To the City of Cle Elum: Mayor, City Council Members, Planning Department

Re: 47 Degrees North Major Amendment Proposal

I am writing to provide the city with my very strong concerns about the Sun Communities 47°N proposal for the Bullfrog Flats property. The proposed manufactured home/RV community:

- Is not in character with the City of Cle Elum or the upper Kittitas Valley (a fundamental requirement of the current zoning for the property),
- Would create a new and separate private tourist resort instead of the natural extension of city neighborhoods originally envisioned by city zoning and current approvals,
- Is in its entirety a private business not a neighborhood (no lots will be created or sold, all spots will be leased, and the project will be private), wholly owned by a large out-of-state publicly traded corporation whose fiduciary duty is to its shareholders,
- Provides no significant benefits to upper valley residents and tax payers,
- Will create serious and significant impacts on roads, police, fire, schools, emergency services, hospitals, and other public services that can't (or won't) be fully mitigated by the developer, and therefore,
- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for, essentially a subsidy for a private business,
- Denial of the Sun Communities proposal would not take away or reduce underlying property rights. The original underlying zoning approval would still allow development of this site, just not as a private resort/manufactured home community.

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Re: 47 Degrees North Major Amendment Proposal

I am writing to provide the city with my very strong concerns about the Sun Communities 47°N proposal for the Bullfrog Flats property. The proposed manufactured home/RV community:

- Is not in character with the City of Cle Elum or the upper Kittitas Valley (a fundamental requirement of the current zoning for the property),
- Would create a new and separate private tourist resort instead of the natural extension of city neighborhoods originally envisioned by city zoning and current approvals,
- Is in its entirety a private business not a neighborhood (no lots will be created or sold, all spots will be leased, and the project will be private), wholly owned by a large out-of-state publicly traded corporation whose fiduciary duty is to its shareholders,
- Provides no significant benefits to upper valley residents and tax payers,
- Will create serious and significant impacts on roads, police, fire, schools, emergency services, hospitals, and other public services that can't (or won't) be fully mitigated by the developer, and therefore,
- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for, essentially a subsidy for a private business,
- Denial of the Sun Communities proposal would not take away or reduce underlying property rights. The original underlying zoning approval would still allow development of this site, just not as a private resort/manufactured home community.

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Re: 47 Degrees North Major Amendment proposal

I am writing to inform the city of my very strong opposition to the Sun Communities 47° North proposal for the Bullfrog flats property. The proposed manufactured home / RV community will result in negative impacts:

- Traffic gridlock with high volume of transient visitors in large recreational vehicles
- Decreased level of service for emergency medical services
- Decreased level of service for police protection
- Decreased level of service for fire protection
- Increased tax burden on existing property owners to pay for aging infrastructure (water, sewer, power, roads)
- Increased 2nd home ownership within a private resort adversely impacting many throughout the community
- Adverse impact to downtown core businesses as resort environment will drive dollars to remain at the resort
- Potential to increase jobs yet does little to offer adequate affordable housing options in relationship to amount of workers necessary to support multiple resorts in the area
- Potential to require additional city resources to manage and address concerns by a high volume of transient visitors
- High volume of short term rentals (STRs) tax revenue by law are applied tourism rather than infrastructure upgrades
- 90% of profits will be, by law, sent out of our community to Wall Street investors

For these reasons, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Respectfully,

Signature

Re: 47 Degrees North Major Amendment Proposal

I am writing to provide the city with my very strong concerns about the Sun Communities 47°N proposal for the Bullfrog Flats property. The proposed manufactured home/RV community:

- Is not in character with the City of Cle Elum or the upper Kittitas Valley (a fundamental requirement of the current zoning for the property),
- Would create a new and separate private tourist resort instead of the natural extension of city neighborhoods originally envisioned by city zoning and current approvals,
- Is in its entirety a private business not a neighborhood (no lots will be created or sold, all spots will be leased, and the project will be private), wholly owned by a large out-of-state publicly traded corporation whose fiduciary duty is to its shareholders,
- Provides no significant benefits to upper valley residents and tax payers,
- Will create serious and significant impacts on roads, police, fire, schools, emergency services, hospitals, and other public services that can't (or won't) be fully mitigated by the developer, and therefore,
- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for, essentially a subsidy for a private business,
- Denial of the Sun Communities proposal would not take away or reduce underlying property rights. The original underlying zoning approval would still allow development of this site, just not as a private resort/manufactured home community.

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Re: 47 Degrees North Major Amendment proposal

I am writing to inform the city of my very strong opposition to the Sun Communities 47° North proposal for the Bullfrog flats property. The proposed manufactured home / RV community:

- Is in clear violation of the vision for the property adopted by the city and presented to the public as a condition for annexing Bullfrog Flats into the city. It's not in character with the City of Cle Elum and does not comply with fundamental requirements of the city's comprehensive plan, the development agreement, or zoning for the property.
- Instead of traditional neighborhoods that were planned to be connected to and a natural extension of the city, supporting the rest of the city, 47 Degrees North would create a private for-profit community and tourist resort with gates, private roads and utilities which will be separated from the rest of the city. It will create a private city within a city, forever.
- Fiscal studies of 47 Degrees North show that it will not create sufficient tax revenue to cover the city's cost to serve it. Unless the developer agrees to financially cover the substantial deficits, forever, existing city taxpayers will be required to subsidize Sun's development and taxes will go up.
- Sun's 47 Degrees North will be in its entirety a private business not a natural neighborhood (no lots sold, all spots leased), wholly owned by a massive out-of-state publicly traded corporation who's fiduciary duty is to its shareholders, not city taxpayers. Any subsidies of the project would be a gift of public funds to a private entity.
- Is not housing as contemplated for the Bullfrog UGA. It will displace half of the actual housing planned for the area and replace it with a private park designed as a transient playground.
- Will be the largest manufactured home/RV park on the West Coast and will double the population of Cle Elum. Parks of this magnitude have no place in a town as small as Cle Elum. Wrong Place Wrong Size.
- Sun has eliminated the industrial park component of the approved plan and is proposing a major new retail center to the project which would compete with existing city businesses and will seriously damage Cle Elum's downtown, which the city has invested millions of dollars to reinvigorate. The retail center is in direct conflict with the city's comprehensive plan which states that the Bullfrog Flats Master Plan...."is intended to elevate the DTC (downtown core) as the primary retail and activity nexus for Cle Elum". Current rules for the Bullfrog Flats property prohibit a retail center on the property.
- Provides no significant benefits to city or UKC residents, but creates serious and significant impacts on roads, police, fire, schools, emergency services, hospitals and other public services that can't be (or won't be) fully mitigated by the developer, and,
- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for. Any such increase in taxes will effectively translate to a subsidy for a private business,
- Denial of 47 Degrees North will not take away or reduce underlying property rights. It will simply require Sun Communities to comply with city's current rules, regulations and comprehensive plan for the property. The original underlying zoning approval and development agreement already allows development of this site, just not as a private resort/manufactured home community/retail center.

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Respectfully,

The retail center is in direct conflict with the city's comprehensive plan which states that the Bullfrog Flats Master Plan...."is intended to elevate the DTC (downtown core) as the primary retail and activity nexus for Cle Elum". Current rules for the Bullfrog Flats property prohibit a retail center on the property.
- Provides no significant benefits to city or UKC residents, but creates serious and significant impacts on roads, police, fire, schools, emergency services, hospitals and other public services that can't be (or won't be) fully mitigated by the developer, and,
- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for. Any such increase in taxes will effectively translate to a subsidy for a private business,
- Denial of 47 Degrees North will not take away or reduce underlying property rights. It will simply require Sun Communities to comply with city's current rules, regulations and comprehensive plan for the property. The original underlying zoning approval and development agreement already allows development of this site, just not as a private resort/manufactured home community/retail center.

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Respectfully,

Re: 47 Degrees North Major Amendment proposal

I am writing to inform the city of my very strong opposition to the Sun Communities 47° North proposal for the Bullfrog flats property. The proposed manufactured home / RV community:

- Is in clear violation of the vision for the property adopted by the city and presented to the public as a condition for annexing Bullfrog Flats into the city. It's not in character with the City of Cle Elum and does not comply with fundamental requirements *of the city's comprehensive plan, the development agreement, or zoning for the property.*
- Instead of traditional neighborhoods that were planned to be connected to and a natural extension of the city, supporting the *rest of the city, 47 Degrees North would create a private for-profit community and tourist resort with gates, private roads and* utilities which will be separated from the rest of the city. It will create a private city within a city, <u>forever</u>.
- Fiscal studies of 47 Degrees North show that it will not create sufficient tax revenue to cover the city's cost to serve it. Unless the developer agrees to financially cover the substantial deficits, <u>forever</u>, existing city taxpayers will be required to subsidize Sun's development and taxes will go up.
- Sun's 47 Degrees North will be in its entirety a private business not a natural neighborhood (no lots sold, all spots leased), wholly owned by a massive out-of-state publicly traded corporation who's fiduciary duty is to its shareholders, not city taxpayers. Any subsidies of the project would be a gift of public funds to a private entity.
- Is not housing as contemplated for the Bullfrog UGA. It will displace half of the actual housing planned for the area and replace it with a private park designed as a transient playground.
- Will be the largest manufactured home/RV park on the West Coast and will double the population of Cle Elum. Parks of this magnitude have no place in a town as small as Cle Elum. Wrong Place Wrong Size.
- Sun has eliminated the industrial park component of the approved plan and is proposing a major new retail center to the project which would compete with existing city businesses and will seriously damage Cle Elum's downtown, which the city has *invested millions of dollars to reinvigorate. The retail center is in direct conflict with the city's comprehensive plan which states* that the Bullfrog Flats Master Plan...."is intended to elevate the DTC (downtown core) as the primary retail and activity nexus for Cle Elum". Current rules for the Bullfrog Flats property prohibit a retail center on the property.
- Provides no significant benefits to city or UKC residents, but creates serious and significant impacts on roads, police, fire, schools, emergency services, hospitals and other public services that can't be (or won't be) fully mitigated by the developer, and,

- Will be the largest manufactured home/RV park on the West Coast and will double the population of Cle Elum. Parks of this magnitude have no place in a town as small as Cle Elum. Wrong Place Wrong Size.

- Sun has eliminated the industrial park component of the approved plan and is proposing a major new retail center to the project which would compete with existing city businesses and will seriously damage Cle Elum's downtown, which the city has *invested millions of dollars to reinvigorate. The retail center is in direct conflict with the city's comprehensive plan which states* that the Bullfrog Flats Master Plan...."is intended to elevate the DTC (downtown core) as the primary retail and activity nexus for Cle Elum". Current rules for the Bullfrog Flats property prohibit a retail center on the property.

- Provides no significant benefits to city or UKC residents, but creates serious and significant impacts on roads, police, fire, schools, emergency services, hospitals and other public services that can't be (or won't be) fully mitigated by the developer, and,

- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for. Any such increase in taxes will effectively translate to a subsidy for a private business,

- <u>Denial</u> of 47 Degrees North will not take away or reduce underlying property rights. It will simply require Sun Communities to comply with city's current rules, regulations and comprehensive plan for the property. The original underlying zoning approval and development agreement already allows development of this site, just not as a private resort/manufactured home community/retail center.

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Respectfully,

Signature

Re: 47 Degrees North Major Amendment proposal

I am writing to inform the city of my very strong opposition to the Sun Communities 47° North proposal for the Bullfrog flats property. The proposed manufactured home / RV community:

- Is in clear violation of the vision for the property adopted by the city and presented to the public as a condition for annexing Bullfrog Flats into the city. It's not in character with the City of Cle Elum and does not comply with fundamental requirements of the city's comprehensive plan, the development agreement, or zoning for the property.
- Instead of traditional neighborhoods that were planned to be connected to and a natural extension of the city, supporting the *rest of the city, 47 Degrees North would create a private for-profit community and tourist resort with gates, private roads and* utilities which will be separated from the rest of the city. It will create a private city within a city, <u>forever</u>.
- Fiscal studies of 47 Degrees North show that it will not create sufficient tax revenue to cover the city's cost to serve it. Unless the developer agrees to financially cover the substantial deficits, <u>forever</u>, existing city taxpayers will be required to subsidize Sun's development and taxes will go up.
- Sun's 47 Degrees North will be in its entirety a private business not a natural neighborhood (no lots sold, all spots leased), wholly owned by a massive out-of-state publicly traded corporation who's fiduciary duty is to its shareholders, not city taxpayers. Any subsidies of the project would be a gift of public funds to a private entity.
- Is not housing as contemplated for the Bullfrog UGA. It will displace half of the actual housing planned for the area and replace it with a private park designed as a transient playground.
- Will be the largest manufactured home/RV park on the West Coast and will double the population of Cle Elum. Parks of this magnitude have no place in a town as small as Cle Elum. Wrong Place Wrong Size.

- Is not housing as contemplated for the Bullfrog UGA. It will displace half of the actual housing planned for the area and replace it with a private park designed as a transient playground.
- Will be the largest manufactured home/RV park on the West Coast and will double the population of Cle Elum. Parks of this magnitude have no place in a town as small as Cle Elum. Wrong Place Wrong Size.
- Sun has eliminated the industrial park component of the approved plan and is proposing a major new retail center to the project which would compete with existing city businesses and will seriously damage Cle Elum's downtown, which the city has invested millions of dollars to reinvigorate. The retail center is in direct conflict with the city's comprehensive plan which states that the Bullfrog Flats Master Plan...."is intended to elevate the DTC (downtown core) as the primary retail and activity nexus for Cle Elum". Current rules for the Bullfrog Flats property prohibit a retail center on the property.
- Provides no significant benefits to city or UKC residents, but creates serious and significant impacts on roads, police, fire, schools, emergency services, hospitals and other public services that can't be (or won't be) fully mitigated by the developer, and,
- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for. Any such increase in taxes will effectively translate to a subsidy for a private business,
- Denial of 47 Degrees North will not take away or reduce underlying property rights. It will simply require Sun Communities to comply with city's current rules, regulations and comprehensive plan for the property. The original underlying zoning approval and development agreement already allows development of this site, just not as a private resort/manufactured home community/retail center.

