the city and presented to the public as a condition for annexing Bullfrog Flats into the city. It's not in character with the City of Cle Elum and does not comply with fundamental requirements of the city's comprehensive plan, the development agreement, or zoning for the property.

- Instead of traditional neighborhoods that were planned to be connected to and a natural extension of the city, supporting the rest of the city, 47 Degrees North would create a private for-profit community and tourist resort with gates, private roads and utilities which will be separated from the rest of the city. It will create a private city within a city, forever.

- Fiscal studies of 47 Degrees North show that it will not create sufficient tax revenue to cover the city's cost to serve it. Unless the developer agrees to financially cover the substantial deficits, forever, existing city taxpayers will be required to subsidize Sun's development and taxes will go up.

- Sun's 47 Degrees North will be in its entirety a private business not a natural neighborhood (no lots sold, all spots leased), wholly owned by a massive out-of-state publicly traded corporation whose fiduciary duty is to its shareholders, not city taxpayers. Any subsidies of the project would be a gift of public funds to a private entity.

- Is not housing as contemplated for the Bullfrog UGA. It will displace half of the actual housing planned for the area and replace it with a private park designed as a transient playground.

- Will be the largest manufactured home/RV park on the West Coast and will double the population of Cle Elum. Parks of this magnitude have no place in a town as small as Cle Elum. Wrong Place, Wrong Size.

This is totally opposite of the city's comprehensive plan which states that the Bullfrog Flats Master Plan...."is intended to elevate the DTC (downtown core) as the primary retail and activity nexus for Cle Elum". Current rules for the Bullfrog Flats property prohibit a retail center on the property.

- Provides no significant benefits to city or UKC residents, but creates serious and significant impacts on roads, police, fire, schools, emergency services, hospitals and other public services that can't be (or won't be) fully mitigated by the developer, and,

- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for, which will be a subsidy for a private business,

- Denial of 47 Degrees North will not take away or reduce underlying property rights. It will simply require Sun Communities to comply with city's current rules, regulations and comprehensive plan for the property. The original underlying zoning approval and development agreement already allows development of this site, just not as a private resort/manufactured home community/retail center.

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Respectfully,

Re: 47 Degrees North Major Amendment proposal

I am writing to inform the city of my very strong opposition to the Sun Communities 47° North proposal for the Bullfrog flats property. The proposed manufactured home / RV community:

- Is in clear violation of the vision for the property adopted by the city and presented to the public as a condition for annexing Bullfrog Flats into the city. It's not in character with the City of Cle Elum and does not comply with fundamental requirements of the city's comprehensive plan, the development agreement and zoning for the property.
- Instead of traditional neighborhoods that were planned to be connected to and a natural extension of the city, supporting the rest of the city, 47 Degrees North would create a private for-profit community and tourist resort with gates, private roads and utilities which will be separated from the rest of the city. It will create a private city within a city, forever.
- Fiscal studies of 47 Degrees North show that it will not create enough tax revenue to cover the city's cost to serve it. Unless the developer agrees to financially cover the substantial deficits, forever, existing city taxpayers will be required to subsidize Sun's development and taxes will go up.
- Sun's 47 Degrees North will be in its entirety a private business not a natural neighborhood (no lots sold, all spots leased), wholly owned by a massive out-of-state publicly traded corporation who's fiduciary duty is to its shareholders, not city taxpayers. Any subsidies of the project would be a gift of public funds to a private entity.
- Is not housing as contemplated for the Bullfrog UGA. It will displace half of the actual housing planned for the area and replace it with a private park designed as a transient playground.
- Will be the largest manufactured home/RV park on the West Coast and will double the population of Cle Elum. Parks of this magnitude have no place in a town as small as Cle Elum. Wrong Place Wrong Size.
- Sun has proposed a major new retail center in the project which would compete with existing city businesses and will seriously damage Cle Elum's downtown, which the city has invested millions of dollars to reinvigorate. This is totally opposite of the city's comprehensive plan which states that the Bullfrog Flats Master Plan...."is intended to elevate the DTC (downtown core) as the primary retail and activity nexus for Cle Elum". Current rules for the Bullfrog Flats property prohibit a retail center on the property.

Re: 47 Degrees North Major Amendment proposal

I am writing to inform the city of my very strong opposition to the Sun Communities 47° North proposal for the Bullfrog flats property. The proposed manufactured home / RV community:

STOP Negative Impact of 47° North STOP

- STOP Decreased level of service for EMS
- STOP Decreased level of service for fire protection
- STOP Decrease level of service for police protection
- STOP Increased traffic burden on 2-lane roads
- STOP Increased tax burden to pay for aging infrastructure (water, sewer, power, roads, EMS, schools, police,)
- STOP Doubling the population of Cle Elum within 6 years
- STOP Profits sent out of our community to Wallstreet investors
- STOP Largest private trailer park community west of the Mississippi
- STOP Wildfire risk due to limited ingress & egress: **Paradise Fire 2.0**

For these reasons, and so many others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Respectfully,

Mrs John A. Hamel

Re: 47 Degrees North Proposal

We are writing to communicate our strong objections to the Sun Communities 47°N proposal for the Bullfrog Flats property. The proposed manufactured home/RV community:

· Would affect the City of Roslyn and the town of Ronald as much or more than the City of Cle Elum—especially as regards traffic congestion and preservation of emergency egress routes,

· Is not in character with the City of Cle Elum or the upper Kittitas Valley (a fundamental requirement of the current zoning for the property),

· Would create a new and separate private tourist resort instead of the natural extension of city neighborhoods originally envisioned by city zoning and current approvals,

· Is in its entirety a private business not a neighborhood (no lots will be created or sold, all spots will be leased, and the project will be private), wholly owned by a large out-of-state publicly traded corporation whose fiduciary duty is to its shareholders,

· Limits opportunity for the creation of wealth within the actual community of homeowners,

· Provides no significant benefits to upper valley residents and tax payers,

· Will create serious and significant impacts on roads, police, fire, schools, emergency services, hospitals, and other public services that can't (or won't) be fully mitigated by the developer, and therefore,

· Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for, essentially a subsidy for a private business,

· Denial of the Sun Communities proposal would not take away or reduce underlying property rights. The original underlying zoning approval would still allow development of this site, just not as a private resort/manufactured home community.

For all of these reasons, and others, I implore the City to DENY this proposed major amendment and retain the current approved land use for the property.

Sincerely,

Ann Miner & Mark Neville
Roslyn, WA

To the City of Cle Elum: Mayor, City Council Members, Planning Department

Re: 47 Degrees North Major Amendment Proposal

I am writing to provide the city with my very strong concerns about the Sun Communities 47°N proposal for the Bullfrog Flats property. The proposed manufactured home/RV community:

- Is not in character with the City of Cle Elum or the upper Kittitas Valley (a fundamental requirement of the current zoning for the property),
- Would create a new and separate private tourist resort instead of the natural extension of city neighborhoods originally envisioned by city zoning and current approvals,
- Is in its entirety a private business not a neighborhood (no lots will be created or sold, all spots will be leased, and the project will be private), wholly owned by a large out-of-state publicly traded corporation whose fiduciary duty is to its shareholders,
- Provides no significant benefits to upper valley residents and tax payers,
- Will create serious and significant impacts on roads, police, fire, schools, emergency services, hospitals, and other public services that can't (or won't) be fully mitigated by the developer, and therefore,
- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for, essentially a subsidy for a private business,
- Denial of the Sun Communities proposal would not take away or reduce underlying property rights. The original underlying zoning approval would still allow development of this site, just not as a private resort/manufactured home community.

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Re: 47 Degrees North Major Amendment Proposal

I am writing to provide the city with my very strong concerns about the Sun Communities 47°N proposal for the Bullfrog Flats property. The proposed manufactured home/RV community:

- Is not in character with the City of Cle Elum or the upper Kittitas Valley (a fundamental requirement of the current zoning for the property),
- Would create a new and separate private tourist resort instead of the natural extension of city neighborhoods originally envisioned by city zoning and current approvals,
- Is in its entirety a private business not a neighborhood (no lots will be created or sold, all spots will be leased, and the project will be private), wholly owned by a large out-of-state publicly traded corporation whose fiduciary duty is to its shareholders,
- Provides no significant benefits to upper valley residents and tax payers,
- Will create serious and significant impacts on roads, police, fire, schools, emergency services, hospitals, and other public services that can't (or won't) be fully mitigated by the developer, and therefore,
- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for, essentially a subsidy for a private business,
- Denial of the Sun Communities proposal would not take away or reduce underlying property rights. The original underlying zoning approval would still allow development of this site, just not as a private resort/manufactured home community.

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Re: 47 Degrees North Major Amendment Proposal

I am writing to provide the city with my very strong concerns about the Sun Communities 47°N proposal for the Bullfrog Flats property. The proposed manufactured home/RV community:

- Is not in character with the City of Cle Elum or the upper Kittitas Valley (a fundamental requirement of the current zoning for the property),
- Would create a new and separate private tourist resort instead of the natural extension of city neighborhoods originally envisioned by city zoning and current approvals,
- Is in its entirety a private business not a neighborhood (no lots will be created or sold, all spots will be leased, and the project will be private), wholly owned by a large out-of-state publicly traded corporation whose fiduciary duty is to its shareholders,
- Provides no significant benefits to upper valley residents and tax payers,
- Will create serious and significant impacts on roads, police, fire, schools, emergency services, hospitals, and other public services that can't (or won't) be fully mitigated by the developer, and therefore,
- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for, essentially a subsidy for a private business,
- Denial of the Sun Communities proposal would not take away or reduce underlying property rights. The original underlying zoning approval would still allow development of this site, just not as a private resort/manufactured home community.

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

- Is not in character with the City of Cle Elum or the upper Kittitas Valley (a fundamental requirement of the current zoning for the property),
- Would create a new and separate private tourist resort instead of the natural extension of city neighborhoods originally envisioned by city zoning and current approvals,
- Is in its entirety a private business not a neighborhood (no lots will be created or sold, all spots will be leased, and the project will be private), wholly owned by a large out-of-state publicly traded corporation whose fiduciary duty is to its shareholders,
- Provides no significant benefits to upper valley residents and tax payers,
- Will create serious and significant impacts on roads, police, fire, schools, emergency services, hospitals, and other public services that can't (or won't) be fully mitigated by the developer, and therefore,
- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for, essentially a subsidy for a private business,
- Denial of the Sun Communities proposal would not take away or reduce underlying property rights. The original underlying zoning approval would still allow development of this site, just not as a private resort/manufactured home community.

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Re: 47 Degrees North Major Amendment Proposal

I am writing to provide the city with my very strong concerns about the Sun Communities 47°N proposal for the Bullfrog Flats property. The proposed manufactured home/RV community:

- Is not in character with the City of Cle Elum or the upper Kittitas Valley (a fundamental requirement of the current zoning for the property),
- Would create a new and separate private tourist resort instead of the natural extension of city neighborhoods originally envisioned by city zoning and current approvals,
- Is in its entirety a private business not a neighborhood (no lots will be created or sold, all spots will be leased, and the project will be private), wholly owned by a large out-of-state publicly traded corporation whose fiduciary duty is to its shareholders,
- Provides no significant benefits to upper valley residents and tax payers,

- Provides no significant benefits to upper valley residents and tax payers,
- Will create serious and significant impacts on roads, police, fire, schools, emergency services, hospitals, and other public services that can't (or won't) be fully mitigated by the developer, and therefore,
- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for, essentially a subsidy for a private business,
- Denial of the Sun Communities proposal would not take away or reduce underlying property rights. The original underlying zoning approval would still allow development of this site, just not as a private resort/manufactured home community.

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Re: 47 Degrees North Major Amendment Proposal

I am writing to provide the city with my very strong concerns about the Sun Communities 47°N proposal for the Bullfrog Flats property. The proposed manufactured home/RV community:

- Is not in character with the City of Cle Elum or the upper Kittitas Valley (a fundamental requirement of the current zoning for the property),
- Would create a new and separate private tourist resort instead of the natural extension of city neighborhoods originally envisioned by city zoning and current approvals,
- Is in its entirety a private business not a neighborhood (no lots will be created or sold, all spots will be leased, and the project will be private), wholly owned by a large out-of-state publicly traded corporation whose fiduciary duty is to its shareholders,
- Provides no significant benefits to upper valley residents and tax payers,
- Will create serious and significant impacts on roads, police, fire, schools, emergency services, hospitals, and other public services that can't (or won't) be fully mitigated by the developer, and therefore,
- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for, essentially a subsidy for a private business,
- Denial of the Sun Communities proposal would not take away or reduce underlying property rights. The original underlying zoning approval would still allow development of this site, just not as a private resort/manufactured home community.

Re: 47 Degrees North Major Amendment proposal

I am writing to inform the city of my very strong opposition to the Sun Communities 47° North proposal for the Bullfrog flats property. The proposed manufactured home / RV community:

- Is in clear violation of the vision for the property adopted by the city and presented to the public as a condition for annexing Bullfrog Flats into the city. It's not in character with the City of Cle Elum and does not comply with fundamental requirements of the city's comprehensive plan, the development agreement, or zoning for the property.

- Instead of traditional neighborhoods that were planned to be connected to and a natural extension of the city, supporting the rest of the city, 47 Degrees North would create a private for-profit community and tourist resort with gates, private roads and utilities which will be separated from the rest of the city. It will create a private city within a city, forever.

- Fiscal studies of 47 Degrees North show that it will not create sufficient tax revenue to cover the city's cost to serve it. Unless the developer agrees to financially cover the substantial deficits, forever, existing city taxpayers will be required to subsidize Sun's development and taxes will go up.

- Sun's 47 Degrees North will be in its entirety a private business not a natural neighborhood (no lots sold, all spots leased), wholly owned by a massive out-of-state publicly traded corporation whose fiduciary duty is to its shareholders, not city taxpayers. Any subsidies of the project would be a gift of public funds to a private entity.

- Is not housing as contemplated for the Bullfrog UGA. It will displace half of the actual housing planned for the area and replace it with a private park designed as a transient playground.

- Will be the largest manufactured home/RV park on the West Coast and will double the population of Cle Elum. Parks of this magnitude have no place in a town as small as Cle Elum. Wrong Place, Wrong Size.

- Sun has eliminated the industrial park component of the approved plan and is proposing a major new retail center to the project which would compete with existing city businesses and will seriously damage Cle Elum's downtown, which the city has invested millions of dollars to reinvigorate. The retail center is in direct conflict with the city's comprehensive plan which states that the Bullfrog Flats Master Plan…."is intended to elevate the DTC (downtown core) as the primary retail and activity nexus for Cle Elum". Current rules for the Bullfrog Flats property prohibit a retail center on the property.

- Provides no significant benefits to city or UKC residents, but creates serious and significant impacts on roads, police, fire, schools, emergency services, hospitals and other public services that can't be (or won't be) fully mitigated by the developer.

- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for. Any such increase in taxes will effectively translate to a subsidy for a private business,

- Denial of 47 Degrees North will not take away or reduce underlying property rights. It will simply require Sun Communities to comply with city's current rules, regulations and comprehensive plan for the property. The original underlying zoning approval and development agreement already allows development of this site, just not as a private resort/manufactured home community/retail center.

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Respectfully,

_____

The retail center is in direct conflict with the city's comprehensive plan which states that the Bullfrog Flats Master Plan…."is intended to elevate the DTC (downtown core) as the primary retail and activity nexus for Cle Elum". Current rules for the Bullfrog Flats property prohibit a retail center on the property.

- Provides no significant benefits to city or UKC residents, but creates serious and significant impacts on roads, police, fire, schools, emergency services, hospitals and other public services that can't be (or won't be) fully mitigated by the developer.

- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for. Any such increase in taxes will effectively translate to a subsidy for a private business,

- Denial of 47 Degrees North will not take away or reduce underlying property rights. It will simply require Sun Communities to comply with city's current rules, regulations and comprehensive plan for the property. The original underlying zoning approval and development agreement already allows development of this site, just not as a private resort/manufactured home community/retail center.

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Respectfully,

S Selvar

Re: 47 Degrees North Major Amendment proposal

I am writing to inform the city of my very strong opposition to the Sun Communities 47° North proposal for the Bullfrog flats property. The proposed manufactured home / RV community:

- Is in clear violation of the vision for the property adopted by the city and presented to the public as a condition for annexing Bullfrog Flats into the city. It's not in character with the City of Cle Elum and does not comply with fundamental requirements of the city's comprehensive plan, the development agreement, or zoning for the property.

- Instead of traditional neighborhoods that were planned to be connected to and a natural extension of the city, supporting the rest of the city, 47 Degrees North would create a private for-profit community and tourist resort with gates, private roads and utilities which will be separated from the rest of the city. It will create a private city within a city, forever.

- Fiscal studies of 47 Degrees North show that it will not create sufficient tax revenue to cover the city's cost to serve it. Unless the developer agrees to financially cover the substantial deficits, forever, existing city taxpayers will be required to subsidize Sun's development and taxes will go up.

- Sun's 47 Degrees North will be in its entirety a private business not a natural neighborhood (no lots sold, all spots leased), wholly owned by a massive out-of-state publicly traded corporation whose fiduciary duty is to its shareholders, not city taxpayers. Any subsidies of the project would be a gift of public funds to a private entity.

