[EXTERNAL EMAIL] DO NOT CLICK links or attachments unless you recognize the sender and know the content is safe.

Virgil,

Bonneville Power Administration's (BPA) has had the opportunity to review an application for the Wildwood Ranch Plat located at 1317 E 1st Street.

In researching our records, we have found that this proposal will not directly impact BPA facilities over 240ft north of the subject properties. BPA does not have any objections to the approval of this request currently.

If you have any questions or need additional information, please feel free to contact Jamie Murray at (406) 751-7820, or by email at JCMurray@bpa.gov.

Thank you for the opportunity to review this application.

RE: SEPA 202503409; SEP#2024-004

Dear Colleda Monick:

Thank you for the opportunity to comment on the Mitigated Determination of Nonsignificance for the Wildwood Ranch Plat. We have reviewed the documents and have the following comments.

Water Resources Program

Your project is located within the boundaries of WAC 173-539A so it may be subject to the rule. If you planning on withdrawing groundwater for a new use within the boundaries of WAC 173-539A, your project must be water budget neutral. Before withdrawing or using any water please submit a *Request of Determination of Water Budget Neutrality* or an *Application for a New Water Right Permit*, depending on the size of your project either form may be required. If you have any questions or would like to respond to these Water Resources comments, please contact Nathan Longoria at (509) 907-1752 or email at nathan.longoria@ecy.wa.gov.

Water Quality Program

Project with Potential to Discharge Off-Site

If your project anticipates disturbing ground with the potential for stormwater discharge off-site, the NPDES Construction Stormwater General Permit is recommended. This permit requires that the SEPA checklist fully disclose anticipated activities including building, road construction and utility placements. Obtaining a permit may take 38-60 days.

The permit requires that a Stormwater Pollution Prevention Plan (Erosion Sediment Control Plan) shall be prepared and implemented for all permitted construction sites. These control measures must be able to prevent soil from being carried into surface water and storm drains by stormwater runoff. Permit coverage and erosion control measures must be in place prior to any clearing, grading, or construction.

In the event that an unpermitted Stormwater discharge does occur off-site, it is a violation of Chapter 90.48 RCW, Water Pollution Control and is subject to enforcement action.

More information on the stormwater program may be found on [Ecology's stormwater](#) website. Please submit an application or contact **Wendy Neet** at the Dept. of Ecology, (509) 571-6733. or wendy.neet@ecy.wa.gov with questions about this permit.

Ecology's comments are based upon information provided by the lead agency. As such, they may not constitute an exhaustive list of the various authorizations that must be obtained or legal requirements that must be fulfilled in order to carry out the proposed action.

If you have any questions or would like to respond to these comments, please contact the appropriate reviewing staff listed above.

Sincerely,

Amber Johnson