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Respectfully,

Re: 47 Degrees North Major Amendment proposal

I am writing to inform the city of my very strong opposition to the Sun Communities 47° North proposal for the Bullfrog flats property. The proposed manufactured home / RV community:

- Is in clear violation of the vision for the property adopted by the city and presented to the public as a condition for annexing Bullfrog Flats into the city. It's not in character with the City of Cle Elum and does not comply with fundamental requirements of the city's comprehensive plan, the development agreement, or zoning for the property.
- Instead of traditional neighborhoods that were planned to be connected to and a natural extension of the city, supporting the *rest of the city, 47 Degrees North would create a private for-profit community and tourist resort with gates, private roads and* utilities which will be separated from the rest of the city. It will create a private city within a city, forever.
- Fiscal studies of 47 Degrees North show that it will not create sufficient tax revenue to cover the city's cost to serve it. Unless the developer agrees to financially cover the substantial deficits, forever, existing city taxpayers will be required to subsidize Sun's development and taxes will go up.
- Sun's 47 Degrees North will be in its entirety a private business not a natural neighborhood (no lots sold, all spots leased), wholly owned by a massive out-of-state publicly traded corporation who's fiduciary duty is to its shareholders, not city taxpayers. Any subsidies of the project would be a gift of public funds to a private entity.
- Is not housing as contemplated for the Bullfrog UGA. It will displace half of the actual housing planned for the area and replace it with a private park designed as a transient playground.

Re: 47 Degrees North Major Amendment proposal

I am writing to inform the city of my very strong opposition to the Sun Communities 47° North proposal for the Bullfrog flats property. The proposed manufactured home / RV community:

- Is in clear violation of the vision for the property adopted by the city and presented to the public as a condition for annexing Bullfrog Flats into the city. It's not in character with the City of Cle Elum and does not comply with fundamental requirements of the city's comprehensive plan, the development agreement, or zoning for the property.

- Instead of traditional neighborhoods that were planned to be connected to and a natural extension of the city, supporting the rest of the city, 47 Degrees North would create a private for-profit community and tourist resort with gates, private roads and utilities which will be separated from the rest of the city. It will create a private city within a city, forever.

- Fiscal studies of 47 Degrees North show that it will not create sufficient tax revenue to cover the city's cost to serve it. Unless the developer agrees to financially cover the substantial deficits, forever, existing city taxpayers will be required to subsidize Sun's development and taxes will go up.

- Sun's 47 Degrees North will be in its entirety a private business not a natural neighborhood (no lots sold, all spots leased), wholly owned by a massive out-of-state publicly traded corporation whose fiduciary duty is to its shareholders, not city taxpayers. Any subsidies of the project would be a gift of public funds to a private entity.

- Is not housing as contemplated for the Bullfrog UGA. It will displace half of the actual housing planned for the area and replace it with a private park designed as a transient playground.

- Will be the largest manufactured home/RV park on the West Coast and will double the population of Cle Elum. Parks of this magnitude have no place in a town as small as Cle Elum. Wrong Place, Wrong Size.

- Sun has eliminated the industrial park component of the approved plan and is proposing a major new retail center to the project which would compete with existing city businesses and will seriously damage Cle Elum's downtown, which the city has invested millions of dollars to reinvigorate. The retail center is in direct conflict with the city's comprehensive plan which states that the Bullfrog Flats Master Plan…."is intended to elevate the DTC (downtown core) as the primary retail and activity nexus for Cle Elum". Current rules for the Bullfrog Flats property prohibit a retail center on the property.

- Provides no significant benefits to city or UKC residents, but creates serious and significant impacts on roads, police, fire, schools, emergency services, hospitals and other public services that can't be (or won't be) fully mitigated by the developer.

- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for. Any such increase in taxes will effectively translate to a subsidy for a private business,

- Denial of 47 Degrees North will not take away or reduce underlying property rights. It will simply require Sun Communities to comply with city's current rules, regulations and comprehensive plan for the property. The original underlying zoning approval and development agreement already allows development of this site, just not as a private resort/manufactured home community/retail center.

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Respectfully,

Re: 47 Degrees North Major Amendment proposal

I am writing to inform the city of my very strong opposition to the Sun Communities 47° North proposal for the Bullfrog flats property. The proposed manufactured home / RV community:

- Is in clear violation of the vision for the property adopted by the city and presented to the public as a condition for annexing Bullfrog Flats into the city. It's not in character with the City of Cle Elum and does not comply with fundamental requirements of the city's comprehensive plan, the development agreement, or zoning for the property.

- Instead of traditional neighborhoods that were planned to be connected to and a natural extension of the city, supporting the rest of the city, 47 Degrees North would create a private for-profit community and tourist resort with gates, private roads and utilities which will be separated from the rest of the city. It will create a private city within a city, forever.

- Fiscal studies of 47 Degrees North show that it will not create sufficient tax revenue to cover the city's cost to serve it. Unless the developer agrees to financially cover the substantial deficits, forever, existing city taxpayers will be required to subsidize Sun's development and taxes will go up.

- Sun's 47 Degrees North will be in its entirety a private business not a natural neighborhood (no lots sold, all spots leased), wholly owned by a massive out-of-state publicly traded corporation whose fiduciary duty is to its shareholders, not city taxpayers. Any subsidies of the project would be a gift of public funds to a private entity.

- Is not housing as contemplated for the Bullfrog UGA. It will displace half of the actual housing planned for the area and replace it with a private park designed as a transient playground.

- Will be the largest manufactured home/RV park on the West Coast and will double the population of Cle Elum. Parks of this magnitude have no place in a town as small as Cle Elum. Wrong Place, Wrong Size.

ADDITIONAL COMMENTS:

THIS IS COMPLETE INSANITY. DO YOU NOT SEE THE BOMPER TO BOMPER TRAFFIC EVERY WEEKEND? SAFETY SHOULD BE FIRST. OUR HOSPITAL CANT HANDLE IT OUR FIRESTATIONS CANT HANDLE IT, OUR POLICE CANT HANDLE IT, OUR ROADS DEFINATLY CANT HANDLE IT.
I CANT GET HOME ON THE WEEKEND, 8 HOURS IT TOOK A FEW WEEKS AGO TO GET FROM THORP TO NELSON SIDING. IF ONE OF MY PARENTS OR ANYONE THAT I KNOW CANT MAKE IT TO THE HOSPITAL ON TIME IT WILL BE ON YOU.
INFRASTRUCTURE SHOULD ALWAYS BE FIRST PRIORITY.
THIS IS A TERRIBLE IDEA FOR ALL OF US.

Re: 47 Degrees North Major Amendment proposal

I am writing to inform the city of my very strong opposition to the Sun Communities 47° North proposal for the Bullfrog flats property. The proposed manufactured home / RV community:

- Is in clear violation of the vision for the property adopted by the city and presented to the public as a condition for annexing Bullfrog Flats into the city. It's not in character with the City of Cle Elum and does not comply with fundamental requirements of the city's comprehensive plan, the development agreement, or zoning for the property.

- Instead of traditional neighborhoods that were planned to be connected to and a natural extension of the city, supporting the rest of the city, 47 Degrees North would create a private for-profit community and tourist resort with gates, private roads and utilities which will be separated from the rest of the city. It will create a private city within a city, forever.

- Fiscal studies of 47 Degrees North show that it will not create sufficient tax revenue to cover the city's cost to serve it. Unless the developer agrees to financially cover the substantial deficits, forever, existing city taxpayers will be required to subsidize Sun's development and taxes will go up.

- Sun's 47 Degrees North will be in its entirety a private business not a natural neighborhood (no lots sold, all spots leased), wholly owned by a massive out-of-state publicly traded corporation whose fiduciary duty is to its shareholders, not city taxpayers. Any subsidies of the project would be a gift of public funds to a private entity.

- Is not housing as contemplated for the Bullfrog UGA. It will displace half of the actual housing planned for the area and replace it with a private park designed as a transient playground.

- Will be the largest manufactured home/RV park on the West Coast and will double the population of Cle Elum. Parks of this magnitude have no place in a town as small as Cle Elum. Wrong Place, Wrong Size.

- Sun has eliminated the industrial park component of the approved plan and is proposing a major new retail center to the project which would compete with existing city businesses and will seriously damage Cle Elum's downtown, which the city has invested millions of dollars to reinvigorate. The retail center is in direct conflict with the city's comprehensive plan which states that the Bullfrog Flats Master Plan…."is intended to elevate the DTC (downtown core) as the primary retail and activity nexus for Cle Elum". Current rules for the Bullfrog Flats property prohibit a retail center on the property.

- Provides no significant benefits to city or UKC residents, but creates serious and significant impacts on roads, police, fire, schools, emergency services, hospitals and other public services that can't be (or won't be) fully mitigated by the developer.

- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for. Any such increase in taxes will effectively translate to a subsidy for a private business,

- Denial of 47 Degrees North will not take away or reduce underlying property rights. It will simply require Sun Communities to comply with city's current rules, regulations and comprehensive plan for the property. The original underlying zoning approval and development agreement already allows development of this site, just not as a private resort/manufactured home community/retail center.

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Respectfully,

- Is in clear violation of the vision for the property adopted by the city and presented to the public as a condition for annexing Bullfrog Flats into the city. It's not in character with the City of Cle Elum and does not comply with fundamental requirements of the city's comprehensive plan, the development agreement, or zoning for the property.

- Instead of traditional neighborhoods that were planned to be connected to and a natural extension of the city, supporting the rest of the city, 47 Degrees North would create a private for-profit community and tourist resort with gates, private roads and utilities which will be separated from the rest of the city. It will create a private city within a city, forever.

- Fiscal studies of 47 Degrees North show that it will not create sufficient tax revenue to cover the city's cost to serve it. Unless the developer agrees to financially cover the substantial deficits, forever, existing city taxpayers will be required to subsidize Sun's development and taxes will go up.

- Sun's 47 Degrees North will be in its entirety a private business not a natural neighborhood (no lots sold, all spots leased), wholly owned by a massive out-of-state publicly traded corporation whose fiduciary duty is to its shareholders, not city taxpayers. Any subsidies of the project would be a gift of public funds to a private entity.

- Is not housing as contemplated for the Bullfrog UGA. It will displace half of the actual housing planned for the area and replace it with a private park designed as a transient playground.

- Will be the largest manufactured home/RV park on the West Coast and will double the population of Cle Elum. Parks of this magnitude have no place in a town as small as Cle Elum. Wrong Place, Wrong Size.

- Sun has eliminated the industrial park component of the approved plan and is proposing a major new retail center to the project which would compete with existing city businesses and will seriously damage Cle Elum's downtown, which the city has invested millions of dollars to reinvigorate. The retail center is in direct conflict with the city's comprehensive plan which states that the Bullfrog Flats Master Plan...."is intended to elevate the DTC (downtown core) as the primary retail and activity nexus for Cle Elum". Current rules for the Bullfrog Flats property prohibit a retail center on the property.

- Provides no significant benefits to city or UKC residents, but creates serious and significant impacts on roads, police, fire, schools, emergency services, hospitals and other public services that can't be (or won't be) fully mitigated by the developer.

- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for. Any such increase in taxes will effectively translate to a subsidy for a private business,

- Denial of 47 Degrees North will not take away or reduce underlying property rights. It will simply require Sun Communities to comply with city's current rules, regulations and comprehensive plan for the property. The original underlying zoning approval and development agreement already allows development of this site, just not as a private resort/manufactured home community/retail center.

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Respectfully,

Marilyn Lund

Any subsidies of the project would be a gift of public funds to a private entity.

- Is not housing as contemplated for the Bullfrog UGA. It will displace half of the actual housing planned for the area and replace it with a private park designed as a transient playground.

- Will be the largest manufactured home/RV park on the West Coast and will double the population of Cle Elum. Parks of this magnitude have no place in a town as small as Cle Elum. Wrong Place, Wrong Size.

- Sun has eliminated the industrial park component of the approved plan and is proposing a major new retail center to the project which would compete with existing city businesses and will seriously damage Cle Elum's downtown, which the city has invested millions of dollars to reinvigorate. The retail center is in direct conflict with the city's comprehensive plan which states that the Bullfrog Flats Master Plan…."is intended to elevate the DTC (downtown core) as the primary retail and activity nexus for Cle Elum". Current rules for the Bullfrog Flats property prohibit a retail center on the property.

- Provides no significant benefits to city or UKC residents, but creates serious and significant impacts on roads, police, fire, schools, emergency services, hospitals and other public services that can't be (or won't be) fully mitigated by the developer.

- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for. Any such increase in taxes will effectively translate to a subsidy for a private business,

- Denial of 47 Degrees North will not take away or reduce underlying property rights. It will simply require Sun Communities to comply with city's current rules, regulations and comprehensive plan for the property. The original underlying zoning approval and development agreement already allows development of this site, just not as a private resort/manufactured home community/retail center.

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Respectfully,

Re: 47 Degrees North Major Amendment proposal

I am writing to inform the city of my very strong opposition to the Sun Communities 47° North proposal for the Bullfrog flats property. The proposed manufactured home / RV community:

- Is in clear violation of the vision for the property adopted by the city and presented to the public as a condition for annexing Bullfrog Flats into the city. It's not in character with the City of Cle Elum and does not comply with fundamental requirements of the city's comprehensive plan, the development agreement, or zoning for the property.

- Instead of traditional neighborhoods that were planned to be connected to and a natural extension of the city, supporting the rest of the city, 47 Degrees North would create a private for-profit community and tourist resort with gates, private roads and utilities which will be separated from the rest of the city. It will create a private city within a city, forever.