- Is not housing as contemplated for the Bullfrog UGA. It will displace half of the actual housing planned for the area and replace it with a private park designed as a transient playground.

- Will be the largest manufactured home/RV park on the West Coast and will double the population of Cle Elum. Parks of this magnitude have no place in a town as small as Cle Elum. Wrong Place, Wrong Size.

- Sun has eliminated the industrial park component of the approved plan and is proposing a major new retail center to the project which would compete with existing city businesses and will seriously damage Cle Elum's downtown, which the city has invested millions of dollars to reinvigorate. The retail center is in direct conflict with the city's comprehensive plan which states that the Bullfrog Flats Master Plan...."is intended to elevate the DTC (downtown core) as the primary retail and activity nexus for Cle Elum". Current rules for the Bullfrog Flats property prohibit a retail center on the property.

- Provides no significant benefits to city or UKC residents, but creates serious and significant impacts on roads, police, fire, schools, emergency services, hospitals and other public services that can't be (or won't be) fully mitigated by the developer.

Unless the developer agrees to financially cover the substantial deficits, forever, existing city taxpayers will be required to subsidize Sun's development and taxes will go up.

- Sun's 47 Degrees North will be in its entirety a private business not a natural neighborhood (no lots sold, all spots leased), wholly owned by a massive out-of-state publicly traded corporation whose fiduciary duty is to its shareholders, not city taxpayers. Any subsidies of the project would be a gift of public funds to a private entity.

- Is not housing as contemplated for the Bullfrog UGA. It will displace half of the actual housing planned for the area and replace it with a private park designed as a transient playground.

- Will be the largest manufactured home/RV park on the West Coast and will double the population of Cle Elum. Parks of this magnitude have no place in a town as small as Cle Elum. Wrong Place, Wrong Size.

- Sun has eliminated the industrial park component of the approved plan and is proposing a major new retail center to the project which would compete with existing city businesses and will seriously damage Cle Elum's downtown, which the city has invested millions of dollars to reinvigorate. The retail center is in direct conflict with the city's comprehensive plan which states that the Bullfrog Flats Master Plan…."is intended to elevate the DTC (downtown core) as the primary retail and activity nexus for Cle Elum". Current rules for the Bullfrog Flats property prohibit a retail center on the property.

- Provides no significant benefits to city or UKC residents, but creates serious and significant impacts on roads, police, fire, schools, emergency services, hospitals and other public services that can't be (or won't be) fully mitigated by the developer.

- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for. Any such increase in taxes will effectively translate to a subsidy for a private business,

- Denial of 47 Degrees North will not take away or reduce underlying property rights. It will simply require Sun Communities to comply with city's current rules, regulations and comprehensive plan for the property. The original underlying zoning approval and development agreement already allows development of this site, just not as a private resort/manufactured home community/retail center.

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Respectfully,

Cory Roller

Re: 47 Degrees North Major Amendment proposal

I am writing to inform the city of my very strong opposition to the Sun Communities 47° North proposal for the Bullfrog flats property. The proposed manufactured home / RV community:

- Is in clear violation of the vision for the property adopted by the city and presented to the public as a condition for annexing Bullfrog Flats into the city. It's not in character with the City of Cle Elum and does not comply with fundamental requirements of the city's comprehensive plan, the development agreement, or zoning for the property.

- Instead of traditional neighborhoods that were planned to be connected to and a natural extension of the city, supporting the rest of the city, 47 Degrees North would create a private for-profit community and tourist resort with gates, private roads and utilities which will be separated from the rest of the city. It will create a private city within a city, forever.

- Fiscal studies of 47 Degrees North show that it will not create sufficient tax revenue to cover the city's cost to serve it. Unless the developer agrees to financially cover the substantial deficits, forever, existing city taxpayers will be required to subsidize Sun's development and taxes will go up.

- Sun's 47 Degrees North will be in its entirety a private business not a natural neighborhood (no lots sold, all spots leased), wholly owned by a massive out-of-state publicly traded corporation whose fiduciary duty is to its shareholders, not city taxpayers. Any subsidies of the project would be a gift of public funds to a private entity.

Any subsidies of the project would be a gift of public funds to a private entity.

- Is not housing as contemplated for the Bullfrog UGA. It will displace half of the actual housing planned for the area and replace it with a private park designed as a transient playground.

- Will be the largest manufactured home/RV park on the West Coast and will double the population of Cle Elum. Parks of this magnitude have no place in a town as small as Cle Elum. Wrong Place, Wrong Size.

- Sun has eliminated the industrial park component of the approved plan and is proposing a major new retail center to the project which would compete with existing city businesses and will seriously damage Cle Elum's downtown, which the city has invested millions of dollars to reinvigorate. The retail center is in direct conflict with the city's comprehensive plan which states that the Bullfrog Flats Master Plan...."is intended to elevate the DTC (downtown core) as the primary retail and activity nexus for Cle Elum". Current rules for the Bullfrog Flats property prohibit a retail center on the property.

- Provides no significant benefits to city or UKC residents, but creates serious and significant impacts on roads, police, fire, schools, emergency services, hospitals and other public services that can't be (or won't be) fully mitigated by the developer.

- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for. Any such increase in taxes will effectively translate to a subsidy for a private business,

- Denial of 47 Degrees North will not take away or reduce underlying property rights. It will simply require Sun Communities to comply with city's current rules, regulations and comprehensive plan for the property. The original underlying zoning approval and development agreement already allows development of this site, just not as a private resort/manufactured home community/retail center.

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Respectfully,

Signature

Re: 47 Degrees North Major Amendment proposal

I am writing to inform the city of my very strong opposition to the Sun Communities 47° North proposal for the Bullfrog flats property. The proposed manufactured home / RV community:

- Is in clear violation of the vision for the property adopted by the city and presented to the public as a condition for annexing Bullfrog Flats into the city. It's not in character with the City of Cle Elum and does not comply with fundamental requirements of the city's comprehensive plan, the development agreement, or zoning for the property.

- Instead of traditional neighborhoods that were planned to be connected to and a natural extension of the city, supporting the rest of the city, 47 Degrees North would create a private for-profit community and tourist resort with gates, private roads and utilities which will be separated from the rest of the city. It will create a private city within a city, forever.

- Fiscal studies of 47 Degrees North show that it will not create sufficient tax revenue to cover the city's cost to serve it. Unless the developer agrees to financially cover the substantial deficits, forever, existing city taxpayers will be required to subsidize Sun's development and taxes will go up.

- Sun's 47 Degrees North will be in its entirety a private business not a natural neighborhood (no lots sold, all spots leased), wholly owned by a massive out-of-state publicly traded corporation whose fiduciary duty is to its shareholders, not city taxpayers. Any subsidies of the project would be a gift of public funds to a private entity.

- Will be the largest manufactured home/RV park on the West Coast and will double the population of Cle Elum. Parks of this magnitude have no place in a town as small as Cle Elum. Wrong Place, Wrong Size.

- Sun has eliminated the industrial park component of the approved plan and is proposing a major new retail center to the project which would compete with existing city businesses and will seriously damage Cle Elum's downtown, which the city has invested millions of dollars to reinvigorate. The retail center is in direct conflict with the city's comprehensive plan which states that the Bullfrog Flats Master Plan…."is intended to elevate the DTC (downtown core) as the primary retail and activity nexus for Cle Elum". Current rules for the Bullfrog Flats property prohibit a retail center on the property.

- Provides no significant benefits to city or UKC residents, but creates serious and significant impacts on roads, police, fire, schools, emergency services, hospitals and other public services that can't be (or won't be) fully mitigated by the developer.

- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for. Any such increase in taxes will effectively translate to a subsidy for a private business,

- Denial of 47 Degrees North will not take away or reduce underlying property rights. It will simply require Sun Communities to comply with city's current rules, regulations and comprehensive plan for the property. The original underlying zoning approval and development agreement already allows development of this site, just not as a private resort/manufactured home community/retail center.

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Respectfully,

Re: 47 Degrees North Major Amendment proposal

I am writing to inform the city of my very strong opposition to the Sun Communities 47° North proposal for the Bullfrog flats property. The proposed manufactured home / RV community:

- Is in clear violation of the vision for the property adopted by the city and presented to the public as a condition for annexing Bullfrog Flats into the city. It's not in character with the City of Cle Elum and does not comply with fundamental requirements of the city's comprehensive plan, the development agreement, or zoning for the property.

- Instead of traditional neighborhoods that were planned to be connected to and a natural extension of the city, supporting the rest of the city, 47 Degrees North would create a private for-profit community and tourist resort with gates, private roads and utilities which will be separated from the rest of the city. It will create a private city within a city, forever.

- Fiscal studies of 47 Degrees North show that it will not create sufficient tax revenue to cover the city's cost to serve it. Unless the developer agrees to financially cover the substantial deficits, forever, existing city taxpayers will be required to subsidize Sun's development and taxes will go up.

- Sun's 47 Degrees North will be in its entirety a private business not a natural neighborhood (no lots sold, all spots leased), wholly owned by a massive out-of-state publicly traded corporation whose fiduciary duty is to its shareholders, not city taxpayers. Any subsidies of the project would be a gift of public funds to a private entity.

- Is not housing as contemplated for the Bullfrog UGA. It will displace half of the actual housing planned for the area and replace it with a private park designed as a transient playground.

- Will be the largest manufactured home/RV park on the West Coast and will double the population of Cle Elum. Parks of this magnitude have no place in a town as small as Cle Elum. Wrong Place, Wrong Size.

- Sun has eliminated the industrial park component of the approved plan and is proposing a major new retail center to the project which would compete with existing city businesses and will seriously damage Cle Elum's downtown, which the city has invested millions of dollars to reinvigorate. The retail center is in direct conflict with the city's comprehensive plan which states that the Bullfrog Flats Master Plan…."is intended to elevate the DTC (downtown core) as the primary retail and activity nexus for Cle Elum". Current rules for the Bullfrog Flats property prohibit a retail center on the property.

- Provides no significant benefits to city or UKC residents, but creates serious and significant impacts on roads, police, fire, schools, emergency services, hospitals and other public services that can't be (or won't be) fully mitigated by the developer.

- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for. Any such increase in taxes will effectively translate to a subsidy for a private business,

- Denial of 47 Degrees North will not take away or reduce underlying property rights. It will simply require Sun Communities to comply with city's current rules, regulations and comprehensive plan for the property. The original underlying zoning approval and development agreement already allows development of this site, just not as a private resort/manufactured home community/retail center.

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Respectfully,

Re: 47 Degrees North Major Amendment proposal

I am writing to inform the city of my very strong opposition to the Sun Communities 47° North proposal for the Bullfrog flats property. The proposed manufactured home / RV community:

- Is in clear violation of the vision for the property adopted by the city and presented to the public as a condition for annexing Bullfrog Flats into the city. It's not in character with the City of Cle Elum and does not comply with fundamental requirements of the city's comprehensive plan, the development agreement, or zoning for the property.

- Instead of traditional neighborhoods that were planned to be connected to and a natural extension of the city, supporting the rest of the city, 47 Degrees North would create a private for-profit community and tourist resort with gates, private roads and utilities which will be separated from the rest of the city. It will create a private city within a city, forever.

- Fiscal studies of 47 Degrees North show that it will not create sufficient tax revenue to cover the city's cost to serve it. Unless the developer agrees to financially cover the substantial deficits, forever, existing city taxpayers will be required to subsidize Sun's development and taxes will go up.

- Sun's 47 Degrees North will be in its entirety a private business not a natural neighborhood (no lots sold, all spots leased), wholly owned by a massive out-of-state publicly traded corporation whose fiduciary duty is to its shareholders, not city taxpayers. Any subsidies of the project would be a gift of public funds to a private entity.

- Is not housing as contemplated for the Bullfrog UGA. It will displace half of the actual housing planned for the area and replace it with a private park designed as a transient playground.

- Will be the largest manufactured home/RV park on the West Coast and will double the population of Cle Elum. Parks of this magnitude have no place in a town as small as Cle Elum. Wrong Place, Wrong Size.

- Sun has eliminated the industrial park component of the approved plan and is proposing a major new retail center to the project which would compete with existing city businesses and will seriously damage Cle Elum's downtown, which the city has invested millions of dollars to reinvigorate. The retail center is in direct conflict with the city's comprehensive plan which states that the Bullfrog Flats Master Plan…."is intended to elevate the DTC (downtown core) as the primary retail and activity nexus for Cle Elum". Current rules for the Bullfrog Flats property prohibit a retail center on the property.

- Provides no significant benefits to city or UKC residents, but creates serious and significant impacts on roads, police, fire, schools, emergency services, hospitals and other public services that can't be (or won't be) fully mitigated by the developer.

- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for. Any such increase in taxes will effectively translate to a subsidy for a private business,

- Denial of 47 Degrees North will not take away or reduce underlying property rights. It will simply require Sun Communities to comply with city's current rules, regulations and comprehensive plan for the property. The original underlying zoning approval and development agreement already allows development of this site, just not as a private resort/manufactured home community/retail center.

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Respectfully,

Re: 47 Degrees North Major Amendment proposal

I am writing to inform the city of my very strong opposition to the Sun Communities 47° North proposal for the Bullfrog flats property. The proposed manufactured home / RV community:

- Is in clear violation of the vision for the property adopted by the city and presented to the public as a condition for annexing Bullfrog Flats into the city. It's not in character with the City of Cle Elum and does not comply with fundamental requirements of the city's comprehensive plan, the development agreement, or zoning for the property.

- Instead of traditional neighborhoods that were planned to be connected to and a natural extension of the city, supporting the rest of the city, 47 Degrees North would create a private for-profit community and tourist resort with gates, private roads and utilities which will be separated from the rest of the city. It will create a private city within a city, forever.

- Fiscal studies of 47 Degrees North show that it will not create sufficient tax revenue to cover the city's cost to serve it. Unless the developer agrees to financially cover the substantial deficits, forever, existing city taxpayers will be required to subsidize Sun's development and taxes will go up.

- Sun's 47 Degrees North will be in its entirety a private business not a natural neighborhood (no lots sold, all spots leased), wholly owned by a massive out-of-state publicly traded corporation whose fiduciary duty is to its shareholders, not city taxpayers. Any subsidies of the project would be a gift of public funds to a private entity.

- Is not housing as contemplated for the Bullfrog UGA. It will displace half of the actual housing planned for the area and replace it with a private park designed as a transient playground.

- Will be the largest manufactured home/RV park on the West Coast and will double the population of Cle Elum. Parks of this magnitude have no place in a town as small as Cle Elum. Wrong Place, Wrong Size.

- Sun has eliminated the industrial park component of the approved plan and is proposing a major new retail center to the project which would compete with existing city businesses and will seriously damage Cle Elum's downtown, which the city has invested millions of dollars to reinvigorate. The retail center is in direct conflict with the city's comprehensive plan which states that the Bullfrog Flats Master Plan…."is intended to elevate the DTC (downtown core) as the primary retail and activity nexus for Cle Elum". Current rules for the Bullfrog Flats property prohibit a retail center on the property.

- Provides no significant benefits to city or UKC residents, but creates serious and significant impacts on roads, police, fire, schools, emergency services, hospitals and other public services that can't be (or won't be) fully mitigated by the developer.

- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for. It will simply require Sun Communities to comply with city's current rules, regulations and comprehensive plan for the property. The original underlying zoning approval and development agreement already allows development of this site, just not as a private resort/manufactured home community/retail center.

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Respectfully,

Ronald Hitz

Re: 47 Degrees North Major Amendment proposal

I am writing to inform the city of my very strong opposition to the Sun Communities 47° North proposal for the Bullfrog flats property. The proposed manufactured home / RV community:

- Is in clear violation of the vision for the property adopted by the city and presented to the public as a condition for annexing Bullfrog Flats into the city. It's not in character with the City of Cle Elum and does not comply with fundamental requirements of the city's comprehensive plan, the development agreement, or zoning for the property.

- Instead of traditional neighborhoods that were planned to be connected to and a natural extension of the city, supporting the rest of the city, 47 Degrees North would create a private for-profit community and tourist resort with gates, private roads and utilities which will be separated from the rest of the city. It will create a private city within a city, forever.

- Fiscal studies of 47 Degrees North show that it will not create sufficient tax revenue to cover the city's cost to serve it. Unless the developer agrees to financially cover the substantial deficits, forever, existing city taxpayers will be required to subsidize Sun's development and taxes will go up.

- Sun's 47 Degrees North will be in its entirety a private business not a natural neighborhood (no lots sold, all spots leased), wholly owned by a massive out-of-state publicly traded corporation whose fiduciary duty is to its shareholders, not city taxpayers. Any subsidies of the project would be a gift of public funds to a private entity.

- Is not housing as contemplated for the Bullfrog UGA. It will displace half of the actual housing planned for the area and replace it with a private park designed as a transient playground.

- Will be the largest manufactured home/RV park on the West Coast and will double the population of Cle Elum. Parks of this magnitude have no place in a town as small as Cle Elum. Wrong Place, Wrong Size.

- Sun has eliminated the industrial park component of the approved plan and is proposing a major new retail center to the project which would compete with existing city businesses and will seriously damage Cle Elum's downtown, which the city has invested millions of dollars to reinvigorate. The retail center is in direct conflict with the city's comprehensive plan which states that the Bullfrog Flats Master Plan…."is intended to elevate the DTC (downtown core) as the primary retail and activity nexus for Cle Elum". Current rules for the Bullfrog Flats property prohibit a retail center on the property.

- Provides no significant benefits to city or UKC residents, but creates serious and significant impacts on roads, police, fire, schools, emergency services, hospitals and other public services that can't be (or won't be) fully mitigated by the developer.

- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for. Any such increase in taxes will effectively translate to a subsidy for a private business,

- Denial of 47 Degrees North will not take away or reduce underlying property rights. It will simply require Sun Communities to comply with city's current rules, regulations and comprehensive plan for the property. The original underlying zoning approval and development agreement already allows development of this site, just not as a private resort/manufactured home community/retail center.

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Re: 47 Degrees North Major Amendment proposal

I am writing to inform the city of my very strong opposition to the Sun Communities 47° North proposal for the Bullfrog flats property. The proposed manufactured home / RV community:

- Is in clear violation of the vision for the property adopted by the city and presented to the public as a condition for annexing Bullfrog Flats into the city. It's not in character with the City of Cle Elum and does not comply with fundamental requirements of the city's comprehensive plan, the development agreement, or zoning for the property.

- Instead of traditional neighborhoods that were planned to be connected to and a natural extension of the city, supporting the rest of the city, 47 Degrees North would create a private for-profit community and tourist resort with gates, private roads and utilities which will be separated from the rest of the city. It will create a private city within a city, forever.

- Fiscal studies of 47 Degrees North show that it will not create sufficient tax revenue to cover the city's cost to serve it. Unless the developer agrees to financially cover the substantial deficits, forever, existing city taxpayers will be required to subsidize Sun's development and taxes will go up.

- Sun's 47 Degrees North will be in its entirety a private business not a natural neighborhood (no lots sold, all spots leased), wholly owned by a massive out-of-state publicly traded corporation whose fiduciary duty is to its shareholders, not city taxpayers. Any subsidies of the project would be a gift of public funds to a private entity.

- Is not housing as contemplated for the Bullfrog UGA. It will displace half of the actual housing planned for the area and replace it with a private park designed as a transient playground.

- Will be the largest manufactured home/RV park on the West Coast and will double the population of Cle Elum. Parks of this magnitude have no place in a town as small as Cle Elum. Wrong Place, Wrong Size.

- Sun has eliminated the industrial park component of the approved plan and is proposing a major new retail center to the project which would compete with existing city businesses and will seriously damage Cle Elum's downtown, which the city has invested millions of dollars to reinvigorate. The retail center is in direct conflict with the city's comprehensive plan which states that the Bullfrog Flats Master Plan…."is intended to elevate the DTC (downtown core) as the primary retail and activity nexus for Cle Elum". Current rules for the Bullfrog Flats property prohibit a retail center on the property.

- Provides no significant benefits to city or UKC residents, but creates serious and significant impacts on roads, police, fire, schools, emergency services, hospitals and other public services that can't be (or won't be) fully mitigated by the developer.

- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for. Any such increase in taxes will effectively translate to a subsidy for a private business,

- Denial of 47 Degrees North will not take away or reduce underlying property rights. It will simply require Sun Communities to comply with city's current rules, regulations and comprehensive plan for the property. The original underlying zoning approval and development agreement already allows development of this site, just not as a private resort/manufactured home community/retail center.

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Re: 47 Degrees North Major Amendment proposal

I am writing to inform the city of my very strong opposition to the Sun Communities 47° North proposal for the Bullfrog flats property. The proposed manufactured home / RV community:

- Is in clear violation of the vision for the property adopted by the city and presented to the public as a condition for annexing Bullfrog Flats into the city. It's not in character with the City of Cle Elum and does not comply with fundamental requirements of the city's comprehensive plan, the development agreement, or zoning for the property.

- Instead of traditional neighborhoods that were planned to be connected to and a natural extension of the city, supporting the rest of the city, 47 Degrees North would create a private for-profit community and tourist resort with gates, private roads and utilities which will be separated from the rest of the city. It will create a private city within a city, forever.

- Fiscal studies of 47 Degrees North show that it will not create sufficient tax revenue to cover the city's cost to serve it. Unless the developer agrees to financially cover the substantial deficits, forever, existing city taxpayers will be required to subsidize Sun's development and taxes will go up.

- Sun's 47 Degrees North will be in its entirety a private business not a natural neighborhood (no lots sold, all spots leased), wholly owned by a massive out-of-state publicly traded corporation whose fiduciary duty is to its shareholders, not city taxpayers. Any subsidies of the project would be a gift of public funds to a private entity.

- Is not housing as contemplated for the Bullfrog UGA. It will displace half of the actual housing planned for the area and replace it with a private park designed as a transient playground.

- Will be the largest manufactured home/RV park on the West Coast and will double the population of Cle Elum. Parks of this magnitude have no place in a town as small as Cle Elum. Wrong Place, Wrong Size.

- Sun has eliminated the industrial park component of the approved plan and is proposing a major new retail center to the project which would compete with existing city businesses and will seriously damage Cle Elum's downtown, which the city has invested millions of dollars to reinvigorate. The retail center is in direct conflict with the city's comprehensive plan which states that the Bullfrog Flats Master Plan…."is intended to elevate the DTC (downtown core) as the primary retail and activity nexus for Cle Elum". Current rules for the Bullfrog Flats property prohibit a retail center on the property.

- Provides no significant benefits to city or UKC residents, but creates serious and significant impacts on roads, police, fire, schools, emergency services, hospitals and other public services that can't be (or won't be) fully mitigated by the developer.

- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for. Any such increase in taxes will effectively translate to a subsidy for a private business,

- Denial of 47 Degrees North will not take away or reduce underlying property rights. It will simply require Sun Communities to comply with city's current rules, regulations and comprehensive plan for the property. The original underlying zoning approval and development agreement already allows development of this site, just not as a private resort/manufactured home community/retail center.

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Respectfully,

_____

Re: 47 Degrees North Major Amendment proposal

I am writing to inform the city of my very strong opposition to the Sun Communities 47° North proposal for the Bullfrog flats property. The proposed manufactured home / RV community:

- Is in clear violation of the vision for the property adopted by the city and presented to the public as a condition for annexing Bullfrog Flats into the city. It's not in character with the City of Cle Elum and does not comply with fundamental requirements of the city's comprehensive plan, the development agreement, or zoning for the property.

- Instead of traditional neighborhoods that were planned to be connected to and a natural extension of the city, supporting the rest of the city, 47 Degrees North would create a private for-profit community and tourist resort with gates, private roads and utilities which will be separated from the rest of the city. It will create a private city within a city, forever.

- Fiscal studies of 47 Degrees North show that it will not create sufficient tax revenue to cover the city's cost to serve it. Unless the developer agrees to financially cover the substantial deficits, forever, existing city taxpayers will be required to subsidize Sun's development and taxes will go up.

- Sun's 47 Degrees North will be in its entirety a private business not a natural neighborhood (no lots sold, all spots leased), wholly owned by a massive out-of-state publicly traded corporation whose fiduciary duty is to its shareholders, not city taxpayers. Any subsidies of the project would be a gift of public funds to a private entity.

- Is not housing as contemplated for the Bullfrog UGA. It will displace half of the actual housing planned for the area and replace it with a private park designed as a transient playground.

- Will be the largest manufactured home/RV park on the West Coast and will double the population of Cle Elum. Parks of this magnitude have no place in a town as small as Cle Elum. Wrong Place, Wrong Size.

- Sun has eliminated the industrial park component of the approved plan and is proposing a major new retail center to the project which would compete with existing city businesses and will seriously damage Cle Elum's downtown, which the city has invested millions of dollars to reinvigorate. The retail center is in direct conflict with the city's comprehensive plan which states that the Bullfrog Flats Master Plan…."is intended to elevate the DTC (downtown core) as the primary retail and activity nexus for Cle Elum". Current rules for the Bullfrog Flats property prohibit a retail center on the property.

- Provides no significant benefits to city or UKC residents, but creates serious and significant impacts on roads, police, fire, schools, emergency services, hospitals and other public services that can't be (or won't be) fully mitigated by the developer.

- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for. Any such increase in taxes will effectively translate to a subsidy for a private business,

- Denial of 47 Degrees North will not take away or reduce underlying property rights. It will simply require Sun Communities to comply with city's current rules, regulations and comprehensive plan for the property. The original underlying zoning approval and development agreement already allows development of this site, just not as a private resort/manufactured home community/retail center.

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Respectfully,

The retail center is in direct conflict with the city's comprehensive plan which states that the Bullfrog Flats Master Plan…."is intended to elevate the DTC (downtown core) as the primary retail and activity nexus for Cle Elum". Current rules for the Bullfrog Flats property prohibit a retail center on the property.

- Provides no significant benefits to city or UKC residents, but creates serious and significant impacts on roads, police, fire, schools, emergency services, hospitals and other public services that can't be (or won't be) fully mitigated by the developer.

- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for. Any such increase in taxes will effectively translate to a subsidy for a private business,

- Denial of 47 Degrees North will not take away or reduce underlying property rights. It will simply require Sun Communities to comply with city's current rules, regulations and comprehensive plan for the property. The original underlying zoning approval and development agreement already allows development of this site, just not as a private resort/manufactured home community/retail center.

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Respectfully,

Beth Parsons

Re: 47 Degrees North Major Amendment proposal

I am writing to inform the city of my very strong opposition to the Sun Communities 47° North proposal for the Bullfrog flats property. The proposed manufactured home / RV community:

- Is in clear violation of the vision for the property adopted by the city and presented to the public as a condition for annexing Bullfrog Flats into the city. It's not in character with the City of Cle Elum and does not comply with fundamental requirements of the city's comprehensive plan, the development agreement, or zoning for the property.

- Instead of traditional neighborhoods that were planned to be connected to and a natural extension of the city, supporting the rest of the city, 47 Degrees North would create a private for-profit community and tourist resort with gates, private roads and utilities which will be separated from the rest of the city. It will create a private city within a city, forever.

- Fiscal studies of 47 Degrees North show that it will not create sufficient tax revenue to cover the city's cost to serve it. Unless the developer agrees to financially cover the substantial deficits, forever, existing city taxpayers will be required to subsidize Sun's development and taxes will go up.

- Sun's 47 Degrees North will be in its entirety a private business not a natural neighborhood (no lots sold, all spots leased), wholly owned by a massive out-of-state publicly traded corporation whose fiduciary duty is to its shareholders, not city taxpayers. Any subsidies of the project would be a gift of public funds to a private entity.

- Is not housing as contemplated for the Bullfrog UGA. It will displace half of the actual housing planned for the area and replace it with a private park designed as a transient playground.

- Will be the largest manufactured home/RV park on the West Coast and will double the population of Cle Elum. Parks of this magnitude have no place in a town as small as Cle Elum. Wrong Place, Wrong Size.

- Sun has eliminated the industrial park component of the approved plan and is proposing a major new retail center to the project which would compete with existing city businesses and will seriously damage Cle Elum's downtown, which the city has invested millions of dollars to reinvigorate. The retail center is in direct conflict with the city's comprehensive plan which states that the Bullfrog Flats Master Plan…."is intended to elevate the DTC (downtown core) as the primary retail and activity nexus for Cle Elum". Current rules for the Bullfrog Flats property prohibit a retail center on the property.

- Fiscal studies of 47 Degrees North show that it will not create sufficient tax revenue to cover the city's cost to serve it. Unless the developer agrees to financially cover the substantial deficits, forever, existing city taxpayers will be required to subsidize Sun's development and taxes will go up.

- Sun's 47 Degrees North will be in its entirety a private business not a natural neighborhood (no lots sold, all spots leased), wholly owned by a massive out-of-state publicly traded corporation whose fiduciary duty is to its shareholders, not city taxpayers. Any subsidies of the project would be a gift of public funds to a private entity.

- Is not housing as contemplated for the Bullfrog UGA. It will displace half of the actual housing planned for the area and replace it with a private park designed as a transient playground.

- Will be the largest manufactured home/RV park on the West Coast and will double the population of Cle Elum. Parks of this magnitude have no place in a town as small as Cle Elum. Wrong Place, Wrong Size.

- Sun has eliminated the industrial park component of the approved plan and is proposing a major new retail center to the project which would compete with existing city businesses and will seriously damage Cle Elum's downtown, which the city has invested millions of dollars to reinvigorate. The retail center is in direct conflict with the city's comprehensive plan which states that the Bullfrog Flats Master Plan…."is intended to elevate the DTC (downtown core) as the primary retail and activity nexus for Cle Elum". Current rules for the Bullfrog Flats property prohibit a retail center on the property.

- Provides no significant benefits to city or UKC residents, but creates serious and significant impacts on roads, police, fire, schools, emergency services, hospitals and other public services that can't be (or won't be) fully mitigated by the developer.

- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for. Any such increase in taxes will effectively translate to a subsidy for a private business,

- Denial of 47 Degrees North will not take away or reduce underlying property rights. It will simply require Sun Communities to comply with city's current rules, regulations and comprehensive plan for the property. The original underlying zoning approval and development agreement already allows development of this site, just not as a private resort/manufactured home community/retail center.

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Respectfully,

Diane M. Chatten

Re: 47 Degrees North Major Amendment proposal

I am writing to inform the city of my very strong opposition to the Sun Communities 47° North proposal for the Bullfrog flats property. The proposed manufactured home / RV community:

- Is in clear violation of the vision for the property adopted by the city and presented to the public as a condition for annexing Bullfrog Flats into the city. It's not in character with the City of Cle Elum and does not comply with fundamental requirements of the city's comprehensive plan, the development agreement, or zoning for the property.

- Instead of traditional neighborhoods that were planned to be connected to and a natural extension of the city, supporting the rest of the city, 47 Degrees North would create a private for-profit community and tourist resort with gates, private roads and utilities which will be separated from the rest of the city. It will create a private city within a city, forever.

- Fiscal studies of 47 Degrees North show that it will not create sufficient tax revenue to cover the city's cost to serve it. Unless the developer agrees to financially cover the substantial deficits, forever, existing city taxpayers will be required to subsidize Sun's development and taxes will go up.

- Sun's 47 Degrees North will be in its entirety a private business not a natural neighborhood (no lots sold, all spots leased), wholly owned by a massive out-of-state publicly traded corporation whose fiduciary duty is to its shareholders, not city taxpayers. Re: 47 Degrees North Major Amendment proposal

I am writing to inform the city of my very strong opposition to the Sun Communities 47° North proposal for the Bullfrog flats property. The proposed manufactured home / RV community:

- Is in clear violation of the vision for the property adopted by the city and presented to the public as a condition for annexing Bullfrog Flats into the city. It's not in character with the City of Cle Elum and does not comply with fundamental requirements of the city's comprehensive plan, the development agreement, or zoning for the property.

- Instead of traditional neighborhoods that were planned to be connected to and a natural extension of the city, supporting the rest of the city, 47 Degrees North would create a private for-profit community and tourist resort with gates, private roads and utilities which will be separated from the rest of the city. It will create a private city within a city, forever.

- Fiscal studies of 47 Degrees North show that it will not create sufficient tax revenue to cover the city's cost to serve it. Unless the developer agrees to financially cover the substantial deficits, forever, existing city taxpayers will be required to subsidize Sun's development and taxes will go up.

- Sun's 47 Degrees North will be in its entirety a private business not a natural neighborhood (no lots sold, all spots leased), wholly owned by a massive out-of-state publicly traded corporation whose fiduciary duty is to its shareholders, not city taxpayers. Any subsidies of the project would be a gift of public funds to a private entity.

- Is not housing as contemplated for the Bullfrog UGA. It will displace half of the actual housing planned for the area and replace it with a private park designed as a transient playground.

- Will be the largest manufactured home/RV park on the West Coast and will double the population of Cle Elum. Parks of this magnitude have no place in a town as small as Cle Elum. Wrong Place, Wrong Size.

- Sun has eliminated the industrial park component of the approved plan and is proposing a major new retail center to the project which would compete with existing city businesses and will seriously damage Cle Elum's downtown, which the city has invested millions of dollars to reinvigorate. The retail center is in direct conflict with the city's comprehensive plan which states that the Bullfrog Flats Master Plan…."is intended to elevate the DTC (downtown core) as the primary retail and activity nexus for Cle Elum". Current rules for the Bullfrog Flats property prohibit a retail center on the property.

- Provides no significant benefits to city or UKC residents, but creates serious and significant impacts on roads, police, fire, schools, emergency services, hospitals and other public services that can't be (or won't be) fully mitigated by the developer.

- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for. Any such increase in taxes will effectively translate to a subsidy for a private business,

- Denial of 47 Degrees North will not take away or reduce underlying property rights. It will simply require Sun Communities to comply with city's current rules, regulations and comprehensive plan for the property. The original underlying zoning approval and development agreement already allows development of this site, just not as a private resort/manufactured home community/retail center.

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Respectfully,

Charles Dahl

Re: 47 Degrees North Major Amendment proposal

I am writing to inform the city of my very strong opposition to the Sun Communities 47° North proposal for the Bullfrog flats property. The proposed manufactured home / RV community:

- Is in clear violation of the vision for the property adopted by the city and presented to the public as a condition for annexing Bullfrog Flats into the city. It's not in character with the City of Cle Elum and does not comply with fundamental requirements of the city's comprehensive plan, the development agreement, or zoning for the property.