- Fiscal studies of 47 Degrees North show that it will not create sufficient tax revenue to cover the city's cost to serve it. Unless the developer agrees to financially cover the substantial deficits, forever, existing city taxpayers will be required to subsidize Sun's development and taxes will go up.

- Sun's 47 Degrees North will be in its entirety a private business not a natural neighborhood (no lots sold, all spots leased), wholly owned by a massive out-of-state publicly traded corporation whose fiduciary duty is to its shareholders, not city taxpayers. Any subsidies of the project would be a gift of public funds to a private entity.

- Is not housing as contemplated for the Bullfrog UGA. It will displace half of the actual housing planned for the area and replace it with a private park designed as a transient playground.

- Will be the largest manufactured home/RV park on the West Coast and will double the population of Cle Elum. Parks of this magnitude have no place in a town as small as Cle Elum. Wrong Place, Wrong Size.

- Sun has eliminated the industrial park component of the approved plan and is proposing a major new retail center to the project which would compete with existing city businesses and will seriously damage Cle Elum's downtown, which the city has invested millions of dollars to reinvigorate. The retail center is in direct conflict with the city's comprehensive plan which states that the Bullfrog Flats Master Plan…."is intended to elevate the DTC (downtown core) as the primary retail and activity nexus for Cle Elum". Current rules for the Bullfrog Flats property prohibit a retail center on the property.

- Provides no significant benefits to city or UKC residents, but creates serious and significant impacts on roads, police, fire, schools, emergency services, hospitals and other public services that can't be (or won't be) fully mitigated by the developer.

- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for. Any such increase in taxes will effectively translate to a subsidy for a private business,

- Denial of 47 Degrees North will not take away or reduce underlying property rights. It will simply require Sun Communities to comply with city's current rules, regulations and comprehensive plan for the property. The original underlying zoning approval and development agreement already allows development of this site, just not as a private resort/manufactured home community/retail center.

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Respectfully,

Dora Bannister

Re: 47 Degrees North Major Amendment proposal

I am writing to inform the city of my very strong opposition to the Sun Communities 47° North proposal for the Bullfrog flats property. The proposed manufactured home / RV community:

- Is in clear violation of the vision for the property adopted by the city and presented to the public as a condition for annexing Bullfrog Flats into the city. It's not in character with the City of Cle Elum and does not comply with fundamental requirements of the city's comprehensive plan, the development agreement, or zoning for the property.

- Instead of traditional neighborhoods that were planned to be connected to and a natural extension of the city, supporting the rest of the city, 47 Degrees North would create a private for-profit community and tourist resort with gates, private roads and utilities which will be separated from the rest of the city. It will create a private city within a city, forever.

- Fiscal studies of 47 Degrees North show that it will not create sufficient tax revenue to cover the city's cost to serve it. Unless the developer agrees to financially cover the substantial deficits, forever, existing city taxpayers will be required to subsidize Sun's development and taxes will go up.

- Sun's 47 Degrees North will be in its entirety a private business not a natural neighborhood (no lots sold, all spots leased), wholly owned by a massive out-of-state publicly traded corporation whose fiduciary duty is to its shareholders, not city taxpayers. Any subsidies of the project would be a gift of public funds to a private entity.

- Is not housing as contemplated for the Bullfrog UGA. It will displace half of the actual housing planned for the area and replace it with a private park designed as a transient playground.

- Will be the largest manufactured home/RV park on the West Coast and will double the population of Cle Elum. Parks of this magnitude have no place in a town as small as Cle Elum. Wrong Place, Wrong Size.

It will simply require Sun Communities to comply with city's current rules, regulations and comprehensive plan for the property. The original underlying zoning approval and development agreement already allows development of this site, just not as a private resort/manufactured home community/retail center.

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Respectfully,

Re: 47 Degrees North Major Amendment proposal

I am writing to inform the city of my very strong opposition to the Sun Communities 47° North proposal for the Bullfrog flats property. The proposed manufactured home / RV community:

- Is in clear violation of the vision for the property adopted by the city and presented to the public as a condition for annexing Bullfrog Flats into the city. It's not in character with the City of Cle Elum and does not comply with fundamental requirements of the city's comprehensive plan, the development agreement, or zoning for the property.

- Instead of traditional neighborhoods that were planned to be connected to and a natural extension of the city, supporting the rest of the city, 47 Degrees North would create a private for-profit community and tourist resort with gates, private roads and utilities which will be separated from the rest of the city. It will create a private city within a city, forever.

- Fiscal studies of 47 Degrees North show that it will not create sufficient tax revenue to cover the city's cost to serve it. Unless the developer agrees to financially cover the substantial deficits, forever, existing city taxpayers will be required to subsidize Sun's development and taxes will go up.

- Sun's 47 Degrees North will be in its entirety a private business not a natural neighborhood (no lots sold, all spots leased), wholly owned by a massive out-of-state publicly traded corporation whose fiduciary duty is to its shareholders, not city taxpayers. Any subsidies of the project would be a gift of public funds to a private entity.

- Is not housing as contemplated for the Bullfrog UGA. It will displace half of the actual housing planned for the area and replace it with a private park designed as a transient playground.

- Will be the largest manufactured home/RV park on the West Coast and will double the population of Cle Elum. Parks of this magnitude have no place in a town as small as Cle Elum. Wrong Place, Wrong Size.

- Sun has eliminated the industrial park component of the approved plan and is proposing a major new retail center to the project which would compete with existing city businesses and will seriously damage Cle Elum's downtown, which the city has invested millions of dollars to reinvigorate. The retail center is in direct conflict with the city's comprehensive plan which states that the Bullfrog Flats Master Plan…."is intended to elevate the DTC (downtown core) as the primary retail and activity nexus for Cle Elum". Current rules for the Bullfrog Flats property prohibit a retail center on the property.

- Provides no significant benefits to city or UKC residents, but creates serious and significant impacts on roads, police, fire, schools, emergency services, hospitals and other public services that can't be (or won't be) fully mitigated by the developer.

- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for. Any such increase in taxes will effectively translate to a subsidy for a private business,

- Denial of 47 Degrees North will not take away or reduce underlying property rights. It will simply require Sun Communities to comply with city's current rules, regulations and comprehensive plan for the property. The original underlying zoning approval and development agreement already allows development of this site, just not as a private resort/manufactured home community/retail center.

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Respectfully,

- Sun has eliminated the industrial park component of the approved plan and is proposing a major new retail center to the project which would compete with existing city businesses and will seriously damage Cle Elum's downtown, which the city has invested millions of dollars to reinvigorate. The retail center is in direct conflict with the city's comprehensive plan which states that the Bullfrog Flats Master Plan...."is intended to elevate the DTC (downtown core) as the primary retail and activity nexus for Cle Elum". Current rules for the Bullfrog Flats property prohibit a retail center on the property.

- Provides no significant benefits to city or UKC residents, but creates serious and significant impacts on roads, police, fire, schools, emergency services, hospitals and other public services that can't be (or won't be) fully mitigated by the developer.

- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for. Any such increase in taxes will effectively translate to a subsidy for a private business,

- Denial of 47 Degrees North will not take away or reduce underlying property rights. It will simply require Sun Communities to comply with city's current rules, regulations and comprehensive plan for the property. The original underlying zoning approval and development agreement already allows development of this site, just not as a private resort/manufactured home community/retail center.

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Respectfully,

Re: 47 Degrees North Major Amendment proposal

I am writing to inform the city of my very strong opposition to the Sun Communities 47° North proposal for the Bullfrog flats property. The proposed manufactured home / RV community:

- Is in clear violation of the vision for the property adopted by the city and presented to the public as a condition for annexing Bullfrog Flats into the city. It's not in character with the City of Cle Elum and does not comply with fundamental requirements of the city's comprehensive plan, the development agreement, or zoning for the property.

- Instead of traditional neighborhoods that were planned to be connected to and a natural extension of the city, supporting the rest of the city, 47 Degrees North would create a private for-profit community and tourist resort with gates, private roads and utilities which will be separated from the rest of the city. It will create a private city within a city, forever.

- Fiscal studies of 47 Degrees North show that it will not create sufficient tax revenue to cover the city's cost to serve it. Unless the developer agrees to financially cover the substantial deficits, forever, existing city taxpayers will be required to subsidize Sun's development and taxes will go up.

- Sun's 47 Degrees North will be in its entirety a private business not a natural neighborhood (no lots sold, all spots leased), wholly owned by a massive out-of-state publicly traded corporation whose fiduciary duty is to its shareholders, not city taxpayers. Any subsidies of the project would be a gift of public funds to a private entity.

- Is not housing as contemplated for the Bullfrog UGA. It will displace half of the actual housing planned for the area and replace it with a private park designed as a transient playground.

- Will be the largest manufactured home/RV park on the West Coast and will double the population of Cle Elum. Parks of this magnitude have no place in a town as small as Cle Elum. Wrong Place, Wrong Size.

- Sun has eliminated the industrial park component of the approved plan and is proposing a major new retail center to the project which would compete with existing city businesses and will seriously damage Cle Elum's downtown, which the city has invested millions of dollars to reinvigorate. The retail center is in direct conflict with the city's comprehensive plan which states that the Bullfrog Flats Master Plan...."is intended to elevate the DTC (downtown core) as the primary retail and activity nexus for Cle Elum". Current rules for the Bullfrog Flats property prohibit a retail center on the property.

Unless the developer agrees to financially cover the substantial deficits, forever, existing city taxpayers will be required to subsidize Sun's development and taxes will go up.

- Sun's 47 Degrees North will be in its entirety a private business not a natural neighborhood (no lots sold, all spots leased), wholly owned by a massive out-of-state publicly traded corporation whose fiduciary duty is to its shareholders, not city taxpayers. Any subsidies of the project would be a gift of public funds to a private entity.

- Is not housing as contemplated for the Bullfrog UGA. It will displace half of the actual housing planned for the area and replace it with a private park designed as a transient playground.

- Will be the largest manufactured home/RV park on the West Coast and will double the population of Cle Elum. Parks of this magnitude have no place in a town as small as Cle Elum. Wrong Place, Wrong Size.

- Sun has eliminated the industrial park component of the approved plan and is proposing a major new retail center to the project which would compete with existing city businesses and will seriously damage Cle Elum's downtown, which the city has invested millions of dollars to reinvigorate. The retail center is in direct conflict with the city's comprehensive plan which states that the Bullfrog Flats Master Plan…."is intended to elevate the DTC (downtown core) as the primary retail and activity nexus for Cle Elum". Current rules for the Bullfrog Flats property prohibit a retail center on the property.

- Provides no significant benefits to city or UKC residents, but creates serious and significant impacts on roads, police, fire, schools, emergency services, hospitals and other public services that can't be (or won't be) fully mitigated by the developer.

- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for. Any such increase in taxes will effectively translate to a subsidy for a private business,

- Denial of 47 Degrees North will not take away or reduce underlying property rights. It will simply require Sun Communities to comply with city's current rules, regulations and comprehensive plan for the property. The original underlying zoning approval and development agreement already allows development of this site, just not as a private resort/manufactured home community/retail center.

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Respectfully,

Re: 47 Degrees North Major Amendment proposal

I am writing to inform the city of my very strong opposition to the Sun Communities 47° North proposal for the Bullfrog flats property. The proposed manufactured home / RV community:

- Is in clear violation of the vision for the property adopted by the city and presented to the public as a condition for annexing Bullfrog Flats into the city. It's not in character with the City of Cle Elum and does not comply with fundamental requirements of the city's comprehensive plan, the development agreement, or zoning for the property.

- Instead of traditional neighborhoods that were planned to be connected to and a natural extension of the city, supporting the rest of the city, 47 Degrees North would create a private for-profit community and tourist resort with gates, private roads and utilities which will be separated from the rest of the city. It will create a private city within a city, forever.

- Fiscal studies of 47 Degrees North show that it will not create sufficient tax revenue to cover the city's cost to serve it. Unless the developer agrees to financially cover the substantial deficits, forever, existing city taxpayers will be required to subsidize Sun's development and taxes will go up.

- Sun's 47 Degrees North will be in its entirety a private business not a natural neighborhood (no lots sold, all spots leased), wholly owned by a massive out-of-state publicly traded corporation whose fiduciary duty is to its shareholders, not city taxpayers. Current rules for the Bullfrog Flats property prohibit a retail center on the property.
- Provides no significant benefits to city or UKC residents, but creates serious and significant impacts on roads, police, fire, schools, emergency services, hospitals and other public services that can't be (or won't be) fully mitigated by the developer, and,
- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for. Any such increase in taxes will effectively translate to a subsidy for a private business,
- Denial of 47 Degrees North will not take away or reduce underlying property rights. It will simply require Sun Communities to comply with city's current rules, regulations and comprehensive plan for the property. The original underlying zoning approval and development agreement already allows development of this site, just not as a private resort/manufactured home community/retail center.

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Respectfully,

Re: 47 Degrees North Major Amendment proposal

I am writing to inform the city of my very strong opposition to the Sun Communities 47° North proposal for the Bullfrog flats property. The proposed manufactured home / RV community:

- Is in clear violation of the vision for the property adopted by the city and presented to the public as a condition for annexing Bullfrog Flats into the city. It's not in character with the City of Cle Elum and does not comply with fundamental requirements of the city's comprehensive plan, the development agreement, or zoning for the property.

- Instead of traditional neighborhoods that were planned to be connected to and a natural extension of the city, supporting the rest of the city, 47 Degrees North would create a private for-profit community and tourist resort with gates, private roads and utilities which will be separated from the rest of the city. It will create a private city within a city, forever.

- Fiscal studies of 47 Degrees North show that it will not create sufficient tax revenue to cover the city's cost to serve it. Unless the developer agrees to financially cover the substantial deficits, forever, existing city taxpayers will be required to subsidize Sun's development and taxes will go up.

- Sun's 47 Degrees North will be in its entirety a private business not a natural neighborhood (no lots sold, all spots leased), wholly owned by a massive out-of-state publicly traded corporation whose fiduciary duty is to its shareholders, not city taxpayers. Any subsidies of the project would be a gift of public funds to a private entity.