- Instead of traditional neighborhoods that were planned to be connected to and a natural extension of the city, supporting the rest of the city, 47 Degrees North would create a private for-profit community and tourist resort with gates, private roads and utilities which will be separated from the rest of the city. It will create a private city within a city, forever.

- Fiscal studies of 47 Degrees North show that it will not create sufficient tax revenue to cover the city's cost to serve it. Unless the developer agrees to financially cover the substantial deficits, forever, existing city taxpayers will be required to subsidize Sun's development and taxes will go up.

- Sun's 47 Degrees North will be in its entirety a private business not a natural neighborhood (no lots sold, all spots leased), wholly owned by a massive out-of-state publicly traded corporation whose fiduciary duty is to its shareholders, not city taxpayers. Any subsidies of the project would be a gift of public funds to a private entity.

- Is not housing as contemplated for the Bullfrog UGA. It will displace half of the actual housing planned for the area and replace it with a private park designed as a transient playground.

- Will be the largest manufactured home/RV park on the West Coast and will double the population of Cle Elum. Parks of this magnitude have no place in a town as small as Cle Elum. Wrong Place, Wrong Size.

- Sun has eliminated the industrial park component of the approved plan and is proposing a major new retail center to the project which would compete with existing city businesses and will seriously damage Cle Elum's downtown, which the city has invested millions of dollars to reinvigorate. The retail center is in direct conflict with the city's comprehensive plan which states that the Bullfrog Flats Master Plan…."is intended to elevate the DTC (downtown core) as the primary retail and activity nexus for Cle Elum". Current rules for the Bullfrog Flats property prohibit a retail center on the property.

- Provides no significant benefits to city or UKC residents, but creates serious and significant impacts on roads, police, fire, schools, emergency services, hospitals and other public services that can't be (or won't be) fully mitigated by the developer.

- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for. Any such increase in taxes will effectively translate to a subsidy for a private business,

- Denial of 47 Degrees North will not take away or reduce underlying property rights. It will simply require Sun Communities to comply with city's current rules, regulations and comprehensive plan for the property. The original underlying zoning approval and development agreement already allows development of this site, just not as a private resort/manufactured home community/retail center.

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Respectfully,

Karen Melbye

- Will be the largest manufactured home/RV park on the West Coast and will double the population of Cle Elum. Parks of this magnitude have no place in a town as small as Cle Elum. Wrong Place, Wrong Size.

- Sun has eliminated the industrial park component of the approved plan and is proposing a major new retail center to the project which would compete with existing city businesses and will seriously damage Cle Elum's downtown, which the city has invested millions of dollars to reinvigorate. The retail center is in direct conflict with the city's comprehensive plan which states that the Bullfrog Flats Master Plan…."is intended to elevate the DTC (downtown core) as the primary retail and activity nexus for Cle Elum". Current rules for the Bullfrog Flats property prohibit a retail center on the property.

- Provides no significant benefits to city or UKC residents, but creates serious and significant impacts on roads, police, fire, schools, emergency services, hospitals and other public services that can't be (or won't be) fully mitigated by the developer.

- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for. Any such increase in taxes will effectively translate to a subsidy for a private business,

- Denial of 47 Degrees North will not take away or reduce underlying property rights. It will simply require Sun Communities to comply with city's current rules, regulations and comprehensive plan for the property. The original underlying zoning approval and development agreement already allows development of this site, just not as a private resort/manufactured home community/retail center.

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Respectfully,

Re: 47 Degrees North Major Amendment proposal

I am writing to inform the city of my very strong opposition to the Sun Communities 47° North proposal for the Bullfrog flats property. The proposed manufactured home / RV community:

- Is in clear violation of the vision for the property adopted by the city and presented to the public as a condition for annexing Bullfrog Flats into the city. It's not in character with the City of Cle Elum and does not comply with fundamental requirements of the city's comprehensive plan, the development agreement, or zoning for the property.

- Instead of traditional neighborhoods that were planned to be connected to and a natural extension of the city, supporting the rest of the city, 47 Degrees North would create a private for-profit community and tourist resort with gates, private roads and utilities which will be separated from the rest of the city. It will create a private city within a city, forever.

- Fiscal studies of 47 Degrees North show that it will not create sufficient tax revenue to cover the city's cost to serve it. Unless the developer agrees to financially cover the substantial deficits, forever, existing city taxpayers will be required to subsidize Sun's development and taxes will go up.

- Sun's 47 Degrees North will be in its entirety a private business not a natural neighborhood (no lots sold, all spots leased), wholly owned by a massive out-of-state publicly traded corporation whose fiduciary duty is to its shareholders, not city taxpayers. Any subsidies of the project would be a gift of public funds to a private entity.

- Is not housing as contemplated for the Bullfrog UGA. It will displace half of the actual housing planned for the area and replace it with a private park designed as a transient playground.

- Will be the largest manufactured home/RV park on the West Coast and will double the population of Cle Elum. Parks of this magnitude have no place in a town as small as Cle Elum. Wrong Place, Wrong Size.

- Is not housing as contemplated for the Bullfrog UGA. It will displace half of the actual housing planned for the area and replace it with a private park designed as a transient playground.

- Will be the largest manufactured home/RV park on the West Coast and will double the population of Cle Elum. Parks of this magnitude have no place in a town as small as Cle Elum. Wrong Place, Wrong Size.

- Sun has eliminated the industrial park component of the approved plan and is proposing a major new retail center to the project which would compete with existing city businesses and will seriously damage Cle Elum's downtown, which the city has invested millions of dollars to reinvigorate. The retail center is in direct conflict with the city's comprehensive plan which states that the Bullfrog Flats Master Plan…."is intended to elevate the DTC (downtown core) as the primary retail and activity nexus for Cle Elum". Current rules for the Bullfrog Flats property prohibit a retail center on the property.

- Provides no significant benefits to city or UKC residents, but creates serious and significant impacts on roads, police, fire, schools, emergency services, hospitals and other public services that can't be (or won't be) fully mitigated by the developer.

- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for. Any such increase in taxes will effectively translate to a subsidy for a private business,

- Denial of 47 Degrees North will not take away or reduce underlying property rights. It will simply require Sun Communities to comply with city's current rules, regulations and comprehensive plan for the property. The original underlying zoning approval and development agreement already allows development of this site, just not as a private resort/manufactured home community/retail center.

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Respectfully,

M. Green

Re: 47 Degrees North Major Amendment proposal

I am writing to inform the city of my very strong opposition to the Sun Communities 47° North proposal for the Bullfrog flats property. The proposed manufactured home / RV community:

- Is in clear violation of the vision for the property adopted by the city and presented to the public as a condition for annexing Bullfrog Flats into the city. It's not in character with the City of Cle Elum and does not comply with fundamental requirements of the city's comprehensive plan, the development agreement, or zoning for the property.

- Instead of traditional neighborhoods that were planned to be connected to and a natural extension of the city, supporting the rest of the city, 47 Degrees North would create a private for-profit community and tourist resort with gates, private roads and utilities which will be separated from the rest of the city. It will create a private city within a city, forever.

- Fiscal studies of 47 Degrees North show that it will not create sufficient tax revenue to cover the city's cost to serve it. Unless the developer agrees to financially cover the substantial deficits, forever, existing city taxpayers will be required to subsidize Sun's development and taxes will go up.

- Sun's 47 Degrees North will be in its entirety a private business not a natural neighborhood (no lots sold, all spots leased), wholly owned by a massive out-of-state publicly traded corporation whose fiduciary duty is to its shareholders, not city taxpayers. Any subsidies of the project would be a gift of public funds to a private entity.

- Is not housing as contemplated for the Bullfrog UGA. It will displace half of the actual housing planned for the area and replace it with a private park designed as a transient playground.

- Will be the largest manufactured home/RV park on the West Coast and will double the population of Cle Elum. Parks of this magnitude have no place in a town as small as Cle Elum. Wrong Place, Wrong Size.

Any subsidies of the project would be a gift of public funds to a private entity.

- Is not housing as contemplated for the Bullfrog UGA. It will displace half of the actual housing planned for the area and replace it with a private park designed as a transient playground.

- Will be the largest manufactured home/RV park on the West Coast and will double the population of Cle Elum. Parks of this magnitude have no place in a town as small as Cle Elum. Wrong Place Wrong Size.

- Sun has eliminated the industrial park component of the approved plan and is proposing a major new retail center to the project which would compete with existing city businesses and will seriously damage Cle Elum's downtown, which the city has invested millions of dollars to reinvigorate. The retail center is in direct conflict with the city's comprehensive plan which states that the Bullfrog Flats Master Plan...."is intended to elevate the DTC (downtown core) as the primary retail and activity nexus for Cle Elum". Current rules for the Bullfrog Flats property prohibit a retail center on the property.

- Provides no significant benefits to city or UKC residents, but creates serious and significant impacts on roads, police, fire, schools, emergency services, hospitals and other public services that can't be (or won't be) fully mitigated by the developer.

- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for. Any such increase in taxes will effectively translate to a subsidy for a private business,

- Denial of 47 Degrees North will not take away or reduce underlying property rights. It will simply require Sun Communities to comply with city's current rules, regulations and comprehensive plan for the property. The original underlying zoning approval and development agreement already allows development of this site, just not as a private resort/manufactured home community/retail center.

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Respectfully,

Re: 47 Degrees North Major Amendment proposal

I am writing to inform the city of my very strong opposition to the Sun Communities 47° North proposal for the Bullfrog flats property. The proposed manufactured home / RV community:

- Is in clear violation of the vision for the property adopted by the city and presented to the public as a condition for annexing Bullfrog Flats into the city. It's not in character with the City of Cle Elum and does not comply with fundamental requirements of the city's comprehensive plan, the development agreement, or zoning for the property.

- Instead of traditional neighborhoods that were planned to be connected to and a natural extension of the city, supporting the rest of the city, 47 Degrees North would create a private for-profit community and tourist resort with gates, private roads and utilities which will be separated from the rest of the city. It will create a private city within a city, forever.

- Fiscal studies of 47 Degrees North show that it will not create sufficient tax revenue to cover the city's cost to serve it. Unless the developer agrees to financially cover the substantial deficits, forever, existing city taxpayers will be required to subsidize Sun's development and taxes will go up.

- Sun's 47 Degrees North will be in its entirety a private business not a natural neighborhood (no lots sold, all spots leased), wholly owned by a massive out-of-state publicly traded corporation who's fiduciary duty is to its shareholders, not city taxpayers. Any subsidies of the project would be a gift of public funds to a private entity.

- Is not housing as contemplated for the Bullfrog UGA. It will displace half of the actual housing planned for the area and replace it with a private park designed as a transient playground.

Re: 47 Degrees North Major Amendment Proposal

I am writing to provide the city with my very strong concerns about the Sun Communities 47°N proposal for the Bullfrog Flats property. The proposed manufactured home/RV community:

- Is not in character with the City of Cle Elum or the upper Kittitas Valley (a fundamental requirement of the current zoning for the property),
- Would create a new and separate private tourist resort instead of the natural extension of city neighborhoods originally envisioned by city zoning and current approvals,
- Is in its entirety a private business not a neighborhood (no lots will be created or sold, all spots will be leased, and the project will be private), wholly owned by a large out-of-state publicly traded corporation whose fiduciary duty is to its shareholders,
- Provides no significant benefits to upper valley residents and tax payers,
- Will create serious and significant impacts on roads, police, fire, schools, emergency services, hospitals, and other public services that can't (or won't) be fully mitigated by the developer, and therefore,
- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for, essentially a subsidy for a private business,
- Denial of the Sun Communities proposal would not take away or reduce underlying property rights. The original underlying zoning approval would still allow development of this site, just not as a private resort/manufactured home community.

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

- Will create serious and significant impacts on roads, police, fire, schools, emergency services, hospitals, and other public services that can't (or won't) be fully mitigated by the developer, and therefore,
- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for, essentially a subsidy for a private business,
- Denial of the Sun Communities proposal would not take away or reduce underlying property rights. The original underlying zoning approval would still allow development of this site, just not as a private resort/manufactured home community.

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Re: 47 Degrees North Major Amendment Proposal

I am writing to provide the city with my very strong concerns about the Sun Communities 47°N proposal for the Bullfrog Flats property. The proposed manufactured home/RV community:

- Is not in character with the City of Cle Elum or the upper Kittitas Valley (a fundamental requirement of the current zoning for the property),
- Would create a new and separate private tourist resort instead of the natural extension of city neighborhoods originally envisioned by city zoning and current approvals,
- Is in its entirety a private business not a neighborhood (no lots will be created or sold, all spots will be leased, and the project will be private), wholly owned by a large out-of-state publicly traded corporation whose fiduciary duty is to its shareholders,
- Provides no significant benefits to upper valley residents and tax payers,
- Will create serious and significant impacts on roads, police, fire, schools, emergency services, hospitals, and other public services that can't (or won't) be fully mitigated by the developer, and therefore,
- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for, essentially a subsidy for a private business,
- Denial of the Sun Communities proposal would not take away or reduce underlying property rights. The original underlying zoning approval would still allow development of this site, just not as a private resort/manufactured home community.

- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for, essentially a subsidy for a private business,
- Denial of the Sun Communities proposal would not take away or reduce underlying property rights. The original underlying zoning approval would still allow development of this site, just not as a private resort/manufactured home community.

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Re: 47 Degrees North Major Amendment Proposal

I am writing to provide the city with my very strong concerns about the Sun Communities 47°N proposal for the Bullfrog Flats property. The proposed manufactured home/RV community:

- Is not in character with the City of Cle Elum or the upper Kittitas Valley (a fundamental requirement of the current zoning for the property),
- Would create a new and separate private tourist resort instead of the natural extension of city neighborhoods originally envisioned by city zoning and current approvals,
- Is in its entirety a private business not a neighborhood (no lots will be created or sold, all spots will be leased, and the project will be private), wholly owned by a large out-of-state publicly traded corporation whose fiduciary duty is to its shareholders,
- Provides no significant benefits to upper valley residents and tax payers,
- Will create serious and significant impacts on roads, police, fire, schools, emergency services, hospitals, and other public services that can't (or won't) be fully mitigated by the developer, and therefore,
- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for, essentially a subsidy for a private business,
- Denial of the Sun Communities proposal would not take away or reduce underlying property rights. The original underlying zoning approval would still allow development of this site, just not as a private resort/manufactured home community.

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Re: 47 Degrees North Major Amendment Proposal

I am writing to provide the city with my very strong concerns about the Sun Communities 47°N proposal for the Bullfrog Flats property. The proposed manufactured home/RV community:

- Is not in character with the City of Cle Elum or the upper Kittitas Valley (a fundamental requirement of the current zoning for the property),
- Would create a new and separate private tourist resort instead of the natural extension of city neighborhoods originally envisioned by city zoning and current approvals,
- Is in its entirety a private business not a neighborhood (no lots will be created or sold, all spots will be leased, and the project will be private), wholly owned by a large out-of-state publicly traded corporation whose fiduciary duty is to its shareholders,
- Provides no significant benefits to upper valley residents and tax payers,
- Will create serious and significant impacts on roads, police, fire, schools, emergency services, hospitals, and other public services that can't (or won't) be fully mitigated by the developer, and therefore,
- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for, essentially a subsidy for a private business,
- Denial of the Sun Communities proposal would not take away or reduce underlying property rights. The original underlying zoning approval would still allow development of this site, just not as a private resort/manufactured home community.

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Re: 47 Degrees North Major Amendment proposal

I am writing to inform the city of my very strong opposition to the Sun Communities 47° North proposal for the Bullfrog flats property. The proposed manufactured home / RV community:

- Is in clear violation of the vision for the property adopted by the city and presented to the public as a condition for annexing Bullfrog Flats into the city. It's not in character with the City of Ce Elum and does not comply with fundamental requirements of the city's comprehensive plan, the development agreement, or zoning for the property.

- Instead of traditional neighborhoods that were planned to be connected to and a natural extension of the city, supporting the rest of the city, 47 Degrees North would create a private for-profit community and tourist resort with gates, private roads and utilities which will be separated from the rest of the city. It will create a private city within a city, forever.

- Fiscal studies of 47 Degrees North show that it will not create sufficient tax revenue to cover the city's cost to serve it. Unless the developer agrees to financially cover the substantial deficits, forever, existing city taxpayers will be required to subsidize Sun's development and taxes will go up.

- Sun's 47 Degrees North will be in its entirety a private business not a natural neighborhood (no lots sold, all spots leased), wholly owned by a massive out-of-state publicly traded corporation who's fiduciary duty is to its shareholders, not city taxpayers. Any subsidies of the project would be a gift of public funds to a private entity.

- Is not housing as contemplated for the Bullfrog UGA. It will displace half of the actual housing planned for the area and replace it with a private park designed as a transient playground.

- Will be the largest manufactured home/RV park on the West Coast and will double the population of Cle Elum. Parks of this magnitude have no place in a town as small as Cle Elum. Wrong Place Wrong Size.

- Sun has eliminated the industrial park component of the approved plan and is proposing a major new retail center to the project which would compete with existing city businesses and will seriously damage Cle Elum's downtown, which the city has invested millions of dollars to reinvigorate. The retail center is in direct conflict with the city's comprehensive plan which states that the Bullfrog Flats Master Plan...."is intended to elevate the DTC (downtown core) as the primary retail and activity nexus for Cle Elum". Current rules for the Bullfrog Flats property prohibit a retail center on the property.

- Provides no significant benefits to city or UKC residents, but creates serious and significant impacts on roads, police, fire, schools, emergency services, hospitals and other public services that can't be (or won't be) fully mitigated by the developer, and,

- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for. Any such increase in taxes will effectively translate to a subsidy for a private business,

- Denial of 47 Degrees North will not take away or reduce underlying property rights. It will simply require Sun Communities to comply with city's current rules, regulations and comprehensive plan for the property. The original underlying zoning approval and development agreement already allows development of this site, just not as a private resort/manufactured home community/retail center.

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Respectfully,

Abigail Archer

- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for. Any such increase in taxes will effectively translate to a subsidy for a private business,

- Denial of 47 Degrees North will not take away or reduce underlying property rights. It will simply require Sun Communities to comply with city's current rules, regulations and comprehensive plan for the property. The original underlying zoning approval and development agreement already allows development of this site, not just as a private resort/manufactured home community/retail center.

A few additional thoughts related to the approval of the Sun Communities 47° North proposal. The decision will have long-lasting impact on the area. Cle Elum is on an upward trajectory. Ever increasing pride in the community and of home ownership, upgrades to the downtown business area, good communications infrastructure, along with the continuing efforts to improve the already quality education offered by the local schools, to name a few. Considering the: improvements to Interstate 90 heading into the Seattle area and the paradigm shift of businesses offering well-paid opportunities for employment, which only requires being in the office a few days a week or even periodically each month will increase demand for home ownership from professionals seeking a rural quality of life along with all the other advantages such as quality schools and well-planned city infrastructure Cle Elum has to offer. The original program for the expansion of the area proposed for the Sun Communities 47° North project was much better aligned with goals that support this potential and result in a long-lasting legacy fitting to the spirt and aspirations of this wonderful community.
Lastly, having continually studied the response from the Cle Elum community over the past few years, in the minutes from the local community council meetings and in the local newspaper, it is obvious that the responses have been overwhelming negative, so, should the project be granted approval to proceed, many questions would arise which would warrant further investigation, for example:

- At inception what was promised to the original stakeholders of Sun Country Communities related to the management of any overwhelming negative response to the project proposal from the people of Cle Elum and surrounding communities?

- Why was the community's response not given proper priority in the decision to approve or not approve the Sun Communities 47° North proposal?

For all these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Respectfully,

The retail center is in direct conflict with the city's comprehensive plan which states that the Bullfrog Flats Master Plan...."is intended to elevate the DTC (downtown core) as the primary retail and activity nexus for Cle Elum". Current rules for the Bullfrog Flats property prohibit a retail center on the property.

- Provides no significant benefits to city or UKC residents, but creates serious and significant impacts on roads, police, fire, schools, emergency services, hospitals and other public services that can't be (or won't be) fully mitigated by the developer, and,

- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for. Any such increase in taxes will effectively translate to a subsidy for a private business,

- Denial of 47 Degrees North will not take away or reduce underlying property rights. It will simply require Sun Communities to comply with city's current rules, regulations and comprehensive plan for the property. The original underlying zoning approval and development agreement already allows development of this site, just not as a private resort/manufactured home community/retail center.

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Respectfully,

_____Alison Redman _____

Re: 47 Degrees North Major Amendment proposal

I am writing to inform the city of my very strong opposition to the Sun Communities 47° North proposal for the Bullfrog flats property. The proposed manufactured home / RV community:

- Is in clear violation of the vision for the property adopted by the city and presented to the public as a condition for annexing Bullfrog Flats into the city. It's not in character with the City of Cle Elum and does not comply with fundamental requirements of the city's comprehensive plan, the development agreement, or zoning for the property.

- Instead of traditional neighborhoods that were planned to be connected to and a natural extension of the city, supporting the rest of the city, 47 Degrees North would create a private for-profit community and tourist resort with gates, private roads and utilities which will be separated from the rest of the city. It will create a private city within a city, forever.

- Fiscal studies of 47 Degrees North show that it will not create sufficient tax revenue to cover the city's cost to serve it. Unless the developer agrees to financially cover the substantial deficits, forever, existing city taxpayers will be required to subsidize Sun's development and taxes will go up.

- Sun's 47 Degrees North will be in its entirety a private business not a natural neighborhood (no lots sold, all spots leased), wholly owned by a massive out-of-state publicly traded corporation whose fiduciary duty is to its shareholders, not city taxpayers. Any subsidies of the project would be a gift of public funds to a private entity.

- Is not housing as contemplated for the Bullfrog UGA. It will displace half of the actual housing planned for the area and replace it with a private park designed as a transient playground.

- Will be the largest manufactured home/RV park on the West Coast and will double the population of Cle Elum. Parks of this magnitude have no place in a town as small as Cle Elum. Wrong Place, Wrong Size.

- Sun has eliminated the industrial park component of the approved plan and is proposing a major new retail center to the project which would compete with existing city businesses and will seriously damage Cle Elum's downtown, which the city has invested millions of dollars to reinvigorate. The retail center is in direct conflict with the city's comprehensive plan which states that the Bullfrog Flats Master Plan…."is intended to elevate the DTC (downtown core) as the primary retail and activity nexus for Cle Elum". Current rules for the Bullfrog Flats property prohibit a retail center on the property.

Cle Elum, WA 98922

Special Comment(s): In addition to the below, the main question we, the home owners and tax payers, have is, how does this development benefit the home owning tax payers of Cle Elum? It doesn't, short answer! All this does is do what all these ideas and installments do, put money in your pockets and the developers. No different is local politics to state and national politics; you are all corrupt, money hungry, and selfish, acting to benefit yourselves and not the community. You are 100% what is wrong with the state of our social and economic landscape ruining the culture and values of communities.

We are writing to inform the city of our very strong opposition to the Sun Communities 47° North proposal for the Bullfrog flats property. The proposed manufactured home / RV community:

- Is in clear violation of the vision for the property adopted by the city and presented to the public as a condition for annexing Bullfrog Flats into the city. It's not in character with the City of Cle Elum and does not comply with fundamental requirements of the city's comprehensive plan, the development agreement, or zoning for the property.

- Instead of traditional neighborhoods that were planned to be connected to and a natural extension of the city, supporting the rest of the city, 47 Degrees North would create a private for-profit community and tourist resort with gates, private roads and utilities which will be separated from the rest of the city. It will create a private city within a city, forever.

- Fiscal studies of 47 Degrees North show that it will not create sufficient tax revenue to cover the city's cost to serve it. Unless the developer agrees to financially cover the substantial deficits, forever, existing city taxpayers will be required to subsidize Sun's development and taxes will go up.

- Sun's 47 Degrees North will be in its entirety a private business not a natural neighborhood (no lots sold, all spots leased), wholly owned by a massive out-of-state publicly traded corporation who's fiduciary duty is to its shareholders, not city taxpayers. Any subsidies of the project would be a gift of public funds to a private entity.

- Is not housing as contemplated for the Bullfrog UGA. It will displace half of the actual housing planned for the area and replace it with a private park designed as a transient playground.

- Will be the largest manufactured home/RV park on the West Coast and will double the population of Cle Elum. Parks of this magnitude have no place in a town as small as Cle Elum. Wrong Place Wrong Size.

- Sun has eliminated the industrial park component of the approved plan and is proposing a major new retail center to the project which would compete with existing city businesses and will seriously damage Cle Elum's downtown, which the city has invested millions of dollars to reinvigorate. The retail center is in direct conflict with the city's comprehensive plan which states that the Bullfrog Flats Master Plan...."is intended to elevate the DTC (downtown core) as the primary retail and activity nexus for Cle Elum". Current rules for the Bullfrog Flats property prohibit a retail center on the property.

- Provides no significant benefits to city or UKC residents, but creates serious and significant impacts on roads, police, fire, schools, emergency services, hospitals and other public services that can't be (or won't be) fully mitigated by the developer, and,

- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for. Any such increase in taxes will effectively translate to a subsidy for a private business,

- Denial of 47 Degrees North will not take away or reduce underlying property rights. It will simply require Sun Communities to comply with city's current rules, regulations and comprehensive plan for the property. The original underlying zoning approval and development agreement already allows development of this site, just not as a private resort/manufactured home community/retail center.

For all of these reasons, and others, we implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Hello City of Cle Elum Officials,

Please see the attached signed letter against the 47 Degrees North Development being discussed in Cle Elum. I believe in growth, but feel this community will be detrimental to the town in terms of the pace of building, lack of foresight, and mobile home/rv park component.

Please let me know if you have any questions.
Thank you,
Andy Cygan

Re: 47 Degrees North Major Amendment proposal

I am writing to inform the city of my very strong opposition to the Sun Communities 47° North proposal for the Bullfrog flats property. The proposed manufactured home / RV community:

- Is in clear violation of the vision for the property adopted by the city and presented to the public as a condition for annexing Bullfrog Flats into the city. It's not in character with the City of Cle Elum and does not comply with fundamental requirements of the city's comprehensive plan, the development agreement, or zoning for the property.

- Instead of traditional neighborhoods that were planned to be connected to and a natural extension of the city, supporting the rest of the city, 47 Degrees North would create a private for-profit community and tourist resort with gates, private roads and utilities which will be separated from the rest of the city. It will create a private city within a city, forever.

- Fiscal studies of 47 Degrees North show that it will not create sufficient tax revenue to cover the city's cost to serve it. Unless the developer agrees to financially cover the substantial deficits, forever, existing city taxpayers will be required to subsidize Sun's development and taxes will go up.

- Sun's 47 Degrees North will be in its entirety a private business not a natural neighborhood (no lots sold, all spots leased), wholly owned by a massive out-of-state publicly traded corporation whose fiduciary duty is to its shareholders, not city taxpayers. Any subsidies of the project would be a gift of public funds to a private entity.

- Is not housing as contemplated for the Bullfrog UGA. It will displace half of the actual housing planned for the area and replace it with a private park designed as a transient playground.

- Will be the largest manufactured home/RV park on the West Coast and will double the population of Cle Elum. Parks of this magnitude have no place in a town as small as Cle Elum. Wrong Place, Wrong Size.

- Sun has eliminated the industrial park component of the approved plan and is proposing a major new retail center to the project which would compete with existing city businesses and will seriously damage Cle Elum's downtown, which the city has invested millions of dollars to reinvigorate. The retail center is in direct conflict with the city's comprehensive plan which states that the Bullfrog Flats Master Plan…."is intended to elevate the DTC (downtown core) as the primary retail and activity nexus for Cle Elum". Current rules for the Bullfrog Flats property prohibit a retail center on the property.

- Provides no significant benefits to city or UKC residents, but creates serious and significant impacts on roads, police, fire, schools, emergency services, hospitals and other public services that can't be (or won't be) fully mitigated by the developer.

- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for. Any such increase in taxes will effectively translate to a subsidy for a private business,

- Denial of 47 Degrees North will not take away or reduce underlying property rights. It will simply require Sun Communities to comply with city's current rules, regulations and comprehensive plan for the property. The original underlying zoning approval and development agreement already allows development of this site, just not as a private resort/manufactured home community/retail center.

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Respectfully,

Andy L. Pink

- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for. Any such increase in taxes will effectively translate to a subsidy for a private business,

- Denial of 47 Degrees North will not take away or reduce underlying property rights. It will simply require Sun Communities to comply with city's current rules, regulations and comprehensive plan for the property. The original underlying zoning approval and development agreement already allows development of this site, just not as a private resort/manufactured home community/retail center.

- All manufactured units are to be purchased and owned by residents, but all underlying land is leased to homeowners. None of the proposed manufactured homes are considered to meet criteria as affordable housing. This type of housing leaves the homeowner vulnerable to constant increases in land leasing prices by Sun Communities.

- The total population of Cle Elum / Roslyn / South Cle Elum is about 3,350. Depending on its final approval, the Sun Communities project will add 1,490 to 1,650 more people plus 940 to 1,880 RV visitors per day, increasing the population of

the three cities by 73% to 105% depending on time of year. This will necessitate the doubling of all of our facilities – police, fire, medical, schools, and public works.

- The traffic increases on major roads would cause severe congestion and be catastrophic if an evacuation were required.

- The trees within our community are one of our most valuable resources. Without them, our ecosystem will be damaged beyond repair. The beauty of our urban environment will be gone forever.

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property. You can stop this! Please save our community!

- Sun's 47 Degrees North will be in its entirety a private business not a natural neighborhood (no lots sold, all spots leased), wholly owned by a massive out-of-state publicly traded corporation whose fiduciary duty is to its shareholders, not city taxpayers. Any subsidies of the project would be a gift of public funds to a private entity.

- Is not housing as contemplated for the Bullfrog UGA. It will displace half of the actual housing planned for the area and replace it with a private park designed as a transient playground.

- Will be the largest manufactured home/RV park on the West Coast and will double the population of Cle Elum. Parks of this magnitude have no place in a town as small as Cle Elum. Wrong Place, Wrong Size.

- Sun has eliminated the industrial park component of the approved plan and is proposing a major new retail center to the project which would compete with existing city businesses and will seriously damage Cle Elum's downtown, which the city has invested millions of dollars to reinvigorate. The retail center is in direct conflict with the city's comprehensive plan which states that the Bullfrog Flats Master Plan…."is intended to elevate the DTC (downtown core) as the primary retail and activity nexus for Cle Elum". Current rules for the Bullfrog Flats property prohibit a retail center on the property.

- Provides no significant benefits to city or UKC residents, but creates serious and significant impacts on roads, police, fire, schools, emergency services, hospitals and other public services that can't be (or won't be) fully mitigated by the developer.

- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for. Any such increase in taxes will effectively translate to a subsidy for a private business,

- Denial of 47 Degrees North will not take away or reduce underlying property rights. It will simply require Sun Communities to comply with city's current rules, regulations and comprehensive plan for the property. The original underlying zoning approval and development agreement already allows development of this site, just not as a private resort/manufactured home community/retail center.

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Respectfully,

Arlene Watts

Re: 47 Degrees North Major Amendment proposal

By Monday 26th 12:00 noon

I am writing to inform the city of my very strong opposition to the Sun Communities 47° North proposal for the Bullfrog flats property. The proposed manufactured home / RV community:

- Is in clear violation of the vision for the property adopted by the city and presented to the public as a condition for annexing Bullfrog Flats into the city. It's not in character with the City of Cle Elum and does not comply with fundamental requirements of the city's comprehensive plan, the development agreement, or zoning for the property.
- Instead of traditional neighborhoods that were planned to be connected to and a natural extension of the city, supporting the rest of the city, 47 Degrees North would create a private for-profit community and tourist resort with gates, private roads and utilities which will be separated from the rest of the city. It will create a private city within a city, forever.
- Fiscal studies of 47 Degrees North show that it will not create sufficient tax revenue to cover the city's cost to serve it. Unless the developer agrees to financially cover the substantial deficits, forever, existing city taxpayers will be required to subsidize Sun's development and taxes will go up.
- Sun's 47 Degrees North will be in its entirety a private business not a natural neighborhood (no lots sold, all spots leased), wholly owned by a massive out-of-state publicly traded corporation who's fiduciary duty is to its shareholders, not city taxpayers. Any subsidies of the project would be a gift of public funds to a private entity.
- Is not housing as contemplated for the Bullfrog UGA. It will displace half of the actual housing planned for the area and replace it with a private park designed as a transient playground.
- Will be the largest manufactured home/RV park on the West Coast and will double the population of Cle Elum. Parks of this magnitude have no place in a town as small as Cle Elum. Wrong Place Wrong Size.

Re: 47 Degrees North Major Amendment proposal

I am writing to inform the city of my very strong opposition to the Sun Communities 47 north proposal for the Bulldog Flats property. The proposed manufactured home / RV community

- is a clear violation of the vision for the property adopted by the city and presented to the public as a condition for annexing Bulldog Flats into the city. It is not in character with the City of Cle Elum and does not comply with fundamental requirements of the city's comprehensive plan, the development agreement, or zoning for this property.

- instead of traditional neighborhoods that were planned to be connected to and a natural extension of the city, supporting the rest of the city, 47 Degrees North would create a private for profit community and tourist resort with gates, private roads and utilities which will be separated from the rest of the city. It will create a private city within a city. Sprawl.

- Fiscal studies of 47 Degrees North show that it will not create sufficient tax revenue to cover the city's cost to serve it. Unless the developer agrees to financially cover the substantial deficits, Sprawl, existing city taxpayers will be required to subsidize Sun's development and taxes will go up.

- Sun's 47 Degrees North will be in its entirety a private business not a natural neighborhood. Lux was sold, as Aprés Ski/Golf, wholly owned by a massive out-of-state publicly traded corporation which's fiduciary duty is to its shareholders, not city taxpayers. Any subsidies of this project would be a gift of public funds to a private entity.

- to top housing as contemplated by the Bulldog UGA. It will displace half of the actual housing planned for the area and replace it with a cement park designed as a transient campground.