- Is not housing as contemplated for the Bullfrog UGA. It will displace half of the actual housing planned for the area and replace it with a private park designed as a transient playground.

- Will be the largest manufactured home/RV park on the West Coast and will double the population of Cle Elum. Parks of this magnitude have no place in a town as small as Cle Elum. Wrong Place, Wrong Size.

- Sun has eliminated the industrial park component of the approved plan and is proposing a major new retail center to the project which would compete with existing city businesses and will seriously damage Cle Elum's downtown, which the city has invested millions of dollars to reinvigorate. The retail center is in direct conflict with the city's comprehensive plan which states that the Bullfrog Flats Master Plan...."is intended to elevate the DTC (downtown core) as the primary retail and activity nexus for Cle Elum". Current rules for the Bullfrog Flats property prohibit a retail center on the property.

- Provides no significant benefits to city or UKC residents, but creates serious and significant impacts on roads, police, fire, schools, emergency services, hospitals and other public services that can't be (or won't be) fully mitigated by the developer.

- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for. - Instead of traditional neighborhoods that were planned to be connected to and a natural extension of the city, supporting the rest of the city, 47 Degrees North would create a private for-profit community and tourist resort with gates, private roads and utilities which will be separated from the rest of the city. It will create a private city within a city, forever.

- Fiscal studies of 47 Degrees North show that it will not create enough tax revenue to cover the city's cost to serve it. Unless the developer agrees to financially cover the substantial deficits, forever, existing city taxpayers will be required to subsidize Sun's development and taxes will go up.

- Sun's 47 Degrees North will be in its entirety a private business not a natural neighborhood (no lots sold, all spots leased), wholly owned by a massive out-of-state publicly traded corporation who's fiduciary duty is to its shareholders, not city taxpayers. Any subsidies of the project would be a gift of public funds to a private entity.

- Is not housing as contemplated for the Bullfrog UGA. It will displace half of the actual housing planned for the area and replace it with a private park designed as a transient playground.

- Will be the largest manufactured home/RV park on the West Coast and will double the population of Cle Elum. Parks of this magnitude have no place in a town as small as Cle Elum. Wrong Place Wrong Size.

- Sun has proposed a major new retail center in the project which would compete with existing city businesses and will seriously damage Cle Elum's downtown, which the city has invested millions of dollars to reinvigorate. This is totally opposite of the city's comprehensive plan which states that the Bullfrog Flats Master Plan…."is intended to elevate the DTC (downtown core) as the primary retail and activity nexus for Cle Elum". Current rules for the Bullfrog Flats property prohibit a retail center on the property.

- Provides no significant benefits to city or UKC residents, but creates serious and significant impacts on roads, police, fire, schools, emergency services, hospitals and other public services that can't be (or won't be) fully mitigated by the developer, and,

- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for, which will be a subsidy for a private business,

- Denial of 47 Degrees North will not take away or reduce underlying property rights. It will simply require Sun Communities to comply with city's current rules, regulations and comprehensive plan for the property. The original underlying zoning approval and development agreement already allows development of this site, just not as a private resort/manufactured home community/retail center.

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Respectfully,

Re: 47 Degrees North Major Amendment proposal

I am writing to inform the city of my very strong opposition to the Sun Communities 47° North proposal for the Bullfrog flats property. The proposed manufactured home / RV community:

- Is in clear violation of the vision for the property adopted by the city and presented to the public as a condition for annexing Bullfrog Flats into the city. It's not in character with the City of Ce Elum and does not comply with fundamental requirements of the city's comprehensive plan, the development agreement and zoning for the property.
- Instead of traditional neighborhoods that were planned to be connected to and a natural extension of the city, supporting the rest of the city, 47 Degrees North would create a private for-profit community and tourist resort with gates, private roads and utilities which will be separated from the rest of the city. It will create a private city within a city, forever.
- Fiscal studies of 47 Degrees North show that it will not create enough tax revenue to cover the city's cost to serve it. Unless the developer ágrees to financially cover the substantial deficits, forever, existing city taxpayers will be required to subsidize Sun's development and taxes will go up.
- Sun's 47 Degrees North will be in its entirety a private business not a natural neighborhood (no lots sold, all spots leased), wholly owned by a massive out-of-state publicly traded corporation who's fiduciary duty is to its shareholders, not city taxpayers. Any subsidies of the project would be a gift of public funds to a private entity.

- Is not housing as contemplated for the Bullfrog UGA. It will displace half of the actual housing planned for the area and replace it with a private park designed as a transient playground.

- Will be the largest manufactured home/RV park on the West Coast and will double the population of Cle Elum. Parks of this magnitude have no place in a town as small as Cle Elum. Wrong Place, Wrong Size.

- Sun has eliminated the industrial park component of the approved plan and is proposing a major new retail center to the project which would compete with existing city businesses and will seriously damage Cle Elum's downtown, which the city has invested millions of dollars to reinvigorate. The retail center is in direct conflict with the city's comprehensive plan which states that the Bullfrog Flats Master Plan…."is intended to elevate the DTC (downtown core) as the primary retail and activity nexus for Cle Elum". Current rules for the Bullfrog Flats property prohibit a retail center on the property.

- Provides no significant benefits to city or UKC residents, but creates serious and significant impacts on roads, police, fire, schools, emergency services, hospitals and other public services that can't be (or won't be) fully mitigated by the developer.

- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for. Any such increase in taxes will effectively translate to a subsidy for a private business,

- Denial of 47 Degrees North will not take away or reduce underlying property rights. It will simply require Sun Communities to comply with city's current rules, regulations and comprehensive plan for the property. The original underlying zoning approval and development agreement already allows development of this site, just not as a private resort/manufactured home community/retail center.

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Respectfully,

_____

Re: 47 Degrees North Major Amendment proposal

I am writing to inform the city of my very strong opposition to the Sun Communities 47° North proposal for the Bullfrog flats property. The proposed manufactured home / RV community:

- Is in clear violation of the vision for the property adopted by the city and presented to the public as a condition for annexing Bullfrog Flats into the city. It's not in character with the City of Cle Elum and does not comply with fundamental requirements of the city's comprehensive plan, the development agreement, or zoning for the property.

- Instead of traditional neighborhoods that were planned to be connected to and a natural extension of the city, supporting the rest of the city, 47 Degrees North would create a private for-profit community and tourist resort with gates, private roads and utilities which will be separated from the rest of the city. It will create a private city within a city, forever.

- Fiscal studies of 47 Degrees North show that it will not create sufficient tax revenue to cover the city's cost to serve it. Unless the developer agrees to financially cover the substantial deficits, forever, existing city taxpayers will be required to subsidize Sun's development and taxes will go up.

- Sun's 47 Degrees North will be in its entirety a private business not a natural neighborhood (no lots sold, all spots leased), wholly owned by a massive out-of-state publicly traded corporation whose fiduciary duty is to its shareholders, not city taxpayers. Any subsidies of the project would be a gift of public funds to a private entity.

- Is not housing as contemplated for the Bullfrog UGA. It will displace half of the actual housing planned for the area and replace it with a private park designed as a transient playground.

- Will be the largest manufactured home/RV park on the West Coast and will double the population of Cle Elum. Parks of this magnitude have no place in a town as small as Cle Elum. Wrong Place, Wrong Size.

- Sun has eliminated the industrial park component of the approved plan and is proposing a major new retail center to the project which would compete with existing city businesses and will seriously damage Cle Elum's downtown, which the city has invested millions of dollars to reinvigorate. The retail center is in direct conflict with the city's comprehensive plan which states that the Bullfrog Flats Master Plan...."is intended to elevate the DTC (downtown core) as the primary retail and activity nexus for Cle Elum". Current rules for the Bullfrog Flats property prohibit a retail center on the property.

- Provides no significant benefits to city or UKC residents, but creates serious and significant impacts on roads, police, fire, schools, emergency services, hospitals and other public services that can't be (or won't be) fully mitigated by the developer.

- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for. Any such increase in taxes will effectively translate to a subsidy for a private business,

- Denial of 47 Degrees North will not take away or reduce underlying property rights. It will simply require Sun Communities to comply with city's current rules, regulations and comprehensive plan for the property. The original underlying zoning approval and development agreement already allows development of this site, just not as a private resort/manufactured home community/retail center.

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Respectfully,

Re: 47 Degrees North Major Amendment proposal

I am writing to inform the city of my very strong opposition to the Sun Communities 47° North proposal for the Bullfrog flats property. The proposed manufactured home / RV community:

- Is in clear violation of the vision for the property adopted by the city and presented to the public as a condition for annexing Bullfrog Flats into the city. It's not in character with the City of Cle Elum and does not comply with fundamental requirements of the city's comprehensive plan, the development agreement, or zoning for the property.

- Instead of traditional neighborhoods that were planned to be connected to and a natural extension of the city, supporting the rest of the city, 47 Degrees North would create a private for-profit community and tourist resort with gates, private roads and utilities which will be separated from the rest of the city. It will create a private city within a city, forever.

- Fiscal studies of 47 Degrees North show that it will not create sufficient tax revenue to cover the city's cost to serve it. Unless the developer agrees to financially cover the substantial deficits, forever, existing city taxpayers will be required to subsidize Sun's development and taxes will go up.

- Sun's 47 Degrees North will be in its entirety a private business not a natural neighborhood (no lots sold, all spots leased), wholly owned by a massive out-of-state publicly traded corporation whose fiduciary duty is to its shareholders, not city taxpayers. Any subsidies of the project would be a gift of public funds to a private entity.

- Is not housing as contemplated for the Bullfrog UGA. It will displace half of the actual housing planned for the area and replace it with a private park designed as a transient playground.

- Will be the largest manufactured home/RV park on the West Coast and will double the population of Cle Elum. Parks of this magnitude have no place in a town as small as Cle Elum. Wrong Place, Wrong Size.

The retail center is in direct conflict with the city's comprehensive plan which states that the Bullfrog Flats Master Plan…."is intended to elevate the DTC (downtown core) as the primary retail and activity nexus for Cle Elum". Current rules for the Bullfrog Flats property prohibit a retail center on the property.

- Provides no significant benefits to city or UKC residents, but creates serious and significant impacts on roads, police, fire, schools, emergency services, hospitals and other public services that can't be (or won't be) fully mitigated by the developer.

- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for. Any such increase in taxes will effectively translate to a subsidy for a private business,

- Denial of 47 Degrees North will not take away or reduce underlying property rights. It will simply require Sun Communities to comply with city's current rules, regulations and comprehensive plan for the property. The original underlying zoning approval and development agreement already allows development of this site, just not as a private resort/manufactured home community/retail center.

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Respectfully,

Amy Dentel

Re: 47 Degrees North Major Amendment proposal

I am writing to inform the city of my very strong opposition to the Sun Communities 47° North proposal for the Bullfrog flats property. The proposed manufactured home / RV community:

- Is in clear violation of the vision for the property adopted by the city and presented to the public as a condition for annexing Bullfrog Flats into the city. It's not in character with the City of Cle Elum and does not comply with fundamental requirements of the city's comprehensive plan, the development agreement, or zoning for the property.

- Instead of traditional neighborhoods that were planned to be connected to and a natural extension of the city, supporting the rest of the city, 47 Degrees North would create a private for-profit community and tourist resort with gates, private roads and utilities which will be separated from the rest of the city. It will create a private city within a city, forever.

- Fiscal studies of 47 Degrees North show that it will not create sufficient tax revenue to cover the city's cost to serve it. Unless the developer agrees to financially cover the substantial deficits, forever, existing city taxpayers will be required to subsidize Sun's development and taxes will go up.

- Sun's 47 Degrees North will be in its entirety a private business not a natural neighborhood (no lots sold, all spots leased), wholly owned by a massive out-of-state publicly traded corporation whose fiduciary duty is to its shareholders, not city taxpayers. Any subsidies of the project would be a gift of public funds to a private entity.

- Is not housing as contemplated for the Bullfrog UGA. It will displace half of the actual housing planned for the area and replace it with a private park designed as a transient playground.

- Will be the largest manufactured home/RV park on the West Coast and will double the population of Cle Elum. Parks of this magnitude have no place in a town as small as Cle Elum. Wrong Place, Wrong Size.

- Sun has eliminated the industrial park component of the approved plan and is proposing a major new retail center to the project which would compete with existing city businesses and will seriously damage Cle Elum's downtown, which the city has invested millions of dollars to reinvigorate. The retail center is in direct conflict with the city's comprehensive plan which states that the Bullfrog Flats Master Plan…."is intended to elevate the DTC (downtown core) as the primary retail and activity nexus for Cle Elum". Current rules for the Bullfrog Flats property prohibit a retail center on the property.

- Fiscal studies of 47 Degrees North show that it will not create sufficient tax revenue to cover the city's cost to serve it. Unless the developer agrees to financially cover the substantial deficits, forever, existing city taxpayers will be required to subsidize Sun's development and taxes will go up.

- Sun's 47 Degrees North will be in its entirety a private business not a natural neighborhood (no lots sold, all spots leased), wholly owned by a massive out-of-state publicly traded corporation whose fiduciary duty is to its shareholders, not city taxpayers. Any subsidies of the project would be a gift of public funds to a private entity.

- Is not housing as contemplated for the Bullfrog UGA. It will displace half of the actual housing planned for the area and replace it with a private park designed as a transient playground.

- Will be the largest manufactured home/RV park on the West Coast and will double the population of Cle Elum. Parks of this magnitude have no place in a town as small as Cle Elum. Wrong Place, Wrong Size.

- Sun has eliminated the industrial park component of the approved plan and is proposing a major new retail center to the project which would compete with existing city businesses and will seriously damage Cle Elum's downtown, which the city has invested millions of dollars to reinvigorate. The retail center is in direct conflict with the city's comprehensive plan which states that the Bullfrog Flats Master Plan…."is intended to elevate the DTC (downtown core) as the primary retail and activity nexus for Cle Elum". Current rules for the Bullfrog Flats property prohibit a retail center on the property.