- will be the largest manufactured home/RV park on the west Coast and will double the population of Cle Elum. Parks of the magnitude have no place in a town as small as Cle Elum, losing Place Young Park.

- Sun has eliminated the industrial park component of the approved plan and is proposing a major new retail center to the project which would compete with existing city businesses and will seriously damage Cle Elum's downtown, which the city has invested millions of dollars to revitalize. The result center is in direct conflict with the city's comprehensive plan which states that the Bulldog Flats Master Plan... "is intended to alleviate the [CLC downtown core] as the primary retail and activity nexus for Cle Elum". Current rules for the Bulldog Flats property prohibit a retail center on the property.

- Provides no significant benefits to city or UAC residents, but creates serious and significant impacts on roads, police, fire, schools, emergency services, hospitals and other public services that can't be (or aren't be) fully mitigated by the developer.

- Will create substantial traffic, congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for. Any such increases in taxes will effectively translate to a subsidy for a private resort/resort.

- Denial of 47 Degrees North will not take away or reduce underlying property rights. It will simply require Sun Communities to comply with city's current rules, regulations, and comprehensive plan for the property. The original underlying zoning approval and development agreement similarly allows development of this site, just not as a private resort/manufactured home community/retail center.

For all of these reasons, and others, I implore the City to DENY the proposed major amendment and retain the current approved land use for the property.

Re: 47 Degrees North Major Amendment proposal

I am writing to inform the city of my very strong opposition to the Sun Communities 47° North proposal for the Bullfrog flats property. The proposed manufactured home / RV community:

- Is in clear violation of the vision for the property adopted by the city and presented to the public as a condition for annexing Bullfrog Flats into the city. It's not in character with the City of Cle Elum and does not comply with fundamental requirements of the city's comprehensive plan, the development agreement, or zoning for the property.
- Instead of traditional neighborhoods that were planned to be connected to and a natural extension of the city, supporting the rest of the city, 47 Degrees North would create a private for-profit community and tourist resort with gates, private roads and utilities which will be separated from the rest of the city. It will create a private city within a city, forever.
- Fiscal studies of 47 Degrees North show that it will not create sufficient tax revenue to cover the city's cost to serve it. Unless the developer agrees to financially cover the substantial deficits, forever, existing city taxpayers will be required to subsidize Sun's development and taxes will go up.
- Sun's 47 Degrees North will be in its entirety a private business not a natural neighborhood (no lots sold, all spots leased), wholly owned by a massive out-of-state publicly traded corporation who's fiduciary duty is to its shareholders, not city taxpayers. Any subsidies of the project would be a gift of public funds to a private entity.
- Is not housing as contemplated for the Bullfrog UGA. It will displace half of the actual housing planned for the area and replace it with a private park designed as a transient playground.
- Will be the largest manufactured home/RV park on the West Coast and will double the population of Cle Elum. Parks of this magnitude have no place in a town as small as Cle Elum. Wrong Place Wrong Size.
- Sun has eliminated the industrial park component of the approved plan and is proposing a major new retail center to the project which would compete with existing city businesses and will seriously damage Cle Elum's downtown, which the city has invested millions of dollars to reinvigorate. The retail center is in direct conflict with the city's comprehensive plan which states that the Bullfrog Flats Master Plan…."is intended to elevate the DTC (downtown core) as the primary retail and activity nexus for Cle Elum". Current rules for the Bullfrog Flats property prohibit a retail center on the property.
- Provides no significant benefits to city or UKC residents, but creates serious and significant impacts on roads, police, fire, schools, emergency services, hospitals and other public services that can't be (or won't be) fully mitigated by the developer, and,
- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for. Any such increase in taxes will effectively translate to a subsidy for a private business,
- Denial of 47 Degrees North will not take away or reduce underlying property rights. It will simply require Sun Communities to comply with city's current rules, regulations and comprehensive plan for the property. The original underlying zoning approval and development agreement already allows development of this site, just not as a private resort/manufactured home community/retail center.

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Respectfully,

Signature

I am writing to inform the city of my very strong opposition to the Sun Communities 47° North proposal for the Bullfrog flats property. The proposed manufactured home / RV community:

- Is in clear violation of the vision for the property adopted by the city and presented to the public as a condition for annexing Bullfrog Flats into the city. It's not in character with the City of Cle Elum and does not comply with fundamental requirements of the city's comprehensive plan, the development agreement, or zoning for the property.

- Instead of traditional neighborhoods that were planned to be connected to and a natural extension of the city, supporting the rest of the city, 47 Degrees North would create a private for-profit community and tourist resort with gates, private roads and utilities which will be separated from the rest of the city. It will create a private city within a city, forever.

- Fiscal studies of 47 Degrees North show that it will not create sufficient tax revenue to cover the city's cost to serve it. Unless the developer agrees to financially cover the substantial deficits, forever, existing city taxpayers will be required to subsidize Sun's development and taxes will go up.

- Sun's 47 Degrees North will be in its entirety a private business not a natural neighborhood (no lots sold, all spots leased), wholly owned by a massive out-of-state publicly traded corporation whose fiduciary duty is to its shareholders, not city taxpayers. Any subsidies of the project would be a gift of public funds to a private entity.

- Is not housing as contemplated for the Bullfrog UGA. It will displace half of the actual housing planned for the area and replace it with a private park designed as a transient playground.

- Will be the largest manufactured home/RV park on the West Coast and will double the population of Cle Elum. Parks of this magnitude have no place in a town as small as Cle Elum. Wrong Place, Wrong Size.

- Sun has eliminated the industrial park component of the approved plan and is proposing a major new retail center to the project which would compete with existing city businesses and will seriously damage Cle Elum's downtown, which the city has invested millions of dollars to reinvigorate. The retail center is in direct conflict with the city's comprehensive plan which states that the Bullfrog Flats Master Plan…."is intended to elevate the DTC (downtown core) as the primary retail and activity nexus for Cle Elum". Current rules for the Bullfrog Flats property prohibit a retail center on the property.

- Provides no significant benefits to city or UKC residents, but creates serious and significant impacts on roads, police, fire, schools, emergency services, hospitals and other public services that can't be (or won't be) fully mitigated by the developer.

- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for. Any such increase in taxes will effectively translate to a subsidy for a private business,

- Denial of 47 Degrees North will not take away or reduce underlying property rights. It will simply require Sun Communities to comply with city's current rules, regulations and comprehensive plan for the property. The original underlying zoning approval and development agreement already allows development of this site, just not as a private resort/manufactured home community/retail center.

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Respectfully,

- Is in clear violation of the vision for the property adopted by the city and presented to the public as a condition for annexing Bullfrog Flats into the city. It's not in character with the City of Cle Elum and does not comply with fundamental requirements of the city's comprehensive plan, the development agreement, or zoning for the property.

- Instead of traditional neighborhoods that were planned to be connected to and a natural extension of the city, supporting the rest of the city, 47 Degrees North would create a private for-profit community and tourist resort with gates, private roads and utilities which will be separated from the rest of the city. It will create a private city within a city, forever.

- Fiscal studies of 47 Degrees North show that it will not create sufficient tax revenue to cover the city's cost to serve it. Unless the developer agrees to financially cover the substantial deficits, forever, existing city taxpayers will be required to subsidize Sun's development and taxes will go up.

- Sun's 47 Degrees North will be in its entirety a private business not a natural neighborhood (no lots sold, all spots leased), wholly owned by a massive out-of-state publicly traded corporation whose fiduciary duty is to its shareholders, not city taxpayers. Any subsidies of the project would be a gift of public funds to a private entity.

- Is not housing as contemplated for the Bullfrog UGA. It will displace half of the actual housing planned for the area and replace it with a private park designed as a transient playground.

- Will be the largest manufactured home/RV park on the West Coast and will double the population of Cle Elum. Parks of this magnitude have no place in a town as small as Cle Elum. Wrong Place, Wrong Size.

- Sun has eliminated the industrial park component of the approved plan and is proposing a major new retail center to the project which would compete with existing city businesses and will seriously damage Cle Elum's downtown, which the city has invested millions of dollars to reinvigorate. The retail center is in direct conflict with the city's comprehensive plan which states that the Bullfrog Flats Master Plan…."is intended to elevate the DTC (downtown core) as the primary retail and activity nexus for Cle Elum". Current rules for the Bullfrog Flats property prohibit a retail center on the property.

- Provides no significant benefits to city or UKC residents, but creates serious and significant impacts on roads, police, fire, schools, emergency services, hospitals and other public services that can't be (or won't be) fully mitigated by the developer.

- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for. Any such increase in taxes will effectively translate to a subsidy for a private business,

- Denial of 47 Degrees North will not take away or reduce underlying property rights. It will simply require Sun Communities to comply with city's current rules, regulations and comprehensive plan for the property. The original underlying zoning approval and development agreement already allows development of this site, just not as a private resort/manufactured home community/retail center.

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Respectfully,

I. Dittmar

- Is in clear violation of the vision for the property adopted by the city and presented to the public as a condition for annexing Bullfrog Flats into the city. It's not in character with the City of Cle Elum and does not comply with fundamental requirements of the city's comprehensive plan, the development agreement, or zoning for the property.

- Instead of traditional neighborhoods that were planned to be connected to and a natural extension of the city, supporting the rest of the city, 47 Degrees North would create a private for-profit community and tourist resort with gates, private roads and utilities which will be separated from the rest of the city. It will create a private city within a city, forever.

- Fiscal studies of 47 Degrees North show that it will not create sufficient tax revenue to cover the city's cost to serve it. Unless the developer agrees to financially cover the substantial deficits, forever, existing city taxpayers will be required to subsidize Sun's development and taxes will go up.

- Sun's 47 Degrees North will be in its entirety a private business not a natural neighborhood (no lots sold, all spots leased), wholly owned by a massive out-of-state publicly traded corporation whose fiduciary duty is to its shareholders, not city taxpayers. Any subsidies of the project would be a gift of public funds to a private entity.

- Is not housing as contemplated for the Bullfrog UGA. It will displace half of the actual housing planned for the area and replace it with a private park designed as a transient playground.

- Will be the largest manufactured home/RV park on the West Coast and will double the population of Cle Elum. Parks of this magnitude have no place in a town as small as Cle Elum. Wrong Place, Wrong Size.

- Sun has eliminated the industrial park component of the approved plan and is proposing a major new retail center to the project which would compete with existing city businesses and will seriously damage Cle Elum's downtown, which the city has invested millions of dollars to reinvigorate. The retail center is in direct conflict with the city's comprehensive plan which states that the Bullfrog Flats Master Plan…."is intended to elevate the DTC (downtown core) as the primary retail and activity nexus for Cle Elum". Current rules for the Bullfrog Flats property prohibit a retail center on the property.

- Provides no significant benefits to city or UKC residents, but creates serious and significant impacts on roads, police, fire, schools, emergency services, hospitals and other public services that can't be (or won't be) fully mitigated by the developer.

- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for. Any such increase in taxes will effectively translate to a subsidy for a private business,

- Denial of 47 Degrees North will not take away or reduce underlying property rights. It will simply require Sun Communities to comply with city's current rules, regulations and comprehensive plan for the property. The original underlying zoning approval and development agreement already allows development of this site, just not as a private resort/manufactured home community/retail center.

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Respectfully,

- Is in clear violation of the vision for the property adopted by the city and presented to the public as a condition for annexing Bullfrog Flats into the city. It's not in character with the City of Cle Elum and does not comply with fundamental requirements of the city's comprehensive plan, the development agreement, or zoning for the property.

- Instead of traditional neighborhoods that were planned to be connected to and a natural extension of the city, supporting the rest of the city, 47 Degrees North would create a private for-profit community and tourist resort with gates, private roads and utilities which will be separated from the rest of the city. It will create a private city within a city, forever.

- Fiscal studies of 47 Degrees North show that it will not create sufficient tax revenue to cover the city's cost to serve it. Unless the developer agrees to financially cover the substantial deficits, forever, existing city taxpayers will be required to subsidize Sun's development and taxes will go up.

- Sun's 47 Degrees North will be in its entirety a private business not a natural neighborhood (no lots sold, all spots leased), wholly owned by a massive out-of-state publicly traded corporation whose fiduciary duty is to its shareholders, not city taxpayers. Any subsidies of the project would be a gift of public funds to a private entity.

- Is not housing as contemplated for the Bullfrog UGA. It will displace half of the actual housing planned for the area and replace it with a private park designed as a transient playground.

- Will be the largest manufactured home/RV park on the West Coast and will double the population of Cle Elum. Parks of this magnitude have no place in a town as small as Cle Elum. Wrong Place, Wrong Size.

- Sun has eliminated the industrial park component of the approved plan and is proposing a major new retail center to the project which would compete with existing city businesses and will seriously damage Cle Elum's downtown, which the city has invested millions of dollars to reinvigorate. The retail center is in direct conflict with the city's comprehensive plan which states that the Bullfrog Flats Master Plan…."is intended to elevate the DTC (downtown core) as the primary retail and activity nexus for Cle Elum". Current rules for the Bullfrog Flats property prohibit a retail center on the property.

- Provides no significant benefits to city or UKC residents, but creates serious and significant impacts on roads, police, fire, schools, emergency services, hospitals and other public services that can't be (or won't be) fully mitigated by the developer.

- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for. Any such increase in taxes will effectively translate to a subsidy for a private business,

- Denial of 47 Degrees North will not take away or reduce underlying property rights. It will simply require Sun Communities to comply with city's current rules, regulations and comprehensive plan for the property. The original underlying zoning approval and development agreement already allows development of this site, just not as a private resort/manufactured home community/retail center.

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Respectfully,

Tamara Reinkens

- Instead of traditional neighborhoods that were planned to be connected to and a natural extension of the city, supporting the rest of the city, 47 Degrees North would create a private for-profit community and tourist resort with gates, private roads and utilities which will be separated from the rest of the city. It will create a private city within a city, forever.

- Fiscal studies of 47 Degrees North show that it will not create sufficient tax revenue to cover the city's cost to serve it. Unless the developer agrees to financially cover the substantial deficits, forever, existing city taxpayers will be required to subsidize Sun's development and taxes will go up.

- Sun's 47 Degrees North will be in its entirety a private business not a natural neighborhood (no lots sold, all spots leased), wholly owned by a massive out-of-state publicly traded corporation whose fiduciary duty is to its shareholders, not city taxpayers. Any subsidies of the project would be a gift of public funds to a private entity.

- Is not housing as contemplated for the Bullfrog UGA. It will displace half of the actual housing planned for the area and replace it with a private park designed as a transient playground.

- Will be the largest manufactured home/RV park on the West Coast and will double the population of Cle Elum. Parks of this magnitude have no place in a town as small as Cle Elum. Wrong Place, Wrong Size.

- Sun has eliminated the industrial park component of the approved plan and is proposing a major new retail center to the project which would compete with existing city businesses and will seriously damage Cle Elum's downtown, which the city has invested millions of dollars to reinvigorate. The retail center is in direct conflict with the city's comprehensive plan which states that the Bullfrog Flats Master Plan…."is intended to elevate the DTC (downtown core) as the primary retail and activity nexus for Cle Elum". Current rules for the Bullfrog Flats property prohibit a retail center on the property.

- Provides no significant benefits to city or UKC residents, but creates serious and significant impacts on roads, police, fire, schools, emergency services, hospitals and other public services that can't be (or won't be) fully mitigated by the developer.

- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for. Any such increase in taxes will effectively translate to a subsidy for a private business,

- Denial of 47 Degrees North will not take away or reduce underlying property rights. It will simply require Sun Communities to comply with city's current rules, regulations and comprehensive plan for the property. The original underlying zoning approval and development agreement already allows development of this site, just not as a private resort/manufactured home community/retail center.

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Respectfully,

Mary Olver

Re: 47 Degrees North Major Amendment proposal

I am writing to inform the city of my very strong opposition to the Sun Communities 47° North proposal for the Bullfrog flats property. The proposed manufactured home / RV community:

- Is in clear violation of the vision for the property adopted by the city and presented to the public as a condition for annexing Bullfrog Flats into the city. It's not in character with the City of Cle Elum and does not comply with fundamental requirements of the city's comprehensive plan, the development agreement, or zoning for the property.

- Instead of traditional neighborhoods that were planned to be connected to and a natural extension of the city, supporting the rest of the city, 47 Degrees North would create a private for-profit community and tourist resort with gates, private roads and utilities which will be separated from the rest of the city. It will create a private city within a city, forever.

- Fiscal studies of 47 Degrees North show that it will not create sufficient tax revenue to cover the city's cost to serve it. Unless the developer agrees to financially cover the substantial deficits, forever, existing city taxpayers will be required to subsidize Sun's development and taxes will go up.

- Sun's 47 Degrees North will be in its entirety a private business not a natural neighborhood (no lots sold, all spots leased), wholly owned by a massive out-of-state publicly traded corporation whose fiduciary duty is to its shareholders, not city taxpayers. Unless the developer agrees to financially cover the substantial deficits, forever, existing city taxpayers will be required to subsidize Sun's development and taxes will go up.

- Sun's 47 Degrees North will be in its entirety a private business not a natural neighborhood (no lots sold, all spots leased), wholly owned by a massive out-of-state publicly traded corporation whose fiduciary duty is to its shareholders, not city taxpayers. Any subsidies of the project would be a gift of public funds to a private entity.