- Provides no significant benefits to city or UKC residents, but creates serious and significant impacts on roads, police, fire, schools, emergency services, hospitals and other public services that can't be (or won't be) fully mitigated by the developer.

- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for. Any such increase in taxes will effectively translate to a subsidy for a private business,

- Denial of 47 Degrees North will not take away or reduce underlying property rights. It will simply require Sun Communities to comply with city's current rules, regulations and comprehensive plan for the property. The original underlying zoning approval and development agreement already allows development of this site, just not as a private resort/manufactured home community/retail center.

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Respectfully,

Re: 47 Degrees North Major Amendment proposal

I am writing to inform the city of my very strong opposition to the Sun Communities 47° North proposal for the Bullfrog flats property. The proposed manufactured home / RV community:

- Is in clear violation of the vision for the property adopted by the city and presented to the public as a condition for annexing Bullfrog Flats into the city. It's not in character with the City of Cle Elum and does not comply with fundamental requirements of the city's comprehensive plan, the development agreement, or zoning for the property.

- Instead of traditional neighborhoods that were planned to be connected to and a natural extension of the city, supporting the rest of the city, 47 Degrees North would create a private for-profit community and tourist resort with gates, private roads and utilities which will be separated from the rest of the city. It will create a private city within a city, forever.

- Fiscal studies of 47 Degrees North show that it will not create sufficient tax revenue to cover the city's cost to serve it. Unless the developer agrees to financially cover the substantial deficits, forever, existing city taxpayers will be required to subsidize Sun's development and taxes will go up.

- Sun's 47 Degrees North will be in its entirety a private business not a natural neighborhood (no lots sold, all spots leased), wholly owned by a massive out-of-state publicly traded corporation whose fiduciary duty is to its shareholders, not city taxpayers. Any subsidies of the project would be a gift of public funds to a private entity.

Re: 47 Degrees North Major Amendment Proposal

I am writing to provide the city with my very strong concerns about the Sun Communities 47°N proposal for the Bullfrog Flats property. The proposed manufactured home/RV community:

- Is not in character with the City of Cle Elum or the upper Kittitas Valley (a fundamental requirement of the current zoning for the property),
- Would create a new and separate private tourist resort instead of the natural extension of city neighborhoods originally envisioned by city zoning and current approvals,
- Is in its entirety a private business not a neighborhood (no lots will be created or sold, all spots will be leased, and the project will be private), wholly owned by a large out-of-state publicly traded corporation whose fiduciary duty is to its shareholders,
- Provides no significant benefits to upper valley residents and tax payers,
- Will create serious and significant impacts on roads, police, fire, schools, emergency services, hospitals, and other public services that can't (or won't) be fully mitigated by the developer, and therefore,
- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for, essentially a subsidy for a private business,
- Denial of the Sun Communities proposal would not take away or reduce underlying property rights. The original underlying zoning approval would still allow development of this site, just not as a private resort/manufactured home community.

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

It will create a private city within a city, forever.

- Fiscal studies of 47 Degrees North show that it will not create sufficient tax revenue to cover the city's cost to serve it. Unless the developer agrees to financially cover the substantial deficits, forever, existing city taxpayers will be required to subsidize Sun's development and taxes will go up.

- Sun's 47 Degrees North will be in its entirety a private business not a natural neighborhood (no lots sold, all spots leased), wholly owned by a massive out-of-state publicly traded corporation whose fiduciary duty is to its shareholders, not city taxpayers. Any subsidies of the project would be a gift of public funds to a private entity.

- Is not housing as contemplated for the Bullfrog UGA. It will displace half of the actual housing planned for the area and replace it with a private park designed as a transient playground.

- Will be the largest manufactured home/RV park on the West Coast and will double the population of Cle Elum. Parks of this magnitude have no place in a town as small as Cle Elum. Wrong Place, Wrong Size.

- Sun has eliminated the industrial park component of the approved plan and is proposing a major new retail center to the project which would compete with existing city businesses and will seriously damage Cle Elum's downtown, which the city has invested millions of dollars to reinvigorate. The retail center is in direct conflict with the city's comprehensive plan which states that the Bullfrog Flats Master Plan…."is intended to elevate the DTC (downtown core) as the primary retail and activity nexus for Cle Elum". Current rules for the Bullfrog Flats property prohibit a retail center on the property.

- Provides no significant benefits to city or UKC residents, but creates serious and significant impacts on roads, police, fire, schools, emergency services, hospitals and other public services that can't be (or won't be) fully mitigated by the developer.

- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for. Any such increase in taxes will effectively translate to a subsidy for a private business,

- Denial of 47 Degrees North will not take away or reduce underlying property rights. It will simply require Sun Communities to comply with city's current rules, regulations and comprehensive plan for the property. The original underlying zoning approval and development agreement already allows development of this site, just not as a private resort/manufactured home community/retail center.

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Respectfully,

Re: 47 Degrees North Major Amendment Proposal

I am writing to provide the city with my very strong concerns about the Sun Communities 47°N proposal for the Bullfrog Flats property. The proposed manufactured home/RV community:

- Is not in character with the City of Cle Elum or the upper Kittitas Valley (a fundamental requirement of the current zoning for the property),
- Would create a new and separate private tourist resort instead of the natural extension of city neighborhoods originally envisioned by city zoning and current approvals,
- Is in its entirety a private business not a neighborhood (no lots will be created or sold, all spots will be leased, and the project will be private), wholly owned by a large out-of-state publicly traded corporation whose fiduciary duty is to its shareholders,
- Provides no significant benefits to upper valley residents and tax payers,
- Will create serious and significant impacts on roads, police, fire, schools, emergency services, hospitals, and other public services that can't (or won't) be fully mitigated by the developer, and therefore,
- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for, essentially a subsidy for a private business,
- Denial of the Sun Communities proposal would not take away or reduce underlying property rights. The original underlying zoning approval would still allow development of this site, just not as a private resort/manufactured home community.

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Re: 47 Degrees North Major Amendment proposal

I am writing to inform the city of my very strong opposition to the Sun Communities 47° North proposal for the Bullfrog flats property. The proposed manufactured home / RV community:

- Is in clear violation of the vision for the property adopted by the city and presented to the public as a condition for annexing Bullfrog Flats into the city. It's not in character with the City of Cle Elum and does not comply with fundamental requirements of the city's comprehensive plan, the development agreement, or zoning for the property.
- Instead of traditional neighborhoods that were planned to be connected to and a natural extension of the city, supporting the rest of the city, 47 Degrees North would create a private for-profit community and tourist resort with gates, private roads and utilities which will be separated from the rest of the city. It will create a private city within a city, forever.
- Fiscal studies of 47 Degrees North show that it will not create sufficient tax revenue to cover the city's cost to serve it. Unless the developer agrees to financially cover the substantial deficits, forever, existing city taxpayers will be required to subsidize Sun's development and taxes will go up.
- Sun's 47 Degrees North will be in its entirety a private business not a natural neighborhood (no lots sold, all spots leased), wholly owned by a massive out-of-state publicly traded corporation who's fiduciary duty is to its shareholders, not city taxpayers. Re: 47 Degrees North Major Amendment proposal

I am writing to inform the city of my very strong opposition to the Sun Communities 47° North proposal for the Bullfrog flats property. The proposed manufactured home / RV community:

- Is in clear violation of the vision for the property adopted by the city and presented to the public as a condition for annexing Bullfrog Flats into the city. It's not in character with the City of Cle Elum and does not comply with fundamental requirements of the city's comprehensive plan, the development agreement, or zoning for the property.
- Instead of traditional neighborhoods that were planned to be connected to and a natural extension of the city, supporting the rest of the city, 47 Degrees North would create a private for-profit community and tourist resort with gates, private roads and utilities which will be separated from the rest of the city. It will create a private city within a city, forever.
- Fiscal studies of 47 Degrees North show that it will not create sufficient tax revenue to cover the city's cost to serve it. Unless the developer agrees to financially cover the substantial deficits, forever, existing city taxpayers will be required to subsidize Sun's development and taxes will go up.
- Sun's 47 Degrees North will be in its entirety a private business not a natural neighborhood (no lots sold, all spots leased), wholly owned by a massive out-of-state publicly traded corporation who's fiduciary duty is to its shareholders, not city taxpayers. Any subsidies of the project would be a gift of public funds to a private entity.
- Is not housing as contemplated for the Bullfrog UGA. It will displace half of the actual housing planned for the area and replace it with a private park designed as a transient playground.
- Will be the largest manufactured home/RV park on the West Coast and will double the population of Cle Elum. Parks of this magnitude have no place in a town as small as Cle Elum. Wrong Place Wrong Size.
- Sun has eliminated the industrial park component of the approved plan and is proposing a major new retail center to the project which would compete with existing city businesses and will seriously damage Cle Elum's downtown, which the city has invested millions of dollars to reinvigorate. The retail center is in direct conflict with the city's comprehensive plan which states that the Bullfrog Flats Master Plan…."is intended to elevate the DTC (downtown core) as the primary retail and activity nexus for Cle Elum". Current rules for the Bullfrog Flats property prohibit a retail center on the property.
- Provides no significant benefits to city or UKC residents, but creates serious and significant impacts on roads, police, fire, schools, emergency services, hospitals and other public services that can't be (or won't be) fully mitigated by the developer, and,
- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for. Any such increase in taxes will effectively translate to a subsidy for a private business,
- Denial of 47 Degrees North will not take away or reduce underlying property rights. It will simply require Sun Communities to comply with city's current rules, regulations and comprehensive plan for the property. The original underlying zoning approval and development agreement already allows development of this site, just not as a private resort/manufactured home community/retail center.

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Respectfully,

Julie Rancourt

Re: 47 Degrees North Major Amendment proposal

I am writing to inform the city of my very strong opposition to the Sun Communities 47° North proposal for the Bullfrog flats property. The proposed manufactured home / RV community:

- Is in clear violation of the vision for the property adopted by the city and presented to the public as a condition for annexing Bullfrog Flats into the city. It's not in character with the City of Cle Elum and does not comply with fundamental requirements of the city's comprehensive plan, the development agreement, or zoning for the property.
- Instead of traditional neighborhoods that were planned to be connected to and a natural extension of the city, supporting the rest of the city, 47 Degrees North would create a private for-profit community and tourist resort with gates, private roads and utilities which will be separated from the rest of the city. It will create a private city within a city, forever.
- Fiscal studies of 47 Degrees North show that it will not create sufficient tax revenue to cover the city's cost to serve it. Unless the developer agrees to financially cover the substantial deficits, forever, existing city taxpayers will be required to subsidize Sun's development and taxes will go up.
- Sun's 47 Degrees North will be in its entirety a private business not a natural neighborhood (no lots sold, all spots leased), wholly owned by a massive out-of-state publicly traded corporation who's fiduciary duty is to its shareholders, not city taxpayers. Any subsidies of the project would be a gift of public funds to a private entity.
- Is not housing as contemplated for the Bullfrog UGA. It will displace half of the actual housing planned for the area and replace it with a private park designed as a transient playground.
- Will be the largest manufactured home/RV park on the West Coast and will double the population of Cle Elum. Parks of this magnitude have no place in a town as small as Cle Elum. Wrong Place Wrong Size.
- Sun has eliminated the industrial park component of the approved plan and is proposing a major new retail center to the project which would compete with existing city businesses and will seriously damage Cle Elum's downtown, which the city has invested millions of dollars to reinvigorate. The retail center is in direct conflict with the city's comprehensive plan which states that the Bullfrog Flats Master Plan...."is intended to elevate the DTC (downtown core) as the primary retail and activity nexus for Cle Elum". Current rules for the Bullfrog Flats property prohibit a retail center on the property.
- Provides no significant benefits to city or UKC residents, but creates serious and significant impacts on roads, police, fire, schools, emergency services, hospitals and other public services that can't be (or won't be) fully mitigated by the developer, and,
- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for. Any such increase in taxes will effectively translate to a subsidy for a private business,
- Denial of 47 Degrees North will not take away or reduce underlying property rights. It will simply require Sun Communities to comply with city's current rules, regulations and comprehensive plan for the property. The original underlying zoning approval and development agreement already allows development of this site, just not as a private resort/manufactured home community/retail center.

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Respectfully,

Signature

ADDITIONAL COMMENTS:

As a professional firefighter and volunteer first responder for multiple agencies in upper County, our emergency response system cannot handle this development. Putting this type of property in city limits will overtax our already strained system, endangering the lives and property of Cle Elum's current residences and anyone passing through.

Re: 47 Degrees North Major Amendment proposal

I am writing to inform the city of my **VERY STRONG** opposition to the Sun Communities 47° North proposal for the Bullfrog flats property. The proposed manufactured home / RV community:

- I have attended many City Council meetings over the past year and a half and have additionally made public comments on these, at a least one meeting voicing my opposition and concerns.
  I will forgo an exhaustive list of those concerns as they have been enumerated by many citizens, in the form of letters, emails and public comments, and wish to be recognized as standing by these as well.
  I include some of my biggest concerns here:

  1. Instead of traditional neighborhoods that were planned to be connected to and a natural extension of the city, supporting the rest of the city, 47 Degrees North would create a private for-profit community and tourist resort with gates, private roads and utilities which will be separated from the rest of the city. It will create a private city within a city, forever.

  2. It will not create sufficient tax revenue to cover the city's cost to serve it (as members of the council believe it will). Unless the developer agrees to financially cover the substantial deficits, forever, existing city taxpayers will be required to subsidize Sun's development and taxes will go up.

  3. Sun's 47 Degrees North will be in its entirety a private business not a natural neighborhood (no lots sold, all spots leased), wholly owned by a massive out-of-state publicly traded corporation whose fiduciary duty is to its shareholders, not city taxpayers. Any subsidies of the project would be a gift of public funds to a private entity.

  4. Is not housing as contemplated for the Bullfrog UGA. It will displace half of the actual housing planned for the area and replace it with a private park designed as a transient playground.

  5. Will be the largest manufactured home/RV park on the West Coast and will double the population of Cle Elum. Parks of this magnitude have no place in a town as small as Cle Elum. Wrong Place Wrong Size.
     Additionally, 500-600+ short term RV spots are beyond catastrophic to the environment and culture of the Upper Kittitas County!

  6. Provides no significant benefits to city or UKC residents, **but creates serious and significant impacts on roads, police, fire, schools, emergency services, hospitals and other public services** that can't be (or won't be) fully mitigated by the developer, and,

  7. Will create **extensive traffic congestion and gridlock** conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for. Any such increase in taxes will effectively translate to a subsidy for a private business,

  8. Denial of 47 Degrees North will not take away or reduce underlying property rights. It will simply require Sun Communities to comply with the city's current rules, regulations, and comprehensive plan for the property. The original underlying zoning approval and development agreement already allows development of this site, not just as a private resort/manufactured home community/retail center.

For all these reasons, and others, I **implore the City** to **PLEASE DENY** this proposed major amendment and consider retaining the current approved land use for the property.

Re: 47 Degrees North Major Amendment proposal

I am writing to inform the city of my very strong opposition to the Sun Communities 47° North proposal for the Bullfrog flats property. The proposed manufactured home / RV community:

- Is in clear violation of the vision for the property adopted by the city and presented to the public as a condition for annexing Bullfrog Flats into the city. It's not in character with the City of Cle Elum and does not comply with fundamental requirements of the city's comprehensive plan, the development agreement, or zoning for the property.

- Instead of traditional neighborhoods that were planned to be connected to and a natural extension of the city, supporting the rest of the city, 47 Degrees North would create a private for-profit community and tourist resort with gates, private roads and utilities which will be separated from the rest of the city. It will create a private city within a city, forever.

- Fiscal studies of 47 Degrees North show that it will not create sufficient tax revenue to cover the city's cost to serve it. Unless the developer agrees to financially cover the substantial deficits, forever, existing city taxpayers will be required to subsidize Sun's development and taxes will go up.

- Sun's 47 Degrees North will be in its entirety a private business not a natural neighborhood (no lots sold, all spots leased), wholly owned by a massive out-of-state publicly traded corporation whose fiduciary duty is to its shareholders, not city taxpayers. Any subsidies of the project would be a gift of public funds to a private entity.

- Is not housing as contemplated for the Bullfrog UGA. It will displace half of the actual housing planned for the area and replace it with a private park designed as a transient playground.

- Will be the largest manufactured home/RV park on the West Coast and will double the population of Cle Elum. Parks of this magnitude have no place in a town as small as Cle Elum. Wrong Place, Wrong Size.

- Sun has eliminated the industrial park component of the approved plan and is proposing a major new retail center to the project which would compete with existing city businesses and will seriously damage Cle Elum's downtown, which the city has invested millions of dollars to reinvigorate. The retail center is in direct conflict with the city's comprehensive plan which states that the Bullfrog Flats Master Plan...."is intended to elevate the DTC (downtown core) as the primary retail and activity nexus for Cle Elum". Current rules for the Bullfrog Flats property prohibit a retail center on the property.

- Provides no significant benefits to city or UKC residents, but creates serious and significant impacts on roads, police, fire, schools, emergency services, hospitals and other public services that can't be (or won't be) fully mitigated by the developer.

- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for. Any such increase in taxes will effectively translate to a subsidy for a private business,

- Denial of 47 Degrees North will not take away or reduce underlying property rights. It will simply require Sun Communities to comply with city's current rules, regulations and comprehensive plan for the property. The original underlying zoning approval and development agreement already allows development of this site, just not as a private resort/manufactured home community/retail center.

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Respectfully,

Re: 47 Degrees North Major Amendment proposal

I am writing to inform the city of my very strong opposition to the Sun Communities 47° North proposal for the Bullfrog flats property. The proposed manufactured home / RV community:

- Is in clear violation of the vision for the property adopted by the city and presented to the public as a condition for annexing Bullfrog Flats into the city. It's not in character with the City of Cle Elum and does not comply with fundamental requirements of the city's comprehensive plan, the development agreement, or zoning for the property.

- Instead of traditional neighborhoods that were planned to be connected to and a natural extension of the city, supporting the rest of the city, 47 Degrees North would create a private for-profit community and tourist resort with gates, private roads and utilities which will be separated from the rest of the city. It will create a private city within a city, forever.

- Fiscal studies of 47 Degrees North show that it will not create sufficient tax revenue to cover the city's cost to serve it. Unless the developer agrees to financially cover the substantial deficits, forever, existing city taxpayers will be required to subsidize Sun's development and taxes will go up.

- Sun's 47 Degrees North will be in its entirety a private business not a natural neighborhood (no lots sold, all spots leased), wholly owned by a massive out-of-state publicly traded corporation whose fiduciary duty is to its shareholders, not city taxpayers. Any subsidies of the project would be a gift of public funds to a private entity.

- Is not housing as contemplated for the Bullfrog UGA. It will displace half of the actual housing planned for the area and replace it with a private park designed as a transient playground.

- Will be the largest manufactured home/RV park on the West Coast and will double the population of Cle Elum. Parks of this magnitude have no place in a town as small as Cle Elum. Wrong Place, Wrong Size.

- Sun has eliminated the industrial park component of the approved plan and is proposing a major new retail center to the project which would compete with existing city businesses and will seriously damage Cle Elum's downtown, which the city has invested millions of dollars to reinvigorate. The retail center is in direct conflict with the city's comprehensive plan which states that the Bullfrog Flats Master Plan…."is intended to elevate the DTC (downtown core) as the primary retail and activity nexus for Cle Elum". Current rules for the Bullfrog Flats property prohibit a retail center on the property.

- Provides no significant benefits to city or UKC residents, but creates serious and significant impacts on roads, police, fire, schools, emergency services, hospitals and other public services that can't be (or won't be) fully mitigated by the developer.

- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for. Any such increase in taxes will effectively translate to a subsidy for a private business,

- Denial of 47 Degrees North will not take away or reduce underlying property rights. It will simply require Sun Communities to comply with city's current rules, regulations and comprehensive plan for the property. The original underlying zoning approval and development agreement already allows development of this site, just not as a private resort/manufactured home community/retail center.

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Respectfully,

Re: 47 Degrees North Major Amendment proposal

I am writing to inform the city of my very strong opposition to the Sun Communities 47° North proposal for the Bullfrog flats property. The proposed manufactured home / RV community:

- Is in clear violation of the vision for the property adopted by the city and presented to the public as a condition for annexing Bullfrog Flats into the city. It's not in character with the City of Cle Elum and does not comply with fundamental requirements of the city's comprehensive plan, the development agreement, or zoning for the property.

- Instead of traditional neighborhoods that were planned to be connected to and a natural extension of the city, supporting the rest of the city, 47 Degrees North would create a private for-profit community and tourist resort with gates, private roads and utilities which will be separated from the rest of the city. It will create a private city within a city, forever.

- Fiscal studies of 47 Degrees North show that it will not create sufficient tax revenue to cover the city's cost to serve it. Unless the developer agrees to financially cover the substantial deficits, forever, existing city taxpayers will be required to subsidize Sun's development and taxes will go up.

- Sun's 47 Degrees North will be in its entirety a private business not a natural neighborhood (no lots sold, all spots leased), wholly owned by a massive out-of-state publicly traded corporation whose fiduciary duty is to its shareholders, not city taxpayers. Any subsidies of the project would be a gift of public funds to a private entity.

- Is not housing as contemplated for the Bullfrog UGA. It will displace half of the actual housing planned for the area and replace it with a private park designed as a transient playground.

- Will be the largest manufactured home/RV park on the West Coast and will double the population of Cle Elum. Parks of this magnitude have no place in a town as small as Cle Elum. Wrong Place, Wrong Size.

- Sun has eliminated the industrial park component of the approved plan and is proposing a major new retail center to the project which would compete with existing city businesses and will seriously damage Cle Elum's downtown, which the city has invested millions of dollars to reinvigorate. The retail center is in direct conflict with the city's comprehensive plan which states that the Bullfrog Flats Master Plan…."is intended to elevate the DTC (downtown core) as the primary retail and activity nexus for Cle Elum". Current rules for the Bullfrog Flats property prohibit a retail center on the property.

- Provides no significant benefits to city or UKC residents, but creates serious and significant impacts on roads, police, fire, schools, emergency services, hospitals and other public services that can't be (or won't be) fully mitigated by the developer.

- Sun's 47 Degrees North will be in its entirety a private business not a natural neighborhood (no lots sold, all spots leased), wholly owned by a massive out-of-state publicly traded corporation whose fiduciary duty is to its shareholders, not city taxpayers. Any subsidies of the project would be a gift of public funds to a private entity.

- Is not housing as contemplated for the Bullfrog UGA. It will displace half of the actual housing planned for the area and replace it with a private park designed as a transient playground.

- Will be the largest manufactured home/RV park on the West Coast and will double the population of Cle Elum. Parks of this magnitude have no place in a town as small as Cle Elum. Wrong Place, Wrong Size.

- Sun has eliminated the industrial park component of the approved plan and is proposing a major new retail center to the project which would compete with existing city businesses and will seriously damage Cle Elum's downtown, which the city has invested millions of dollars to reinvigorate. The retail center is in direct conflict with the city's comprehensive plan which states that the Bullfrog Flats Master Plan…."is intended to elevate the DTC (downtown core) as the primary retail and activity nexus for Cle Elum". Current rules for the Bullfrog Flats property prohibit a retail center on the property.

- Provides no significant benefits to city or UKC residents, but creates serious and significant impacts on roads, police, fire, schools, emergency services, hospitals and other public services that can't be (or won't be) fully mitigated by the developer.

- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for. Any such increase in taxes will effectively translate to a subsidy for a private business,

- Denial of 47 Degrees North will not take away or reduce underlying property rights. It will simply require Sun Communities to comply with city's current rules, regulations and comprehensive plan for the property. The original underlying zoning approval and development agreement already allows development of this site, just not as a private resort/manufactured home community/retail center.

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Respectfully,

Chris Lucurell

Re: 47 Degrees North Major Amendment proposal

I am writing to inform the city of my very strong opposition to the Sun Communities 47° North proposal for the Bullfrog flats property. The proposed manufactured home / RV community:

- Is in clear violation of the vision for the property adopted by the city and presented to the public as a condition for annexing Bullfrog Flats into the city. It's not in character with the City of Cle Elum and does not comply with fundamental requirements of the city's comprehensive plan, the development agreement, or zoning for the property.

- Instead of traditional neighborhoods that were planned to be connected to and a natural extension of the city, supporting the rest of the city, 47 Degrees North would create a private for-profit community and tourist resort with gates, private roads and utilities which will be separated from the rest of the city. It will create a private city within a city, forever.

- Fiscal studies of 47 Degrees North show that it will not create sufficient tax revenue to cover the city's cost to serve it. Unless the developer agrees to financially cover the substantial deficits, forever, existing city taxpayers will be required to subsidize Sun's development and taxes will go up.

- Sun's 47 Degrees North will be in its entirety a private business not a natural neighborhood (no lots sold, all spots leased), wholly owned by a massive out-of-state publicly traded corporation whose fiduciary duty is to its shareholders, not city taxpayers. Any subsidies of the project would be a gift of public funds to a private entity.

- Sun's 47 Degrees North will be in its entirety a private business not a natural neighborhood (no lots sold, all spots leased), wholly owned by a massive out-of-state publicly traded corporation whose fiduciary duty is to its shareholders, not city taxpayers. Any subsidies of the project would be a gift of public funds to a private entity.

- Is not housing as contemplated for the Bullfrog UGA. It will displace half of the actual housing planned for the area and replace it with a private park designed as a transient playground.

- Will be the largest manufactured home/RV park on the West Coast and will double the population of Cle Elum. Parks of this magnitude have no place in a town as small as Cle Elum. Wrong Place, Wrong Size.

- Sun has eliminated the industrial park component of the approved plan and is proposing a major new retail center to the project which would compete with existing city businesses and will seriously damage Cle Elum's downtown, which the city has invested millions of dollars to reinvigorate. The retail center is in direct conflict with the city's comprehensive plan which states that the Bullfrog Flats Master Plan...."is intended to elevate the DTC (downtown core) as the primary retail and activity nexus for Cle Elum". Current rules for the Bullfrog Flats property prohibit a retail center on the property.

- Provides no significant benefits to city or UKC residents, but creates serious and significant impacts on roads, police, fire, schools, emergency services, hospitals and other public services that can't be (or won't be) fully mitigated by the developer.

- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for. Any such increase in taxes will effectively translate to a subsidy for a private business,

- Denial of 47 Degrees North will not take away or reduce underlying property rights. It will simply require Sun Communities to comply with city's current rules, regulations and comprehensive plan for the property. The original underlying zoning approval and development agreement already allows development of this site, just not as a private resort/manufactured home community/retail center.

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Respectfully,

Re: 47 Degrees North Major Amendment proposal

I am writing to inform the city of my very strong opposition to the Sun Communities 47° North proposal for the Bullfrog flats property. The proposed manufactured home / RV community:

- Is in clear violation of the vision for the property adopted by the city and presented to the public as a condition for annexing Bullfrog Flats into the city. It's not in character with the City of Cle Elum and does not comply with fundamental requirements of the city's comprehensive plan, the development agreement, or zoning for the property.

- Instead of traditional neighborhoods that were planned to be connected to and a natural extension of the city, supporting the rest of the city, 47 Degrees North would create a private for-profit community and tourist resort with gates, private roads and utilities which will be separated from the rest of the city. It will create a private city within a city, forever.