- Is not housing as contemplated for the Bullfrog UGA. It will displace half of the actual housing planned for the area and replace it with a private park designed as a transient playground.

- Will be the largest manufactured home/RV park on the West Coast and will double the population of Cle Elum. Parks of this magnitude have no place in a town as small as Cle Elum. Wrong Place, Wrong Size.

- Sun has eliminated the industrial park component of the approved plan and is proposing a major new retail center to the project which would compete with existing city businesses and will seriously damage Cle Elum's downtown, which the city has invested millions of dollars to reinvigorate. The retail center is in direct conflict with the city's comprehensive plan which states that the Bullfrog Flats Master Plan…."is intended to elevate the DTC (downtown core) as the primary retail and activity nexus for Cle Elum". Current rules for the Bullfrog Flats property prohibit a retail center on the property.

- Provides no significant benefits to city or UKC residents, but creates serious and significant impacts on roads, police, fire, schools, emergency services, hospitals and other public services that can't be (or won't be) fully mitigated by the developer.

- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for. Any such increase in taxes will effectively translate to a subsidy for a private business,

- Denial of 47 Degrees North will not take away or reduce underlying property rights. It will simply require Sun Communities to comply with city's current rules, regulations and comprehensive plan for the property. The original underlying zoning approval and development agreement already allows development of this site, just not as a private resort/manufactured home community/retail center.

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Respectfully,

Elisabeth Ellis

Re: 47 Degrees North Major Amendment proposal

I am writing to inform the city of my very strong opposition to the Sun Communities 47° North proposal for the Bullfrog flats property. The proposed manufactured home / RV community:

- Is in clear violation of the vision for the property adopted by the city and presented to the public as a condition for annexing Bullfrog Flats into the city. It's not in character with the City of Cle Elum and does not comply with fundamental requirements of the city's comprehensive plan, the development agreement, or zoning for the property.

- Instead of traditional neighborhoods that were planned to be connected to and a natural extension of the city, supporting the rest of the city, 47 Degrees North would create a private for-profit community and tourist resort with gates, private roads and utilities which will be separated from the rest of the city. It will create a private city within a city, forever.

- Fiscal studies of 47 Degrees North show that it will not create sufficient tax revenue to cover the city's cost to serve it. Unless the developer agrees to financially cover the substantial deficits, forever, existing city taxpayers will be required to subsidize Sun's development and taxes will go up.

- Sun's 47 Degrees North will be in its entirety a private business not a natural neighborhood (no lots sold, all spots leased), wholly owned by a massive out-of-state publicly traded corporation whose fiduciary duty is to its shareholders, not city taxpayers. Any subsidies of the project would be a gift of public funds to a private entity.

Any subsidies of the project would be a gift of public funds to a private entity.

- Is not housing as contemplated for the Bullfrog UGA. It will displace half of the actual housing planned for the area and replace it with a private park designed as a transient playground.

- Will be the largest manufactured home/RV park on the West Coast and will double the population of Cle Elum. Parks of this magnitude have no place in a town as small as Cle Elum. Wrong Place, Wrong Size.

- Sun has eliminated the industrial park component of the approved plan and is proposing a major new retail center to the project which would compete with existing city businesses and will seriously damage Cle Elum's downtown, which the city has invested millions of dollars to reinvigorate. The retail center is in direct conflict with the city's comprehensive plan which states that the Bullfrog Flats Master Plan…."is intended to elevate the DTC (downtown core) as the primary retail and activity nexus for Cle Elum". Current rules for the Bullfrog Flats property prohibit a retail center on the property.

- Provides no significant benefits to city or UKC residents, but creates serious and significant impacts on roads, police, fire, schools, emergency services, hospitals and other public services that can't be (or won't be) fully mitigated by the developer.

- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for. Any such increase in taxes will effectively translate to a subsidy for a private business,

- Denial of 47 Degrees North will not take away or reduce underlying property rights. It will simply require Sun Communities to comply with city's current rules, regulations and comprehensive plan for the property. The original underlying zoning approval and development agreement already allows development of this site, just not as a private resort/manufactured home community/retail center.

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Respectfully,

Debbie Bosch-Gravel

Re: 47 Degrees North Major Amendment proposal

I am writing to inform the city of my very strong opposition to the Sun Communities 47° North proposal for the Bullfrog flats property. The proposed manufactured home / RV community:

- Is in clear violation of the vision for the property adopted by the city and presented to the public as a condition for annexing Bullfrog Flats into the city. It's not in character with the City of Cle Elum and does not comply with fundamental requirements of the city's comprehensive plan, the development agreement, or zoning for the property.

- Instead of traditional neighborhoods that were planned to be connected to and a natural extension of the city, supporting the rest of the city, 47 Degrees North would create a private for-profit community and tourist resort with gates, private roads and utilities which will be separated from the rest of the city. It will create a private city within a city, forever.

- Fiscal studies of 47 Degrees North show that it will not create sufficient tax revenue to cover the city's cost to serve it. Unless the developer agrees to financially cover the substantial deficits, forever, existing city taxpayers will be required to subsidize Sun's development and taxes will go up.

- Sun's 47 Degrees North will be in its entirety a private business not a natural neighborhood (no lots sold, all spots leased), wholly owned by a massive out-of-state publicly traded corporation whose fiduciary duty is to its shareholders, not city taxpayers. Any subsidies of the project would be a gift of public funds to a private entity.

- Is not housing as contemplated for the Bullfrog UGA. It will displace half of the actual housing planned for the area and replace it with a private park designed as a transient playground.

- Will be the largest manufactured home/RV park on the West Coast and will double the population of Cle Elum. Parks of this magnitude have no place in a town as small as Cle Elum. Wrong Place, Wrong Size.

- Sun has eliminated the industrial park component of the approved plan and is proposing a major new retail center to the project which would compete with existing city businesses and will seriously damage Cle Elum's downtown, which the city has invested millions of dollars to reinvigorate. The retail center is in direct conflict with the city's comprehensive plan which states that the Bullfrog Flats Master Plan…."is intended to elevate the DTC (downtown core) as the primary retail and activity nexus for Cle Elum". Current rules for the Bullfrog Flats property prohibit a retail center on the property.

- Provides no significant benefits to city or UKC residents, but creates serious and significant impacts on roads, police, fire, schools, emergency services, hospitals and other public services that can't be (or won't be) fully mitigated by the developer.

- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for. Any such increase in taxes will effectively translate to a subsidy for a private business,

- Denial of 47 Degrees North will not take away or reduce underlying property rights. It will simply require Sun Communities to comply with city's current rules, regulations and comprehensive plan for the property. The original underlying zoning approval and development agreement already allows development of this site, just not as a private resort/manufactured home community/retail center.

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Respectfully,

Shawn S.

Re: 47 Degrees North Major Amendment proposal

I am writing to inform the city of my very strong opposition to the Sun Communities 47° North proposal for the Bullfrog flats property. The proposed manufactured home / RV community:

- Is in clear violation of the vision for the property adopted by the city and presented to the public as a condition for annexing Bullfrog Flats into the city. It's not in character with the City of Cle Elum and does not comply with fundamental requirements of the city's comprehensive plan, the development agreement, or zoning for the property.

- Instead of traditional neighborhoods that were planned to be connected to and a natural extension of the city, supporting the rest of the city, 47 Degrees North would create a private for-profit community and tourist resort with gates, private roads and utilities which will be separated from the rest of the city. It will create a private city within a city, forever.

- Fiscal studies of 47 Degrees North show that it will not create sufficient tax revenue to cover the city's cost to serve it. Unless the developer agrees to financially cover the substantial deficits, forever, existing city taxpayers will be required to subsidize Sun's development and taxes will go up.

- Sun's 47 Degrees North will be in its entirety a private business not a natural neighborhood (no lots sold, all spots leased), wholly owned by a massive out-of-state publicly traded corporation whose fiduciary duty is to its shareholders, not city taxpayers. Any subsidies of the project would be a gift of public funds to a private entity.

- Is not housing as contemplated for the Bullfrog UGA. It will displace half of the actual housing planned for the area and replace it with a private park designed as a transient playground.

- Will be the largest manufactured home/RV park on the West Coast and will double the population of Cle Elum. Parks of this magnitude have no place in a town as small as Cle Elum. Wrong Place, Wrong Size.

- Sun has eliminated the industrial park component of the approved plan and is proposing a major new retail center to the project which would compete with existing city businesses and will seriously damage Cle Elum's downtown, which the city has invested millions of dollars to reinvigorate. - Will be the largest manufactured home/RV park on the West Coast and will double the population of Cle Elum. Parks of this magnitude have no place in a town as small as Cle Elum. Wrong Place, Wrong Size.

- Sun has eliminated the industrial park component of the approved plan and is proposing a major new retail center to the project which would compete with existing city businesses and will seriously damage Cle Elum's downtown, which the city has invested millions of dollars to reinvigorate. The retail center is in direct conflict with the city's comprehensive plan which states that the Bullfrog Flats Master Plan…."is intended to elevate the DTC (downtown core) as the primary retail and activity nexus for Cle Elum". Current rules for the Bullfrog Flats property prohibit a retail center on the property.

- Provides no significant benefits to city or UKC residents, but creates serious and significant impacts on roads, police, fire, schools, emergency services, hospitals and other public services that can't be (or won't be) fully mitigated by the developer.

- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for. Any such increase in taxes will effectively translate to a subsidy for a private business,

- Denial of 47 Degrees North will not take away or reduce underlying property rights. It will simply require Sun Communities to comply with city's current rules, regulations and comprehensive plan for the property. The original underlying zoning approval and development agreement already allows development of this site, just not as a private resort/manufactured home community/retail center.

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Respectfully,

Re: 47 Degrees North Major Amendment proposal

I am writing to inform the city of my very strong opposition to the Sun Communities 47° North proposal for the Bullfrog flats property. The proposed manufactured home / RV community:

- Is in clear violation of the vision for the property adopted by the city and presented to the public as a condition for annexing Bullfrog Flats into the city. It's not in character with the City of Cle Elum and does not comply with fundamental requirements of the city's comprehensive plan, the development agreement, or zoning for the property.

- Instead of traditional neighborhoods that were planned to be connected to and a natural extension of the city, supporting the rest of the city, 47 Degrees North would create a private for-profit community and tourist resort with gates, private roads and utilities which will be separated from the rest of the city. It will create a private city within a city, forever.

- Fiscal studies of 47 Degrees North show that it will not create sufficient tax revenue to cover the city's cost to serve it. Unless the developer agrees to financially cover the substantial deficits, forever, existing city taxpayers will be required to subsidize Sun's development and taxes will go up.

- Sun's 47 Degrees North will be in its entirety a private business not a natural neighborhood (no lots sold, all spots leased), wholly owned by a massive out-of-state publicly traded corporation whose fiduciary duty is to its shareholders, not city taxpayers. Any subsidies of the project would be a gift of public funds to a private entity.

- Is not housing as contemplated for the Bullfrog UGA. It will displace half of the actual housing planned for the area and replace it with a private park designed as a transient playground.

- Will be the largest manufactured home/RV park on the West Coast and will double the population of Cle Elum. Parks of this magnitude have no place in a town as small as Cle Elum. Wrong Place, Wrong Size.

- Provides no significant benefits to city or UKC residents, but creates serious and significant impacts on roads, police, fire, schools, emergency services, hospitals and other public services that can't be (or won't be) fully mitigated by the developer.

- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for. Any such increase in taxes will effectively translate to a subsidy for a private business,

- Denial of 47 Degrees North will not take away or reduce underlying property rights. It will simply require Sun Communities to comply with city's current rules, regulations and comprehensive plan for the property. The original underlying zoning approval and development agreement already allows development of this site, just not as a private resort/manufactured home community/retail center.

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Respectfully,

Mary Bundrock

Re: 47 Degrees North Major Amendment proposal

I am writing to inform the city of my very strong opposition to the Sun Communities 47° North proposal for the Bullfrog flats property. The proposed manufactured home / RV community:

- Is in clear violation of the vision for the property adopted by the city and presented to the public as a condition for annexing Bullfrog Flats into the city. It's not in character with the City of Cle Elum and does not comply with fundamental requirements of the city's comprehensive plan, the development agreement, or zoning for the property.

- Instead of traditional neighborhoods that were planned to be connected to and a natural extension of the city, supporting the rest of the city, 47 Degrees North would create a private for-profit community and tourist resort with gates, private roads and utilities which will be separated from the rest of the city. It will create a private city within a city, forever.

- Fiscal studies of 47 Degrees North show that it will not create sufficient tax revenue to cover the city's cost to serve it. Unless the developer agrees to financially cover the substantial deficits, forever, existing city taxpayers will be required to subsidize Sun's development and taxes will go up.

- Sun's 47 Degrees North will be in its entirety a private business not a natural neighborhood (no lots sold, all spots leased), wholly owned by a massive out-of-state publicly traded corporation whose fiduciary duty is to its shareholders, not city taxpayers. Any subsidies of the project would be a gift of public funds to a private entity.

- Is not housing as contemplated for the Bullfrog UGA. It will displace half of the actual housing planned for the area and replace it with a private park designed as a transient playground.

- Will be the largest manufactured home/RV park on the West Coast and will double the population of Cle Elum. Parks of this magnitude have no place in a town as small as Cle Elum. Wrong Place, Wrong Size.

- Sun has eliminated the industrial park component of the approved plan and is proposing a major new retail center to the project which would compete with existing city businesses and will seriously damage Cle Elum's downtown, which the city has invested millions of dollars to reinvigorate. The retail center is in direct conflict with the city's comprehensive plan which states that the Bullfrog Flats Master Plan…."is intended to elevate the DTC (downtown core) as the primary retail and activity nexus for Cle Elum". Current rules for the Bullfrog Flats property prohibit a retail center on the property.

- Provides no significant benefits to city or UKC residents, but creates serious and significant impacts on roads, police, fire, schools, emergency services, hospitals and other public services that can't be (or won't be) fully mitigated by the developer.

- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for. Any such increase in taxes will effectively translate to a subsidy for a private business,

- Denial of 47 Degrees North will not take away or reduce underlying property rights. It will simply require Sun Communities to comply with city's current rules, regulations and comprehensive plan for the property. The original underlying zoning approval and development agreement already allows development of this site, just not as a private resort/manufactured home community/retail center.

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Respectfully,

Steven Bird

Re: 47 Degrees North Major Amendment proposal

I am writing to inform the city of my very strong opposition to the Sun Communities 47° North proposal for the Bullfrog flats property. The proposed manufactured home / RV community:

- Is in clear violation of the vision for the property adopted by the city and presented to the public as a condition for annexing Bullfrog Flats into the city. It's not in character with the City of Cle Elum and does not comply with fundamental requirements of the city's comprehensive plan, the development agreement, or zoning for the property.

- Instead of traditional neighborhoods that were planned to be connected to and a natural extension of the city, supporting the rest of the city, 47 Degrees North would create a private for-profit community and tourist resort with gates, private roads and utilities which will be separated from the rest of the city. It will create a private city within a city, forever.

- Fiscal studies of 47 Degrees North show that it will not create sufficient tax revenue to cover the city's cost to serve it. Unless the developer agrees to financially cover the substantial deficits, forever, existing city taxpayers will be required to subsidize Sun's development and taxes will go up.

- Sun's 47 Degrees North will be in its entirety a private business not a natural neighborhood (no lots sold, all spots leased), wholly owned by a massive out-of-state publicly traded corporation whose fiduciary duty is to its shareholders, not city taxpayers. Any subsidies of the project would be a gift of public funds to a private entity.

- Is not housing as contemplated for the Bullfrog UGA. It will displace half of the actual housing planned for the area and replace it with a private park designed as a transient playground.

- Will be the largest manufactured home/RV park on the West Coast and will double the population of Cle Elum. Parks of this magnitude have no place in a town as small as Cle Elum. Wrong Place, Wrong Size.

- Sun has eliminated the industrial park component of the approved plan and is proposing a major new retail center to the project which would compete with existing city businesses and will seriously damage Cle Elum's downtown, which the city has invested millions of dollars to reinvigorate. The retail center is in direct conflict with the city's comprehensive plan which states that the Bullfrog Flats Master Plan…."is intended to elevate the DTC (downtown core) as the primary retail and activity nexus for Cle Elum". Current rules for the Bullfrog Flats property prohibit a retail center on the property.

- Provides no significant benefits to city or UKC residents, but creates serious and significant impacts on roads, police, fire, schools, emergency services, hospitals and other public services that can't be (or won't be) fully mitigated by the developer.

- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for. Any such increase in taxes will effectively translate to a subsidy for a private business,

- Denial of 47 Degrees North will not take away or reduce underlying property rights. It will simply require Sun Communities to comply with city's current rules, regulations and comprehensive plan for the property. The original underlying zoning approval and development agreement already allows development of this site, just not as a private resort/manufactured home community/retail center.