- Fiscal studies of 47 Degrees North show that it will not create sufficient tax revenue to cover the city's cost to serve it. Unless the developer agrees to financially cover the substantial deficits, forever, existing city taxpayers will be required to subsidize Sun's development and taxes will go up.

- Sun's 47 Degrees North will be in its entirety a private business not a natural neighborhood (no lots sold, all spots leased), wholly owned by a massive out-of-state publicly traded corporation whose fiduciary duty is to its shareholders, not city taxpayers. Any subsidies of the project would be a gift of public funds to a private entity.

- Is not housing as contemplated for the Bullfrog UGA. It will displace half of the actual housing planned for the area and replace it with a private park designed as a transient playground.
- Will be the largest manufactured home/RV park on the West Coast and will double the population of Cle Elum. Parks of this magnitude have no place in a town as small as Cle Elum. Wrong Place Wrong Size.
- Sun has eliminated the industrial park component of the approved plan and is proposing a major new retail center to the project which would compete with existing city businesses and will seriously damage Cle Elum's downtown, which the city has invested millions of dollars to reinvigorate. The retail center is in direct conflict with the city's comprehensive plan which states that the Bullfrog Flats Master Plan…."is intended to elevate the DTC (downtown core) as the primary retail and activity nexus for Cle Elum". Current rules for the Bullfrog Flats property prohibit a retail center on the property.
- Provides no significant benefits to city or UKC residents, but creates serious and significant impacts on roads, police, fire, schools, emergency services, hospitals and other public services that can't be (or won't be) fully mitigated by the developer, and,
- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for. Any such increase in taxes will effectively translate to a subsidy for a private business,
- Denial of 47 Degrees North will not take away or reduce underlying property rights. It will simply require Sun Communities to comply with city's current rules, regulations and comprehensive plan for the property. The original underlying zoning approval and development agreement already allows development of this site, just not as a private resort/manufactured home community/retail center.

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Respectfully,

Emily Taylor

Re: 47 Degrees North Major Amendment proposal

I am writing to inform the city of my very strong opposition to the Sun Communities 47° North proposal for the Bullfrog flats property. The proposed manufactured home / RV community:

- Is in clear violation of the vision for the property adopted by the city and presented to the public as a condition for annexing Bullfrog Flats into the city. It's not in character with the City of Cle Elum and does not comply with fundamental requirements of the city's comprehensive plan, the development agreement, or zoning for the property.
- Instead of traditional neighborhoods that were planned to be connected to and a natural extension of the city, supporting the rest of the city, 47 Degrees North would create a private for-profit community and tourist resort with gates, private roads and utilities which will be separated from the rest of the city. It will create a private city within a city, forever.
- Fiscal studies of 47 Degrees North show that it will not create sufficient tax revenue to cover the city's cost to serve it. Unless the developer agrees to financially cover the substantial deficits, forever, existing city taxpayers will be required to subsidize Sun's development and taxes will go up.
- Sun's 47 Degrees North will be in its entirety a private business not a natural neighborhood (no lots sold, all spots leased), wholly owned by a massive out-of-state publicly traded corporation who's fiduciary duty is to its shareholders, not city taxpayers. Any subsidies of the project would be a gift of public funds to a private entity.
- Is not housing as contemplated for the Bullfrog UGA. It will displace half of the actual housing planned for the area and replace it with a private park designed as a transient playground.
- Will be the largest manufactured home/RV park on the West Coast and will double the population of Cle Elum. Parks of this magnitude have no place in a town as small as Cle Elum. Wrong Place Wrong Size.

ADDITIONAL COMMENTS:

In addition to reasons stated here as a united community, the entire character of greater Cle Elum would be forever altered, and not in the good, if "47 Degrees North" goes forward.

Thank you for listening, and we trust you have heard concerns raised to boldly reject "47 Degrees North."

Current rules for the Bullfrog Flats property prohibit a retail center on the property.

- Provides no significant benefits to city or UKC residents, but creates serious and significant impacts on roads, police, fire, schools, emergency services, hospitals and other public services that can't be (or won't be) fully mitigated by the developer.

- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for. Any such increase in taxes will effectively translate to a subsidy for a private business,

- Denial of 47 Degrees North will not take away or reduce underlying property rights. It will simply require Sun Communities to comply with city's current rules, regulations and comprehensive plan for the property. The original underlying zoning approval and development agreement already allows development of this site, just not as a private resort/manufactured home community/retail center.

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Respectfully,

Tami Drake

Re: 47 Degrees North Major Amendment proposal

I am writing to inform the city of my very strong opposition to the Sun Communities 47° North proposal for the Bullfrog flats property. The proposed manufactured home / RV community:

- Is in clear violation of the vision for the property adopted by the city and presented to the public as a condition for annexing Bullfrog Flats into the city. It's not in character with the City of Cle Elum and does not comply with fundamental requirements of the city's comprehensive plan, the development agreement, or zoning for the property.

- Instead of traditional neighborhoods that were planned to be connected to and a natural extension of the city, supporting the rest of the city, 47 Degrees North would create a private for-profit community and tourist resort with gates, private roads and utilities which will be separated from the rest of the city. It will create a private city within a city, forever.

- Fiscal studies of 47 Degrees North show that it will not create sufficient tax revenue to cover the city's cost to serve it. Unless the developer agrees to financially cover the substantial deficits, forever, existing city taxpayers will be required to subsidize Sun's development and taxes will go up.

- Sun's 47 Degrees North will be in its entirety a private business not a natural neighborhood (no lots sold, all spots leased), wholly owned by a massive out-of-state publicly traded corporation whose fiduciary duty is to its shareholders, not city taxpayers. Any subsidies of the project would be a gift of public funds to a private entity.

- Is not housing as contemplated for the Bullfrog UGA. It will displace half of the actual housing planned for the area and replace it with a private park designed as a transient playground.

- Will be the largest manufactured home/RV park on the West Coast and will double the population of Cle Elum. Parks of this magnitude have no place in a town as small as Cle Elum. Wrong Place, Wrong Size.

- Sun has eliminated the industrial park component of the approved plan and is proposing a major new retail center to the project which would compete with existing city businesses and will seriously damage Cle Elum's downtown, which the city has invested millions of dollars to reinvigorate. The retail center is in direct conflict with the city's comprehensive plan which states that the Bullfrog Flats Master Plan…."is intended to elevate the DTC (downtown core) as the primary retail and activity nexus for Cle Elum". Current rules for the Bullfrog Flats property prohibit a retail center on the property.

- Provides no significant benefits to city or UKC residents, but creates serious and significant impacts on roads, police, fire, schools, emergency services, hospitals and other public services that can't be (or won't be) fully mitigated by the developer.

- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for. - Is in clear violation of the vision for the property adopted by the city and presented to the public as a condition for annexing Bullfrog Flats into the city. It's not in character with the City of Cle Elum and does not comply with fundamental requirements of the city's comprehensive plan, the development agreement, or zoning for the property.

- Instead of traditional neighborhoods that were planned to be connected to and a natural extension of the city, supporting the rest of the city, 47 Degrees North would create a private for-profit community and tourist resort with gates, private roads and utilities which will be separated from the rest of the city. It will create a private city within a city, forever.

- Fiscal studies of 47 Degrees North show that it will not create sufficient tax revenue to cover the city's cost to serve it. Unless the developer agrees to financially cover the substantial deficits, forever, existing city taxpayers will be required to subsidize Sun's development and taxes will go up.

- Sun's 47 Degrees North will be in its entirety a private business not a natural neighborhood (no lots sold, all spots leased), wholly owned by a massive out-of-state publicly traded corporation whose fiduciary duty is to its shareholders, not city taxpayers. Any subsidies of the project would be a gift of public funds to a private entity.

- Is not housing as contemplated for the Bullfrog UGA. It will displace half of the actual housing planned for the area and replace it with a private park designed as a transient playground.

- Will be the largest manufactured home/RV park on the West Coast and will double the population of Cle Elum. Parks of this magnitude have no place in a town as small as Cle Elum. Wrong Place, Wrong Size.

- Sun has eliminated the industrial park component of the approved plan and is proposing a major new retail center to the project which would compete with existing city businesses and will seriously damage Cle Elum's downtown, which the city has invested millions of dollars to reinvigorate. The retail center is in direct conflict with the city's comprehensive plan which states that the Bullfrog Flats Master Plan…."is intended to elevate the DTC (downtown core) as the primary retail and activity nexus for Cle Elum". Current rules for the Bullfrog Flats property prohibit a retail center on the property.

- Provides no significant benefits to city or UKC residents, but creates serious and significant impacts on roads, police, fire, schools, emergency services, hospitals and other public services that can't be (or won't be) fully mitigated by the developer.

- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for. Any such increase in taxes will effectively translate to a subsidy for a private business,

- Denial of 47 Degrees North will not take away or reduce underlying property rights. It will simply require Sun Communities to comply with city's current rules, regulations and comprehensive plan for the property. The original underlying zoning approval and development agreement already allows development of this site, just not as a private resort/manufactured home community/retail center.

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Respectfully,

- Fiscal studies of 47 Degrees North show that it will not create enough tax revenue to cover the city's cost to serve it. Unless the developer agrees to financially cover the substantial deficits, forever, existing city taxpayers will be required to subsidize Sun's development and taxes will go up.
- Sun's 47 Degrees North will be in its entirety a private business not a natural neighborhood (no lots sold, all spots leased), wholly owned by a massive out-of-state publicly traded corporation who's fiduciary duty is to its shareholders, not city taxpayers. Any subsidies of the project would be a gift of public funds to a private entity.
- Is not housing as contemplated for the Bullfrog UGA. It will displace half of the actual housing planned for the area and replace it with a private park designed as a transient playground.
- Will be the largest manufactured home/RV park on the West Coast and will double the population of Cle Elum. Parks of this magnitude have no place in a town as small as Cle Elum. Wrong Place Wrong Size.
- Sun has proposed a major new retail center in the project which would compete with existing city businesses and will seriously damage Cle Elum's downtown, which the city has invested millions of dollars to reinvigorate. This is totally opposite of the city's comprehensive plan which states that the Bullfrog Flats Master Plan...."is intended to elevate the DTC (downtown core) as the primary retail and activity nexus for Cle Elum". Current rules for the Bullfrog Flats property prohibit a retail center on the property.
- Provides no significant benefits to city or UKC residents, but creates serious and significant impacts on roads, police, fire, schools, emergency services, hospitals and other public services that can't be (or won't be) fully mitigated by the developer, and,
- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for, which will be a subsidy for a private business,
- Denial of 47 Degrees North will not take away or reduce underlying property rights. It will simply require Sun Communities to comply with city's current rules, regulations and comprehensive plan for the property. The original underlying zoning approval and development agreement already allows development of this site, just not as a private resort/manufactured home community/retail center.

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Respectfully,

M C Santa

Re: 47 Degrees North Major Amendment proposal

I am writing to inform the city of my very strong opposition to the Sun Communities 47° North proposal for the Bullfrog flats property. The proposed manufactured home / RV community:

- Is in clear violation of the vision for the property adopted by the city and presented to the public as a condition for annexing Bullfrog Flats into the city. It's not in character with the City of Ce Elum and does not comply with fundamental requirements of the city's comprehensive plan, the development agreement and zoning for the property.

- Instead of traditional neighborhoods that were planned to be connected to and a natural extension of the city, supporting the rest of the city, 47 Degrees North would create a private for-profit community and tourist resort with gates, private roads and utilities which will be separated from the rest of the city. It will create a private city within a city, forever.

- Fiscal studies of 47 Degrees North show that it will not create enough tax revenue to cover the city's cost to serve it. Unless the developer agrees to financially cover the substantial deficits, forever, existing city taxpayers will be required to subsidize Sun's development and taxes will go up.

- Sun's 47 Degrees North will be in its entirety a private business not a natural neighborhood (no lots sold, all spots leased), wholly owned by a massive out-of-state publicly traded corporation who's fiduciary duty is to its shareholders, not city taxpayers. Any subsidies of the project would be a gift of public funds to a private entity.

Re: 47 Degrees North Major Amendment proposal

I am writing to inform the city of my very strong opposition to the Sun Communities 47° North proposal for the Bullfrog flats property. The proposed manufactured home / RV community:

- Is in clear violation of the vision for the property adopted by the city and presented to the public as a condition for annexing Bullfrog Flats into the city. It's not in character with the City of Cle Elum and does not comply with fundamental requirements of the city's comprehensive plan, the development agreement, or zoning for the property.

- Instead of traditional neighborhoods that were planned to be connected to and a natural extension of the city, supporting the rest of the city, 47 Degrees North would create a private for-profit community and tourist resort with gates, private roads and utilities which will be separated from the rest of the city. It will create a private city within a city, forever.

- Fiscal studies of 47 Degrees North show that it will not create sufficient tax revenue to cover the city's cost to serve it. Unless the developer agrees to financially cover the substantial deficits, forever, existing city taxpayers will be required to subsidize Sun's development and taxes will go up.

- Sun's 47 Degrees North will be in its entirety a private business not a natural neighborhood (no lots sold, all spots leased), wholly owned by a massive out-of-state publicly traded corporation whose fiduciary duty is to its shareholders, not city taxpayers. Any subsidies of the project would be a gift of public funds to a private entity.

- Is not housing as contemplated for the Bullfrog UGA. It will displace half of the actual housing planned for the area and replace it with a private park designed as a transient playground.

- Will be the largest manufactured home/RV park on the West Coast and will double the population of Cle Elum. Parks of this magnitude have no place in a town as small as Cle Elum. Wrong Place, Wrong Size.

- Sun has eliminated the industrial park component of the approved plan and is proposing a major new retail center to the project which would compete with existing city businesses and will seriously damage Cle Elum's downtown, which the city has invested millions of dollars to reinvigorate. The retail center is in direct conflict with the city's comprehensive plan which states that the Bullfrog Flats Master Plan…."is intended to elevate the DTC (downtown core) as the primary retail and activity nexus for Cle Elum". Current rules for the Bullfrog Flats property prohibit a retail center on the property.