Re: 47 Degrees North Major Amendment Proposal

I am writing to provide the city with my very strong concerns about the Sun Communities 47°N proposal for the Bullfrog Flats property. The proposed manufactured home/RV community:

- Is not in character with the City of Cle Elum or the upper Kittitas Valley (a fundamental requirement of the current zoning for the property),
- Would create a new and separate private tourist resort instead of the natural extension of city neighborhoods originally envisioned by city zoning and current approvals,
- Is in its entirety a private business not a neighborhood (no lots will be created or sold, all spots will be leased, and the project will be private), wholly owned by a large out-of-state publicly traded corporation whose fiduciary duty is to its shareholders,
- Provides no significant benefits to upper valley residents and tax payers,
- Will create serious and significant impacts on roads, police, fire, schools, emergency services, hospitals, and other public services that can't (or won't) be fully mitigated by the developer, and therefore,
- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for, essentially a subsidy for a private business,
- Denial of the Sun Communities proposal would not take away or reduce underlying property rights. The original underlying zoning approval would still allow development of this site, just not as a private resort/manufactured home community.

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Re: 47 Degrees North Major Amendment Proposal

I am writing to provide the city with my very strong concerns about the Sun Communities 47°N proposal for the Bullfrog Flats property. The proposed manufactured home/RV community:

- Is not in character with the City of Cle Elum or the upper Kittitas Valley (a fundamental requirement of the current zoning for the property),
- Would create a new and separate private tourist resort instead of the natural extension of city neighborhoods originally envisioned by city zoning and current approvals,
- Is in its entirety a private business not a neighborhood (no lots will be created or sold, all spots will be leased, and the project will be private), wholly owned by a large out-of-state publicly traded corporation whose fiduciary duty is to its shareholders,
- Provides no significant benefits to upper valley residents and tax payers,
- Will create serious and significant impacts on roads, police, fire, schools, emergency services, hospitals, and other public services that can't (or won't) be fully mitigated by the developer, and therefore,
- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for, essentially a subsidy for a private business,
- Denial of the Sun Communities proposal would not take away or reduce underlying property rights. The original underlying zoning approval would still allow development of this site, just not as a private resort/manufactured home community.

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Re: 47 Degrees North Major Amendment proposal

I am writing to inform the city of my very strong opposition to the Sun Communities 47° North proposal for the Bullfrog flats property. The proposed manufactured home / RV community will result in negative impacts:

- Traffic gridlock with high volume of transient visitors in large recreational vehicles
- Decreased level of service for emergency medical services
- Decreased level of service for police protection
- Decreased level of service for fire protection
- Increased tax burden on existing property owners to pay for aging infrastructure (water, sewer, power, roads)
- Increased 2nd home ownership within a private resort adversely impacting many throughout the community
- Adverse impact to downtown core businesses as resort environment will drive dollars to remain at the resort
- Potential to increase jobs yet does little to offer adequate affordable housing options in relationship to amount of workers necessary to support multiple resorts in the area
- Potential to require additional city resources to manage and address concerns by a high volume of transient visitors
- High volume of short term rentals (STRs) tax revenue by law are applied tourism rather than infrastructure upgrades
- 90% of profits will be, by law, sent out of our community to Wall Street investors

For these reasons, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Respectfully,

Re: 47 Degrees North Major Amendment proposal

I am writing to inform the city of my very strong opposition to the Sun Communities 47° North proposal for the Bullfrog flats property. The proposed manufactured home / RV community will result in negative impacts:

- Traffic gridlock with high volume of transient visitors in large recreational vehicles
- Decreased level of service for emergency medical services
- Decreased level of service for police protection
- Decreased level of service for fire protection
- Increased tax burden on existing property owners to pay for aging infrastructure (water, sewer, power, roads)
- Increased 2nd home ownership within a private resort adversely impacting many throughout the community
- Adverse impact to downtown core businesses as resort environment will drive dollars to remain at the resort
- Potential to increase jobs yet does little to offer adequate affordable housing options in relationship to amount of workers necessary to support multiple resorts in the area
- Potential to require additional city resources to manage and address concerns by a high volume of transient visitors
- High volume of short term rentals (STRs) tax revenue by law are applied tourism rather than infrastructure upgrades
- 90% of profits will be, by law, sent out of our community to Wall Street investors

For these reasons, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Respectfully,

Re: 47 Degrees North Major Amendment Proposal

I am writing to provide the city with my very strong concerns about the Sun Communities 47°N proposal for the Bullfrog Flats property. The proposed manufactured home/RV community:

- Is not in character with the City of Cle Elum or the upper Kittitas Valley (a fundamental requirement of the current zoning for the property),
- Would create a new and separate private tourist resort instead of the natural extension of city neighborhoods originally envisioned by city zoning and current approvals,
- Is in its entirety a private business not a neighborhood (no lots will be created or sold, all spots will be leased, and the project will be private), wholly owned by a large out-of-state publicly traded corporation whose fiduciary duty is to its shareholders,
- Provides no significant benefits to upper valley residents and tax payers,
- Will create serious and significant impacts on roads, police, fire, schools, emergency services, hospitals, and other public services that can't (or won't) be fully mitigated by the developer, and therefore,
- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for, essentially a subsidy for a private business,
- Denial of the Sun Communities proposal would not take away or reduce underlying property rights. The original underlying zoning approval would still allow development of this site, just not as a private resort/manufactured home community.

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

- Will create serious and significant impacts on roads, police, fire, schools, emergency services, hospitals, and other public services that can't (or won't) be fully mitigated by the developer, and therefore,
- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for, essentially a subsidy for a private business,
- Denial of the Sun Communities proposal would not take away or reduce underlying property rights. The original underlying zoning approval would still allow development of this site, just not as a private resort/manufactured home community.

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Re: 47 Degrees North Major Amendment Proposal

I am writing to provide the city with my very strong concerns about the Sun Communities 47°N proposal for the Bullfrog Flats property. The proposed manufactured home/RV community:

- Is not in character with the City of Cle Elum or the upper Kittitas Valley (a fundamental requirement of the current zoning for the property),
- Would create a new and separate private tourist resort instead of the natural extension of city neighborhoods originally envisioned by city zoning and current approvals,
- Is in its entirety a private business not a neighborhood (no lots will be created or sold, all spots will be leased, and the project will be private), wholly owned by a large out-of-state publicly traded corporation whose fiduciary duty is to its shareholders,
- Provides no significant benefits to upper valley residents and tax payers,
- Will create serious and significant impacts on roads, police, fire, schools, emergency services, hospitals, and other public services that can't (or won't) be fully mitigated by the developer, and therefore,
- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for, essentially a subsidy for a private business,
- Denial of the Sun Communities proposal would not take away or reduce underlying property rights. The original underlying zoning approval would still allow development of this site, just not as a private resort/manufactured home community.

I am writing to provide the city with my very strong concerns about the Sun Communities 47°N proposal for the Bullfrog Flats property. The proposed manufactured home/RV community:

- Is not in character with the City of Cle Elum or the upper Kittitas Valley (a fundamental requirement of the current zoning for the property),
- Would create a new and separate private tourist resort instead of the natural extension of city neighborhoods originally envisioned by city zoning and current approvals,
- Is in its entirety a private business not a neighborhood (no lots will be created or sold, all spots will be leased, and the project will be private), wholly owned by a large out-of-state publicly traded corporation whose fiduciary duty is to its shareholders,
- Provides no significant benefits to upper valley residents and tax payers,
- Will create serious and significant impacts on roads, police, fire, schools, emergency services, hospitals, and other public services that can't (or won't) be fully mitigated by the developer, and therefore,
- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for, essentially a subsidy for a private business,
- Denial of the Sun Communities proposal would not take away or reduce underlying property rights. The original underlying zoning approval would still allow development of this site, just not as a private resort/manufactured home community.

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

- Denial of the Sun Communities proposal would not take away or reduce underlying property rights. The original underlying zoning approval would still allow development of this site, just not as a private resort/manufactured home community.

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Re: 47 Degrees North Major Amendment Proposal

I am writing to provide the city with my very strong concerns about the Sun Communities 47°N proposal for the Bullfrog Flats property. The proposed manufactured home/RV community:

- Is not in character with the City of Cle Elum or the upper Kittitas Valley (a fundamental requirement of the current zoning for the property),
- Would create a new and separate private tourist resort instead of the natural extension of city neighborhoods originally envisioned by city zoning and current approvals,
- Is in its entirety a private business not a neighborhood (no lots will be created or sold, all spots will be leased, and the project will be private), wholly owned by a large out-of-state publicly traded corporation whose fiduciary duty is to its shareholders,
- Provides no significant benefits to upper valley residents and tax payers,
- Will create serious and significant impacts on roads, police, fire, schools, emergency services, hospitals, and other public services that can't (or won't) be fully mitigated by the developer, and therefore,
- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for, essentially a subsidy for a private business,
- Denial of the Sun Communities proposal would not take away or reduce underlying property rights. The original underlying zoning approval would still allow development of this site, just not as a private resort/manufactured home community.

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Re: 47 Degrees North Major Amendment proposal

I am writing to inform the city of my very strong opposition to the Sun Communities 47° North proposal for the Bullfrog flats property. The proposed manufactured home / RV community will result in negative impacts:

- Traffic gridlock with high volume of transient visitors in large recreational vehicles
- Decreased level of service for emergency medical services
- Decreased level of service for police protection
- Decreased level of service for fire protection
- Increased tax burden on existing property owners to pay for aging infrastructure (water, sewer, power, roads)
- Increased 2nd home ownership within a private resort adversely impacting many throughout the community
- Adverse impact to downtown core businesses as resort environment will drive dollars to remain at the resort
- Potential to increase jobs yet does little to offer adequate affordable housing options in relationship to amount of workers necessary to support multiple resorts in the area
- Potential to require additional city resources to manage and address concerns by a high volume of transient visitors
- High volume of short term rentals (STRs) tax revenue by law are applied tourism rather than infrastructure upgrades
- 90% of profits will be, by law, sent out of our community to Wall Street investors

For these reasons, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Respectfully,

Signature

I am writing to provide the city with my very strong concerns about the Sun Communities 47°N proposal for the Bullfrog Flats property. The proposed manufactured home/RV community:

- Is not in character with the City of Cle Elum or the upper Kittitas Valley (a fundamental requirement of the current zoning for the property),
- Would create a new and separate private tourist resort instead of the natural extension of city neighborhoods originally envisioned by city zoning and current approvals,
- Is in its entirety a private business not a neighborhood (no lots will be created or sold, all spots will be leased, and the project will be private), wholly owned by a large out-of-state publicly traded corporation whose fiduciary duty is to its shareholders,
- Provides no significant benefits to upper valley residents and tax payers,
- Will create serious and significant impacts on roads, police, fire, schools, emergency services, hospitals, and other public services that can't (or won't) be fully mitigated by the developer, and therefore,
- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for, essentially a subsidy for a private business,
- Denial of the Sun Communities proposal would not take away or reduce underlying property rights. The original underlying zoning approval would still allow development of this site, just not as a private resort/manufactured home community.

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

RE: 47 Degrees North Major Amendment Proposal

The purpose of my letter today is to comment on the 47 Degrees North development agreement that is currently in the planning approval process.

I am not a resident of the City of Cle Elum proper. However, I, and my family "live" in Cle Elum, Washington. We are a 4-generation family who treasure our hometown and want only what's best for the city and its citizens –those of us in the surrounding areas are citizens of Cle Elum by the fact that Cle Elum is the city we have chosen to call home. The decision(s) you make regarding this development, and others that are in the works, affects all who call this area home.

You have received a great deal of input regarding this development. My concerns echo those comments you have already heard many, many times. I am opposed to the revised plans of this development and request you consider the impact of these revised plans to the Whole of the Upper County – the impact it will have on both the short term and the future well-being of our community. The path that is chosen now is irreversible.

While administratively there are commitments in place for this development; it is my understanding the revision submitted does not contain prior commitments the City is legally required to honor.

Thank you for considering my thoughts. As the elected representatives who make decisions for its citizens, careful consideration is paramount at this time.

Respectfully submitted,

Rebecca Montgomery

Re: 47 Degrees North Major Amendment proposal

I am writing to inform the city of my very strong opposition to the Sun Communities 47° North proposal for the Bullfrog flats property. The proposed manufactured home / RV community will result in negative impacts:

- Traffic gridlock with high volume of transient visitors in large recreational vehicles
- Decreased level of service for emergency medical services
- Decreased level of service for police protection
- Decreased level of service for fire protection
- Increased tax burden on existing property owners to pay for aging infrastructure (water, sewer, power, roads)
- Increased 2nd home ownership within a private resort adversely impacting many throughout the community
- Adverse impact to downtown core businesses as resort environment will drive dollars to remain at the resort
- Potential to increase jobs yet does little to offer adequate affordable housing options in relationship to amount of workers necessary to support multiple resorts in the area
- Potential to require additional city resources to manage and address concerns by a high volume of transient visitors
- High volume of short term rentals (STRs) tax revenue by law are applied tourism rather than infrastructure upgrades
- 90% of profits will be, by law, sent out of our community to Wall Street investors

For these reasons, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Respectfully,

Signature

Re: 47 Degrees North Major Amendment Proposal

I am writing to provide the city with my very strong concerns about the Sun Communities 47°N proposal for the Bullfrog Flats property. The proposed manufactured home/RV community:

- Is not in character with the City of Cle Elum or the upper Kittitas Valley (a fundamental requirement of the current zoning for the property),
- Would create a new and separate private tourist resort instead of the natural extension of city neighborhoods originally envisioned by city zoning and current approvals,
- Is in its entirety a private business not a neighborhood (no lots will be created or sold, all spots will be leased, and the project will be private), wholly owned by a large out-of-state publicly traded corporation whose fiduciary duty is to its shareholders,
- Provides no significant benefits to upper valley residents and tax payers,
- Will create serious and significant impacts on roads, police, fire, schools, emergency services, hospitals, and other public services that can't (or won't) be fully mitigated by the developer, and therefore,
- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for, essentially a subsidy for a private business,
- Denial of the Sun Communities proposal would not take away or reduce underlying property rights. The original underlying zoning approval would still allow development of this site, just not as a private resort/manufactured home community.

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Re: 47 Degrees North Major Amendment proposal

I am writing to inform the city of my very strong opposition to the Sun Communities 47° North proposal for the Bullfrog flats property. The proposed manufactured home / RV community will result in negative impacts:

- Traffic gridlock with high volume of transient visitors in large recreational vehicles
- Decreased level of service for emergency medical services
- Decreased level of service for police protection
- Decreased level of service for fire protection
- Increased tax burden on existing property owners to pay for aging infrastructure (water, sewer, power, roads)
- Increased 2nd home ownership within a private resort adversely impacting many throughout the community
- Adverse impact to downtown core businesses as resort environment will drive dollars to remain at the resort
- Potential to increase jobs yet does little to offer adequate affordable housing options in relationship to amount of workers necessary to support multiple resorts in the area
- Potential to require additional city resources to manage and address concerns by a high volume of transient visitors
- High volume of short term rentals (STRs) tax revenue by law are applied tourism rather than infrastructure upgrades
- 90% of profits will be, by law, sent out of our community to Wall Street investors

For these reasons, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Respectfully,

Sandy Furnite

Re: 47 Degrees North Major Amendment Proposal

I am writing to provide the city with my very strong concerns about the Sun Communities 47°N proposal for the Bullfrog Flats property. The proposed manufactured home/RV community:

- Is not in character with the City of Cle Elum or the upper Kittitas Valley (a fundamental requirement of the current zoning for the property),
- Would create a new and separate private tourist resort instead of the natural extension of city neighborhoods originally envisioned by city zoning and current approvals,
- Is in its entirety a private business not a neighborhood (no lots will be created or sold, all spots will be leased, and the project will be private), wholly owned by a large out-of-state publicly traded corporation whose fiduciary duty is to its shareholders,
- Provides no significant benefits to upper valley residents and tax payers,
- Will create serious and significant impacts on roads, police, fire, schools, emergency services, hospitals, and other public services that can't (or won't) be fully mitigated by the developer, and therefore,
- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for, essentially a subsidy for a private business,
- Denial of the Sun Communities proposal would not take away or reduce underlying property rights. The original underlying zoning approval would still allow development of this site, just not as a private resort/manufactured home community.

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for, essentially a subsidy for a private business,
- Denial of the Sun Communities proposal would not take away or reduce underlying property rights. The original underlying zoning approval would still allow development of this site, just not as a private resort/manufactured home community.

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Re: 47 Degrees North Major Amendment Proposal

I am writing to provide the city with my very strong concerns about the Sun Communities 47°N proposal for the Bullfrog Flats property. The proposed manufactured home/RV community:

- Is not in character with the City of Cle Elum or the upper Kittitas Valley (a fundamental requirement of the current zoning for the property),
- Would create a new and separate private tourist resort instead of the natural extension of city neighborhoods originally envisioned by city zoning and current approvals,
- Is in its entirety a private business not a neighborhood (no lots will be created or sold, all spots will be leased, and the project will be private), wholly owned by a large out-of-state publicly traded corporation whose fiduciary duty is to its shareholders,
- Provides no significant benefits to upper valley residents and tax payers,
- Will create serious and significant impacts on roads, police, fire, schools, emergency services, hospitals, and other public services that can't (or won't) be fully mitigated by the developer, and therefore,
- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for, essentially a subsidy for a private business,
- Denial of the Sun Communities proposal would not take away or reduce underlying property rights. The original underlying zoning approval would still allow development of this site, just not as a private resort/manufactured home community.

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.