- Provides no significant benefits to city or UKC residents, but creates serious and significant impacts on roads, police, fire, schools, emergency services, hospitals and other public services that can't be (or won't be) fully mitigated by the developer.

- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for. Any such increase in taxes will effectively translate to a subsidy for a private business,

- Denial of 47 Degrees North will not take away or reduce underlying property rights. It will simply require Sun Communities to comply with city's current rules, regulations and comprehensive plan for the property. The original underlying zoning approval and development agreement already allows development of this site, just not as a private resort/manufactured home community/retail center.

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Respectfully,

Re: 47 Degrees North Major Amendment proposal

I am writing to inform the city of my very strong opposition to the Sun Communities 47° North proposal for the Bullfrog flats property. The proposed manufactured home / RV community:

- Is in clear violation of the vision for the property adopted by the city and presented to the public as a condition for annexing Bullfrog Flats into the city. It's not in character with the City of Cle Elum and does not comply with fundamental requirements of the city's comprehensive plan, the development agreement, or zoning for the property.

- Instead of traditional neighborhoods that were planned to be connected to and a natural extension of the city, supporting the rest of the city, 47 Degrees North would create a private for-profit community and tourist resort with gates, private roads and utilities which will be separated from the rest of the city. It will create a private city within a city, forever.

- Fiscal studies of 47 Degrees North show that it will not create sufficient tax revenue to cover the city's cost to serve it. Unless the developer agrees to financially cover the substantial deficits, forever, existing city taxpayers will be required to subsidize Sun's development and taxes will go up.

- Sun's 47 Degrees North will be in its entirety a private business not a natural neighborhood (no lots sold, all spots leased), wholly owned by a massive out-of-state publicly traded corporation whose fiduciary duty is to its shareholders, not city taxpayers. Any subsidies of the project would be a gift of public funds to a private entity.

- Is not housing as contemplated for the Bullfrog UGA. It will displace half of the actual housing planned for the area and replace it with a private park designed as a transient playground.

- Will be the largest manufactured home/RV park on the West Coast and will double the population of Cle Elum. Parks of this magnitude have no place in a town as small as Cle Elum. Wrong Place, Wrong Size.

- Sun has eliminated the industrial park component of the approved plan and is proposing a major new retail center to the project which would compete with existing city businesses and will seriously damage Cle Elum's downtown, which the city has invested millions of dollars to reinvigorate. The retail center is in direct conflict with the city's comprehensive plan which states that the Bullfrog Flats Master Plan…."is intended to elevate the DTC (downtown core) as the primary retail and activity nexus for Cle Elum". Current rules for the Bullfrog Flats property prohibit a retail center on the property.

- Provides no significant benefits to city or UKC residents, but creates serious and significant impacts on roads, police, fire, schools, emergency services, hospitals and other public services that can't be (or won't be) fully mitigated by the developer.

- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for. Any such increase in taxes will effectively translate to a subsidy for a private business,

- Denial of 47 Degrees North will not take away or reduce underlying property rights. It will simply require Sun Communities to comply with city's current rules, regulations and comprehensive plan for the property. The original underlying zoning approval and development agreement already allows development of this site, just not as a private resort/manufactured home community/retail center.

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Respectfully,

Re: 47 Degrees North Major Amendment proposal

I am writing to inform the city of my very strong opposition to the Sun Communities 47° North proposal for the Bullfrog flats property. The proposed manufactured home / RV community:

- Is in clear violation of the vision for the property adopted by the city and presented to the public as a condition for annexing Bullfrog Flats into the city. It's not in character with the City of Cle Elum and does not comply with fundamental requirements of the city's comprehensive plan, the development agreement, or zoning for the property.

- Instead of traditional neighborhoods that were planned to be connected to and a natural extension of the city, supporting the rest of the city, 47 Degrees North would create a private for-profit community and tourist resort with gates, private roads and utilities which will be separated from the rest of the city. It will create a private city within a city, forever.

- Fiscal studies of 47 Degrees North show that it will not create sufficient tax revenue to cover the city's cost to serve it. Unless the developer agrees to financially cover the substantial deficits, forever, existing city taxpayers will be required to subsidize Sun's development and taxes will go up.

- Sun's 47 Degrees North will be in its entirety a private business not a natural neighborhood (no lots sold, all spots leased), wholly owned by a massive out-of-state publicly traded corporation whose fiduciary duty is to its shareholders, not city taxpayers. Any subsidies of the project would be a gift of public funds to a private entity.

- Is not housing as contemplated for the Bullfrog UGA. It will displace half of the actual housing planned for the area and replace it with a private park designed as a transient playground.

- Will be the largest manufactured home/RV park on the West Coast and will double the population of Cle Elum. Parks of this magnitude have no place in a town as small as Cle Elum. Wrong Place, Wrong Size.

The retail center is in direct conflict with the city's comprehensive plan which states that the Bullfrog Flats Master Plan…."is intended to elevate the DTC (downtown core) as the primary retail and activity nexus for Cle Elum". Current rules for the Bullfrog Flats property prohibit a retail center on the property.

- Provides no significant benefits to city or UKC residents, but creates serious and significant impacts on roads, police, fire, schools, emergency services, hospitals and other public services that can't be (or won't be) fully mitigated by the developer.

- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for. Any such increase in taxes will effectively translate to a subsidy for a private business,

- Denial of 47 Degrees North will not take away or reduce underlying property rights. It will simply require Sun Communities to comply with city's current rules, regulations and comprehensive plan for the property. The original underlying zoning approval and development agreement already allows development of this site, just not as a private resort/manufactured home community/retail center.

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

Respectfully,

Signature

Re: 47 Degrees North Major Amendment proposal

I am writing to inform the city of my very strong opposition to the Sun Communities 47° North proposal for the Bullfrog flats property. The proposed manufactured home / RV community:

- Is in clear violation of the vision for the property adopted by the city and presented to the public as a condition for annexing Bullfrog Flats into the city. It's not in character with the City of Cle Elum and does not comply with fundamental requirements of the city's comprehensive plan, the development agreement, or zoning for the property.

- Instead of traditional neighborhoods that were planned to be connected to and a natural extension of the city, supporting the rest of the city, 47 Degrees North would create a private for-profit community and tourist resort with gates, private roads and utilities which will be separated from the rest of the city. It will create a private city within a city, forever.

- Fiscal studies of 47 Degrees North show that it will not create sufficient tax revenue to cover the city's cost to serve it. Unless the developer agrees to financially cover the substantial deficits, forever, existing city taxpayers will be required to subsidize Sun's development and taxes will go up.

- Sun's 47 Degrees North will be in its entirety a private business not a natural neighborhood (no lots sold, all spots leased), wholly owned by a massive out-of-state publicly traded corporation whose fiduciary duty is to its shareholders, not city taxpayers. Any subsidies of the project would be a gift of public funds to a private entity.

- Is not housing as contemplated for the Bullfrog UGA. It will displace half of the actual housing planned for the area and replace it with a private park designed as a transient playground.

- Will be the largest manufactured home/RV park on the West Coast and will double the population of Cle Elum. Parks of this magnitude have no place in a town as small as Cle Elum. Wrong Place, Wrong Size.

- Sun has eliminated the industrial park component of the approved plan and is proposing a major new retail center to the project which would compete with existing city businesses and will seriously damage Cle Elum's downtown, which the city has invested millions of dollars to reinvigorate. The retail center is in direct conflict with the city's comprehensive plan which states that the Bullfrog Flats Master Plan…."is intended to elevate the DTC (downtown core) as the primary retail and activity nexus for Cle Elum". Current rules for the Bullfrog Flats property prohibit a retail center on the property.

Re: 47 Degrees North Major Amendment proposal

I am writing to inform the city of my very strong opposition to the Sun Communities 47° North proposal for the Bullfrog flats property. The proposed manufactured home / RV community:

- Is in clear violation of the vision for the property adopted by the city and presented to the public as a condition for annexing Bullfrog Flats into the city. It's not in character with the City of Ce Elum and does not comply with fundamental requirements of the city's comprehensive plan, the development agreement and zoning for the property.
- Instead of traditional neighborhoods that were planned to be connected to and a natural extension of the city, supporting the rest of the city, 47 Degrees North would create a private for-profit community and tourist resort with gates, private roads and utilities which will be separated from the rest of the city. It will create a private city within a city, forever.
- Fiscal studies of 47 Degrees North show that it will not create enough tax revenue to cover the city's cost to serve it. Unless the developer agrees to financially cover the substantial deficits, forever, existing city taxpayers will be required to subsidize Sun's development and taxes will go up.
- Sun's 47 Degrees North will be in its entirety a private business not a natural neighborhood (no lots sold, all spots leased), wholly owned by a massive out-of-state publicly traded corporation who's fiduciary duty is to its shareholders, not city taxpayers. Any subsidies of the project would be a gift of public funds to a private entity.
- Is not housing as contemplated for the Bullfrog UGA. It will displace half of the actual housing planned for the area and replace it with a private park designed as a transient playground.
- Will be the largest manufactured home/RV park on the West Coast and will double the population of Cle Elum. Parks of this magnitude have no place in a town as small as Cle Elum. Wrong Place Wrong Size.
- Sun has proposed a major new retail center in the project which would compete with existing city businesses and will seriously damage Cle Elum's downtown, which the city has invested millions of dollars to reinvigorate. This is totally opposite of the city's comprehensive plan which states that the Bullfrog Flats Master Plan...."is intended to elevate the DTC (downtown core) as the primary retail and activity nexus for Cle Elum". Current rules for the Bullfrog Flats property prohibit a retail center on the property.
- Provides no significant benefits to city or UKC residents, but creates serious and significant impacts on roads, police, fire, schools, emergency services, hospitals and other public services that can't be (or won't be) fully mitigated by the developer, and,
- Will create extensive traffic congestion and gridlock conditions and an overall reduction in levels of service of upper county services which will require public expenditures and increased upper county taxes to pay for, which will be a subsidy for a private business,
- Denial of 47 Degrees North will not take away or reduce underlying property rights. It will simply require Sun Communities to comply with city's current rules, regulations and comprehensive plan for the property. The original underlying zoning approval and development agreement already allows development of this site, just not as a private resort/manufactured home community/retail center.

For all of these reasons, and others, I implore the City to **DENY** this proposed major amendment and retain the current approved land use for the property.

I am writing to inform the City of Cle Elum of my very strong opposition to the Retail Component of the Sun Communities 47 Degrees North Proposal.

I am also requesting that the City initiate a new Environmental Impact Review that studies and compares the impact of the 47 Degrees North Retail against the backdrop of the current retail that exists within the Downtown Core.

I represent the aforementioned business that is located within the Cle Elum Downtown Core. Cle Elum has had a decades long policy of supporting the Downtown Core and the Downtown Master Plan by prohibiting retail on the Bullfrog Flats Property, specifically so that it won't compete with Downtown businesses. The City's Comprehensive Plan, Pre-Annexation Agreement, Subarea Plan, and the Development Agreement all specifically and excruciatingly exclude retail from the Bullfrog Flats Property, so as to maintain and enhance the existing retail core of the City of Cle Elum.

Any retail development created within the Bullfrog Flats Property will certainly have the effect of diverting customers and revenues. Excess storefront capacity currently and historically exists within our Downtown Core. Efforts to revitalize our City need to focus on building up the Old Town portion of Cle Elum rather than breaking it apart and effectively allocating 50% of the City's retail space to what would be the largest landlord in the county.

To:
City of Cle Elum
Attention: Planning Department/47 Degrees North
119 West First Street, Cle Elum, WA 98922

I am writing to inform the City of Cle Elum of my very strong opposition to the Retail Component of the Sun Communities 47 Degrees North Proposal. I am also requesting that the City initiate a new Environmental Impact Review that studies and compares the impact of the 47 Degrees North Retail against the backdrop of the current retail that exists within the Downtown Core.

I represent the aforementioned business that is located within the Cle Elum Downtown Core. Cle Elum has had a decades long policy of supporting the Downtown Core and the Downtown Master Plan by prohibiting retail on the Bullfrog Flats Property, specifically so that it won't compete with Downtown businesses. The City's Comprehensive Plan, Pre-Annexation Agreement, Subarea Plan, and the Development Agreement all specifically and excruciatingly exclude retail from the Bullfrog Flats Property, so as to maintain and enhance the existing retail core of the City of Cle Elum.

Any retail development created within the Bullfrog Flats Property will certainly have the effect of diverting customers and revenues. Excess storefront capacity currently and historically exists within our Downtown Core. Efforts to revitalize our City need to focus on building up the Old Town portion of Cle Elum rather than breaking it apart and effectively allocating 50% of the City's retail space to what would be the largest landlord in the county.

Sincerely,

Jeffrey Dantzler
Land owner

I represent the aforementioned business that is located within the Cle Elum Downtown Core. Cle Elum has had a decades long policy of supporting the Downtown Core and the Downtown Master Plan by prohibiting retail on the Bullfrog Flats Property, specifically so that it won't compete with Downtown businesses. The City's Comprehensive Plan, Pre-Annexation Agreement, Subarea Plan, and the Development Agreement all specifically and excruciatingly exclude retail from the Bullfrog Flats Property, so as to maintain and enhance the existing retail core of the City of Cle Elum.

Any retail development created within the Bullfrog Flats Property will certainly have the effect of diverting customers and revenues. Excess storefront capacity currently and historically exists within our Downtown Core. Efforts to revitalize our City need to focus on building up the Old Town portion of Cle Elum rather than breaking it apart and effectively allocating 50% of the City's retail space to what would be the largest landlord in the county.

I am writing to inform the City of Cle Elum of my very strong opposition to the Retail Component of the Sun Communities 47 Degrees North Proposal.

I am also requesting that the City initiate a new Environmental Impact Review that studies and compares the impact of the 47 Degrees North Retail against the backdrop of the current retail that exists within the Downtown Core.
